

INFINIUM QUANTUM™ TRUNK

(BASE PN: X6262BEE0FEHHJLLM)

PATENT PENDING

Infinium Quantum fiber trunks and harnesses are available in Single-Mode and Multimode. Both are fully configurable with a variety of cable and connector combinations including connector type, breakout configurations and jacket material. Each trunk can have multiple connectors of different types and a choice of cable construction in between. Legrand Infinium Quantum trunk cables are manufactured using an innovative furcation method.

- Industry leading performance is available only when mated with matched Infinium Quantum Cassettes (see pages 9 & 10 for proper mating equipment.)
- Available with Plenum, riser, low-smoke zero halogen (LSZH) rated jackets (or CPR – rated for EU use)
- Bend-insensitive fiber for optimal cable management
- Single-mode and Multimode options include 8-fiber, 12-fiber, and 24-fiber MPO connectors
- Utilizes higher quality tubing for more consistent jacket foot print
- Leverages high impact AMS at the furcation point
- Provides a sleeker, more innovative design
