REPORT

A Seminar on "ANSYS used in various research activities" was conducted by the Mechanical Engineering Department on 18/02/2019. The resource person was Mr. Ninad Pande Lead Engineer & associate, proton synergy pvt, Ltd. ANSYS is a company that provides engineering simulation software to help customers in various research and development activities. The company has been around for more than 40 years, and it has grown from a small start-up to one of the largest providers of engineering simulation software in the world. It is headquartered in Canonsburg, Pennsylvania, with offices all over the world. In recent years, ANSYS has been used to study turbulence by creating simulations, analysis and interpretation of data and synthesis of the information to provide valid conclusions. The simulations are created using the Navier-Stokes equations which are then solved by ANSYS. These simulations have been very useful in determining how turbulence behaves when it interacts with other objects. Total 13 students have participated.

Program Outcome –

In this program we covered PO4 where we use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Circular

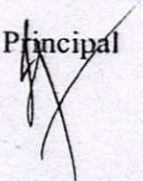

The Department of Mechanical Engineering has planned to conduct a Seminar for students on
" ANSYS used in various research activity ", held on 18/02/2019, Time: 12:45 pm to 2.45 pm. The students
are told to take advantage of the seminar and learn more. The concerned Coordinator

(Mr. B.S Kale, Contact No. - 9819678899).

All students and faculty members are cordially invited to attend this seminar.
