

4.2.3 Resumes

A resume or summary of qualifications, work experience, education, and skills must be provided for all key personnel, including any subcontractors, who will be performing any aspects of the contract. Include years of experience providing services similar to those required; education; and certifications where applicable. Identify what role each person would fulfill in performing work identified in this RFP.

A summary of our key personnel and their qualifications is provided in Section 3.10.5, Key Personnel and Resources while resumes detailing their experience, accomplishments, and qualifications are presented in this section.

Team CNSI has provided resumes for the following key positions as required by the RFP:

Additionally, Team CNSI has provided resumes for the following positions beyond the requirements of the RFP:

[illegible]

1. **Identify the main components of the system.** The system consists of a **client** and a **server**. The client is responsible for sending requests to the server, and the server is responsible for processing these requests and returning responses.

2. **Define the data flow.** Data flows from the client to the server via a **network**. The server processes the data and returns the result to the client.

3. **Describe the system architecture.** The system is a **distributed system** where the client and server are located on different machines. The client and server are connected via a **network**.

4. **Explain the system's functionality.** The system is designed to provide a **remote service** to the client. The client sends a request to the server, and the server processes the request and returns the result to the client.

5. **Discuss the system's performance.** The system's performance is determined by the **network latency** and the **server processing time**. The system is designed to be **scalable** and **reliable**.

6. **Summarize the system's benefits.** The system provides a **remote service** to the client, which is **scalable** and **reliable**. The system is designed to be **easy to use** and **flexible**.
