Program Overview
The MS in Data Analytics Engineering is a Volgenau multidisciplinary degree program, administered by the Department of Statistics, designed to provide students with an understanding of the technologies and methodologies necessary for data-driven decision-making. Students study topics such as data mining, information technology, statistical modeling, predictive analytics, optimization, risk analysis, and data visualization. It is aimed at students who wish to become data scientists and analysts in finance, marketing, operations, business/government intelligence, and other information intensive groups generating and consuming large amounts of data. The focus of the degree is on the technologies and methodologies of data analytics for solving Big Data problems.

Program Requirements
The Master of Science in Data Analytics Engineering requires completion of a minimum of 30 credits of graduate course work with a core component of 15 credits and an elective component of 15 credits.

Core course options include:
- Analytics: Big Data to Information
- Principles of Data Management and Mining or Theory and Applications of Data Mining
- Data Analytics Project
- Analytics and Decision Analysis or Operations Research: Deterministic Models
- Applied Statistics and Visualization for Analytics or Applied Statistics I

Students need to select an area of concentration:
- Applied Analytics
- Bioengineering
- Business Analytics
- Cyber Analytics
- Data Mining
- Financial Engineering
- Health Data Analytics
- Internet of Things
- Predictive Analytics
- Statistical Analytics

Students can also create an individualized plan of study (subject to approval).

Distance Education courses may be available for select programs. Graduate Certificate degree programs may also be offered. Please visit our website for details.
Data Analytics Engineering (M.S.)

Admission Requirements
In addition to meeting general university admissions requirements, Applicants must have completed a baccalaureate degree from an accredited program with a reputation for high academic standards and an earned GPA of 3.00 or better in their 60 highest-level credits. While no specific undergraduate degree is required, a background in engineering, business, computer science, statistics, mathematics, or information technology is desirable, or alternatively strong work experience with data or analytics may be used. At a minimum at least one course each in calculus, statistics, and computer programming is required. Data Analytics Fundamentals may be required for students without a basic foundation in Data Analytics.

For each of the concentrations there are additional admission requirements. These are listed in the descriptions of the individual concentrations at https://catalog.gmu.edu/colleges-schools/engineering/data-analytics-engineering-ms.

Required application materials include:
- Online application and non-refundable fee
- Transcripts showing all post-secondary study
- Professional and Educational Goals Statement
- Two letters of recommendation from professors or senior officials at place of employment
- Self-Evaluation
- Resume

Additional application materials, including English proficiency examination scores (e.g., TOEFL, IELTS), are required if the applicant holds a degree from an international institution and/or requires an F-1 or J-1 visa. Visit http://admissions.gmu.edu/grad for details.

Special admission programs are available for Volgenau School students and alumni.
