FOR IMMEDIATE RELEASE

## **McLanahan Bedding Dryer Honored for Innovation at World Dairy Expo**

Hollidaysburg, Pa., October 20, 2017 – The McLanahan Bedding Dryer was recognized for innovation at an awards ceremony October 3 at World Dairy Expo in Madison, Wisconsin, according to Renee Schrift, Director of Sales-Agricultural Products, North America for McLanahan Corporation.

By quickly and dramatically reducing moisture and pathogens in recycled sand or manure bedding, the McLanahan Bedding Dryer system helps dairy producers improve milk quality, reduce the incidence of mastitis, increase cow comfort, and enhance overall farm sustainability. Bedding material is retained just long enough to achieve ideal pathogen kill for maximum thermal efficiency.

“Dry, clean bedding is critical for improving cow health and milk quality,” said Schrift. “This innovative Bedding Dryer helps producers realize the benefits of using recycled bedding without the expense, labor, fuel or time requirements of mechanical conditioning.”

Headquartered in Hollidaysburg, Pennsylvania, McLanahan Corporation provides bedding, manure and nutrient management solutions to help dairy producers improve efficiency, productivity and profitability. For more information, please visit [www.mclanahan.com](http://www.mclanahan.com) or email [agdivision@mclanahan.com](mailto:agdivision@mclanahan.com).

###
