

CSU Professional Education DevOps Bootcamp

Study part-time to get the in-demand DevOps skills you need to launch your tech career, plus job search support to actually get hired.

According to research from Lightcast™, the national demand for development operations is projected to grow 25.5% over the next 10 years.

High-tech businesses including **The Buckle**, **Charter Communications**, and **Dish Network** are actively seeking DevOps professionals as the global growth in technology continues to evolve. Graduates of the CSU Professional Education DevOps Bootcamp will have the skills to qualify for these jobs and more.

What You'll Learn

- Design, plan, and administrate enterprise systems
- Transform on-premise IT systems into cloud ready architectures
- Create scalable applications and systems in AWS with automation
- Use AWS operational and architecture best practices for common services
- Apply security hardening best practices for applications and systems
- Setup and apply end-to-end Software Development Lifecycles (SDLC) with common tools and practices
