

## PAINT

### Simple Finger Paint

Add tempera paint to liquid starch.

### Finger Paint

- 2 cups flour
- 2 teaspoons salt
- 3 cups cold water
- 2 cups hot water
- food coloring or powdered tempera

Combine flour, salt, and cold water and beat until smooth. Add hot water and boil mixture, stirring constantly until clear. Beat until smooth. Mix in color.

### Cornstarch Finger Paint

- 3 tablespoons sugar
- ½ cup cornstarch
- 2 cups cold water
- food coloring or powdered tempera

Combine sugar, cornstarch, and water. Cook over low heat, stirring constantly until mixture thickens. Let cool. Add coloring.

### Easy Soap Flake Finger Paint

- ½ cup soap chips
- 6 cups water
- 1 cup liquid starch
- powdered tempera

Dissolve soap chips in water. Mix water with starch. Add tempera.

### Easiest Soap Flake Finger Paint

Mix soap flakes with a little water. Beat with an eggbeater. Add color.

### Face Paint

- 1 cup solid vegetable shortening
- 1 cup cornstarch
- water (if necessary)
- food coloring

Mix shortening and cornstarch until smooth. If thick, add water; if thin, add shortening. Add food coloring. If sealed in plastic and refrigerated, this paint will keep for three days.
