

ABM Municipal EV Charging Solutions

The Municipal Parking Roadmap for EV Electrification

The record growth of the electric vehicle market, combined with upwards of \$5 billion in federal funding for electrical vehicle infrastructure over the next five years, makes this an optimal time to take the next step in electrifying your municipal parking facilities.

Adding EV charging to your parking operations also creates new ways to both utilize your spaces and maximize revenue.

ABM provides turnkey solutions for municipalities—from identifying funding and policy guidelines to electrical infrastructure, EV charger installation, maintenance, and monetization.

ABM uses industry-leading EV infrastructure and parking expertise to guide you to customized and future-proofed decisions for your city.

Capitalize on EV Growth

EV Makes a Statement for Municipal Parking

EV charging stations are powerful symbols for your parking facilities and your city.

Providing reliable charging locations sought by drivers for convenience and to ease “range anxiety.”

Creating new city revenue streams.

Demonstrating commitment to reduce greenhouse gas emissions.

ABM Accelerates Municipal EV Parking Solutions

ABM is the #1 installer of commercial EV chargers in the US with \$1 billion of infrastructure installed and maintained, supported by 10,000 EV Technicians across the country.

ABM has been a parking management and transportation leader since 1966, operating in 230 cities with more than 875,000 spaces at 2,000 client locations, including city parking operations across the country.

Turnkey Municipal EV Solutions

ABM provides strategic guidance and turnkey solutions that fit the diverse needs of municipal parking facilities, including:

Applying for funding

Active load management

Full EV infrastructure planning and installation

Vehicle to grid charging

EV charger installation with Level 2 and DC fast charging

Parking monetization

Electric utility coordination

Service and maintenance

ABM has its own line of reliable EV chargers and also works with leading EV equipment manufacturers and EVOS technology if you have those partners in place.

Cities ABM serves

Akron, OH
