

The Foundry Roundup

JULY, 1954

Ed's Corner

IT'S ALWAYS been my belief that a fellow can do anything he *thinks* he can. A man by the name of Darwin P. Kingsley says it in much better words than I can. He says: "There are no limitations as to what you can do except the limitations in your own mind as to what you cannot do. Don't think you cannot. Think you can."

All through history, the men and women who have done important things and who have got for themselves the things they wanted, were the very rare few who said "it *can* be done" when most other people said "it *can't*."

We all know that when Columbus set out on his first voyage to cross the Atlantic, most people thought that was the last they would ever hear of him or his crew.

When the Wright brothers were building their first plane, most folks thought they would either break their necks or end up the laughing stock of

the country.

And when Henry Ford announced he would build a car that anybody could afford to buy, most others in the auto industry said it was impossible.

But Columbus did even more than cross the ocean: he opened up a new world. The Wright brothers didn't break their necks: they founded a vast industry. And Henry Ford didn't go broke. He revolutionized the auto industry and created a higher standard of living for the worker which indirectly stimulated the development of American industry as a whole.

It is most fortunate that we have some people in our company who are "can do" thinking people. If we didn't, our company would not be where it is today. At the same time, we have too many others who are "can't do" people whenever an idea is presented which calls for effort, courage, strenuous creative thinking and persistence.

Of course, we aren't the only company in which these people are found. Negative-minded folks are in every company, every organization, and in

the field of government.

It may be fear of embarrassment that prompts so many people to be "can't do's." They may fear that somebody will say "I told you so" if something is undertaken but not accomplished.

What does it matter if somebody *gloats*? If he is that kind of person his opinion isn't worth very much. The person who tries at least has the gumption that the other fellow doesn't have.

Perhaps, again, it is plain garden variety laziness that handicaps the "can't do's." Finding the way to do a difficult thing generally involves hard work and great mental activity.

I've learned down through the years that a person who says "I can" generally *does*.

We watch most carefully to discover the "can do" people in our organization. They are the people who will make Lufkin Foundry and Machine Company progress—and they are the people who will go places with the company.

Edward P. Trout

Some visitors were in Kentucky and decided to go to the hills and see how the mountaineers lived. They came to a farm where a man was lying on the front porch smoking a corn cob pipe and a woman was digging in a plot of land.

They asked, "Isn't that hard work for your wife?"

He said, "Yep, but we work in shifts."

"Oh, I see, when she gets tired, you take over?"

"Naw," he answered slowly, "when she gets tired out in the garden, she shifts to the housework."

Irate doctor: "That check you gave me came back."

Patient: "So did my arthritis."

Hints For Taking Winning Snapshots

MAYBE you've already taken your vacation and don't need any advice on how to make snapshots. But then, maybe you aren't happy with the way your pictures turned out.

The Vacation-Photo Contest, sponsored by THE FOUNDRY ROUNDUP, does not necessarily mean that the photograph you enter must be taken while you are on vacation. The picture can be made any time between January 1, 1954, and September 1, 1954. But only one picture in each of two classes can be entered by an employee. So make sure that the picture you submit is your best.

On this page are some photographs intended to be helpful to you. They will give you ideas about subjects for pictures.

As mentioned before, you do not have to make your picture while on vacation away from home. The picture can be taken of the children romping in the yard, taking a shower bath, or giving their dog a bath. It might be taken of the family on a Saturday afternoon picnic, or enjoying a sandlot baseball game, or at a swimming pool or lakeside. Fishing and boating pictures always lend themselves to pleasant, unposed pictures.

By all means, don't pose your subjects stiffly in front of the camera. Let them appear natural and as unaware of the camera as is at all possible. The more candid your photograph, the more chance you have of winning a prize.

Three cash prizes will be awarded. The first prize is \$15; second, \$10; and third, \$5.

None of the pictures entered in the contest will be returned. Judges of the contest are Vice-President E. P. Trout, Company Photographer R. M. Rosser, and the Editor.

The rules of the contest are as follows:

1. You can enter photographs in two classes:
 - a. Scenic pictures taken during your vacation trip.
 - b. Candid camera snapshots of you or members of your family while on vacation.
2. The picture submitted must have been taken after January 1, 1954, and before September 1, 1954.
3. The picture must have been taken by an employee of the

WHAT MAN wouldn't be proud to have his picture taken in this setting?

Lufkin Foundry and Machine Company or a member of his or her immediate family.

4. Only one picture in each class (a. and b. above) of any size, black and white glossy, may be entered by an employee.
5. The name of the employee sub-

mitting the picture and the name of the person who took the picture, together with other information as to the time and place, date, etc., should be written on a separate sheet of paper and submitted with the picture being entered.

MIRROR LAKE in Yosemite Valley provides the background for this shot.

PICNIC SCENES always make good opportunities for snapshots.

John Temple

IDA TEMPLE and one-month-old John Benjamin Temple, Jr.

WHY buy a needed article when you can make it yourself—better and cheaper? This seems to be the philosophy of one Lufkin Foundry and Machine Company employee—J. B. Temple.

John has recently completed a four-wheel tractor that any man who loves to work the soil by machine would be happy to own.

His machine came into being like so many other modern inventions of our time—a matter of necessity. He

owned a two-wheel tractor, but it was too slow. Too slow for John's 34 acres.

The Temple family has a fruit tree and berry orchard about 300 yards from the house. John says he could walk faster than his two-wheeler could carry him to the orchard.

"I needed something that I could hop on and run down there for awhile each morning, and accomplish something each afternoon after work," John explained.

And so he built his own tractor.

The machine has a Crosley running gear and front wheels. It operates on a six horsepower Wisconsin motor. On the front end of the Crosley transmission, John mounted an 8½-inch pulley. There's a 3-inch pulley on the motor which is equipped with an automatic clutch. Regular 600-16 car wheels had to be adapted to fit the Crosley hub.

The tractor will make between 15 and 20 miles per hour on the open road. It pulls a 10-inch turning plow or a 46-inch cultivator or pull a disk with six 16-inch disk blades.

It also will pull a lightly loaded two-wheel trailer. And John pulls his power lawn mower behind it to keep his large lawn well mowed. He plans to put a mower attachment on the front of the tractor sometime soon.

He says that the tractor cuts his mowing time down about two-thirds. But it also creates a problem.

"The only thing my wife and I disagree on are those flowers and shrubs. If it weren't for them, I could really fly through that mowing job. But I will have to admit the place looks nice with those running rose bushes around," he added with a smile.

But John has something else besides a self-made tractor of which to be proud. First, there's his 10-year-old daughter, Jeanette. And Jeanette isn't wasting any time getting her education. When school begins next September, she'll enter the seventh grade. Most 10-year-olds will be beginning the fifth grade.

The second bundle of love in John's life is six-weeks old John Benjamin Temple, Jr.

"I thought if we had a boy this time, I'd name him John after me and Wesley after my wife's father. But when he arrived, he looked so much like me that I just had to add that Junior," he explained with a grin.

John is a former baker, having been in a partnership bakery in Laredo until May, 1950.

He said that owning one's own business was fine in some ways but it certainly had its disadvantages too.

JEANETTE rides proudly along beside her Daddy as he operates his self-made tractor.

THEIR big yard is an easy thing to keep pretty now that the mower is pulled behind the tractor.

Builds His Own Tractor

"There was always something to worry about," he pointed out. "One day you worried whether or not you would get that shipment of shortening, and the next day you'd be worrying about sugar. The hours were long and hard. Sure, we made good money, but I learned that money isn't everything. My wife was working in the bakery too. I decided if we ever were going to have a home with children and family life, I'd have to give up

the business and go to work for the other fellow.

"I am a native of Angelina County, so I suggested that we move to East Texas. We did, and we haven't been sorry. Now I work just eight hours each day with Saturday's off. I have leisure time to spend without worrying about my job."

John was employed in the Material Control department in January, 1951.

He estimates that he spent between

25 and 30 hours building his tractor, and he has about \$200 invested in it. He says there are no tractors on the market under \$400, and that a Cub tractor somewhat similar to his sells for around \$1500.

He had a lot of fun working on his project, he reports. His hobby has always been to build things—mechanical things, if necessary—to better the situation.

He's just a natural builder, his wife, Ida, adds. We believe she's right.

A FEW minutes each morning in this tractor will keep his garden clean and growing.

JOHN says he has about \$200 invested in this most useful tool.

A farmer had a son at college. At the end of the first year the son came home in high feather. He stood second in his class.

"Second?" said his father. "Second! Why didn't you stand first? What do you think I'm sending you to college for?"

The young man returned for his second year, determined to win first place. At the end of the year he returned home and announced his success to his father.

The father looked at him for a few minutes in silence, then shrugged his shoulders, and said: "At the head of

the class, you? Well it can't be much of a college after all!"

A small girl from the city was making her first visit to the country and was fascinated to see cows milked. Next morning, the hired man came running with news that one of the cows had been stolen.

"Don't worry," piped the youngster, "she won't go far. We drained her crankcase last night."

An elderly woman had been to hear her nephew preach for the first time,

and she thought it a very poor sermon.

Later that day she asked: "James, why did you enter the ministry?"

"Because I was called," he answered.

"James," said the aunt, looking solemnly at him, "are you sure it wasn't some other noise you heard?"

Michael had taken a strong dislike to kindergarten. All persuasion failed and finally his mother told him firmly that he would have to go. "All right," retorted Michael, "if you want me to grow up into a danged bead-stringer, I'll go."

Kolb Boys Have Many Pets

LOTS of kids have dogs and cats for pets, but not every little boy can boast the ownership of a pet coon.

But Billy, The Coon, who is only seven weeks old, is king at the Jewel Kolb home on the Old Nacogdoches Highway. As his playmates, he has two youngsters, a white rabbit, and—believe it or not—a coon hound. Only the hound is just three months old. Their friendship may split up when the hound gets a few more months behind him.

The two youngsters, Dean, 6, and Donald, 3, became the proud owners of Billy, The Coon, when he was only about two weeks old. Their Dad found him with three sisters or brothers (as the case may be) while he was on a hunt. Jewel took Billy home, and the kids adopted him immediately.

How to feed the new arrival posed somewhat of a problem, but a doll's bottle answered the need. And the two boys must have been pretty good at feeding with the bottle, because Billy is plenty healthy today.

Like people, Billy has his favorite. That's the youngest little Kolb, Donald. Wherever Donald goes, Billy follows. But Dean doesn't seem to mind if Billy gives all his attention to Donald. Dean has Sue, the hound. And they make

quite a pair.

Course Billy's favorite dish happens to be a favorite with Sue, too. That is, both prefer bacon skins. The two animals never get in a mix-up over who gets the skins, because their living quarters are well separated. But two little boys often engage in a rather heated discussion about which pet should get the piece of bacon rind at hand.

Bunny, the white rabbit, who's been around for more than two years, isn't perturbed at all over the bacon rind arguments. He'll settle for rabbit food deluxe bought at the nearest store.

"And you'd be surprised how quickly a rabbit can do away with a 25-pound sack of food," Jewel declared.

Jewel has always been interested in coon hunting with dogs. At various times in the past, he's had various numbers of hounds. Currently, he has only two, but his brother owns three hounds, and together they have quite a time of it.

When asked what the next pet would be, Doris Kolb, wife and mother to the Kolb menfolks, answered that the boys were crazy for a goat.

"Just any day now I expect to see Jewel drive up with a goat," she added with a laugh.

WHAT more could two boys want? A coon and a Hound dog.

Jewel works in the Machine Shop on the second shift. He first came to work for Lufkin Foundry and Machine Company in July, 1951. In July, 1953, he was laid off, but was re-employed in March of this year.

DONALD holds Sue, the Hound, while Billy, the Coon comes down the tree.

DEAN doesn't seem too happy about Sue's nearness to Billy.

OSCAR and his mower keep our grounds clean and beautiful.

Oscar Dixon has helped to make a real change in the looks of the place around here. His job is to keep our lawns in tip-top shape—and that's just what he is doing. Only a few short months ago, our grass was stringy and withered looking. Our shrubbery was dingy and sick. Today, we have a beautiful lawn of thick, rich-looking St. Augustine grass, and the flowers and evergreens are as beautiful and verdant as anyone could want.

JEWELL holds Billy in tow while Bunny rests beside him.

KAREN DENISE BOZEMAN

In case you've looked and looked at the picture of a sweet little girl on this page and wondered whether you were looking at a real live baby or some doll, we'll answer the question. She's real—very real, or so Karl Bozeman of the Material Control, her daddy, assures us. She's Karen Denise Bozeman, 11 months old. She's also the granddaughter of Dave Hayes of the Machine Shop. She'll celebrate her first birthday August 1.

BILL KELLEY operates his new Match & Merryweather cutoff machine in the Lathe Shop. This modern tool cuts round stock to the correct length. This is another example of how modern tools have lightened and perfected work today.

Let's Have An Outdoor Supper

OUTDOOR eating has zoomed to popularity all over the United States, and from now through the Labor Day weekend, Americans will be spending the greater part of their time outdoors.

And it's the outdoors that make it possible for the men to shine with their cooking. Menfolks think—and they probably are right—that no woman can charcoal broil a steak like a man.

But the broiling itself isn't all that counts. A good sauce is most essential to make the meal perfect. A well seasoned, pungent southern hot pepper sauce, Tabasco, is needed to bring out the flavor and add a special touch to the steak. Why not try it on your next night out—in the yard?

Tabasco Steak Sauce

- 1 clove garlic
- ½ cup salad oil
- 3 tablespoons lime juice
- ½ teaspoon Tabasco
- ¼ teaspoon salt

If desired, put garlic to soak in the oil the day before the cook-out. Combine all ingredients in small saucepan, and mix well. Brush over steak and broil over hot coals. Makes 2/3 cup sauce.

AND just in case you're hungry for some barbecued chicken, try this recipe.

Tabasco Barbecued Chicken

- 2 tablespoons butter or margarine
- ½ cup catsup
- Juice of 1 lime
- ⅛ teaspoon salt
- ¼ teaspoon Tabasco

To make sauce, melt butter in small saucepan. Add remaining ingredients and mix well. Use chickens weighing approximately 2 pounds dressed weight. Have butcher split chicken in half and grill over a bed of coals, placing skin side up to cook inside first, then turn. Baste with sauce frequently. Whole chickens may be barbecued on a spit, turning and basting frequently with the sauce. Makes sauce enough for two chickens.

SHOULD you turn thumbs down on both beef and chicken, how about

THERE'S nothing to compare with a sizzling charcoal broiled steak out under the shade of your favorite tree.

lamb? If you're fond of lamb, here's something good to try.

Lamb Kebabs in Lime Marinade

- 2 pounds boned lamb shoulder
- ½ cup salad oil
- ¼ cup lime juice
- 1 teaspoon dry mustard
- ¼ teaspoon thyme
- 1 bay leaf
- ⅛ teaspoon basil
- ⅛ teaspoon rosemary
- ½ teaspoon salt
- ⅛ teaspoon pepper
- 2 medium onions, sliced
- 1 medium onion, chopped
- 1 green pepper, sliced
- 1 4-ounce can mushroom

Have lamb shoulder cut in 1½-inch cubes. Blend salad oil, lime juice, seasonings and chopped onion in bowl. Add lamb cubes; let stand 5 hours or overnight. Drain. Cut onions in ¼-inch slices and green pepper in ¼-inch rings. Alternate cubes of lamb on skewer with onion slice, mushroom, pepper rings; repeat, then end with

lamb cube. Preheat broiler 10 minutes; place kebabs on rack 3 inches from heat, broil about 20 minutes, turning once. Serves six.

"What have I got to be happy about? I can't pay my bills."

"Well, then be happy you're not one of your creditors."

Traffic Cop (stopping motorist)
"Mister, your wife fell out of the car three blocks back."

Motorist: "Thank heavens! I thought I'd gone stone deaf."

"Will you tell the court what passed between you and your wife during the quarrel?" the judge asked.

"Yes, sir. A flat iron, a rolling pin, six plates and a teakettle."

Small boy approaching father with bad report card: "Here's my report card, and I'm tired of watching television anyway."

After getting no answer as to the identification of St. Matthew and St. Mark, the Sunday School teacher said, "Surely, someone must remember who Peter was?"

A tiny voice spoke up: "I fink he was a wabbit."

"Want to buy a ticket in a raffle we're having for a young widow?"

"Nope. If I won, my wife wouldn't let me keep her."

Tramp (to fat lady): "Lady, please have mercy on me. I havent eaten in four days."

Lady of the House: My word, I certainly wish I had your will power."

Foreman: "And how long have you been working here?"

Machinist: "Ever since I saw you coming this direction."

It was an eight-year-old's first trip to a movie, and he didn't think much of the film. "Daddy," yawned the kid, "change the channel!"

A man was perched atop a building in a large southern city and it looked like an attempted suicide. A policeman made his way to the roof to persuade him not to jump.

"Think of your maw and family," pleaded the cop.

"Ain't got any."

"Well, think of your girl friend."

"I hate women!"

"All right," said the cop des- perately, "think of Robert E. Lee."

"Who's he?"

"Jump, you derved Yankee!"

An Easterner was being driven by a rancher over a blistering and almost barren stretch of West Texas when a large brightly-colored bird scurried across the road in front of them. The visitor had never seen a bird like that and asked what it was.

"That's a bird of paradise," said the rancher.

"Pretty long way from home, isn't he?" remarked the visitor.

Inviting a friend to his wedding anniversary, an Irishman explained: "We're on the 7th floor, Apt. D. Just touch the button with your elbow."

"And why should I use my elbow?"

"Well, for heaven's sake!" said the exasperated Irishman, "You're not coming empty-handed, are you?"

Protect the birds: the doves bring peace and the storks bring exemp- tions.

A couple of Scottish ladies were walking along the road and one was jingling something in her purse. Her friend asked, "Jane, you must have plenty of money in there."

"Oh, no," replied Jane, "that's my husband's false teeth . . . there's been too much eating between meals in our house."

Sign in window of Riverside's laun- derette: "Ladies who care to drive by and drop off their clothes will receive prompt and courteous attention."

A minister advertised for a handy man and the next morning a neat young man rang the bell.

Minister: "Can you start the fire and have breakfast ready by 7 a.m.?"

Young Man: "I think I can."

Minister: "Can you polish all the silver, wash the dishes, and keep the house tidy?"

Young Man: "I guess so."

Minister: "Can you mow the lawn, fix the plumbing and see that every- thing is shipshape?"

Young Man: "Look, Reverend, I came here to see about getting mar- ried, but if it's going to be anything like that, you can count me out right now."

First Old Maid: "What kind of time did you have in New York?"

Second Old Maid: "Eastern Stand- ard Time!"

Joe (greeting friend he hadn't seen for some time): "Well, Jim, who are you working for now?"

Jim: "Same people—the wife and three kids."

"Two!" shouted the pint-sized um- pire.

"Two what?" snarled the big catcher.

"Yeah, two what?" echoed the equally large batter.

"Too close to tell," said the umpire.

A Lancashire woman, wishing to lose weight, had been put on a diet by her doctor. One day a friend dropped in and was amazed to behold her tackling with great appetite a large potato-pie.

"I thought you were on a diet!" exclaimed the visitor.

"Aye, so I am," was the reply. "But I've had me diet, and now I'm havin' me dinner."

Young man to draft board: "But you can't turn me down! I've already proposed to three girls, told my boss what I think of him, and sold my car!"

THE JETSTREAM IS A RECENTLY DISCOVERED AERIAL RIVER, THIN AS A SHEET, WHICH RACES AROUND THE WORLD AT SPEEDS UP TO 300 MILES AN HOUR. JET PILOTS USE IT TO ADD CRUISING SPEED TO THEIR PLANES.

BY 1960 MANAGEMENT EXPERTS ESTIMATE THERE WILL BE 500,000 MORE FOREMEN IN THIS COUNTRY THAN THERE ARE TODAY. THERE ARE NOW 2,500,000!

There was a lady at the zoo who reached over and tickled the kangaroo, who leaped a 12 foot fence and escaped. The frantic zoo keeper asked the lady what she'd done. After she explained, the keeper said, "Well, you'd better tickle me in the same place because I've got to catch the kangaroo."

Young and inexperienced father (looking at triplets the nurse had just brought out), "We'll take the one in the middle."

Children are often spoiled because you can't spank their grandmothers.
