

Release Notes

Trimble® Accubid® Anywhere v2.30

This document contains summary information on new features and product improvements related to the Trimble® Accubid® Anywhere v2.30 release on September 25, 2026.

This release includes software enhancements, corrections and general technical improvements aimed at enhancing user experience and increasing productivity.

New Features and Updates

Field Labor API Availability

To give teams clearer visibility into project labor performance without complex setup, this release introduces a new field labor feature. Field teams can now use the API connection to send labor metrics directly into external reporting tools or custom apps.

Change Order Data to Trimble Analytics

Your contract changes, potential issues, and request updates now flow straight into your connected analytics dashboards:

- **Updated Data Structures:** Added standardized data layouts for Contracts, Requests for Proposals (RFPs), Potential Change Orders (PCOs), Requests for Proposals (RFPs), and Change Orders (COs).
- **Automated Change Updates:** Set up background database procedures and event triggers to capture deleted or updated contracts and change orders in real time.
- **Excluded:** Empty reference fields, Deleted data, Files & Links

Platform & Partner Ecosystem Updates

- **Supplier Xchange Updates:** Improved integrations with Supplier Xchange for real-time vendor price quote requests and distributor communication to ensure your bids contain the most up-to-date pricing information.
- **System Modernization:** Updated system code bases for Visual Studio 2026 and refreshed background references for Microsoft Project to keep the application running reliably.

Software Corrections & Optimizations

- **Automatic Bid Closeout Updates:** Fixed an issue where changing Closeout settings did not automatically recalculate the Final Price.
 - **Faster Bid Breakdown Calculation:** Optimized database queries and verified core calculating routines to speed up loading times when reviewing bid breakdowns and calculating estimate totals.
-

Upgrade procedure

The Accubid Anywhere application features an automated self-update mechanism to ensure you are always running the most current version. If you require a manual installation, the standalone installer for the latest release is available via the [Trimble Downloads](#) portal.

Trimble MEP Client Services

Trimble MEP Client Services is available during regular business hours, Monday through Friday. For additional assistance, you can contact support or utilize the chat tool in [My Trimble](#) for fast and easy support.
