

Essential Studio® Solves Performance Issues

Body:

Lam Le is a solutions architect at X Software Co. Ltd., a software company based in Vietnam. Lam and the team at X Software are making an appointment booking app.

Challenge

What were you using before Syncfusion®?

Telerik.

What challenges and pain points did you face before using Syncfusion products?

Performance with big data when loading, difficult to scale, and some other minor issues. We were unable to find a different product that met our performance requirements.

Solution

Which Syncfusion products do you use?

We use ASP.NET Core and JavaScript components, but mainly the Scheduler.

What are your favorite features of Syncfusion products?

- User-friendly UI
- Easy to integrate
- Comprehensive and feature-rich UI framework
- Ability to deploy on mobile, web, and desktop
- Scalable components
- Trusted support team

Result

How have our products helped the application or program you are working on?

- Resolved performance issues
- Allowed us to scale some minor features
- Let us integrate other functionality

Pull Quote

“Syncfusion tools are easy to use and effective.”

—Lam Le, solutions architect at X Software Co. Ltd.
