

# Release Notes

## TRIMBLE ACCUBID ANYWHERE

This document contains summary information on new features and product improvements related to the **Trimble® Accubid® Anywhere v2.26** release on November 27, 2025.

### Software Updates

#### Core User Interface Component Upgrade

In this release, Trimble has updated Accubid Anywhere's core technology foundation by upgrading the underlying DevExpress user interface (UI) framework to its latest version. By utilizing the latest version of DevExpress, we incorporate cumulative bug fixes directly from DevExpress alongside critical security patches. This keeps Accubid Anywhere aligned with modern cybersecurity compliance protocols, ensuring your data remains protected.

### Trimble MEP Client Services

Trimble MEP Client Services is available during regular business hours, Monday through Friday. If you need any help, please contact support by one of the following options:
