*** Terms:**

Organization (Private Company or Government Agency) must license each facility owned, managed and operated by the agency. Number of license needed for each such facility is determined by the facility's "offender count" divided by 1000 rounded up to the next whole number.

Organization must commit to purchase licenses for all facilities within 24 months.

Organization must acquire annual maintenance for their software which is 12% of all licenses and customization. This annual maintenance provides free bug fixes, second level helpdesk support and fixes for newer versions of operating system, database engine and web servers. It does not provide functionality enhancements or upgrades.

Organization may not license or use the software at facilities not owned, operated or managed by the organization.

ATG grants to the Customer, a perpetual, non-exclusive, and non-transferable license to use software program(s) provided by ATG, and the accompanying user documentation ("Documentation"), (collectively, the "Software") as purchased by the Customer only as authorized by the Agreement.

Customer may not assign, transfer, rent, or sublicense the Software. The Software consists of proprietary products of ATG or its third party suppliers, and the proprietary rights that protect such property may include, but are not limited to, U.S. and international copyrights, trademarks, patents, and trade secret laws of general applicability. All right, title and interest in and to the Software are and shall remain with ATG or its third party suppliers, as applicable. This license does not convey to the Customer any interest in or title to the Software, but only a limited right of use, revocable in accordance with its terms.

ATG software is licensed to a named correctional facility that is owned, operated and managed by the particular ordering activity that purchased the license. The software can only be used to manage information about offenders supervised by the named correctional facility. The license does not limit number of users, even from other agencies that need access to the information stored. The licenses are not transferable between agencies or between correctional facilities within an agency. The only exception to the previous statement is that in the event that a facility is permanently closed, the agency can transfer that license to another facility owned, operated and managed by the same agency.
