

## Inspections Management

### IMPROVING CMS COMPLIANCE + SAFETY FOR PATIENTS AND STAFF

Manage the built environment, including life safety assessments and door inspection processes, aggregate data across multiple sites, and trend/track deficiency remediation costs, issues and strategies. Integrated planning, reporting and performance metrics for life safety and asset inspections offer significant efficiencies.

#### Customizable For Improved Coordination and Control

Our Inspections Management Module provides customizable, user-friendly, web-based technology for hospitals, ambulatory and business occupancies, long-term care facilities, or entire healthcare systems with a central hub for reporting, communication, coordination and accreditation/licensure compliance.

-  **Coordination**  
Align life safety programs across the healthcare system, from location to region/division and national.
-  **Continuous Readiness**  
Maintain continuous accreditation readiness to support the built environment.
-  **Compliance Management**  
Use dashboards and summaries of trends and metrics for accreditation and licensure with risk mitigation strategies.
-  **Cost Savings**  
Proactively address issues and resolve them while mitigating the risk of citations and protecting business continuity.
-  **Control**  
Configure access to information and data.

## ProtectAdvisr™

**ProtectAdvisr Inspections Management** addresses compliance while bridging the gaps and cross-referencing requirements between CMS Regulations (K-Tags), Life Safety accreditation standards and the NFPA Life Safety Code®.

### TECHNOLOGY HUB TO TRACK, STORE + MONITOR

By moving from paper to a centralized technology solution, healthcare organizations will eliminate challenges associated with staff turnover while at the same time maximizing staff utilization.

ProtectAdvisr can help improve information accessibility across the organization and reduce data gaps and inconsistencies that may result from manual or paper-based processes.
