

BTC450

Quick Reference Guide

Car Kit Installation

Instructions

Please refer to the diagram on page no. 1

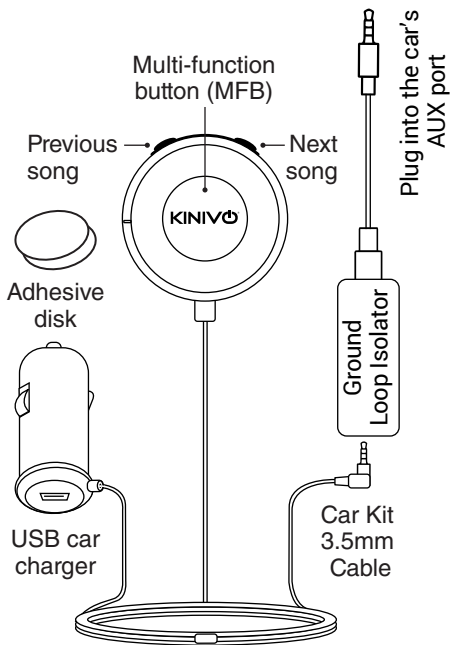

- 1) Plug in the car kit's USB charger to the car's power outlet (also called the cigarette lighter)
- 2) Connect the car kit's 3.5mm cable to the ground loop isolator. Then, connect the ground loop isolator to the AUX input in your car
- 3) Adjust the car stereo settings to AUX input
- 4) Once the BTC450 is powered on, open Bluetooth settings on your phone and pair it with BTC450
- 5) Mount BTC450 on the car dashboard using the adhesive disk (optional)

Car Kit Overview

FAQ

Q: How many Bluetooth connections will the car kit remember?

A: BTC450 will remember up to 4 previous Bluetooth connections and can connect up to 2 devices simultaneously.

Q: Why do I hear a humming noise in my car while using BTC450?

A: To eliminate the electrical humming noise, use the included ground loop isolator as illustrated in the 'Car Kit Installation' diagram.

Q: How do I pair the second device to BTC450?

A:

1. Pair BTC450 with your first device
2. Enter pairing mode again
3. Pair car kit with the second device
4. Unplug and replug the USB car charger, to connect both devices

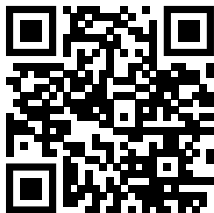

FAQ

Q: Can I charge my device with the USB car charger?

A: Yes, connect your device to the USB port of the power adapter.
