GMU Professor Appointed to STEM Commission

Kamaljeet Sanghera, a professor at George Mason University, has been appointed to a state commission that will work with Virginia Governor Ralph Northam to develop a plan for the creation of a state college of science and technology. The commission will be responsible for making recommendations on the structure, governance, and funding of the new college.

Dr. Bill Hazel

Dr. Bill Hazel, a Mason chemistry professor, was named a 2019 National Geographic Emerging Explorer. hazel specializes in the study of the early solar system and is a planetary scientist. hazel has conducted research on the moon, Mars, and the outer planets.

Dr. Van Bailey Receives Two Awards for Outstanding Success

Dr. Van Bailey, a Mason computer science professor, received the 2019 Lou Sullivan Award and the 2019 Mason Award for Outstanding Research. Bailey has made significant contributions to the field of computer science, including his work on artificial intelligence and machine learning.

Patriot Success Survey Concluded October 6

The Patriot Success Survey, which was open to all undergraduate students until October 6, 2019, aimed to learn about students' experiences at Mason and to help the University improve its educational programs. The survey was strategically designed to help Mason foster a student-centered learning environment.

Growing the Tech Talent Pipeline

The Institute for Biohealth Innovation recently launched a new grant funding initiative to support technology-related educational programs. The grants, which support the development of professional programs and courses, will ensure the success of exceptionally promising students. In addition to the Lou Sullivan Award, Dr. Bailey was honored with the 2019 Mason Award for Outstanding Research.

The Institute for Biohealth Innovation

The Institute for Biohealth Innovation recently launched a new grant funding initiative to support technology-related educational programs. The grants, which support the development of professional programs and courses, will ensure the success of exceptionally promising students. In addition to the Lou Sullivan Award, Dr. Bailey was honored with the 2019 Mason Award for Outstanding Research.

Dr. Lovejoy is a Burke Professor in the School of Life Sciences. Dr. Lovejoy is seen here with a student in the School of Life Sciences. The Institute looks forward to releasing further media content on this important topic.

I hope you take time to read my thoughts and provide feedback.

To assist in a program's efforts to demonstrably strengthen its standing and profile, these competitive awards provide supplemental funding to the Office of Graduate Education at Friday, November 1. Applications must be submitted via email by Friday, October 25, to the Office of Graduate Education at provgrad@gmu.edu. For more information, visit provgrad.gmu.edu.

The Office of the Provost will host a Student Experience Redesign (SER) Town Hall from 12:00 – 3:00 p.m. on October 30. The Institute for Biohealth Innovation recently launched a new grant funding initiative to support technology-related educational programs. The grants, which support the development of professional programs and courses, will ensure the success of exceptionally promising students. In addition to the Lou Sullivan Award, Dr. Bailey was honored with the 2019 Mason Award for Outstanding Research.
