

A Toolset Beyond This World

Background

Software developer Victor Ahuwanya works at [Virock](#), a company that specializes in developing innovative SaaS solutions that enhance customer engagement and streamline lead generation.

Challenge

Victor needed a multi-combo box with autocomplete functionality for the Uno Platform. The app they were working on was an automated backlink generator called [Linklasso](#).

Solution

Enter Syncfusion® Essential Studio®. Once Victor started using it, they got the multi-combo box they had been looking for with the autocomplete feature they needed.

Results

Victor was impressed with the wide selection of prebuilt tools and controls in Essential Studio. The previous toolset they used didn't have everything they needed, but Syncfusion did.
