GENERAL NOTES

1. This drawing emphasizes the VELUX DMT4 Deck Mount Traditional Double Dome Skylight. It illustrates a general arrangement layout (plus recommendations) for a VELUX DMT4 installation in a 0-60 degree roof pitch application. VELUX DMT4 skylights are shipped on VELUX curb designs.
2. The architectural/structural design and specifications for the inclusion of a commercial skylight, such as the VELUX DMT4 in any roofing/ceiling application is determined and provided by others. The design criteria includes, but is not limited to design loads, structural configurations, structural framing member sizes and material, architectural finishes and integration with the roofing/ceiling systems of the building. VELUX recommends compliance by all designers and installers with all local and industry specific building codes and guidelines. VELUX assumes no responsibility or liability in the design, construction and performance of a building structure by others.
3. The fasteners securing the curb to the rough opening are provided by others. VELUX recommends #8 x 1-3/4" steel non-corrosive fasteners. The fasteners should be placed in the center of the curb flange 4" from each corner and 12" on center for the length and width of the deck mounted skylight.

This drawing is an instrument of service and is provided for informational use only.
