Senior Drupal Developer

Bronxville, NY • (917) 365-0968 • william.wolfrath@gmail.com • <https://wilwolf.com>

A passionate Acquia Drupal 10 certified Senior Drupal Developer with over a decade of experience in building and enhancing Drupal websites. Expert in migrating sites to Drupal and implementing custom modules, with significant contributions upgrading sites to new Drupal versions. Proven track record of integrating third-party applications and enhancing site functionality. Used to solving problems, fixing bugs, learning new technology. Excellent verbal and written communication skills. Self-starter, creative and relentless in making things work correctly.

Certified Acquia Drupal 10 Developer.

Experience

APR 2026 – PRESENT

Senior Drupal Developer | Tech2i | Herndon, VA

- Contracted to GDIT (General Dynamics Information Technology) for Drupal development on government websites.
- Responsible for updates to the Center for Medicare and Medicaid Drupal website.
- Facilitated communication between the CMS content and tech teams to implement HTML, CSS, and JavaScript updates.
- Used AI to analyze existing CSS system to better integrate changes with minimal site disruption.
- Created documentation on all changes to share with stakeholders and content team.
- Reviewed and updated content to follow 508 Accessibility best practices.

FEB 2025 – APR 2026

Senior Drupal Developer | Bounteous | New York, NY

- Maintained, managed, and developed for the CrystalRunHealthcare Drupal website.
- Oversaw and developed for the East Optum WordPress website.
- Contributed to both Drupal backend and React-based front end code.
- Audited Drupal website code and configuration, working with clients to give recommendations and improvements.
- Integrated websites with external services such as Salesforce and Eventbrite.
- Worked directly with clients to update and add new features.
- Improved site accessibility score, code structure, and security.
- Managed life-cycle processes all the way through releases.

JULY 2014 – AUG 2024

Senior Developer & VP of Engineering | 3BL Media, LLC | Northampton, MA

- Spearheaded the coding and development of multiple Drupal 7-11 websites.
- Headed the migration from Drupal 7 to 9.
- Worked with Docker, DDev, AWS, and external services such as Snowflake and Sigma
- Led the migration of acquired websites TriplePundit.com and CSRWire.com to Headless Drupal with a React front end.
- Engineered and maintained custom Drupal modules for content publishing, distribution, and analytics reporting.
- Wrote back-end code related to all parts of the Drupal ecosystem such as event listeners, custom access checks, custom feeds and bundle classes.
- Wrote cron jobs and automation scripts to sync and push data to other platforms.
- Created front end HTML, Twig, CSS and JavaScript.
- Oversaw the transition to the Acquia platform and executed Drupal upgrades.
- Integrated a multitude of third-party applications and APIs to enhance functionality.
- Oversaw the tech team, conducting code reviews, training sessions, and release deployments, core and module updates and testing, and collaborated with contractors and consultants when needed.

JAN 2009 – APR 2025

Freelance & Contract Drupal Developer | New York, NY

- Executed Drupal development for websites under Hugemedia.com and maintained them, doing module and front end development, bug fixes, updates, and security reviews.
- Converted multiple Drupal websites from 10 to 11, including updating the deprecated hook system.
- Built early OpenAI integration into Drupal 11 websites.
- Wrote custom modules related to Drupal workflow, tokens, Solr search, eCommerce, emails and statistics.
- Created Drupal themes using Bootstrap.
- Built, maintained, and upgraded WCIRB.com.
- Led development projects for Intrax, Inc.
- Developed high-quality websites for NYU Langone Medical Center
- Crafted an interactive hospital map for NYU using Drupal and jQuery.
- Debugged and refined existing code and themes to improve performance

APR 2001 – DEC 2008

Programmer | Advance Internet | Jersey City, NJ

- Collaborated as part of a programming team to develop affiliate-branded applications
- Developed C CGI's, scripts, and libraries to enhance affiliate websites.
- Created robust Java and Python/Django web applications.

SEPT 1997 – JAN 2001

Programmer | Boyle Software | New York, NY

- Developed C websites for Columbia House and TotalE.com
- Engineered Java front-end and back-end applications.
