

# R.O.S. Software achieves Custom Grid Solutions with Syncfusion

Cost-effective pricing.

Seamless integration.

24/7 support resources.

## Introduction

Founded in 1990 by Ronny Schreinzer, R.O.S. Software develops tools for musical instrument digital interface (MIDI) and audio applications. In doing so, R.O.S. Software aims to provide affordable, high-quality software for live events, theater, and TV.

## Problem Summary

Component One grid components offered limited customization and hindered R.O.S. Software's desktop application development.

*"[Syncfusion tools] are easy to use and the price point is fair."*  
– Ronny Schreinzer, Founder & Software Developer.

## Use Case

R.O.S. Software used the Syncfusion® WinForms DataGrid to build Teatro—an audio playback software designed for TV studios, theaters, and other live events.

#### BEFORE SYNCFUSION

### Challenges

- ❌ Required grid components with adjustable colors, fonts, etc.
- ❌ ComponentOne controls hampered desktop application development.

#### AFTER SYNCFUSION

### Solutions

- ✅ Leveraged Syncfusion's WinForms DataGrid to build an audio playback application, Teatro.
- ✅ Adopted Syncfusion's WinForms DataGrid, which can be customized down to the cell level.

## Implementation

Syncfusion's comprehensive WinForms documentation, paired with its prompt, client-specific support, made it "very easy" for Ronny to integrate the Syncfusion WinForms DataGrid component into his desktop application.

## Result

- Replaced ComponentOne grid components with Syncfusion's WinForms DataGrid, allowing R.O.S. Software to create its ideal tabular data display.
- Effortlessly integrated customized, enterprise-grade components into a desktop application and elevated its end-user experience.
- Successfully built and deployed an audio playback application, Teatro.

## Conclusion

With Syncfusion's WinForms DataGrid, Ronny and his team designed a desktop application that met both their functionality and appearance requirements without going over budget. This enabled R.O.S. Software to launch its flagship software, Teatro, without a hitch.
