

Vast Selection, Easy to Use

Body:

The following Q&A was submitted by Syncfusion customer Derek Papworth.

What were you using before using Syncfusion tools?

Various over the years.

Which Syncfusion products do you use now?

Essential Studio for .NET MAUI and Blazor.

What is the functionality of the application you built with Syncfusion tools?

I use various Syncfusion Blazor components mainly to save time when compared to development on my own.

How have Syncfusion components helped your application?

Huge time savings by being able to use great components that would've taken me ages to code myself.

What was it like getting started with Syncfusion?

Pretty easy to implement—no problems.

How would you describe the application you built with Syncfusion?

A Blazor app for both Server and WASM.

Pull Quote:

"Great tools with a vast selection of components and easy to use, saving loads of development time."
