Accountability

- **CACFP Claim Export Now Available**

We have added the ability to export CACFP claims. This may require some setup in the Imports & Exports section of the System module; please contact our Support team if you need help.

For now, the available format is keyed to the Texas state format. If your state has an available CACFP import format, please send it in so we can add it!

Accountability > Claims

Eligibility

- **Make Simple Changes to your Application's Design**

A new page has been added to allow users to modify the HTML image template for an application (referred to as 'Application Image' in Application Details) that is visible throughout SchoolCafé and Family Hub, so that districts can align its design with the look and feel of their paper application. Simple changes are best; any changes will take immediate effect. Be careful not to modify fields in {{green}} unless advised!

Eligibility > Settings > Application Image
