

Multimedia Content in *Finding God*[®]

Finding God: Our Response to God's Gifts[®] offers many opportunities to experience multimedia content. Any place you see a QR (Quick Response) code, there is an opportunity to engage with multimedia. The icon alongside each QR code indicates the type of media (audio, video, interactive, or text) that will be encountered once the QR code is scanned. The With My Family page (the last page of each session) is devoted to helping you strengthen your ability to communicate the treasure of the Catholic faith to your child as his or her most influential catechist. The media content accessed by scanning the QR code on that page is parent focused and includes full-length "How to Raise Faith-Filled Kids" articles for most sessions.

Access Multimedia Content

This multimedia content can be accessed most readily using a smartphone or tablet device equipped with a QR (Quick Response) code reader application, and a connection to the internet, ideally via Wi-Fi. If your device doesn't have a QR code reader, go online to the app store associated with the operating system for your device and download a QR code reader app.

With the code reader open, hold the device over the QR code. (Some apps require that you press a button to begin the scan.) The media associated with that page will appear. If you don't have access to a digital device or a reliable Wi-Fi connection, contact your child's catechist or teacher for alternative ways to access the content.

Setting Family Rules for Digital Device Use

If your child's catechist or teacher chooses to have children access the multimedia content during class, he or she will do so in accordance with clear classroom rules and expectations for using digital devices. Setting rules and expectations at home, such as limits on how long your child can engage with the content, as well as where, when, and with what device, are also appropriate. Whenever possible, view the media or engage with the activities together as a family.

Many children experience difficulty transitioning away from interacting with a digital device to another activity. Establishing time limits, perhaps even setting a timer, can help alleviate some of the anxiety around moving from one activity to another when the timeframe is known to all in advance.
