

François Rapidly Builds Rich, High-Performance Charts with Syncfusion Controls

125+

WinForms UI controls

30+

configurable chart types.

Stunning, built-in themes.

Introduction

Leveraging years of industry expertise, retired programmer François Pilloud is currently developing his own WinForms application.

Problem Summary

François struggled to design quality, high-performance charts for his desktop application.

"I will recommend [others] to use Syncfusion."

– **François Pilloud**, Software Developer

Use Case

François used Syncfusion's WinForms Charts, DataGridTabControl, and DataGrid Tabs controls to create engaging data displays and improve his application's visual configuration.

François Pilloud,
Software Developer

BEFORE SYNCFUSION

Challenges

- ❌ François Pilloud, Software Developer.

AFTER SYNCFUSION

Solutions

- ✅ Integrated Syncfusion's prebuilt WinForms Chart controls, which offer enterprise-grade quality out of the box.

Implementation

François single-handedly integrated Syncfusion's WinForms Chart, DataGrid, and TabControl into his desktop application—expanding its data visualization and navigation capabilities.

Results

- Acquired the Syncfusion Community License.
- Accessed 125+ WinForms UI controls for free.
- Reduced manual development workload.
- Created fast, high-quality data presentations.
- Enhanced application's visual configuration.

Conclusion

By adopting Syncfusion's WinForms UI controls, François was able to successfully create engaging charts and tables. The addition of prebuilt UI components, combined with the Syncfusion Community License, empowered François to upgrade his application's visual configuration and functionality at no cost.
