Notes and caveats	<p>All data is drawn from government survey results and is subject to any associated limitations or distortions present in the source data.</p> <p>Literacy was measured as the ability to read and write in any language.</p> <p>Languages with population shares less than 0.01% or under 1,000 people (whichever is greater) have been aggregated into the "Other" category.</p> <p>All decimal values have been rounded to a maximum of 3 decimal places. As a result language shares may not total 100%.</p>
Copyright and terms of use	<p>Empty values represent non-existent data and should not be treated as zero values.</p> <p>Data is available under an Attribution NonCommercial ShareAlike 4.0 International license (CC BY NC SA 4.0)</p> <p>You are free to share and adapt the data subject to requirements for attribution and non commercial use. Any derivative work must be licensed under the same license as the original data.</p> <p>https://creativecommons.org/licenses/by-nc-sa/4.0/.</p>

<u>Field heading</u>	<u>HXL code</u>	<u>Description</u>
----------------------	-----------------	--------------------

admin2_name	#adm2+name	Name of administrative unit
admin2_pcode	#adm2+code	Unique geographic identification code
admin1_name	#adm1+name	Name of administrative unit
admin1_pcode	#adm1+code	Unique geographic identification code
admin0_name	#country+name	Name of administrative unit
admin0_pcode	#country+code	Unique geographic identification code
number_of_named_languages	#indicator+lang+num	Number of named (non Other) languages reported in area (excluding those with less than 0.1 coverage in this area)
main_language	#indicator+lang+main	Name of reported language with highest attributed population in area
main_language_share	#indicator+lang+main+pct	Percentage share of population in area attributed to main language
..
Language fields	#indicator+lang+pct+iso639 3_ABC	communication in their households
Other language	#indicator+lang+pct+iso639 3_unknown	communication in their households is not a named language
..
illiteracy_all	#population+total+pct+illiterate+age6up	Percentage of population aged 6 and over who are illiterate
illiteracy_male	#population+m+pct+illiterate+age6up	Percentage of male population aged 6 and over who are illiterate
illiteracy_female	#population+f+pct+illiterate+age6up	Percentage of female population aged 6 and over who are illiterate
pop_total	#population+total	Number of total population
pop_male	#population+m	Number of male population
pop_female	#population+f	Number of female population
language_data_yn	#meta+data+bool	record
data_confidence	#meta+confidence	Assessment of data quality (high/medium/low)
notes	#meta+text	Notes and clarifications on data

Data confidence desc **Examples**

High	Data from well regarded government census or other specialist organisation.
Medium	Data from quality source but without clear methodology, or inverse.
Low	Data known to be erroneous, or based on non statistical or imprecise data.
Factors increasing con	Data is corroborated. Data can be directly applied to administrative areas without aggregation or manipulation.
Factors decreasing cor	Data is disputed. Data requires transformation that may affect accuracy, for example combining admin 2 data to form admin 1 dat
