## Front Office

### Accountability

- Report Page Updates**

We have continued our rollout of report updates for the following pages:

- Edit Check: Site Type and Meal Type are now multi-select dropdowns.
- Meal Count: Site Type, Site Code/Site Name, and Meal Type are now multi-select dropdowns. We have also added a Terminal dropdown that lists POS terminals. The Include Adults option is also now on by default.

More updates coming soon!

## Back Office

### Inventory

- Internal Vendors & Inventory Distribution**

We are excited to announce the launch of Inventory Distribution. Inventory now supports the configuration of Internal Vendors, which are sites that can be set up to receive orders and fulfill those orders using the Distribution tool. If you think Distribution would improve your district operations, please contact us for more information!

#### Distribution Calendar

- **Order Details Updates**

To support the release of Inventory Distribution, the Order Details page has been redesigned to improve usability in the user interface. The Details tab, Receipts tab, and Receipt Details screens have all been updated to optimize screen space for the most important information.

## Menu Planning

- **Display Custom Background Images for Family Portal Monthly Menu Calendars**

Now, users can upload custom background images for published menu calendars for individual sites and the whole district! These images will be displayed in the Family Portal for users who view or print the Monthly View of their site menus.
