Notes and caveats	<p>All data is drawn from government survey results and is subject to any associated limitations or distortions present in the source data.</p> <p>All decimal values have been rounded to a maximum of 3 decimal places. As a result language shares may not total 100%.</p> <p>Empty values represent non-existent data and should not be treated as zero values.</p>

Data confidence

descriptions

Examples

High	Data from well regarded government census or other specialist organisation.
Medium	Data from quality source but without clear methodology or inverse.
Low	Data known to be erroneous or based on non-statistical or imprecise data.
Factors increasing	Data is corroborated. Data can be directly applied to administrative areas without aggregation or manipulation.
Factors decreasing confidence	Data is disputed. Data requires transformation that may affect accuracy for example combining admin 2 data to form admin 1 data.
