

Luca Tomat builds High-Performance, Intuitive GUIs with Syncfusion Components

Hassle-free UI.

140+ ASP.NET Core UI controls.

145+ Blazor UI and DataViz components.

Introduction

Based in Tolmezzo, Italy, Luca Tomat offers freelance software development services involving data elaboration and display, machine controls, and more.

Problem Summary

Luca wanted to design intuitive, high-performance GUIs, but struggled to find a low-cost Blazor toolkit suited for independent developers.

"I have already suggested Syncfusion to several other coworkers for their personal projects or their commercial apps since I think it is a great product, and the only product I know to offer free licenses for private use and small businesses."

Customer Detail

Luca Tomat , Freelance Developer

Use Case

Luca used Syncfusion's ASP.NET Core and Blazor UI controls to build efficient, user-friendly GUIs without undergoing additional expenses.

BEFORE SYNCFUSION

Challenges

- ❌ Required a versatile set of Blazor UI controls to build useful and user-friendly GUIs.
- ❌ Labored to find a toolkit that met both cost and functionality requirements.

AFTER SYNCFUSION

Solutions

- ✅ Syncfusion's Blazor and ASP.NET Core component suites offer powerful GUI controls.
- ✅ Qualified for the Syncfusion Community License, unlocking 1,700+ UI controls and frameworks at no cost.

Results

- Accessed ASP.NET Core and Blazor UI controls for free with the Syncfusion Community License.
- Enhanced the usability and efficiency of GUIs by integrating Syncfusion's ASP.NET Core and Blazor UI components.
- Improved intranet applications, increasing the likelihood of client satisfaction.

Conclusion

By adopting Syncfusion's ASP.NET Core and Blazor UI controls, Luca successfully built useful and user-friendly GUIs for clients' intranet applications. The addition of diverse UI components, paired with the Syncfusion Community License, enabled Luca to elevate his end-user experience without increasing expenses.
