

Healthcare Coalition Management

A COLLABORATIVE PLANNING + RESPONSE TOOL

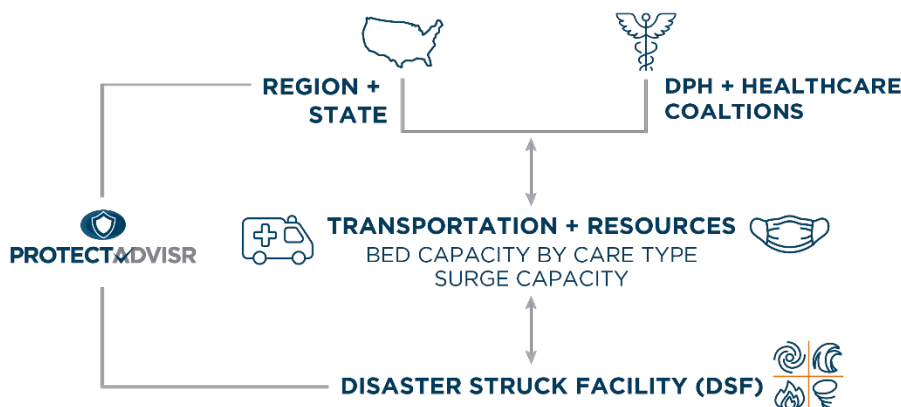

Through ProtectAdvisr, Healthcare Coalition (HCC) partners can rapidly share information and resources when preparing for or responding to a local or regional emergency through our proven technology platform. The Healthcare Coalition solution facilitates planning, response and reporting for healthcare systems common operating picture, resource requests and coalition coordination.

Developed specifically for healthcare, the HCC solution provides detailed information to support response activities and Federal reporting requirements. The solution supports coalition groups with customizable datasets that can be tailored to your specific needs while also encompassing any on-demand reporting requirements.

Streamlines Real-Time Reporting For An Effective Response

Our HCC Management solution provides members an easy-to-navigate reporting platform that prompts questions based on the facility type and any essential details for the event.

- + Members can report directly from their mobile devices in the same easy-to-use platform as the desktop version.
- + Coalition administrators and command centers can review member reporting in real-time to coordinate effective responses

ProtectAdvisr™

ProtectAdvisr Healthcare Coalition Management helps ensure safe and effective care for healthcare patients and residents, even during times of crisis.

At times, the impacts and the responses necessary to ensure patient/resident safety exceed the abilities and resources of a single healthcare facility. Often the best sources of this support come from other healthcare facilities in the area.

PIONEERING HCCs AND MUTUAL AID PROGRAM DEVELOPMENT SINCE 1982

We assist in developing programs for states, regions, counties, and localities to coordinate whole community preparedness through the lens of healthcare by coordinating and collaborating with local emergency operations centers, response teams and first responders.

How Can We Help?
