12:30 PM – 5:30 PM

Committee Meeting

Diversity & Inclusion Leadership Council Meeting

This is a private meeting for RILA members on the Diversity & Inclusion Leaders Council.

2:00 PM – 3:00 PM

Committee Meeting

Transportation and Infrastructure Committee Meeting

This is a private meeting for RILA members on the Transportation & Infrastructure Committee. We will use this time to update members on the current legislative and regulatory landscape regarding transportation issues, benchmark alongside peer companies and discuss additional industry priorities.

3:00 PM – 5:30 PM

Committee Meeting

Supply Chain Leaders Council Meeting

This is a private meeting for RILA members on the Supply Chain Leaders Council. The council is comprised of the senior-most retail executives who are responsible for global supply chain issues within their respective companies.

5:00 PM – 5:30 PM

Orientation

First Timers' Reception

Whether you are a new attendee or a 10-year veteran, attend this pre-session to ask questions of, learn tips from, and network with conference veterans and RILA staff.

5:30 PM – 7:00 PM

Reception

Sponsored by FedEx

Welcome Reception

Kick off the conference at the welcome reception where you can reconnect with industry friends, network with your peers and enjoy drinks and light fare.

9:15 AM – 10:00 AM
General Session

The Shopping Revolution: How Successful Retailers Win Customers in an Era of Endless Disruption

We are just witnessing the start of radical changes that will revolutionize the way shopping in every way. Customers' expectations are being ratcheted up, making winning (and keeping) those customers all the more challenging. In this session, Prof. Kahn will examine the companies that have been most successful during this wave of change and offer insights into what we can learn from their ascendance. Building on these insights, she will present the "Kahn Success Matrix" which provides a framework that any company can use to create a competitive strategy to survive and thrive in today's – and tomorrow's disruptive environment.

Breakout Session

Complexities of Large Format Last Mile

The session will consist of a panel of leading last mile delivery providers and retailers that ship large/bulky shipments requiring multiple levels of delivery/service. The panel will share perspectives on emerging trends in this rapidly evolving space, key challenges and various solutions to satisfy consumer's needs.

Brian McNabb, Vice President, Global Transportation, The Michaels Companies,

John DeAngelo, Vice President, Business Development, Ryder System,

John Kacherski, Chief Commercial Officer, FIDELITONE,

Steve Anderson, Executive Vice President, Operations, Williams-Sonoma,

Jay Kirkham, Vice President, Logistics, ICON Health & Fitness

10:30 AM – 11:15 AM **Brewing Real Insights: Anheuser-Busch's Data Strategy & Platform**

Breakout Session

While “data analytics” is always a trending topic in supply chain and logistics, only when data can lend itself to actionable results do retailers really start reaping the benefits for their bottom line. This session will highlight Anheuser-Busch’s real world experience in working with data insights, and how this has helped them identify wasteful and under performing areas along their supply chain, while simultaneously improving pricing, forecasting, scorecarding and more. Anheuser-Busch will share some of the KPIs and data that they collect, and how this has translated into creating a more efficient process for the company. By accessing real-time data analytics, Anheuser-Busch has gleaned what their weakest warehouses and carrier are, allowing them to improve unloading times, lower detention costs, and more across the board.

Mark Young, Director, Transport Procurement, Anheuser-Busch Companies,

Drew McElroy, Chief Executive Officer & Co-founder, Transfix

10:30 AM – 11:15 AM **Case Study: Augmented Reality Picking for Apparel Fulfillment**

Breakout Session

Once considered a futuristic technology, augmented reality (AR) is currently being implemented in real-world scenarios. As labor turnover in distribution centers continues to increase, one way retailers are trying to quickly onboard and retain hourly employees is by simplifying the training process and using picking tools like AR to enhance this process. Hear how longtime kidswear retailer Cookie’s Kids has used AR to improve productivity and accuracy in their Distribution operations, then experience a demo of the technology firsthand!

Al Falack, Senior Director, e-commerce, Cookie's Kids Clothing

Charlie Armstrong, Founder, JASCI Software

10:30 AM – 11:15 AM **How Retailers Use Network Resources to Optimize Omnichannel**

Breakout Session

E-commerce today is pushing everyone to have a solution to meet their customer’s need right now. Does your network have the ability to respond quickly? How do you choose where orders are fulfilled? Do you have a multi-carrier platform to be flexible and nimble when it comes to fulfillment and delivery times? Planning and execution for an optimal complex omnichannel network is not a simple task. Effectively using network resources – order fulfillment, stores, and transportation are ways that Office Depot boosts their omnichannel fulfillment strategy.

Rick DiMaio, Vice President, Supply Chain Operations & Strategy, Office Depot

Aaron Guild, Director of Strategic Solutions, Green Mountain Technology

10:30 AM – 11:15 AM **UX and Returns: The Boomerang Continues**

Breakout Session

Reverse logistics has long been the “tail of the dog” in the supply chain. Not any longer. Come learn how retailers/ecommerce companies are leveraging technology, analytics and operational enhancements to reinvent their returns strategies while enhancing the user experience. One thing is for certain, returns will always be a part of the retail model, and the return percentages will continue to vary between 5-45% depending on the category. Come listen to what some of the leading retailers are doing to make returns more profitable, easier for the consumer and leveraging a more creative and efficient operating platform to drive shareholder value. This session will help the audience understand how:

- Technology can help shorten your returns cycle and provide visibility into what is being returned
- Returns are expected to increase going forward and the impact on our business
- Benchmarks from industry leaders on how to streamline your returns processes to enhance the user experience
- Customer expectations/experience around the returns process
- Latest trends in how to improve reverse operations

Andy Bowerman, Vice President, Supply Chain Operations & Data Science, Groupon

Jeremy Witte, Vice President, Returns, Damages & Recommerce, Best Buy

Curt Bimschleger, Managing Director, Deloitte Consulting LLP

10:30 AM – 11:15 AM **Reshaping The Retail Supply Chain with AI: Capacity Modeling as a Response to Aggressive Growth in Nordstrom’s E-commerce Channel**

Breakout Session

Sponsored by Yusen Logistics

In this talk, we will share how the AI mindset is helping retail leaders like Nordstrom rethink the supply chain. Nordstrom is experiencing enormous growth in their ecommerce channel. Recently, there have been capacity challenges in the fulfillment centers. The process of analyzing capacity requirements for outbound, returns, inbound, and storage needed a level of sophistication that could inform the business team at a speed that allows fact-based decision making and significant improvements in many areas of the supply chain. The Opex team

partnered with Nordstrom's Network Strategy team to build robust and scalable machine learning models that not only predict the impact on service level agreements (SLAs), but also recommend the prioritization threshold for different business segments. As Nordstrom reshapes the Supply Chain with AI, there are plans to apply artificial intelligence -- through a mix of cutting edge optimization and analytics algorithms -- to improve following functions: Labor allocation, product allocation strategy, order prioritization systems, returns flow and turnaround time, and product placement inside fulfillment centers to increase overall efficiency. Hear about this and more as we share details on the retail AI journey.

Educational Session Room Sponsored by Yusen Logistics
Jason Trusley, Vice President, Supply Chain & Operations, Nordstrom
Ganesh Ramakrishna, Partner, Opex Analytics

Leading to Win - Abby Wambach

A leader on and off the field, Abby Wambach's life after professional soccer has not always been a smooth path. By embracing the lessons she learned through her unmatched career, and the challenges she's faced since leaving professional soccer, Abby's passion and perseverance have served as a model for others. An activist and advocate in the fight for equality and inclusion for causes and people across the globe, Abby talks about issues ranging from closing the gender pay gap, to using her voice as an advocate for the LGBT community. Her messages to audiences about leading by example are enhanced by her optimism and fearless nature.

Intro to Data Analytics

How to start by developing and implementing real, simple, and powerful data analytics to empower your company to make better decisions. This session explores how to identify ERP gaps, and begin visualizing and sharing data analytics between manufacturer, retailer, and vendors to better perform on-time in full.

Brian Catron, Head of Global Retail Services Product Strategy & Distribution Services, APL Logistics

2:30 PM – 3:15 PM

Breakout Session

Blockchain 101

In this session you will learn the basics of Blockchain and why it will revolutionize supply chain and logistics. You will gain a better understanding of the underlying technology that drives Bitcoin, ICOs and Smart Contracts. Furthermore, you will learn how Blockchain can be leveraged to drive better supply chain solutions. The most important foundations of logistics are traceability and transparency. Blockchain optimizes business transactions and trading relationships with robustly secure business networks—both locally and globally. The result is an equal visibility of activities revealing where assets are at any point in time, who owns them and what condition they're in.

Michael Visentine, Principal Consultant for Blockchain-enabled Supply Chain Management, New Paradigm Advisors,

Mant Hawkins, President, Possibilitarians, LLC,

Ali Agha, Founder & Chief Executive Officer, Olypsis Technologies

2:30 PM – 3:15 PM

How David's Bridal Leverages Distributed Order Management as the 'Omni' in Omnichannel

As customer expectation continue to skyrocket and store-based fulfillment strategies multiply, retailers are caught in a world that demands ever-smaller fulfillment windows and costs. Learn how to not just survive but thrive in the world of connected commerce from David's Bridal, who uses distributed order management to ensure their inventory picture is accurate, complete and dependable when they make promises to their customers. Because when the most important day in their customer's life is on the line, David's Bridal has to execute flawlessly.

Diane Garforth, Senior Director, Supply Chain Systems & Operations, David's Bridal

Chris Shaw, Director, Product Marketing, Manhattan Associates

2:30 PM – 3:15 PM
Breakout Session

Master's Student Session: Using Data Analytics to Optimize Returns at Abercrombie & Fitch

As retailers embrace omni-channel supply chain strategies, their access to a broadened pool of customers grows. But so grows the complexity of managing the omni-channel reverse logistics and returns management process. In the fall of 2018, a graduate student research team at Auburn University, under the direction of Dr. Glenn Richey, partnered with Abercrombie and Fitch, the Auburn Center for Supply Chain Innovation, and RILA to examine this issue. The students spent the semester immersed in the world of omni-channel reverse logistics problems and solutions. The team analyzed the industry environment, competitor practices, and over 25k+ customer comments to uncover eight key areas of concern for retailers. This not to be missed presentation will detail those eight critical areas of concern and cover solutions suggested by the research team and the partner organizations.

Kristen Kravitz, Director, Supply Chain, Abercrombie & Fitch

2:30 PM – 3:15 PM

Getting Ready for the Future of Freight Today: Capitalizing on New Technologies

New technologies and underlying supply chain data can help retailers create a more efficient, transparent, and integrated supply chain network. Bill Kammerer, Retail Supply Chain Principal, Deloitte, will present a new vision for the future of freight. Kelly Killingsworth, VP of Transportation, Walmart, will share how Walmart is bringing this new vision to life by capitalizing on new technologies to get greater visibility on freight and create a connected driver experience. Together, Kelly and Bill will discuss key transportation trends, what is really happening, and provide some takeaways that retailers can apply today.

Educational Session Room Sponsored by Yusen Logistics

Insight Session: Patagonia

Patagonia, the outdoor apparel company, is known for quality gear and its commitment to environmental protection, and it is increasingly recognized for providing its employees family support policies that are among the best of any company in the United States. These policies, including integrated, on-site child care, family emergency leave, maternity and paternity leave, align with the company's higher purpose of "doing no unnecessary harm" to our planet and to our society, and also create significant business value. Because of business value alone, Patagonia believes all companies can and should adopt family support policies. To that end, Dean Carter, Patagonia's global head of HR, Legal, and Finance Shared Services, will give a multi-media presentation that will inspire business, government and civil society leaders to take action on this very important topic.

10:30 AM – 11:15 AM **Predicting What's Next in Your Retail Supply Chain**

Breakout Session

Learn how Artificial Intelligence and Machine Learning enhanced retail solutions enable real-time decision-making that unlocks more autonomous, profitable business decisions throughout your retail supply chain. A recent retail survey found that 53% of retailers will be investing in AI and ML over the next 18 months. If you're just starting your AI & ML journey, come learn where to begin to get the most return in your supply chain. Understand how AI solutions can analyze data to draw out valuable insights, automate core processes like planning/ pricing /replenishment, improve product availability, and increase profitability.

JoAnn Martin, Vice President, Industry Strategies, JDA Software Inc.,

Colin Yankee, Senior Vice President, Supply Chain, Tractor Supply Company,

Robert McQuaig, Vice President, Operational Excellence, GEODIS

10:30 AM – 12:00 PM **Caution - Dangerous Curves Ahead: Domestic Transportation Outlook (Panel & Roundtable)**

Breakout Session

2018 was a challenging year for both domestic and import shippers in the retail industry with unexpected cost and service challenges. A growing economy, continued challenges in hiring and keeping drivers, and the long-awaited implementation of ELDs converged to create the conditions for significantly constrained market capacity and rising freight rates. On the international front, an unlucky combination of U.S. government trade actions coupled with carrier capacity deletions succeeded in creating an advantageous pricing scenario for carriers, and a free-for-all by shippers to secure needed space in peak. The landscape in 2019 and beyond looks no less challenging and retailers must look beyond the usual paradigms to ensure their supply chains can meet the needs of the business, deliver service, and better predict cost impacts. 2018 was a bare-knuckled ride for retail transportation practitioners with challenging conditions and steep inclines. While we may have reached the top of the hill there may still be hazards to be navigate. This session will review and discuss some of the factors driving both challenges and changes in the transportation market, and provide a forum for exploring how retailers are reacting and adapting to market pressures. An interactive discussion will allow for the sharing of points of view, ideas and solutions to some of the most pressing transportation challenges and opportunities faced by retail shippers.

Transforming Distribution & Fulfillment at Office Depot with Collaborative Robotics

Changing customer buying patterns, inventory optimization needs across the multi-echelons of a supply chain, and the ever-changing dynamics of the labor market today are driving organizations to invest in the most recent advancements in robotic technologies for their distribution and fulfillment operations. To meet strategic goals the team at Office Depot needed to transform distribution and fulfillment operations to:

- Respond quickly to how and where

orders are fulfilled • Manage regular fluctuations between multi-line and single-line orders • Easily on-board new pick/pack/ship associates In this session you will learn how Office Depot partnered with 6 River Systems to transform their distribution and fulfillment operations with collaborative robotics.

Bob Abbondanza, Senior Director, Supply Chain Engineering & Network Design, Office Depot
Jerome Dubois, Co-Founder & Co-Chief Executive Officer, 6 River Systems

1:15 PM – 2:00 PM

Breakout Session

Deep Dive Data Analytics

Panelists will share practical case studies that can benefit any consumer product organization, demonstrating how data analytics helped identify gaps inherent in traditional ERP supply chain planning modules to perform On Time In Full (OTIF) and fewer chargebacks. This session will cover advanced topics such as predictive analytics and how new technology has delivered cost savings to shippers by leveraging data from multiple sources in the supply chain, powerful algorithms and artificial intelligence to predict deliveries with a rate of accuracy of nearly 100%. Retailers will learn how to identify what data can accurately be trusted, how to implement changes, and where data is headed for the future incorporating AI, Machine Learning and IoT (Internet of Things).

Peter Smith, Executive Vice President, Global Supply Chain, Carter's

Adam Compain, Chief Executive Officer, ClearMetal

1:15 PM – 2:00 PM

How Your Stores Can Beat Amazon at its Own Game

Omnichannel retailers are challenged to manage multiple sources of demand when customers expect everything in stock all the time, whether they are in the store at 1 p.m. or online at 1 a.m. Customers have more ways to interact including buy online and return in store, buy online and ship from store, buy online and pickup in store – placing enormous strain on inventories and demand forecasting. This leaves retailers questioning how to better optimize inventories, determine fulfillment source, and more accurately predict demand. To beat this real-time “last mile” supply chain challenge, this session will explore how retailers can leverage advanced analytics to use their stores and distribution centers as one unified distribution center to achieve massive margin gains.

Marc Chretien, Senior Director, eCommerce, Aldo Group

Vivek Farias, Chief Technology Officer & Co-Founder, Celect

General Session
- 3:45 PM – 4:30 PM **Authentic Leadership: Inspire Others and Build Trust by Being Yourself**
General Session
Leadership can be challenging, especially in today's fast-paced, globalized world. Leaders with a strong sense of emotional intelligence (EQ), a willingness to be courageous and vulnerable, and the capacity to inspire others in a genuine way, have a distinct advantage. This session, which is based on the core principles of Mike Robbins' work and books, delves into practical ways for leaders to enhance their impact and effectiveness by leading with authenticity.

Other
Please join us for breakfast and networking before the day begins.
Sponsored by Locus
- 8:30 AM – 9:15 AM **The Future of Fulfillment – Faster, Slower, Reverse, Repeat**
General Session
Many Retailers believe that meeting consumer needs for shorter order fulfillment lead times is the key capability to ensure future success. This session articulates three more urgent priorities – new forecasting capabilities to predict how, when and where consumers want their orders fulfilled, a new set of consumer incentives to effectively slow down their desire for fast fulfillment and the development of a circular rather than linear supply chain.

Tom Enright, Vice President, Retail Supply Chain Research, Gartner

9:15 AM – 10:15 AM

General Session

Closing Keynote: Moving to Great

Think of when you were at your best. Maybe you felt confident. Or powerful. Or passionate about life. What if you could be at your best more often? What if you could unleash the same energy again and again? "Most of us get glimpses of the greatness within us," says leadership expert and former NFL wide receiver Eric Boles, "but these glimpses are few and far between." How can we unleash our best, more of the time? Deepen your understanding of the fundamentals of personal mastery and change management, and learn how leaders emphasize personal accountability in overcoming the natural, human resistance to change. Leave with a renewed sense of commitment and the tools to seek out and implement new approaches to tackling both personal and organizational challenges.

Eric Boles, President, The Game Changers
