Eligibility

- **New Controls Added for Pending Applications**

We have added the ability to control the scenarios that cause an online application to be marked as pending. You can toggle the variety of reasons on or off with the new Form Settings page.

This was requested by districts that wanted the ability to let specific scenarios pass through for automatic approval.

All directors and central office staff should have access to the new page with this update. If you don't, check the Roles and Permissions page in the System module.
