

Baby Lock Meridian (Model BLMA) Software Update Version 3.03

July 2025

Introduction

If the software version of your Meridian (Model BLMA) is earlier than version 3.03, an update program is now available for download to improve its performance.

Version 3.03 update will provide the following changes:

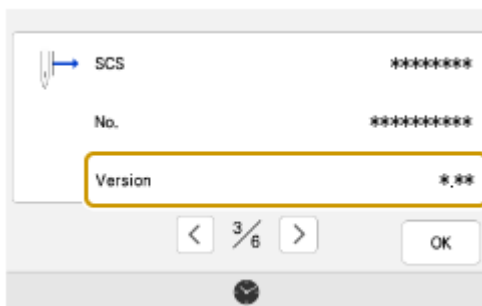

1. Improved resume function and undo/redo function.

How to confirm the software version of your BLMA

1. Press the power switch to "I" to turn on your machine.
2. If the opening movie is played, touch anywhere on the LCD screen.
3. Touch  (Machine setting key) to display the machine's settings screen.

4. The machine's settings screen appears.
5. Switch the settings screens by using  (Previous page key) or  (Next page key) to display the machine's program version.
6. Check the version shown on the display as described below.

- If "**Version**" is already "**3.03**" or later, it is not necessary to update your machine.

- If "**Version**" is lower than "**3.03**", update your machine's software with the Version 2.11 update file.

7. Turn off the machine.

How to update your machine's software

- You must use a USB flash drive to update your machine's software if the version is lower than 2.02.
- You may use your machine's wireless network connection to download the update if your version is 2.02 or higher. You must have a strong Wi-Fi signal to use this option. See Instruction & Reference Guide Addendum for more information.

***** NOTE *****

- **Do not turn off your machine while the machine is saving the update software to itself.**

If the machine's power is turned off while saving the update software, it may result in damage to the machine.

How to update your machine's software using a USB flash drive

You must use a formatted 8GB or 16GB USB flash drive to ensure that no data exists on the USB used to update your machine's software.

1. Insert the USB flash drive into the USB port on the computer.
2. Copy only the update file, [W_V303_T_Emb_P.upf](#), to the USB flash drive.
3. Safely remove the USB flash drive from the USB port on the computer.
4. With the machine **OFF**, press the "**Automatic Threading**" button while turning the main power to **ON**.

5. The following appears on the LCD screen. Touch the highlighted key.

: Touch this key to load the program file from the USB flash drive plugged into the USB port for media

6. Insert the USB flash drive into the USB port on the machine corresponding to the USB key pressed in step 5.

① USB port for media

② USB port for mouse

③ USB flash drive

7. Touch Load key.

Press LOAD after connecting the USB media containing the upgrade file.

8. **Do Not** turn off your machine while the update file is loading.
9. When the message "**Upgrade complete**" appears, the update file has been loaded.

Upgrade complete.

10. Remove USB flash drive from the USB port on the machine.
11. Turn the machine off, pause and then turn it on again.
12. Your machine's software has been updated to version 3.03.

Baby Lock Meridian (Model BLMA) Update History

➤ **Version 2.11 update provided the following changes:**

1. Improved PHX data compatibility with multi-needle embroidery machines.

➤ **Version 2.10 update provided the following changes:**
