Front Office

Accountability

- **Serving Days on the Meal Count Report**

We have updated the Meal Count Report to show serving days based on the selected program and meal type. Previously, this referenced only SNP, but now it also accounts for SFSP/CACFP meals.

Accountability > Reports > Meal Count

Eligibility

- **Preview of the Application Image**

We have added a new action to the Applications grid - Application Image. This will show you the filled-out application form, in both the latest and original formats.

With the PDF viewer, you can also download or print the form directly.

Eligibility > Forms > Applications

- **State ID Column Added to Eligibility Status Changes and Roster Reports**

The State ID column, accessible in other reports, has now been added as a potential column within the Eligibility Status Changes and Roster Reports. Select the 'Columns & Views' button above the grid for either report to find it.

Eligibility > Reports

- **Export Eligibility Data from the Roster Report**

We have added an option to the Roster Report to export eligibility data. You will be able to select the source of this information - Direct Certification, FRE Applications, Surveys, and our upcoming Forms feature - and it will provide you with a CSV file containing that information as of today's date.

Eligibility > Reports > Roster

Family Hub

- **Single Sign-On for Family Hub**

Now, admins and users with a new permission will be able to use a new link to log in to Family Hub directly from SchoolCafé without needing to maintain another set of credentials. This is because the feature utilizes existing information to create a new district admin account in Family Hub if one does not already exist for the user. Contact Customer Care if you need any help enabling this permission.
