11.23.12 Some Website promotion offers will not be applied where the Cash Out feature has been used to close all or part of a bet. See Terms and Conditions for each promotion offer for details.

11.23.13 Pay-outs to customers in respect of cashed out transactions will occur at the time of cash out, however delays may occur from time to time in settling funds.

11.24 The maximum winnings in any 24-hour period for each sport can be found [here](#). The maximum winnings are quoted in Euros as a base currency to ensure consistency across the world, but currency equivalents apply for actual pay-outs. Where a multiple bet has been placed which involves Events with different maximum winnings limits then the lowest limit will apply. All maximum winnings limits apply to all our customers, or groups of customers, who have placed bets containing the same selections, at a range of prices, using different betting accounts. Should we have reason to believe that several bets have been placed this way, the total payment of all those bets combined will be limited to one single maximum winnings pay-out.

14. Fairness and RNG Testing Methods

14.1 The Website operates under a Curaçao Gaming licence issued by the CGA (The Curacao Gaming Authority). Our online products are all supplied by companies with approved CGA licensing and status. All products operated by the Website go through a vigorous testing process before launch, including internal testing and External Compliance Testing (ECT). Conducted ECT covers elements including but not limited to functionality, display, transaction, rules and mathematics ensuring product compliance to regulatory requirements. Additional internal compliance is also conducted to ensure other functionality around integration testing and user acceptance testing, further guaranteeing integrated Games perform up to the expected user experience standard. Our Games all offer unpredictable Game play and possibilities of large wins and losses, but the average long term return of a Game can be calculated using the Theoretical Return to Player (RTP) value using either a theoretical or simulated approach adjusted according to the Game type. The Theoretical RTP value is as suggested - a theoretical calculation disclosing expected wage percentage player return after a certain amount of plays. Visit the information section of the Game to find more information about RTP of specific Games.
