FOR IMMEDIATE RELEASE

AWS Marks Completion of Migrating Certified Welding Engineer (CWEng) Certification Exams to Computer-Based Testing

Doral, FL, November 4, 2021:

Over the past few years, the American Welding Society has been migrating its paper-based certification examinations to computer-based tests (CBT). The most recent certification exam to move to entirely computer-based testing is the Certified Welding Engineer (CWEng) exam. Those seeking to sit for the four-part CWEng exam may now do so at any Prometric exam center worldwide.

AWS Certified Welding Engineers have demonstrated they are familiar with codes, specifications, standards and other aspects of fabrication and assembly for the production of welded joints. They prepare and produce reports, which accurately reflect professional judgment and work with management representatives, inspection personnel, welders and support crafts, understanding the integrated role of each in the development of weldments.

“The move of the CWEng exam to CBT represents several advantages,” said Denny Smith, Managing Director of Certification. “Exam standardization and security is improved, exams are taken at the candidate’s closest Prometric test center on a convenient date and time for them, and the exam review and scoring processes are streamlined.”

To learn more on the Certified Welding Engineer credential, registration, exam and available preparation options, visit [AWS.org/CWEng](https://aws.org/CWEng).

###

About AWS: The American Welding Society is the worldwide authority in the development of [standards](#), [certifications](#) and [educational programming](#) for the welding, allied joining and cutting community. We are a not-for-profit organization committed to connecting the welding industry to our extensive collection of resources, informing our community of technological advancements and developing the next generation of welding professionals with the help of the [AWS Foundation](#). AWS serves over 60,000 [members](#) worldwide, is composed of 22 Districts with 250 Sections and Student Chapters, and includes more than 1500 volunteers in over 200 [technical committees](#), subcommittees and task groups. For more information, visit the American Welding Society's website at aws.org.
