Syncfusion®

Countless Controls to Count On

Body:

The following Q&A was submitted by a Syncfusion® customer.

What were you using before Syncfusion?

Telerik

Which Syncfusion products do you use?

Essential Studio® for Blazor and WinUI.

Describe the application you built with Syncfusion tools.

Real-time markets. Blockchain and smart contracts.

What issue were you trying to resolve before using Syncfusion?

We needed a wide, high-quality control set for different platforms and support during our start-up phase. Someone we could count on and work with throughout the process and beyond.

How has Syncfusion helped?

Your control set and tools cover most aspects, and if there was a special circumstance, customization, or behavior we needed, your team provided solutions. You guys are on the ball. I was impressed.

What was it like getting started with Syncfusion?

Super easy. The documentation is excellent. There are also examples, demos, and the support team responds with solutions.

What features motivated you to use Syncfusion?

- Easy integration
- A feature-rich UI framework
- Ability to deploy on mobile, web, and desktop
