

ENGINEERED TO PERFORM

McLanahan's Production Performance Optimization Drive (ProPOD) Technology combines rugged reliability with advanced engineering to maximize uptime and productivity in the most demanding applications.

BUILT FOR EXTREME CONDITIONS

- ✓ The ProPOD's self-contained mechanism allows for simple maintenance and reduced downtime
- ✓ Delivers the aggressive stroke needed for the toughest screening applications
- ✓ Ensures the power and flexibility for screening success in any application

SIMPLIFIED MAINTENANCE

- ✓ Longer bearing life for maximum performance
- ✓ Minimal specialized labor needed for maintenance
- ✓ Reduce downtime with simple changeouts
