Front Office

POS

- **Inactive Visiting Students at the POS**

We have made a minor update to the POS to ensure that visiting inactive student accounts are not loaded when the **Serve Inactive Students** option is not enabled.

System > Sites & Users > Site Configuration > POS Configuration tab

Eligibility

- **Update for Pending Students on FRE Forms**

We have made some updates to how pending students are shown and selected for FRE Application forms.

- **Match** buttons are available if multiple students are available to link against the pending student.
- Application Details are only updated after the **Process Matches** button is clicked.
- Status and Eligibility have been added to the Match Details screen for improved clarity.

Eligibility > Forms > Applications > Pending Students tab

Back Office

Menu Planning

- **CACFP Analysis: Product Based Added Sugars Flag**

Product Based Sugar items will now be flagged and fail CACFP Meal Pattern analysis based on the newly added sugar rules implemented on October 1, 2025. Any breakfast cereals or yogurts marked as “Product Based Sugar” items will now be checked for added sugar and flagged on all analyses if the added sugar exceeds the amount allowed.

Menu Planning > Menu, Menu Cycle

- **CACFP Analysis: MMA as Grain for Breakfast**

The CACFP Meal Pattern Analysis has been updated to support the calculation of using MMA as Grains for breakfast. This allows users to indicate any MMA as Grains for Breakfast on menus and calculates the analysis based on these indications. A flag has also been added to fail the analysis if MMA has been used as a grain more than three times in a single week.
