

RELIABLE REMOTE POWER

**COST EFFECTIVE
CLEAN
QUIET
FUEL FLEXIBLE**

CLEAN POWER. TODAY.

CLEAN POWER. TODAY.

Providing reliable and cost effective power is a key requirement for delivering high quality telecommunications services. Over a third of the world's 4.5 million telecom towers are off grid or connected to unreliable grids.

The Bladon Micro Turbine Genset (MTG) delivers a simple, reliable and practical source of power

without the high operating costs, noise and pollutants you get with a diesel genset.

The MTG actively lowers monthly operating expenses and total cost of ownership compared to traditional diesel gensets, hybrid diesel gensets or fuel cells especially for off grid and bad grid site applications.

OPEX 60%

LOWERS OPERATING COSTS

ONCE A YEAR SERVICING, REGARDLESS OF RUN HOURS

- Reduce site service visits by up to 90%
- Zero maintenance, sealed for life power unit
- No liquid coolant or oils, no overhauls, no oil disposal required

FUEL FLEXIBLE

- The MTG can run on diesel, kerosene, paraffins, HVO's (Hydrotreated Vegetable Oils) or any blend of these in any ratio thus giving security of supply, and access to cheaper fuels while also deterring fuel theft

CLEANER, QUIETER

- EU Stage V emissions equivalent
- Less than 60dB(A) @ 7m

**INNOVATIVE MICROTURBINE
ENGINE AND AIR BEARING
TECHNOLOGIES DELIVERS
12kW OF RELIABLE POWER.**

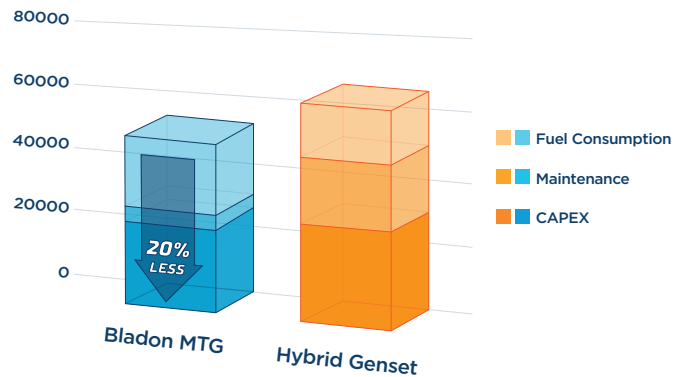

UNIQUE APPROACH TO LOWERING TOTAL COST OF OWNERSHIP

- Reduced site maintenance visits by up to 95%
- Reduce fuel costs by using cheaper and locally available fuels such as kerosene or paraffin
- Blend different fuels together to eliminate fuel theft
- Eliminate cost of engine oil and liquid coolant and their disposal costs.

Compared to diesel genset or hybrid genset configurations the Bladon Micro Turbine Genset can reduce Total Cost of Ownership especially for sites that are off grid or connected to bad grid.

Example: Using real data from South African off grid sites with 6kW average load reduced TCO by 20% compared to regular diesel genset

Example: Using actual data (South Africa) – off grid site with 6kW average site load – reduced TCO by 20% compared to hybrid genset configuration

CLEANER AND QUIETER

The Bladon Micro Turbine Genset bridges the gap between adoption of 100% renewable energy solutions with traditional diesel gensets. The MTG delivers all the reliability and practicality of a diesel genset but with significantly lower emissions, noise and no engine oil or disposal costs. The MTG is EU Stage V equivalent and produces significantly less emissions than the new legislative requirements.

The Bladon Micro Turbine generates a sound that is very quiet and unique; making less than 60dB(A) at 7m. No other generator sounds like this one because of its high frequency turbine noise which dissipates rapidly with distance

REMOTE MANAGEMENT AND CONTROL AS STANDARD

Eliminate unnecessary site visits through real time monitoring tools from DeepSea Electronics. The DSE7320 MKII™ controller and DSE890 Gateway™ remote manager are standard in the MTG.

BLADON MTG SPECIFICATION

KEY DATA		
Engine	Variable Speed Micro Turbine	
Application	Prime Power, Standby Power, Off Grid and Bad Grid	
Fuel	Diesel, kerosene, paraffin and Hydrotreated Vegetable Oil. Fuels may be blended in any ratio, without any reconfiguration.	
Power	0kW to 12kW (Prime Continuous)	
Voltage	230v AC single phase, 50/60Hz	
Earthing	IEC 60364 TN-S	
Certification	2006/42/EC Machinery Directive, CE marked	
Handling	Standard forklift truck, sling points for easy crane handling	
ENVIRONMENTAL		
Emissions	EU Stage V equivalent No liquid coolant, engine oil, grease, or lubricant needed	
Noise	Less than 60dB(A) @ 7m	
DIMENSIONS		STANDARD FEATURES
Length	2100 mm	DeepSea DSE7320 MkII controller
Width	1010 mm	GSM and 3G/4G aerial with a GPS receiver
Height	1400 mm	DeepSea DSE890 communication gateway for remote monitoring
Weight	850 kg	(provision for alternative communication gateways)
OPTIONAL EQUIPMENT		
Automatic Transfer Switch (ATS), 48V battery trickle charger for standby applications, Extended Warranty		
SERVICE & WARRANTY		
Service: Single person service in less than one hour, One in-situ service every 12 months Warranty: 1 year or 8,760 hours whichever occurs first		

Specifications are not warranted and are subject to change without notice. Bladon Jets and all persons acting on its behalf disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

**Actual service life subject to air and fuel quality
