One county office candidate who had announced earlier has withdrawn from the race. That is County Judge W. G. Brewton, running for his second term. Judge Brewton dropped out of the race for personal reasons, he said. His statement can be found elsewhere in this issue of the Star.

Names which will be seen on the Sabine County ballots in July and the offices they are running for are, according to J. H. Minton:

Charts, in the Airman's Guide and the Texas Airport Directory. The Commission also assists in getting Federal Aid on eligible items for the Airstrip if all CAA requirements are met.

The Aviation Committee is at present investigating possibilities for location of the Airstrip. A strip of land, 3000 feet or longer, will be necessary for an all-weather runway, properly drained, 75 feet wide, into the prevailing wind, generally north and south. One thousand feet clearance at each end is required, and a probable 550 feet or more width is to be desired in allowance for future building areas, hangars, fueling, sanitary facilities and telephones. The land should be near a road, or highway for easy accessibility.

According to a recent letter received by Mayor Sanders, some members of the Texas Aeronautics Commission will arrive in Pineland within the next three or four weeks to begin assisting the city with airstrip construction. Potential users of the Airstrip will be the 7,000 civil aircraft based in Texas or any of the 82,000 aircraft in the United States that may fly to Texas for business or pleasure.

Judge Brewton Withdraws from Co. Judge Race

County Judge W. G. Brewton has withdrawn his name from the race for re-election to that office. Judge Brewton says that he has decided on this course for personal reasons.

In withdrawing, Judge Brewton says, "For personal reasons I have decided to not make the race for the office of County Judge in the July primary. I have enjoyed the three and one half years that I have acted as your County Judge. I want to thank the Commissioners Court and the people of the county for their cooperation in making it possible to get our county on a pay as you go cash basis.

"Forgive me for my mistakes and let us all go ahead and pull for the people and anything that is good for our country. Thanks a million times and may God bless you."

WE HONOR ANY BURIAL POLICY

10% OF COST

The lumber used in the construction of an average home represents less than 10% of the total cost...yet the entire structure depends upon it. Can any home owner or builder afford therefore to use any lumber less than the best?

The most important part of any house is its structural framework. This is the framing lumber, hidden from view once the house is completed. It must give the house its sup-port . . . its shape and its strength. On its quality depends the efficiency of all the house functions . . . the life of the home itself. No thinking man should allow himself to be persuaded to cheapen the structure of his home with so little to gain.

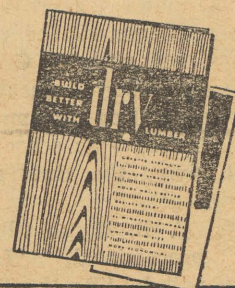

For his own protection, the prospective home owner should pay particular attention to the quality of this fram-ing lumber. One way to get this protection is to ask your lumber dealer for Texas Grown, KILN DRIED, SPB Grade-Marked lumber from Southern Pine Lumber Company.
