

RXD SUPPRESSORS

Dead Air Silencers and Ruger® Firearms are two of the most respected names in the shooting sports industry. These great brands came together to offer an entirely new and exciting product line: RXD Suppressors. Dead Air developed this line of performance-driven suppressors and accessories to complement Ruger's innovative firearms designs. RXD products are not reskins - they represent a new standard for suppressor design, performance, and maintainability.

RXD 22Ti

Dead Air delivers a new standard in rimfire performance: the RXD22Ti. This innovative suppressor is comprised of a Titanium tube, a 3D printed PVD coated single-piece Triskelion™ core, titanium retaining cap and an all-new XRF muzzle brake specially designed to enhance performance and capture lead.

Mark-Series Pistols

SR22® Pistol

MULTI-CALIBER

Small caliber, high velocity. The RXD22Ti is purpose built to suppress many different cartridges including .22LR, .22WSM, and .17HMR.

ACOUSTIC PERFORMANCE

Small package, large suppression. The RXD22Ti boasts incredible sound performance with excellent muzzle suppression and reduced ejection port pop, that will reduce muzzle report for even high velocity cartridges like .17 HMR and .22 WMR, all while retaining the low tonal frequency of the Triskelion™ family of suppressors.

GAS MANAGEMENT SYSTEM (GMS)™

Less gas, more suppression. Rimfire firearms don't often suffer from being over-gassed, but the decrease in backpressure minimizes ejection port noise leading to a cleaner shooting experience and a better sound.

COTS TOOL FEATURES

No proprietary tools required. The RXD22Ti and its subcomponents were designed to incorporate tool features that will accommodate most Commercial Off-The-Shelf (COTS) tools.

ADDITIVE MANUFACTURING

Not your Grandpa's mono-core! The RXD22Ti has an intricate single piece PVD coated Triskelion™ baffle system that is only possible to achieve with 3D printing, resulting in a stronger, lighter, and easily cleanable suppressor.

XRF RIMFIRE MUZZLE BRAKE

Different threads, no worries. The RXD22Ti ships with a unique and novel tapered rimfire muzzle device ensuring a secure lockup that allows shooters to use the same suppressor on multiple different platforms with 1/2"-28 and M10x1 muzzle threads. This feature helps capture lead before it enters the suppressor for easier maintenance.

MATERIALS

Suppressor: 6AL4V Titanium
Muzzle Device: Nitride 17-4 PH Stainless Steel

FINISH

Black or Burnt Bronze high temp Cerakote®,
Nitride adapter, PVD Triskelion® Core

CALIBER RATING
