## BANISH 9K OWNER'S MANUAL

BANISH Suppressors has always had one overriding goal in mind - to make the most user-friendly suppressor on the market. And what is more user-friendly than being multi-caliber? At BANISH Suppressors, we are proud of what we've accomplished, and we want to share with you what makes a BANISH Suppressor stand out from the crowd.

Our unique WhisperTech™ tube is where the BANISH multi-caliber system starts, with a lightweight titanium alloy tube. BANISH Suppressors are light-weight and tough enough for a lifetime of service. The internal baffles handle the gas in such a way that the suppressor significantly reduces recoil as well as sound.

## WARNING

To provide for your safety and the effective use of this silencer, it is important that the owner and any user of the silencer read this entire manual and strictly follow the warnings and instructions within. This silencer should be used only by those who are well-versed in the safe operation of firearms.

Failure to follow installation and maintenance instructions in this manual may result in serious personal injury and damage to the firearm.

Suppressed firearms make less noise than unsuppressed firearms and it is easy to forget that they are still capable of causing bodily injury and property damage. Remember, a suppressed firearm should be treated with the same safety and caution as an unsuppressed firearm.

Before installing the silencer, be sure that the firearm is unloaded and the action is opened and visibly clear of any ammunition. If you are at all unsure as to the proper procedures to ensure that your firearm is unloaded, please consult your firearm user's manual/instructions and/or contact a properly licensed dealer or the manufacturer of your firearm.

Firearm silencers are user-attached firearm muzzle devices, and as such are subject to improper attachment issues unless the procedures outlined in this manual are followed precisely.

Check the fit between your barrel and silencer before firing! The thread mount must be fully shouldered on the barrel. There should be no visible gap between the barrel shoulder and the face of the silencer thread mount (crush washer from muzzle brake must be removed).

If there is any gap DO NOT fire the host with the silencer attached. Poor accuracy and product damage may result if the silencer is not seated against thread shoulder.

Silencers must be free of obstructions such as mud, dirt, etc. DO NOT attempt to shoot through an obstructed silencer.

The silencer is designed to suppress the initial muzzle blast and subsequent projectile de-corking pressure. The silencer doesn't contact or otherwise interact with the bullet, allowing the projectile to travel at its default speed.

A sonic crack may be produced by the projectile as it breaks the sound barrier. This is solely a function of the projectile breaking the sound barrier and is not related to product performance.

To ensure your silencer remains secure while firing, it is of the utmost importance that you frequently verify the silencer is securely tightened onto the barrel. We recommend checking the security of the attachment after 30 discharges of the firearm.

Before removing the silencer from the host firearm, be sure that the firearm is unloaded and the action is opened so that it is visibly clear of any ammunition. When removing the silencer, use extreme caution as it may be hot to the touch after firing. Use a Devour™ suppressor cover (sold separately) or gloves to avoid burns or other injuries.

Once the silencer is removed from the host firearm, BANISH recommends using a thread protector or other muzzle device to protect the muzzle threads and crown during storage or transport.

Engineering is an artform unto itself, and the BANISH 9K is a technical masterpiece. The additive manufactured titanium 9K is just 4.1 inches long and has a diameter of just 1.3 inches, making it one of the most compact 9mm suppressors available. It weighs just 2.7 ounces, too. Yes, you read that right – 2.7 ounces. This compact size makes concealed carry a possibility with the BANISH 9K suppressor.

Compact size and light weight don't mean much if the sound levels are still high. Don't worry – the BANISH 9K has your back. It brings the levels down for average 9mm rounds to 132 decibels at the ear. For subsonic rounds, it is even rated for full-auto fire.

The BANISH 9K comes in dedicated suppressors manufactured in either 1/2x28 or M13.5x1LH metric threads. It doesn't require a piston, so just thread it onto your barrel and go. If you've been waiting for the ultimate 9mm can, your wait is over.

## SPECS

**LENGTH:** 4.1" | **DIAMETER:** 1.3" | **NUMBER OF BAFFLES:** 8 | **WEIGHT:** 2.7oz  
**MATERIAL:** 3D PRINTED TITANIUM | **THREAD PITCH:** 1/2X28 OR M13.5x1 LH  
**CALIBER:** 9mm | **CALIBER RANGE:** .380, 5.7x28, 9mm, .300 BLK | **COLOR:** BLACK  
**FINISH:** CERAKOTE | **FULL-AUTO RATED:** FULL AUTO RATED FOR SUPERSONIC 9MM AND  
SUB SONIC 300 BLACK OUT | **MOUNT STYLE:** DIRECT THREAD 1/2 X 28 OR M13.5x1 LH  
**SOUND REDUCTION:** 26db | **LIFETIME WARRANTY:** YES | **SELF-SERVICE:** NO

## CLEANING

It is recommended that the suppressor be cleaned every 50 – 100 rounds fired. The use of solid lead or plated lead bullets is not recommended.

To clean, make sure the firearm is unloaded and unscrew to remove from host firearm.

The BANISH 9K is not user serviceable. Due to the use of additive manufacturing, where the entire suppressor is a single fused unit, the internal baffles cannot be removed.

Soak the entire can in a dish soap solution OR seal the muzzle exit hole and fill the silencer with any cleaning solution and let it sit for 24hrs in both scenarios. Any firearm solvent or sonic wash firearm cleaning solution will work. Ensure not to use solutions that will strip the Cerakote® coating from the silencer.

Once clean, allow the silencer to dry. Shoot 10–15 rounds through the silencer. The high pressure will shoot out any loose debris and buildup that was loosened during cleaning.

## LIFETIME WARRANTY

We provide a lifetime warranty against all manufacturing defects and damages caused by the normal use of our products. We will repair or replace free of charge any suppressor manufactured by, or at the direction of, BANISH Suppressors. The product is sold "as is" with no further implied contractual rights or warranties beyond those expressly stated herein.

The lifetime warranty does not apply to certain conditions or acts. It is at the sole discretion and determination of BANISH Suppressors if a defect or condition is covered by this warranty. Conditions not covered include, but are not limited to: modifications, abuse, neglect, use of defective ammunition, use of improperly sized ammunition, and criminal conduct. BANISH Suppressors assumes no liability for damages or bodily injury caused by such acts or omissions as previously described. Abuse and neglect are defined as usage outside of the reasonable scope for which the product is intended, thus contributing to the accelerated and unreasonable premature wear of the suppressor itself.

If a repair is required, the owner must contact our Customer Service Department. Our customer service representative will arrange for return of the suppressor at manufacturer's shipping expense. PLEASE DO NOT SHIP THE SUPPRESSOR FOR REPAIR WITHOUT FIRST CONTACTING CUSTOMER SERVICE AND DO NOT SHIP IN ANY EVENT WITHOUT A COPY OF THE APPROVED BATFE FORM.

When you ship the suppressor back to the manufacturer, please include a detailed statement concerning

the type of defect or malfunction encountered, describe the ammunition used and type of host weapon the product was used on or attached to.

If for any reason your suppressor is not eligible for repair or replacement, you may purchase a replacement suppressor for 50% off the MSRP for a same or similar suppressor.

Please contact our Customer Service Department at 888-781-8778 for further details and requirements.

### RETURN SHIPPING

The cost of shipping for any items returned to Silencer Central is the responsibility of the customer, with the exception of warranty claim returns. Return shipping to Silencer Central for warranty claims and/or repairs are covered by Silencer Central as long as Customer Service is contacted in advance and a warranty claim form is completed by the customer.
