Why Oral Probiotics Matter

Your mouth contains over **700 different species of bacteria**. Some are harmful, but many are beneficial.

- Bad bacteria cause plaque, cavities, and gum infections.
- Good bacteria protect teeth, freshen breath, and support digestion.

Traditional dental products (toothpaste, mouthwash) often kill **both good and bad bacteria**, leaving your mouth vulnerable.

ProDentim is different – it **repopulates your mouth with healthy bacteria** so your teeth and gums naturally stay strong.

ProDentim Ingredients – What’s Inside?

The strength of ProDentim lies in its **probiotic + natural herb formula**. Here’s a breakdown:

- **Lactobacillus Paracasei** – Supports gum health and reduces inflammation.
- **Lactobacillus Reuteri** – Helps prevent plaque build-up and supports healthy digestion.
- **BLIS K-12 & BLIS M-18** – Patented oral probiotics that reduce throat infections, improve breath, and maintain white teeth.
- **Inulin (from Chicory Root)** – Prebiotic fiber that nourishes good bacteria.
- **Peppermint & Spearmint Extracts** – Natural breath fresheners with antibacterial effects.
- **Malic Acid (from strawberries)** – Supports teeth whitening and enamel strength.
- **Dicalcium Phosphate** – Mineral that supports strong teeth and jawbone.

👉 Together, these ingredients **rebuild your oral microbiome, protect enamel, and keep gums healthy**.

How Does ProDentim Work?

ProDentim follows a **unique 3-step mechanism**:

1. **Repopulates Healthy Bacteria** – Adds beneficial probiotics to fight oral pathogens.
2. **Protects Teeth & Gums** – Reduces inflammation, prevents cavities, and strengthens enamel.
3. **Freshens Breath Naturally** – Neutralizes odor-causing bacteria for long-lasting freshness.

Unlike mouthwash or toothpaste, ProDentim works **from the inside out**, targeting the root cause of poor dental health.

ProDentim is ideal for people who:

- Suffer from **cavities or weak enamel**
