

LSI streamlines Template management with Syncfusion DOCX Editor

Accessible UI

Seamless integration.

Dynamic DOCX templates

Introduction

Based in Palembang, Indonesia, PT. Lingkaran Sistem Intelektual (LSI) offers a wide range of services, including IT consulting, UI/UX design, application development, social media design, media release preparation and distribution, and tax guidance.

Problem Summary

LSI used a static PDF generator in PHP, which made it difficult to maintain templates.

"I would recommend [Syncfusion]."

– **Dedek Julian**, Smart Atom Software Developer.

Use Case

LSI adopted Syncfusion's React DOCX Editor SDK, empowering the team to create dynamic DOCX templates that facilitate maintenance.

Customer Detail

Dedek Julian

Team Member

BEFORE SYNCFUSION

Challenges

- ❌ Generated static PDFs in PHP, making template maintenance frustrating.

AFTER SYNCFUSION

Solutions

- ✅ Syncfusion's React DOCX Editor SDK enables dynamic template creation, reducing maintenance burden.

Implementation

Pasquale found it easy to integrate Syncfusion's Kanban Board into his desktop application. Since Syncfusion offers comprehensive documentation, Pasquale was guided step-by-step through the implementation process.

Results

- Successfully replaced static PDF generation tools.
- Simplified template generation and maintenance.
- Increased efficiency of template maintenance workflows.

Conclusion

By adopting Syncfusion's React DOCX Editor SDK, LSI converted PHP-based PDF templates into dynamic, maintainable documents—eliminating maintenance bottlenecks. As Dedek Julian puts it, "The document editor is great. Everything feels dynamic. We used to write many template letters. Now, we're using Word, and everything is great."
