

SMB – Diseño y Render Builds Interactive Templates with Syncfusion’s UI Controls

Highly customizable

Seamless integration

Extensive documentation

Introduction

Leveraging years of residential, commercial, and infrastructure project experience, Architect Saúl Moreta founded SMB – Diseño y Render. Based in Santiago de los Caballeros, Dominican Republic, SMB – Diseño y Render designs, plans, and creates 3D renderings for architectural projects.

Problem Summary

"[Syncfusion] is excellent and accessible with excellent documentation."

– Saúl Moreta, Founder, SMB – Diseño y Render

Use Case

SMB – Diseño y Render used Syncfusion’s ASP.NET Core and Blazor UI controls to improve its templates’ interactivity, empowering users to fill out information accurately and quickly.

Founder

BEFORE SYNCFUSION

Challenges

- ❌ Templates needed functional elements that enhance accessibility and user-friendliness
- ❌ Manually building interactive templates proved time-consuming and laborious.

AFTER SYNCFUSION

Solutions

- ✅ Syncfusion offers input controls to boost interactivity, like the Checkbox, Radio Button, and Signature.
- ✅ Syncfusion's UI components can be used out of the box, enabling faster, effortless feature development.

Implementation

Saúl described Syncfusion's ASP.NET Core and Blazor UI controls as "easy to use and implement." Since Syncfusion offers in-depth documentation, Saúl was guided through each stage of the development process.

Result

- Facilitated development by integrating Syncfusion's ready-to-use UI controls, rather than building dynamic components from scratch.
- Elevated template design with Syncfusion's ASP.NET Core and Blazor UI controls, allowing users to provide correct information significantly faster.
- Simplified real-world workflows involving templates, reducing operational burden and stress.

Conclusion

Syncfusion's rich, prebuilt ASP.NET Core and Blazor UI components—like the DataGrid and input controls—paired with its comprehensive documentation, empowered SMB – Diseño y Render to build templates that streamline internal processes effortlessly.

As said by Founder Saúl Moreta, "[Syncfusion] has helped me enhance my templates. Those of us who use them can fill them out more accurately and efficiently. I don't have to create any new features."
