

Clients See More with Grids and Charts

Challenges

The only tools developer Jorge had used before were the default ones found in Visual Studio Community Edition. After finding Essential Studio® for Windows Forms by Syncfusion®, he was able to adorn his app with beautiful grids that had extraordinary functionality. Now, exporting to Excel format is a breeze and he can insert excellent charts.

Solution

Jorge's client needed to understand data in the form of well-functioning grids and insightful charts. With Syncfusion, he built an app where the grid appeared his client, and the beautiful charts allowed them to understand the data they needed.

Impact

Budget cuts made money a challenge, and Jorge's former solution was too costly. With Syncfusion, he saved money and found an easy-to-start solution.

Benefits

- User-friendly UI.
- Easy to integrate.
- Comprehensive and feature-rich UI framework.
- Ability to deploy on mobile, web, and desktop.
- Trusted support team.
- Simplified license pricing and no hidden fees.
- Wide selection of prebuilt tools and controls.

Pull Quote

"All I can say is I very much recommend this component suite."

—Jorge Barelo, developer
