McLanahan Corporation Designs New Website

Hollidaysburg, PA, January 2010 – McLanahan Corporation has officially launched its redesigned website on January 18th, 2010. McLanahan Corporation is celebrating its 175th Year Anniversary and the design of a new website is just one of the many ways this family-owned business has decided to commemorate this special occasion. Showcasing all 6 Divisions, the new site was designed to offer customers information regarding equipment & services; more detailed pictures; videos of field footage; and updated News & Events on related industries as well as Trade Shows & Expos. McLanahan is a unique corporation due to its diversified lines of equipment and different industries that they are able to service. This is why the site has a distinct new look so customers are able to view the wealth of information available, but are still able to navigate through the site very easily.

McLanahan has also designed new brochures for several pieces of equipment & services. These brochures are all attached to the website where customers can get the most up to date information regarding products and view pictures of our most recent jobs. Videos of our new Plate & Frame Filter Press, DDC Sizers, Separators™, and many more pieces of equipment are available to view of the new site. Each Division provides a list of contact names, numbers, and emails so customers always have quick and easy access to our qualified staff.

For more detailed information regarding any our equipment lines or services please call 814-695-9807 or email sales@mclanahan.com.

About McLanahan Corporation

McLanahan Corporation was ranked by Family Business Magazine as the 49th oldest family-owned business in the country. Now in its 5th & 6th generations of operation, McLanahan is proud to be a world leader in the development and manufacture of process equipment and systems. Our base of operations remains in Hollidaysburg, Pennsylvania, and we also have locations in Gallatin, Tennessee; Lakeland, Florida; and New Castle, Australia.
