## REPORT

A one day Seminar on “**Intellectual Property Rights for data scientist**” was conducted by Information Technology Department on **09/03/2022**. The resource person was Dr. Irfan S.. Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty. Pharmaceutical industry currently has an evolving IPR strategy requiring a better focus and approach in the coming era. Total 73 students have participated.

### Program Outcome-

In this program we covered PO8 which gives aspects of how to prepare an Oral research presentation. It is obvious that management of IP and IPR is a multidimensional task and calls for many different actions and strategies which need to be aligned with national laws and international treaties and practices.

## Circular

The Department of Information Technology has planned to conduct a Seminar for students on **"Intellectual Property Rights for data scientics"**, held on 09/03/2022, Time: 3pm-4pm. The students are told to take advantage of the seminar and learn more. The concerned Coordinator (Prof. Aparan Bhonde).

All students and faculty members are cordially invited to attend this seminar in 806.
