A visit to the zoo

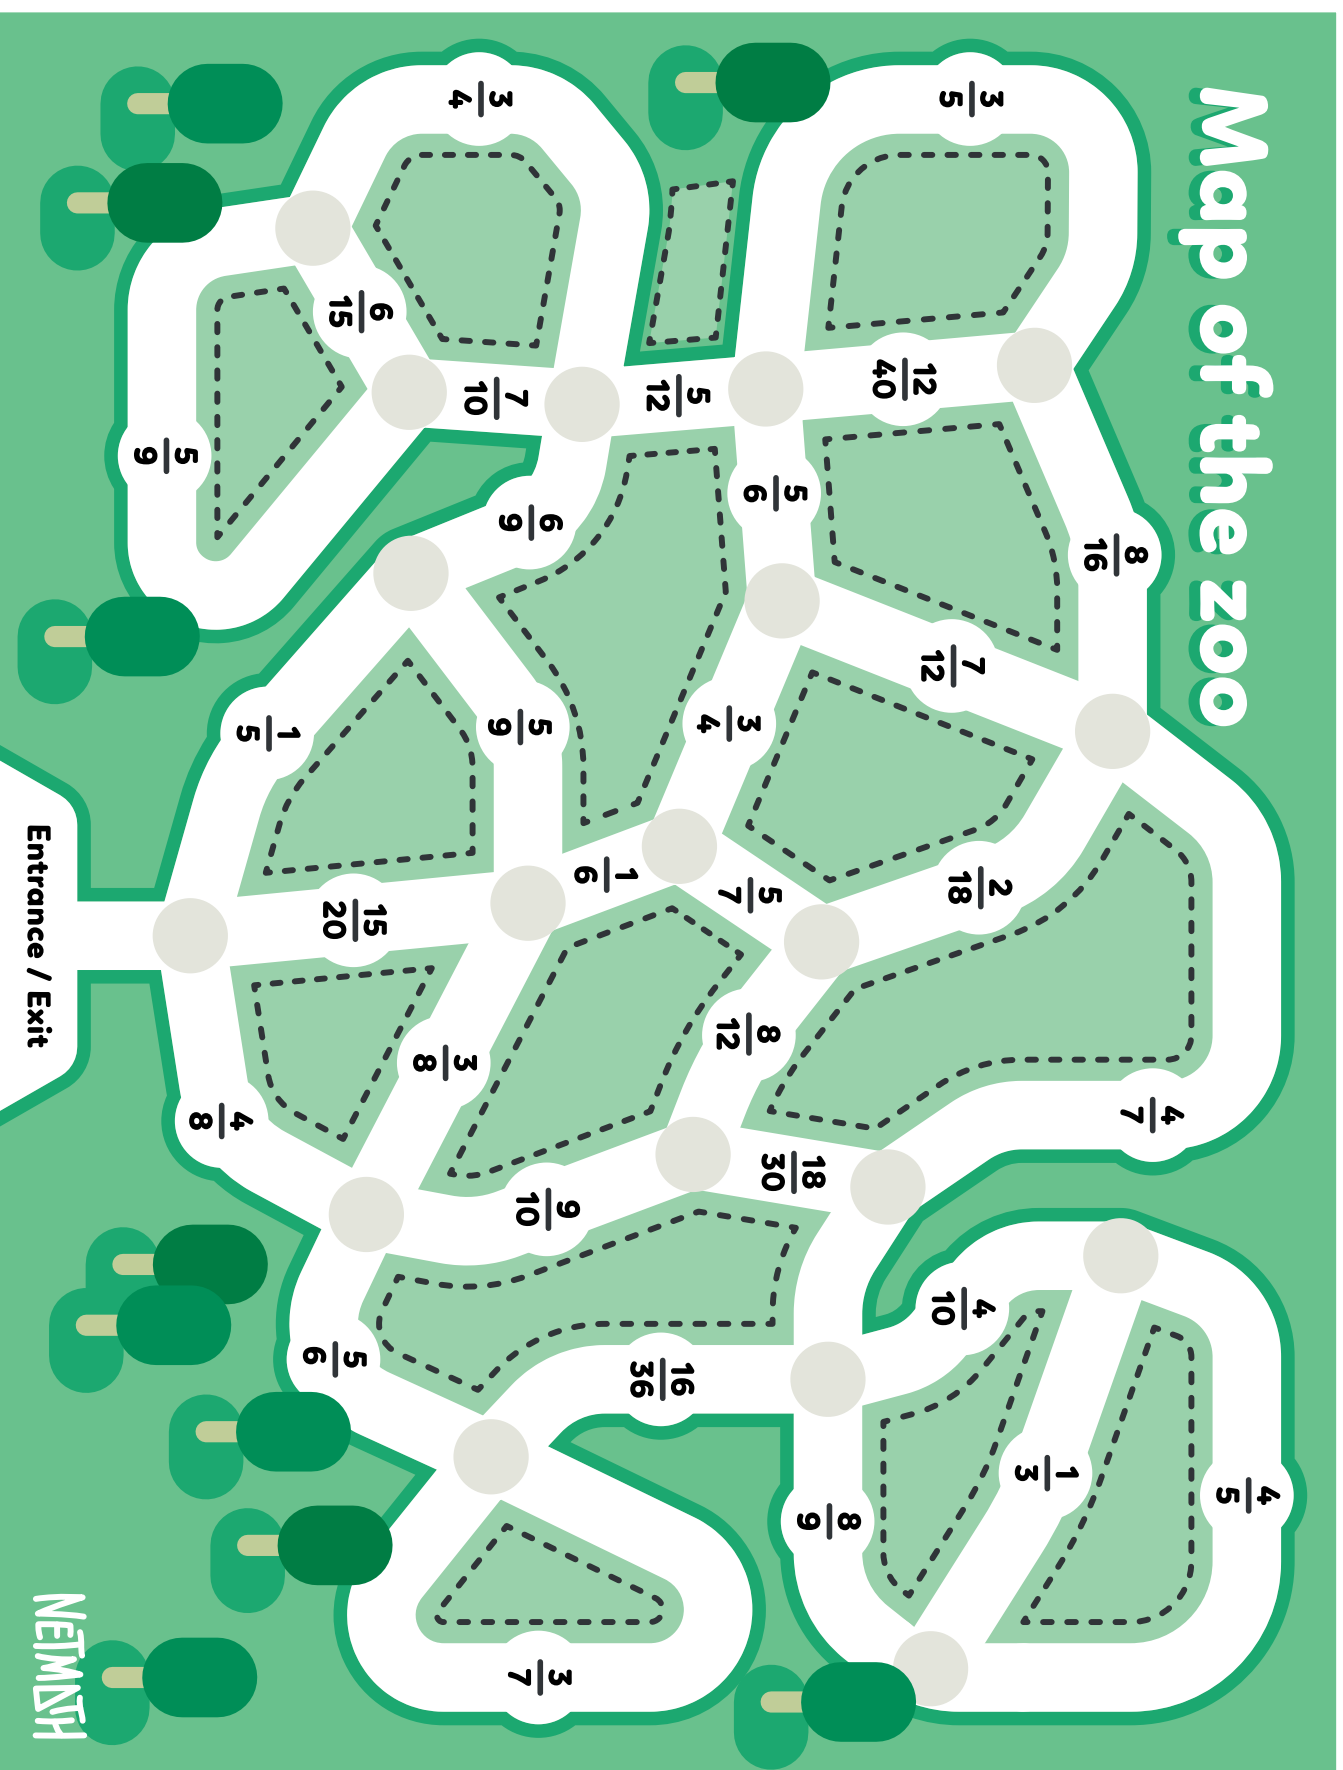

Activity sheet

Amélia, Benoît, Coralie and Derek are visiting a zoo. They tell you there are all kinds of animals to discover by taking one of 4 possible paths. On each path, you'll come across fractions and intersections (represented by grey circles).

1. First, choose one of the 4 paths presented on page 3.
2. Then, follow the instructions on the path you chose to visit part of the zoo.
3. As you move along the path, write the names of the animals you come across, or draw them.

Map of the zoo

NEIMISH

Amélia's Path

- I took the path that is equivalent to $25/50$ so that I could see the giraffes.
- At the intersection, I turned onto the $35/42$ path and got to admire the lions.
- Then, I took the $12/28$ path so that I could get a better view of the cheetahs.
- I walked until the $4/9$ path.
- I got to the $16/18$ path, and saw the goats.
- I took the $12/15$ footbridge where I had an amazing view of the koalas.
- Lastly, I took the $2/5$ path to take a break beside my favourite animals: the goats!

Benoît's Path

- By taking the $3/4$ path, I walked between the giraffes (on my right) and the wolves.
- I continued along the $24/64$ path.
- The $27/30$ path allowed me to see the elephants on my left.
- I took the $4/6$ path and came across the sheep.
- The $1/9$ path led me to the sheep and the crocodiles.
- I then walked along the $32/64$ path, and passed in front of the bears.
- I ended by taking the $15/25$ path and had a picnic beside the beavers.

Coralie's Path

- I took the $3/4$ path, and walked between the giraffes (on my right) and the wolves.
- I then took the $3/18$ path; there were elephants on the same side as the giraffes.
- The $9/12$ path gave me a chance to see the sheep and the foxes.
- By continuing on the $14/24$ path, I had another chance to see the sheep.
- I took the $1/2$ path and saw some bears.
- By turning on to the $30/50$ path, I was able to walk around the beaver dam.
- I ended by taking the $3/10$ path and picnicking with Derek between the bears and the beavers.

Derek's Path

- I started on the $3/15$ path, which brought me close to the wolves.
- I continued along the $2/3$ path, and ended up very close to the foxes.
- I continued along the $14/20$ path.
- The $15/27$ path led me to the tigers.
- By taking the $12/16$ path, I saw a panda munching on bamboo.
- I saw a rabbit while I was on the $15/36$ path.
- I ended my visit by walking along the $6/20$ path, which led me to the beavers and bears, and where I met up with Coralie.
