CMdS-Claims captures the service authorization data content to process X12 278 HIPAA transactions. The service authorization user interface displays the requested dates, units, and dollar amounts separate from the approved authorization details. The service authorization header is shown Figure 4.2.15-5, and the line is shown Figure 4.2.15-6.

Figure 4.2.15-6. Service Authorization Entry – Line
The line item information includes the detail for the service requested, including requested and approved units, dollar amounts, begin and end dates.

Service Authorization Notifications. Upon completion of processing a service authorization or referral, we produce letters automatically for delivery using the preferred communication channel. Providers submitting X12 278 authorization requests receive standard response transactions and notification concerning status determinations through their preferred channel. Our external portal supports self-service status checks, regardless of the method of submission, by allowing the provider to query authorization status at any time. The status is retrieved real-time from CMdS-Claims.

AUTH10
The Contractor's solution shall provide the ability to update service authorizations (e.g., extend or limit effective dates, update authorized limits) based on configurable business rules while maintaining a history of the changes to the record.

We have different options for updating service authorizations based on the source and type of update. We support these updates through the user interface, bulk data updates, and interfaces. The configurable business rules performed during adjudication validate the updates. The solution tracks updates through audit logging, which includes the before and after data and the user ID (or system process), date, and time. Authorized users can view the audit log information directly from the user interface.

Conduent Proprietary Information

AUTH11

The Contractor's solution shall have the ability to automatically generate approval and denial notices/communication to requesting and assigned providers, case managers, and members based on their communication preference for service authorizations based on configurable business rules.

CMdS-Claims produces notification to providers, case managers, and authorized users when the service authorization is approved, denied, or updated. Service authorization notifications are delivered to the providers and members secure inboxes on the external portal based on communication preferences. We maintain electronic copies of the notifications in the enterprise content management (ECM) solution and provide a link from the service authorization to view the associated notification.

The service authorization letter itself is configurable, allowing users to send alternate letters based on authorization type or authorization status. As shown in Figure 4.2.15-7 the letter may include selectable letter comments and/or free-format additional letter text. Other people, such as case managers and authorized users, may also receive a copy of the letter if entered in the additional addressee section of the service authorization user interface. Enclosures are also configurable. For example, denied or partially denied authorizations may include the member rights to a fair hearing enclosure if the letter is delivered to the member.

Figure 4.2.15-7. Automated Authorization Letters
We can generate automated service authorization letters that can be sent through multiple communication channels.

Conduent Proprietary Information

AUTH12

The Contractor's solution shall allow for flexible and configurable service authorizations (e.g., required fields, edits, service authorization types, business rules) to support a variety of programs, benefit plans, and claim types. The solution shall assign a unique number to service authorizations.

CMdS-Claims supports service authorizations for Medicaid and State specific waiver programs, benefit plans, and professional, dental and institutional claims. We also support accepting and storing pharmacy service authorizations, although these are not adjudicated based on our standard APIs. Authorization processing is performed using a variety of data configuration and business rules. Some of the configuration items in service authorizations include:

- Pricing overrides for member specific rates
- Edit configuration for service authorization adjudication
- Locations to hold service authorizations awaiting work or a response
- Benefit plan specific service authorizations
- Business rules validating member eligibility
- Business rules validating provider eligibility
- Authorization and referral letters

Unique Identifiers for Service Authorizations. CMdS-Claims supports importing an external authorization identifier and assignment of unique authorization IDs. When we are the source of truth for authorization IDs, we assign them as shown in Figure 4.2.15-8.

Figure 4.2.15-8. Unique Service Authorization
CMdS-Claims assigns a unique ID to every service authorization.

Conduent Proprietary Information

AUTH15
The Contractor's solution shall have the capability to perform mass updates to service authorization records (e.g., change a provider ID number, procedure code) with pending or approved but unutilized services that may initiate workflow for updates that require review and approval.

Our CMdS-Claims product supports mass updates to service authorizations to ensure providers can get their claims processed and members receive the care they need. Our CMdS workflow tool is used to configure notifications and routing for review and approval. The workflow rules look for pending or approved service authorizations with unused services based on the authorization's approved and used units or amounts. Once the rules detect unused services, the solution sends an alert to the appropriate work queue for review and approval.

AUTH16
The Contractor's solution shall have the capability to put requested service authorizations in a pending status if any information is invalid, missing or needs to be approved by another entity based on configurable business rules.

CMdS-Claims adjudicates service authorizations based on configurable business rules. When the data on a service authorization triggers an edit based on a business rule, the exception control determines the resulting authorization status. The edits identify invalid or missing data. The solution uses the exceptions' location work queues to route the authorization to the appropriate user or entity for approval. Prior to approving a service authorization, all exceptions must be resolved. Exceptions are worked based on the resolution instructions which can be accessed online through a link to the authorization exception control user interface.

AUTH01
The Contractor's solution shall have the ability to track services received against services approved based on service authorizations and/or claims.

The CMdS-Claims adjudication process updates the service authorization used and remaining units or amounts when a claim status is to-be-paid. If a claim is processed with submitted units or an amount greater than what is remaining on the service authorization, the reimbursed units or amount on the claim is cutback to the amount remaining. A base rate change is applied to the claim indicating why the reduction occurred. When the approved amounts and/or units are exhausted, subsequent claims for that specific member and service deny, unless override criteria is configured within the benefit plan or utilization review criteria.

The service authorization units (approved, used, and remaining) or amount fields are shown in Figure 4.2.15-9. The solution updates these fields in real time as each claim is adjudicated to a to-be-paid status. The authorization shows the history of claims that processed against it as shown in Figure 4.2.15-10.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.15-9. Claim Line Detail for Authorized Services
Unit and amount fields are updated in real time as claims process against the approved units or approved amount fields for the authorization line.

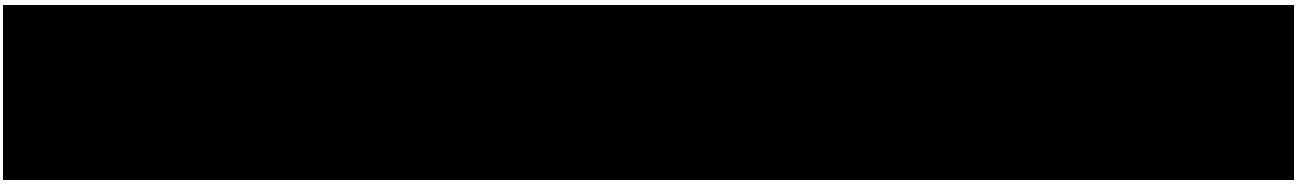

Figure 4.2.15-10. Service Authorization – Claim Activity
The solution displays the TCNs of the claims that use the authorization. Users can view the claim details by clicking on the TCN.

AUTH06
The Contractor's solution shall include configurable referral functionality to include creating, updating and sending referrals from primary care providers to other providers (e.g., specialty providers) to allow for claims payment. The solution shall assign a unique number for each referral.

CMdS-Claims produces notification to providers, case managers, and authorized users when the referral is approved, denied, or updated. Referral notifications are delivered to provider and member secure inboxes on the external portal. We maintain electronic copies of the notifications in ECM and provide a link from the referral to view the associated notification. The referral letter itself is configurable, allowing users to send alternate letters based on referral type or status. Additional people, such as case managers and authorized users, may receive a copy of the letter if entered in the additional addressee section of the user interface.

Unique Identifiers for Referrals. We use the same number sequence for authorizations and referrals. We describe the unique IDs in response to ID AUTH12.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

AUTH13
The Contractor's solution shall have the capability to filter and view service authorizations (service authorization detail list) based on configurable filters (e.g., provider, procedure code, diagnosis code) and allow mass updates from the service authorization detail list.

Our user interface includes the service authorization search capability shown in Figure 4.2.15-11 which allows the user to select the tab that best matches the user's search criteria. Then the user enters the appropriate criteria.

Figure 4.2.15-11. Searching for Service Authorizations
CMdS-Claims provides a search web page that includes tabs tailored to the type of search.

For example, the user selects the provider tab if the user wants to view a provider's requests that match a procedure code. Figure 4.2.15-12 shows the provider tab where the user enters the provider and the service code (procedure code). The solution returns the search results allowing the user to sort the results, refine the search criteria, or select an authorization to view in detail.

Figure 4.2.15-12. Searching for Service Authorizations by Provider ID
The provider search allows you to search for authorizations belonging to a provider and enter additional search criteria to filter your results even further.

CMdS-Claims supports mass updates to service authorizations in batch and we can use the search criteria from the user interface to identify the authorizations that need updating. Our product does not currently support mass updates directly from the user interface. During the implementation we work with you to better understand this requirement.

Conduent Proprietary Information

AUTH14
The Contractor's solution shall have the capability to perform mass updates of referrals (e.g., member changes PCP, PCP who are retiring, service code changes) that may initiate workflow for updates that require review and approval.

Our CMdS-Claims product supports mass updates to referrals to ensure members receive the care they need. These updates include PCP updates and service code changes. We use the CMdS workflow tool to configure notifications and routing for review and approval of these updates.

AUTH18
The Contractor's solution shall have the capability for authorized users to send requests via workflow or their preferred method of communication (e.g., inbox, fax, mail) for additional information related to service authorization requests.

When users need additional information to process a service authorization or referral request, CMdS-Claims allows the user to request an automated letter seeking additional information as shown in Figure 4.2.15-13. The letters and responses section in the user interface maintains a record of letters and responses and a link to view the details. Today, we can send letters automatically to the portal inbox or through the mail. We also support the immediate generation of a letter as a PDF that we can send through fax or secure email.

Figure 4.2.15-13. Automated Authorization Letters
Users can generate automated service authorization letters that can be sent through multiple communication channels.

Conduent Proprietary Information

AUTH22
The Contractor's solution shall provide the ability to allow approved services (e.g. private duty nursing) on one service authorization to be used by multiple providers during overlapping dates of service based on configurable business rules.

CMdS-Claims maintains complete data for service authorizations at both the header and line detail level, including member, provider, service, and status information. A single authorization may be submitted for a member with multiple service providers, multiple services, and dates of service (overlapping or not). This is a standard feature of our line-level authorization processing.

AUTH23
The Contractor's solution shall provide and maintain the capability to create, edit and void services authorized and to extend or limit the effective dates of the authorization. The solution shall maintain the original and the change data in the service authorization record.

CMdS allows entry and maintenance of the details of an authorization, including authorized services and effective dates approved by the authorized user. All changes to authorization data are captured by our audit capabilities.

Making Changes to Service Authorizations. CMdS allows voiding of services approved on a service authorization, if no claims have been processed against those lines. Users may change approved units and amounts on the authorization; however, decreases to the units and amounts of approved services cannot decrease below the units and amounts already used by claims. Users can also extend or shorten the time period approved for the service, but if shortened, it cannot be prior to any claim service date already processed against the authorization.

Tracking Data Changes. CMdS-Claims maintains an audit trail of all changes to the authorization which is available for online viewing from the user interface. Audit tracking is at the field level and includes the user ID of the person who made the change, a timestamp, and before and after images.

© 2020 Conduent State Healthcare, LLC

4.2.16 Option A: Financial [RFP 3.10.16]

REQUIREMENT: RFP Section 3.10.16

In addition to the Core scope of the Claims Processing and Management Services module, states may procure additional components and services for activities not categorized in Sections 3.10.1 through 3.10.15. Option A: Financial includes requirements to support Agency-wide integrated financial services to support accounts payable, accounts receivable, and general ledger functions that is compliant with Generally Accepted Accounting Principles (GAAP) and facilitates Federal and State financial reporting.

Powered by CMdS-Financial, our solution supports the shared funding model that pays for the Agency's public health programs and delivers the advanced processing of payments and recoupments the Agency is seeking.

Making payments is increasingly a core function of providing healthcare access, as states drive innovation in healthcare using capitated payments, accountable care, and value-based payments. States want to integrate disparate and manual financial reporting to improve accuracy, increase transparency, and ensure precise control over payments. CMS has indicated that states should define modules based on the business processes that require support. Financial services, as a specific offering, is a key trend among Medicaid programs, as evidenced by the recent modular strategies of New Mexico, Pennsylvania, and Virginia.

Conduent's financial services proposed for Option A build upon our CMdS-Financial product to effectively manage financial transactions, with a focus on fine-tuned control of expenditures and recoupments. We designed our solution to support the specific financial and accounting needs of the shared funding model that pays for the Agency's public health programs.

We provide you with the details of our solution for Option A – Financial in two proposal sections:

- 4.2.16.1 Fiscal Management
- 4.2.16.2 Financial Reporting

© 2020 Conduent State Healthcare, LLC

4.2.16.1 Fiscal Management [RFP 3.10.16.1, Attachment F]

REQUIREMENT: RFP Section 3.10.16.1, Attachment F

This section outlines the requirements necessary to meet overall fiscal management business processes. The solution will allow data required for financial business processes to be entered manually, received from other sources, or automatically generated based on a configurable business rules engine. Data received from other systems will be translated into consistent financial account coding to report back to the state's financial system. The transactions are translated into summary level data and detailed data. Financial information (e.g., FMAP, fund code) is assigned to each healthcare claim and financial transaction at the line and header level. Accounts payable and receivable will be associated with an entity with flexibility in payment schedules. Adjustments will be generated to change financial information assigned to a healthcare or financial claim as appropriate. These adjustments generate corrected financial information without requiring the claims be re-adjudicated. If the Offeror chooses to include these services in their proposal the Offeror must describe in detail their approach to meet each of the Option A Financial Management requirements in Attachment F – Requirements Response Matrix. The Offeror simply repeating the RFP requirements does not qualify as a good response as defined in Section 6.1.1 of this RFP.

CMdS-Financial tracks your funding sources and gives you configurable control over your expenditures and recoupments.

Conduent uses our financial module, CMdS-Financial, to provide you with your advanced capability requests under Option A. We've thoroughly reviewed your fiscal management requirements and believe the capabilities of our solution are a strong match.

Advanced Fiscal Control

- Make selective payments
- Budgets enforced automatically
- Recoupment schedules and limits
- Configurable workflow for prioritization and approvals

Budgets. You can configure budget information for each program using our web-based user interface. Our budget structure supports the co-existence of Title XIX, waiver programs, and other Agency programs. To limit payments by budget, a budget amount is set up for a fund code, which accumulates expenditures as payments are processed.

Fiscal Pend. CMdS-Financial includes configurable rules in the fiscal pend user interface to identify criteria to limit, delay, or hold payments. When the payment cycle runs, our solution will hold, or release claims based on entered criteria. Claims pended one week will be processed again the next week and released for payment based on the fiscal pend criteria. Data related to fiscal pend activity is available through the CMdS-Insights module. The automated fiscal pending of claims due to expenditures exceeding the budget amount usually occurs closer to year-end, when available funds are exhausted. Increasing the available budget will allow the fiscal pended claims to be processed.

Financial Transaction Types. CMdS-Financial performs processes transactions using three financial transaction types—receivables, payouts, and receipts. A receivable represents money owed to a program managed by the Agency. A payout represents a request for the Agency to issue a payment or track a payment that happened. And a receipt represents funds received by the Agency. An overview of common reasons that can be used with these transaction types can be found in Table 4.2.16.1-1.

Table 4.2.16.1-1. Major Financial Transaction Types and Reasons

Receivable	Payout	Receipt
Receivable Cost Settlement	Payout-Cost Settlement	Receipt Cost Settlement
Receivable Provider Recovery	Payout-Gross level	Receipt Provider Over Payment
Advance Payment Receivable	Check Replacement	Receipt Prov TPL Health Insurance
Receivable Legal Settlement	Payout HIPP	Failed EFT or Check Replacement
IRS Lien	Excess Provider Refund	Stale-dated Check

© 2020 Conduent State Healthcare, LLC

Workflows and Operational Status. Our workflow tool shown in Figure 4.2.16.1-1 supports grouping work within CMdS modules into queues. We provide a visual and statistical view of the work that has been completed – and the work to be performed. Users can see the work available in each queue including their current assignments.

Figure 4.2.16.1-1. Workflow Status at a Glance
The splash page provides the user with a summary of current events and information. The queues can be seen under the "Workflows" grouping.

The following pages provide our responses to your Fiscal Management requirements.

FSCM08
The Contractor's solution shall have the ability to calculate incentive payments based on different criteria (e.g., patient volume, re-admission rate) for different state healthcare programs based on configurable business rules.

We recognize that the payment of incentives is an important component of a value-based payment methodology that holds providers financially accountable for both the cost and quality of care. Using our CMdS-Insights capability within our claims solution, we can calculate and create gross payments to providers in our CMdS-Financial module based on structured analysis and calculations from claims activity or other accumulated data. Using tools and skilled analysis, we deliver a solution that calculates incentive payments for providers based on their ability to meet your specific criteria for patient volume, readmission rate, or other applicable standards.

Calculating Incentives Using Configurable Criteria. To calculate incentive payments using structured business rules, we use the reporting capabilities of our CMdS-Insights solution. CMdS-Insights has access

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

to our full data model of both the online database and our reporting schema. This allows access to data that is appropriately structured and time sensitive for the required task. Using filters and calculations, we can configure non-actuarial computations based on your business rules for each type of incentive payment. Our solution supports the output of data into several formats including Microsoft Excel, which supports both simple and advanced financial analysis, as well as the bulk loading of payments into CMdS-Financial.

Paying Incentives using Financial Transactions. Incentive transactions are processed as a type of financial transaction and labeled as a *payout* in our solution. Payouts can either be entered by an authorized user or loaded in bulk from a spreadsheet. Each payout transaction requires an approval using our web-based user interface, entered by a user with a separate level of authority from the authority level of the user who created the payout transaction. For bulk transactions such as incentive payments, we can either load the transaction pre-approved or route the transactions as required to the person(s) responsible for approving payments.

Tracking Funding Sources for Incentive Payments. We use financial reason codes throughout CMdS-Financial to link financial transactions to funding sources, budgets, FMAP rates, and accounting codes. Each payout transaction created for an incentive payment includes the appropriate financial reason code(s) required to meet both your accounting and federal reporting requirements.

FSCM09
The Contractor's solution shall allow for one or more accounts receivable balances to be adjusted based on collections/recoupment as defined by the Agency.

Two other types of financial transactions available in CMdS-Financial are *receivables* and *receipts* and these transactions are used together to process collections and recoupments. Receivables represent money owed to an Agency program by a provider, member, or other entity. Receipts represent a payment being made to the Agency program or a payment reversal such as returned check. Receivables may also be satisfied by new payment activity, subject to configurable restrictions on each receivable. We show an overview of collections/recoupment activity in CMdS in Figure 4.2.16.1-2.

© 2020 Conduent State Healthcare, LLC

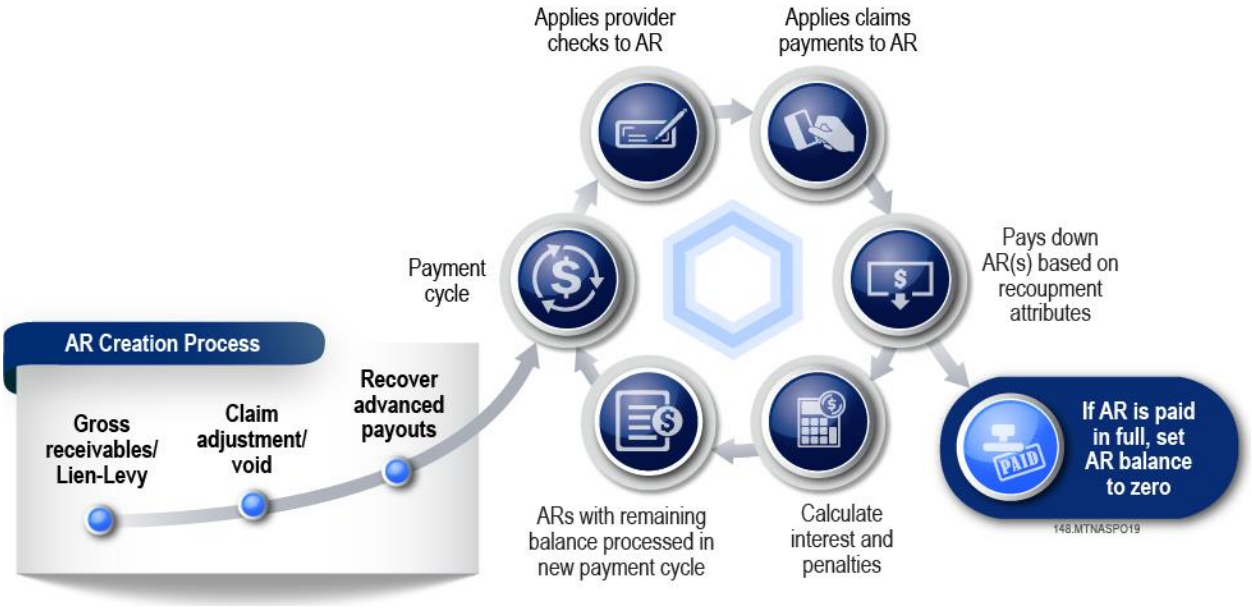

Figure 4.2.16.1-2. Recoupment in CMdS-Financial

CMdS-Financial supports the creation of receivables as a type of financial transaction to support recoupment activities. Receivables are satisfied by received payments and/or offsetting claims activity or payouts. Payments are applied according to business rules, including configurable options per receivable that limit recoupment activity.

Adjusting Receivable Balances. Adjusting a receivable based on payment received is a real-time activity in CMdS-Financial performed through our web-based user interface. All payments received are first recorded as a type of financial transaction called a *receipt*. The receipt is associated with the provider or other entity that made the payment. If the entity does not currently exist, an entry can be immediately created and later updated. You can see an example of a receipt being entered on the Financial Receipt user interface in Figure 4.2.16.1-3.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.1-3. Financial Receipt User Interface
When funds are received you enter a financial receipt transaction in CMdS-Financial. Each receipt is associated with the entity that made the payment.

Once the receipt representing the payment or collection has been created, the user can apply the payment to receivables immediately. The Financial Receipt user interface shows all the outstanding receivables for the payee. The user applies the receipt against a selected receivable and enters an amount less than or equal to both the receivable outstanding balance and the amount of the receipt as shown in Figure 4.2.16.1-4. This process is real-time, and the system shows both the receivable outstanding balance and the receipt unapplied balance reduction immediately. The user can then apply any remaining funds on the receipt to additional receivables or refund any remaining balance. The receipt includes a transaction history that identifies all the financial activity generated.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.1-4. Applying Financial Receipts to Receivables

Once a receipt has been created, the user can apply the funds to one or more receivables. The process is real-time and shows both the receipt and receivable balances reduce as funds are applied.

FSCM10

The Contractor's solution shall have the ability to automatically generate payment transactions from financial transactions, financial processes, and interfaces as defined by the Agency.

CMdS-Financial supports financial cycles as a core function that produce payments based on the accumulation of claim and financial transactions, including payouts and receivables. We support payments to providers, members, and other financial entities such as vendors. In addition to including these transactions in the normal flow of regularly scheduled financial cycles, our solution also supports expedited payment cycles that prioritize critical payments.

Entering Financial Transactions to Create Payments. In order to create payments for providers, members, or other financial entities, our solution uses a type of financial transaction we refer to as a *payout*. In addition to being created by financial processes and interfaces, payouts can be entered through our web-based user-interfaces. You enter the following to create a payout:

- Payee and related information
- Amount of the requested payment
- Time period the payment is associated with
- Category of service
- Accounting information that associates the payment to the funding sources for state accounting and federal reporting
- Notes that explain the purpose of the payment
- Attachments that represent additional information including any correspondence and backup detail

An example of a payout entered on the Financial Payout user interface can be seen in Figure 4.2.16.1-5.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.1-5. Financial Payout User Interface
CMdS-Financial supports the creation of a financial transaction type called payouts to request payments to providers, members, or other financial entities. Here is the screen used to enter payout financial transactions.

Financial Processes Create Payments. Our solution supports the bulk creation of payments to providers or other entities, similar to the provider incentives process already discussed. Other common types of payments we support include UPL/DSH payments, and the capitation and PMPM creation processes supported by our claims solution. Payments can be created with varying degrees of automation, including fully automated, depending on the calculation and review processes involved.

Interfaces for Receiving Financial Transactions. CMdS-Financial has existing inbound interfaces to receive medical/dental claims, pharmacy claims, and financial payouts. We enforce data validation by running data received via interfaces through content business rules.

FSCM11
The Contractor's solution shall assign or receive, store, maintain, and display separate accounting codes for accounts receivable and for the corresponding interest owed, based on configurable business rules.

CMdS-Financial supports a uniform approach to accounting codes across all types of financial transactions, including receivables. We use *reason codes* and *fund codes* to identify both the purpose of a transaction and any associated funding source. Reason codes and fund codes are added, configured, and maintained on our web-based user interface.

Currently, we have a single fund code associated with each receivable that allocates both the recoupment and the interest to a single accounting code. The fund code stored with the receivable is assigned in the user interface or financial process or may be received through an interface. The fund code is both maintained and displayed on the Financial Receivable web-based user interface. During the

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

implementation, we will enhance our solution to support assigning/receiving, storing, maintaining, and displaying a separate accounting code for the interest on each receivable.

FSCM12
The Contractor's solution shall support automatic and manual processes to remove balances on prepaid debit cards, based on configurable business rules.

Based on the State's Question & Answer Board response to *Attachment F, FSCM12*, we understand that Contractors are not expected to issue debit cards but depending on the participating State's financial system an interface may be required with a third-party system or vendor. Conduent is a leader in the government financial space with extensive experience issuing debit cards and processing transactions for child support, EBT, and other programs. During the implementation, we gather more specific processing and interface requirements that may be needed, and work with you to determine the best way to support this requirement within our solution.

FSCM13
The Contractor's solution shall allow for adjustments to automatically update an account receivable using configurable business rules.

CMdS-Financial will automatically satisfy an account receivable during a financial cycle, if the payment activity of the provider or financial entity results in a net payment. The financial cycle process will automatically create receipts and apply them to adjust account receivable balances based on priority and configurable business rules.

Our solution provides several options to configure recoupment processing. We can set the recoupment method to deduct a percentage of the remaining account receivable balance amount or a percentage of the claim payment, or we can establish a specific dollar amount to be deducted from payments and applied to the account receivable balance. Our solution supports variations in payment frequency, as weekly, bi-weekly, monthly, or every payment cycle. We can also specify the date that recoupment begins, providing flexibility to delay the recoupment start date, as needed. A full list of available options is in Table 4.2.16.1-2.

Table 4.2.16.1-2. Receivable Recoupment Options

Recoupment Type	How It Works
Percentage Amount	Recoup a percentage of the outstanding balance every financial cycle
Dollar Amount	Limit recoupment up to a dollar amount per financial cycle
Schedule Payments	Used to do one of the following: • Recoup normally • Delay recoupment until agreed upon date • Recoup a defined percentage each financial cycle
No Recoupment	No recoupment occurs

© 2020 Conduent State Healthcare, LLC

FSCM14

The Contractor's solution shall automatically create accounts receivable based on other financial transactions (e.g., claim adjustments, cost settlements, unsolicited refunds, advances, gross adjustment payouts) using configurable business rules.

CMdS-Financial automatically creates account receivable financial transactions as part of the financial cycle when a payee's reimbursement amount is negative. This is a normal occurrence when a payee has negative activity (claim voids or adjustments where the claim pays less than previously reimbursed) not fully offset by positive activities. Existing receivables may also reduce a payment, but not below zero. If a receivable is created from transactions that represent multiple funding sources, a separate receivable will be automatically created and configured for each funding source.

FSCM15

The Contractor's solution shall allow for authorized users to manually create accounts receivable and the associated details based on configurable business rules.

You can create a receivable in CMdS-Financial using our web-based user interface. The receivable represents funds that the payee owes to the Agency, or another entity for which the Agency is collecting. Once manually created, the receivable can be satisfied by applying funds from a receipt either through the user interface (such as a check was received) or through normal positive payment activity in the next financial cycle. Configured receivables include both configurable reasons and funding sources that represent why the receivable was created and link to the appropriate accounting codes. You can also configure the receivable to be on hold, have a delayed start, or to recoup less than the full amount each financial cycle. Notes and attachments can be used to provide further information about the requested recoupment. An example of an entered receivable is shown in Figure 4.2.16.1-6.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.1-6. Financial Receivable User Interface

Users can manually create financial receivable transactions in CMdS-Financial through the web-based user interface. Each receivable is associated with a reason, the related funding source, and the degree to which recoupment activity to satisfy the receivable should be on hold, delayed, or performed over time.

FSCM16

The Contractor's solution shall include the ability to exempt a receivable, or interest, from being used in the offset process, based on configurable business rules.

You can configure a receivable through the Financial Receivable screen to set the AR Recoupment Type to "No Recoupment." A receivable amount, including any interest amount, with the status of "No Recoupment" will not be considered for the application of net payments during the financial cycle.

FSCM17

The Contractor's solution shall automatically update the accounts receivable status and details (e.g., date of update comments, financial coding) for payments received and link any supporting documentation, based on configurable business rules.

CMdS-Financial tracks payments received as *financial receipt* transactions. From the Financial Receipt screen on our web-based user interface, you can choose the receivables to apply the funds toward until the funds are exhausted, or all receivables are satisfied. The receipt will be automatically updated in real-time to the appropriate funding source/coding and amounts based on the funding source/coding from each receivable. Our solution supports notes and attachments for each configuration item, including receivables and receipts.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM18
The Contractor's solution shall have the ability to have different authorization and approval processes (e.g., single person approval or multiple person approval) for different financial transactions (e.g., update Payee information, journals, Health Insurance Premium Program (HIPP) payments) based on configurable business rules.

CMdS-Financial supports role-based access within our web-based user interface. Our recommended best practice is to configure groups representing logical collections of roles. We then assign users to those groups. With this capability, we can support requests for separate security profiles, and help mitigate the risk of fraud or waste associated with user access through strict access protocols. Through this capability, we can separate authority and restrict access; for example, a user cannot issue a payment to a payee they created or updated. Our solution also supports a multi-user approval for payout transactions where one user enters the payout and then a user with a separate security profile provides approval. Unapproved payouts will not be considered by the financial cycle.

FSCM19
The Contractor's solution shall provide financial audit controls meeting generally accepted accounting principles (GAAP) for governmental proprietary funds.

Our financial procedures are defined and documented in a detailed procedure manual. We routinely review all procedures, ensuring users have access to the most current information available. Our procedures are aligned with GAAP for government proprietary funds and include internal controls that support the following:

- Receipt and handling of payments received in the mailroom and/or lockbox
- Processing financial transactions, payments, and refunds in our solution, as well as procedures for resolving errors and issues
- Financial file scheduling and interface file production, including balancing payment cycle files
- Bank reconciliation activities
- Submitting payment files to Agency payment systems or the financial institution
- Maintaining correct fund code, budget, and other accounting information by fund source and fiscal year
- Coordinating activities with state financial units and all vendors responsible for handling finances on behalf of the State
- Maintaining bank accounts, including zero-balance bank accounts
- Supporting stakeholders when documentation or assistance is needed with financial processes or information

Financial services are controlled by strict processes due to the sensitivity of management of state and federal funds. We enforce separation of duties based upon issuance and receipt of financial data. Our internal QA staff monitors and audits functions of the financial services unit to confirm we follow our approved processes. We take immediate action to define the best course of action to correct issues we identify. We send appropriate notifications and develop a corrective action plan. Actions include employee performance coaching, additional training, and, if necessary, modifications to procedures or documentation.

© 2020 Conduent State Healthcare, LLC

In addition to our formal QA and audit processes, our leadership staff monitor the day-to-day performance of the team, including adhering to service level agreements, reviewing relevant dashboards and reports supporting controls, and coaching support staff as they perform their job functions.

FSCM20
The Contractor's solution shall allow for limiting payment amount based on single or multiple factors (e.g., total dollar amount, timeframe, date) per configurable business rules. These rules can be overridden, or the payments released without changing the factors, by authorized user.

CMdS-Financial supports very powerful and configurable criteria for controlling payments based on funding source and other criteria. Our solution includes a capability called a *fiscal pend*, a function that limits the transactions considered during the payment cycle. Based on user entered fiscal pend dates, the fiscal pend criteria can span multiple payment cycles if required. This process can connect funding sources to a budget, and thereby limit payments based on budget limits.

Configurable Budgets. CMdS-Financial allows authorized users to configure budget information for each program using the web-based user interface as presented in Figure 4.2.16.1-7. Our budget structure supports the co-existence of Title XIX, waiver programs, and other Agency programs. To limit payments by budget, a budget amount is set up for a fund code, which accumulates expenditures as payments are processed.

Figure 4.2.16.1-7. Budget Data User Interface
Our solution tracks the budget amounts and effective dates, fund codes, funding sources, and share allocation percentages.

During the payment cycle, CMdS-Financial calculates the share allocations and updates the budget expenditures and the claim FMAP. When expenditures exceed the budgeted amount, our solution suspends payments until the Agency authorizes additional funding.

Conduent Proprietary Information

FSCM21
The Contractor's solution shall have the ability for authorized users to adjust processing windows for specific transactions (e.g., journals, vouchers, deposits) and different year end processing (e.g. state fiscal year, federal fiscal year, calendar year) based on configurable business rules.

The CMdS-Financial solution includes configurable system parameters that establish federal and state fiscal year periods. Our solution supports configuring these parameters to create different fiscal year beginning and ending timeframes to be applied for specific processing as defined by the Agency.

The payment cycle in CMdS-Financial is parameter-driven and can be customized for specific financial cycles as needed. Our fiscal pend functionality provides the ability to include or exclude transaction types within a financial cycle based on configurable business rules.

FSCM22
The Contractor's solution shall have the ability to hold specific transactions during processing for State Fiscal Year End, Federal Fiscal Year End, and Calendar Year End using configurable business rules.

CMdS-Financial includes configurable rules in the fiscal pend user interface to identify criteria to limit, delay, or hold payments as seen in Figure 4.2.16.1-8. During the payment cycle, our solution will hold, or release claims based on entered criteria. Claims pended in a payment cycle will be processed again in the next payment cycle and released for payment based on the fiscal pend criteria. Fiscal pend processing usually occurs at year-end when limited funds may be available. Data related to fiscal pend activity is available through the CMdS-Insights module.

Figure 4.2.16.1-8. Fiscal Pend User Interface
Users can enter fiscal pend requests in CMdS-Financial through the web-based user interface. Standard fields are available for configuration which may then be extended by mapsets that allow complex and/or logic and access to a larger set of data elements.

Provider payments can be put on hold based on provider type, provider ID, claim type, billing taxonomy, procedure code, modifiers, benefit plan, category of service, cap amount, or a configurable mapset. A fiscal pend mapset provides the user flexibility to pend claims based on configurable rules. The user sets up fiscal pend criteria using begin and end dates that are used by the payment cycle. Financial transactions, such as payouts, can be put on hold as specified to meet fiscal year end processing requirements. The fiscal pend status allows claims to process but suspends the claims from payment until the fiscal pend hold is removed or expires.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM23
The Contractor's solution shall automatically setup recoupments based on payment transaction type (e.g., advance payments, manual check) per configurable business rules.

CMdS-Financial has specific financial reasons used to delineate payouts that are designated for recoupment, including advance payments. Once the payout financial transaction is approved, an offsetting receivable is automatically created that matches the payee and funding source of the payout. To delay immediate full recoupment during the same financial cycle, you must edit the receivable to set the recoupment parameters.

FSCM24
The Contractor's solution shall have the ability to manually create and schedule adjustment requests to financial transactions, based on configurable business rules.

CMdS-Financial supports the capability to perform scheduled manual updates as required for the project. We perform manual adjustments to financial transactions in CMdS-Financial using the user interface and data updates through SQL when mass updates are required. We prepare and test updates in a non-production environment, followed by using our scheduler to select a specific date and time to execute the updates in production.

FSCM25
The Contractor's solution shall receive, store, maintain, and display Federal Match Rate data.

CMdS-Financial stores the matching rates within the budget data configuration. As shown in Figure 4.2.16.1-9, the user can enter or update matching rates per time period and per funding source using our web-based user interface. Once entered, the match rate will be displayed on the budget screen. In addition to the Federal Match Rate, we also capture the state share and any applicable county or other matching fund contributions.

Figure 4.2.16.1-9. Matching Rates in Budgets
Users can enter matching rates for each funding source for each time period through the web-based user interface on the Budget screen.

FSCM26
The Contractor's solution shall automatically generate journal entries from interfaces based on configurable business rules.

When we receive journal entries from interfaces, we create financial transactions that will have a corresponding impact on the providers payment. For a credit to the journal, we will create a payout financial transaction. For a debit, we will create a receivable financial transaction. Each financial transaction will have appropriate financial reasons and funding sources attached to support state accounting and federal reporting. During the payment cycle, as journal entries are created to send to the state accounting system, we also create journal entries from any created payouts or receivables and include them in the journal.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM27
The Contractor's solution shall support a process for importing (with second-party review and approval) journal information from a standardized Microsoft Excel spreadsheet to create journal entries based on configurable business rules.

Based on our approach to creating journal entries from interfaces described in our response to ID FSCM26, we take journal information from standardized Microsoft Excel spreadsheets and create payouts and receivables from credits and debits respectively. Loading financial transactions from files is a common task we perform by transforming the data into the data elements used to store data in CMdS-Financial and inserting appropriate rows into database tables. All financial transactions are subject to the second-party review and approval processes as described in our response to ID FSCM153, page 4.2-802.

FSCM28
The Contractor's solution shall allow for processing of "one time payments" based on configurable business rules. Payees receiving one time payments will not be required to have Tax ID and a unique Payee ID will not be created for them.

CMdS-Financial does not require a tax ID to make a one-time payment. While our solution does depend on having, at a minimum, an internally generated payee identifier to create a payment, the identifier does not have to be unique for a specific one-time payment nor does the payee have to be aware of the ID.

FSCM29
The Contractor's solution shall have the ability to combine payments under one tax ID per Department or have separate payments based on configurable business rules.

Our solution supports the ability to have providers participating in multiple programs from different departments with separate funding sources. We recommend avoiding duplicate and multiple registrations of payees and our solution supports this approach. CMdS-Financial can crosswalk to multiple payee identifiers and can be configured to disallow tax ID sharing. We support a single payment per payee that has a unique tax ID, and our solution tracks the funding back to the individual department. In the event multiple payments are required per department, our solution has the capability to issue separate payments through configurable approaches. For 1099 reporting, multiple payees with the same tax ID will be reported on a single 1099.

FSCM30
The Contractor's solution shall have a method for alerting appropriate State staff when significant change occurs in daily, weekly, or other time period payments, based on configurable business rules.

CMdS-Financial utilizes our highly configurable and flexible workflow tool to send notifications and alerts. When a user initially logs into CMdS-Financial, the home page will display alerts and notifications so that each user is aware of any activities assigned to them based on the configured workflows, along with important notifications intended for all users. During the implementation, we work with you to configure the workflows and alerts to support the business needs outlined in the RFP.

© 2020 Conduent State Healthcare, LLC

FSCM31
The Contractor's solution shall process and reconcile payments (e.g., original payment, replacements, voids) by account coding (e.g., fund code, division, speed chart, payee ID, warrants) at periodic intervals based on configurable business rules.

CMdS-Financial includes an automated balancing function to verify that transaction counts and dollar amounts remain in balance throughout the financial cycle, and that the daily adjudication totals balance with the weekly payment cycle. During the financial cycle, we link claims and other types of financial transactions (payouts and receivables) to a remittance advice number that represents the provider's payment (warrant) during the financial cycle.

During the payment cycle, we automatically reconcile the payments by funding source and time period to the appropriate budget, reconcile the totals, and update the budget expenditures. The expenditure totals are available on the budget screen.

FSCM32
The Contractor's solution shall receive, store, maintain, and display returned payment information at the Individual Payee and/or group Payee level based on configurable business rules.

Returned payments are processed and stored in CMdS-Financial as a receipt financial transaction with a financial reason code specific to a check return. You can search for returned checks on our financial search screen by selecting the reason code in the filter criteria.

FSCM33
The Contractor's solution shall have the ability to use multiple Agency lockboxes for receiving checks and follow a financially acceptable process for batching, balancing, and dispositioning the checks as defined by the Agency.

CMdS-Financial has the capability to track bank accounts used to make payments. Bank accounts are added on the add bank account screen as shown in Figure 4.2.16.1-10. We support capturing information associated to the account, including multiple lockboxes.

Figure 4.2.16.1-10. Support for Tracking Multiple Lockboxes
When entering the bank account information for the account used to disburse payments, the user can also add all the lockboxes in use.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Our solution supports a lockbox in a similar workflow to how a physically present check would be processed. Instead of a physical check, you process based on the images provided by each lockbox financial institution. Checks received from the lockboxes are entered in CMdS-Financial as a receipt financial transaction and can be applied to receivables immediately or later. Our solution supports entering the lockbox number in the receipt as seen in Figure 4.2.16.1-11. Each time funds are applied as a receivable, the funds applied will inherit the funding and accounting information from the receivable. Images received from the lockbox service can be stored in ECM as an attachment to the receipt.

Figure 4.2.16.1-11. Entering the Lockbox Number on Financial Receipts
The Receipt screen supports the entry of a lockbox number to indicate which lockbox received the check.

FSCM34
The Contractor's solution shall have the ability to automatically validate that all Payees receiving incentive payments have met all the requirements for the incentive, based on configurable business rules.

We discussed in our response to ID FSCM08 that we use the reporting capabilities of our CMdS-Insights solution to identify payees eligible for incentive payments and to calculate those payments. By using a structured tool that performs the filtering and calculations we mitigate the risk of error. Based on specific incentive payments that you require we will produce validation reports.

FSCM35
The Contractor's solution shall provide the ability to perform both automated and manual audits of designated payment types (e.g., lump sum, incentive) and take appropriate action (e.g., reverse, no change, route) per Agency defined criteria. Manual review and disposition will occur online.

CMdS-Claims utilizes our highly configurable and flexible workflow tool to send notifications and alerts. When a user initially logs into CMdS-Financial, the home page will display the alerts and notifications so that each user is aware of any activities assigned to them based on the configured workflows, along with important general notifications. During the implementation we work with you to determine what types of payments you would want to be alerted about. Once alerted a user can review the linked transaction and

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

either dismiss the alert, remove the approval so that the payout does not happen, or route the alert to another user for review.

FSCM36
The Contractor's solution shall calculate and charge simple or complex interest on unpaid or partially paid accounts receivable based on configurable business rules and allow for exceptions (e.g., waive interest, change the start date, pause interest) as defined by the Agency.

CMdS-Financial performs an interest calculation on outstanding accounts receivable balances that allows for configurable interest rates that can vary based on the age of the receivable. Our solution supports specific interest rates for receivables that have aged 30, 60, 90, or 120 plus days. We also support the application of escalating penalties for aging receivables based on the same timeframes. Interest and penalties can be turned on or off per receivable as seen in Figure 4.2.16.1-12. We default the settings in our solutions based on your policies.

Figure 4.2.16.1-12. Turning On or Off Interest on Receivables
In the configuration for each receivable you can control whether the interest and penalties are turned on.

Using the user interface an authorized user can waive interest by turning the indicator off and setting the value to $0. We do not currently pause interest or delay the start of charging interest. We will work with you during the implementation to understand the details around these requirements and enhance our solution.

FSCM37
The Contractor's solution shall support multiple accounts receivable for a Payer and have a process for prioritizing and applying receipts to outstanding balances as defined by the Agency. If the system has accounts receivable for multiple Entities, then the prioritization will be separate for each Entity.

CMdS-Financial supports the creation of multiple account receivables either manually in the user interface, through interfaces, or created in the financial cycle. Our solution includes automatic prioritization criteria to select the order in which funds from net payments are applied to receivables. This prioritization process first applies receivables that are liens/levies followed by other receivables oldest to newest. Each payee's receivables are separately prioritized. For funds being applied to a receivable by a user when a check is received, the user selects the appropriate receivable based on documentation received with the check, and applicable policies regarding receivable priorities.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM38
The Contractor's solution shall allow authorized users to override the prioritization order of accounts receivable as defined by the Agency.

While CMdS-Financial includes flexible criteria to modify default processing of receivables, our solution requires a change to fully support a user-driven prioritization of accounts receivable funds being applied automatically during the financial cycle. During the implementation, we would like to better understand your goals with this requirement and discuss the current automatic prioritization described in our response to ID FSCM37. If our current capability cannot satisfy your needs, we will discuss enhancing the prioritization capabilities.

FSCM39
The Contractor's solution shall have the ability to automatically set or change the collection status of an accounts receivable based on configurable business rules.

When processing financial cycles, CMdS-Financial will perform multiple actions on receivables controlled through configuration. Based on the hierarchy used by the system to order receivables, the financial cycle will attempt to satisfy receivables in order. Based on the recoupment type configured on the receivable, recoupment frequency, and the funds available to apply, the receivable may be skipped or only partially satisfied. The options to slow or delay recoupment are listed in Table 4.2.16.1-3.

Table 4.2.16.1-3. Receivable Recoupment Options

Recoupment Type	How It Works
Percentage Amount	Recoup a percentage of the outstanding balance every financial cycle
Dollar Amount	Limit recoupment up to a dollar amount per financial cycle
Schedule Payments	Used to do one of the following: • Recoup normally • Delay recoupment until agreed upon date • Recoup a defined percentage each financial cycle
No Recoupment	No recoupment occurs

If a receivable is subject to interest and/or penalties, amounts are automatically calculated and applied to the receivable based on configured parameters, including any configured schedule regarding the application of such interest and penalties.

FSCM40
The Contractor's solution shall provide the ability to apply received payments from a different payee (e.g. NPI, Provider ID) than is associated to the accounts receivable, based on configurable business rules.

CMdS-Financial supports applying a payment from a different payee than the owner of the receivable through the following process:

1. Log the payment as a financial receipt transaction by the payee that submitted the payment
2. Transfer the receivable from the payee that owns the receivable to the payee that submitted the payment

© 2020 Conduent State Healthcare, LLC

3. Apply the payment from the receipt to the receivable
4. Transfer the receivable back to the original owner

If there are funds remaining on the receipt, they can then be applied to additional receivables attached to the payee that submitted the payment.

FSCM41
The Contractor's solution shall have the ability to create work queues for different aging levels (e.g., 30, 60, 90 day) for Accounts Receivable based on configurable business rules.

Our workflow tool supports grouping work within CMdS modules into queues. Users can see the work available in each queue including their current assignments as seen in Figure 4.2.16.1-13. We can configure queues according to policies and desired work groupings, including based on aging levels for account receivables.

Figure 4.2.16.1-13. Workflow Status at a Glance
The splash page provides the user with a summary of current events and information. The queues can be seen under the 'Workflows' grouping.

FSCM42
The Contractor's solution shall have the ability to provide Payees flexible payment capabilities (e.g., one time, scheduled, recurring) via the online portal as defined by the Agency.

Based on your responses to other payment-related questions, we expect to connect to another entity to process these payments. During the implementation we will enhance our portal to collect the required payment information and integrate with the other entity. Payments collected through the portal will be recorded as receipt financial transactions.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM43
The Contractor's solution shall automatically initiate or generate statements reflecting all transactions applied to an accounts receivable on a regular timeframe (e.g., weekly, monthly) as defined by the Agency. The Contractor will display the statement via the portal and submit the notice via the Payees' preferred notification method.

CMdS-Financial provides detailed receivable information on the printed remittance statements we publish to the portal. Figure 4.2.16.1-14 shows an example.

Figure 4.2.16.1-14. Receivable Detail on Portal
Our remittance statements provide details on receivables, including transaction numbers, financial reasons, dates, balances, and activity.

FSCM44
The Contractor's solution shall automatically generate alerts to specified Entities (e.g., Payees, providers) for financial activities (e.g., delinquent accounts receivable, contract utilization thresholds, accounts receivables with no activity), based on configurable business rules.

CMdS utilizes our highly configurable and flexible workflow tool to send notifications and alerts. When a user initially logs into the system, the home page displays the alerts and notifications so that each user is aware of any activities assigned to them based on the configured workflows. During the implementation, we work with you to configure the workflows and alerts to support the business needs outlined in the RFP.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM45

The Contractor's solution shall automatically initiate or generate any notices to support financial processes
(e.g., Accounts Receivable establishment notices, delinquency notices, increasing demand letters when accounts receivable are not satisfied, informational insert, hospitals for disproportionate share payment notices), based on configurable business rules. The Contractor will display the notice via the portal and submit the notice via the Payees' preferred notification method.

CMdS-Financial has an existing library of letters that are generated in the course of financial processing. As a standard practice for implementation, we'll work with you to revise the letters to be sent and the content of the letters. Our letters are generated from customizable templates that can be edited in a form that resembles the actual appearance of the letter when viewed/printed. Our standard library of letters includes:

- 1099 Letter
- Unredeemed Warrants 30 Days Overdue
- Unredeemed Warrants 60 Days Overdue
- Random EOMB Letter
- Targeted EOMB Letter
- Recoupment Notice with Appeal Rights
- Letters to Providers with Outstanding A/R - 30/60/90/120 days past dues

We generate our notices into a PDF format, which is suitable for printing and online viewing. We send the letter data to be posted on the provider portal as well as submitted according to payee communication preferences.

FSCM46

The Contractor's solution shall provide comprehensive search capabilities that allow authorized users to search within and across transaction types on a combination of fields (e.g., date range, account code, organization, subclass, employer/plan name, identification number, policy number, etc.) as defined by the Agency.

CMdS-Financial provides search screens for receipts, receivables, payouts, and financial entities. For each component, you can search by the financial control number (FCN), financial reason, various financial criteria, or by payee ID. If a single result is returned, the details for that result are displayed. Otherwise a search grid appears, and you can click on a result, sort the results or further modify their search criteria and run the search again. In addition to searching through our user interfaces, we also provide access to additional search criteria from our data model in CMdS-Insights.

FSCM47

The Contractor's solution shall allow for one payment to be applied to multiple accounts receivable for one or more Payees, based on configurable business rules (e.g. recouping federal funds first and/or applying funds by dollar amount or percentage).

Payments can be applied to multiple receivables in CMdS-Financial. A user can do this from the user interface, or our solution will do so automatically with net payments during the financial cycle. As described in our response to ID FSCM40, you can apply a payment to a receivable assigned to a different

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

payee using temporary transfers of the receivable. CMdS-Financial includes automatic prioritization of receivables to favor lien/levy and then oldest receivables. You can configure receivables to put them on hold or slow/limit recoupment activities.

FSCM48
The Contractor's solution shall assign or receive, store, maintain, and display account coding information (e.g., FMAP, program code, division, speed chart, voucher type) at the header and line level for every claim and financial transaction, regardless of how the transaction was created (e.g., automatically, manually, upload from spreadsheet, interface) based on configurable business rules. The Contractor solution shall provide this information to the Agency Data Warehouse to support budget tracking and allocations, such that details can be pulled when requested.

Fund code assignment within CMdS-Financial provides the ability to associate, track, and reconcile data that relates expenditures to funding sources. Fund codes are determined at the header level or the line level, depending on payment type. During claims adjudication and financial transaction processing fund codes are applied that link to account coding information in the budget. This stamping includes all transactions, regardless of source. We provide all the transaction processing and budget data captured in our solution to the Agency Data Warehouse.

FSCM49
The Contractor's solution shall translate incoming transaction information into consistent state defined account coding based on configurable business rules. Information needed to trace back to the source system must be maintained.

CMdS-Financial uses configurable fund codes to help us manage financial transaction information, including tracking expenditures to funding sources. Our solution assigns fund codes to incoming transactions, either based on the specific interface or based on data received in interface transactions. These fund codes will link the incoming transaction with state-defined account coding as seen in Figure 4.2.16.1-15.

Figure 4.2.16.1-15. Fund Code Configuration
CMdS-Financial uses configurable fund codes to link transactions to accounting information and funding sources.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM50
The Contractor's solution shall indicate the date, time, reason and coding of any validation failure from an external Entity as defined by the Agency.

CMdS has a modern, flexible API-based architecture used for interfacing with other systems through our Digital Hub, which provides a single point of exchange for all interfaces. This process is responsible for both inbound and outbound processes. We capture all interface validation errors in an error table. We support capturing the type of error (reason), date and time, type of interface, and the error text.

FSCM51
The Contractor's solution shall allow authorized users to resubmit corrections to transactions with validation errors from an external Entity as defined by the Agency.

As a standard practice when supporting interfaces, Conduent attempts to report errors back to the source so that we can obtain a properly authorized correction. Reporting errors also serves the additional benefit of building awareness to prevent future similar reoccurrences. For batch interfaces, authorized users can re-run jobs to process corrected transactions. For real-time interfaces, the interface partner can send a correction. When dealing with time sensitive issues, or where impractical to have the data corrected and re-sent, the failed transaction can be entered using our web-based user interface.

FSCM52
The Contractor's solution shall include comprehensive edits to identify duplicate Payees and have an automatic and manual consolidation process, based on configurable business rules.

Our recommended approach is centered around prevention. We recommend simply not allowing duplicate combinations using configurable settings, such as not allowing payees with a duplicate tax ID. We can prevent other combinations of duplicate data that violate your policy. During the implementation, we look forward to discussing our options around prevention versus detection and putting in place consolidation processes where required.

FSCM53
The Contractor's solution shall allow authorized users to maintain, modify and view financial transaction types and account codes.

Financial reasons can be viewed, maintained, and modified through our online data dictionary as seen in Figure 4.2.16.1-16. These financial reasons are used throughout our standard transaction types – payouts, receipts, and receivables – to customize them to different types of financial transactions. We configure account codes through fund codes, a configurable item applied to transactions during processing.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.1-16. Financial Reason Codes
CMdS-Financial includes an online data dictionary that supports the definition of valid values used by our solution. Here you can see examples of financial reason valid values.

FSCM54
The Contractor's solution shall provide an accounting structure (e.g., chart of accounts, program) that is compatible with the accounting structure used by an external entity. Additionally, the solution shall translate and code outgoing transactions into standardized accounting codes using configurable business rules.

As a best practice, we recommend using your accounting codes to define our fund codes in CMdS-Financial. This approach avoids translation and allows you to see familiar information on our user interfaces and reports.

FSCM55
The Contractor's solution shall display financial side-by-side comparisons (e.g., expenditures by program, receipts) on a year to year basis for state fiscal year, calendar year, federal fiscal year, and rolling year as defined by the Agency.

In the CMdS-Financial user interface we have a claim financial inquiry that provides a summary of payments specific to a provider made over a period going back four years; however, the inquiry does not display information side-by-side or program level information. We have several budget / expenditure reports that could serve as the starting point for this effort. We look forward to discussing this with you during the implementation to determine what type of report or enhancement is appropriate to satisfy the requirement.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM56
The Contractor's solution shall include comprehensive edits (e.g. duplicate checking logic, duplicate check numbers) of financial transactions based on configurable business rules.

CMdS-Financial edits for duplicates in several ways. Each financial transaction is assigned a unique identifier to ensure duplicate entries are not made, either from the user interface or through file-based interfaces. There are edits to ensure that a check that has already been issued is not reissued as a duplicate, helping to prevent duplicate payouts. Payout transactions require review by an authorized approver, an additional security step designed to prevent duplicate payouts.

FSCM57
The Contractor's solution shall allow authorized users drill down capability to see all details linked to a specific financial transaction (e.g., claims/claim lines, per Member per month, accounts receivable) as defined by the Agency

We link financial transactions throughout CMdS-Financial to allow us to connect related transactions. Some examples include:

- Receipts are linked to the appropriate receivables
- Receivables created by the financial cycle are linked to the claims that created them and the claims that satisfy them
- Remittance advice numbers represent payments and link to the transactions included in the payment

This linking helps in both the web-based user interface, where those links are used to drill down into related records, and in CMdS-Insights reporting.

FSCM58
The Contractor's solution shall automate a balancing process at different levels (e.g., payment level, department level, financial cycle level) to ensure the total amount paid is equal to the payment for claims plus or minus any financial transactions that were applied to the payment on a scheduled basis (e.g., daily, weekly) as defined by the Agency.

CMdS-Financial is designed with balancing steps during and after every payment cycle so any accounting period interval will be in balance. The solution includes an automated balancing function to verify that transaction counts and dollar amounts remain in balance throughout the payment cycle, and that the daily adjudication processes balance with the weekly payment cycle. Our production staff are on call and ready to resolve discrepancies in transaction counts or payment amounts.

As part of the balancing process, data is associated with an original date of service as well as the current date of payment. Retrospective payment adjustments are recorded by date of service to appropriately affect service totals. The current payment date that affects only totals for the next closing cycle and does not affect prior accounting cycles. Several reports support balancing processes:

- Reconciliation Balancing
- Unredeemed Warrant
- Weekly Cumulative Voided Payment
- Deposit and Receipt Reports
- Preliminary Payment Summary Report
- Final Payment Summary Report
- Operational Final Payment Register Report

© 2020 Conduent State Healthcare, LLC

FSCM59
The Contractor's solution shall generate a financial transaction to refund the federal share of overpayments within federal guidelines or as defined by the Agency.

Providers are obligated to report overpayments within 60 days of discovery, or they become subject to the False Claims Act. Should an unrecoverable overpayment occur, and the Agency must return federal funds, we enter a financial transaction to document the payment and assign to the proper budget and accounting codes. This data is then available for federal reporting.

FSCM60
The Contractor's solution shall include enough detail to display any offsets to the payment (e.g., each discrete accounts receivable, discrete cash receipts) on the remittance advice as defined by the Agency.

The CMdS-Financial payment cycle identifies any funds a payee owes and offsets the payee's payable funds toward the outstanding receivables. The remittance advice displays all financial transactions received and processed by CMdS-Financial for that week along with recoupments and any other related information. The Summary section displays any offsets for that week as seen in Figure 4.2.16.1-17.

Figure 4.2.16.1-17. Remittance Advice Summary
CMdS-Financial provides a clear remittance advice summary which helps the provider to understand the payments for the week.

FSCM61
The Contractor's solution shall have the ability to automate the posting of recoupments from other systems, based on configurable business rules.

To facilitate the automation of recoupment posting from other systems, CMdS-Financial has an API based architecture that allows for ready integration with other systems, and we work with you during implementation to address your specific needs about automating the posting of recoupments from other systems.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM62
The Contractor's solution shall allow for more than one accounting code to be assigned to each header or detail level of a claim, managed care or financial transaction as defined by the Agency.

The CMdS-Financial module assigns fund codes at the header or at the line, depending on the claim type being processed. A line priced claim can have different fund codes based on the data elements on the claim lines, for example claim type, category of service, member details, and provider details. We look forward to discussing the scenarios requiring more than one accounting code to come up with an approach that meets your business need.

FSCM63
The Contractor's solution shall provide an online mechanism which displays real time Aging of the accounts receivable providing both detailed (e.g., Name) and summary information as defined by the Agency.

When you search for receivable financial transactions in CMdS-Financial the results search grid includes the created date, which can be both filtered for and sorted by the age of the receivable. We also have configurable capabilities in our workflow tool to organize queues of work according to your criteria, which can include the age of the receivable.

FSCM64
The Contractor's solution shall provide an online mechanism which displays real time Accounts Receivable Collection Activity providing both detailed (e.g., Payee Type) and summary information of collection activity as defined by the Agency.

Our workflow tool provides a web-based online mechanism that displays real-time activity, including accounts receivable collection activity. Figure 4.2.16.1-18 shows an example of totals with a graph showing operational activity under the *Activity Summary* section.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.1-18. Workflow Status at a Glance
The splash page supports statistical counts and charts showing operational trends and totals.

FSCM65
The Contractor's solution shall have processes to suspend, terminate, withhold, or continue processing payments to Providers under investigation as defined by the Agency.

CMdS-Financial includes configurable rules in the fiscal pend user interface to identify criteria to limit, delay, or hold payments as seen in Figure 4.2.16.1-19. When the payment cycle runs, our solution will hold, or releases claims based on entered criteria. Data related to fiscal pend activity is available through the CMdS-Insights module.

Figure 4.2.16.1-19. Fiscal Pend User Interface
Users can enter fiscal pend requests in CMdS-Financial through the web-based user interface. Standard fields are available for configuration which may then be extended by mapsets that allow complex 'and/or' logic and access to a larger set of data elements.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Provider payments can be put on hold based on provider type, provider ID, claim type, billing taxonomy, procedure code, modifiers, benefit plan, category of service, cap amount, or a configurable mapset. A fiscal pend mapset provides the user flexibility to pend claims based on configurable rules. The user sets up fiscal pend criteria using begin and end dates that are used by the payment cycle. Financial transactions, such as payouts, can be put on hold as specified. The fiscal pend status allows claims to process but suspends the claims from payment until the hold is removed or expired.

In addition to the fiscal pend process, CMdS supports editing functionality associated with placing a provider on review. This status allows claims to process but suspends the claims from payment until the hold is removed. Once removed, the system releases suspended claims for payment processing.

FSCM66
The Contractor's solution shall provide the ability to drill down to any financial transaction that has been linked to a specific program integrity transaction as defined by the Agency.

Financial transactions related to program integrity activities can be linked to assigned specific configured financial reasons. Users can drill down to financial transactions using searches through our web-based user interface, and via reporting with CMdS-Insights.

FSCM67
The Contractor's solution shall allow for the collection and maintenance of recoveries that link to the SURS recovery solution as defined by the Agency.

Whether created automatically by the voiding of claims or manually upon request, CMdS-Financial supports assigning an appropriate financial reason that labels the receivable as a SURS recovery. New financial reasons are added through configuration in our solution.

FSCM68
The Contractor's solution shall group payments as defined by the Agency (e.g., by Payee, Department) to reduce the number of transactions issued.

CMdS-Financial automatically groups all payments for the same payee, regardless of funding source. Payments can be made up from multiple sources, and our solution tracks the funds that belong to each funding source and accounting code. We look forward to discussing this requirement further during the implementation to understand more about the types of grouping required.

FSCM69
The Contractor's solution shall provide the ability to enter financial transactions in real-time as defined by the Agency.

CMdS-Financial includes a web-based user interface that fully supports the entry of all supported transaction types online, including:

- Payouts
- Receipts
- Receivables
- Fiscal pend criteria
- 1099 Correction

© 2020 Conduent State Healthcare, LLC

All transactions entered are immediately saved and become available for viewing and searching. Transactions that involve immediate actions, such as applying funds to a receivable based on a received payment, take effect immediately.

FSCM70
The Contractor's solution shall provide the ability to copy a financial transaction (e.g., adjustment) so that users can edit selected information without having to re-enter all the information as defined by the Agency.

CMdS-Financial allows you to adjust a receivable transaction using the accounts receivable user interface. Our solution copies the original accounts receivable information when the user performs any of the adjustment actions shown in Figure 4.2.16.1-20.

Figure 4.2.16.1-20. Receivable Financial Transaction Adjustment
Our solution copies original financial transaction information to the adjustment. This capability is used for changing the amounts, writing off the receivable, etc.

We provide a similar capability for receipt financial transactions when adjusting, reversing, or returning/voiding checks as shown in Figure 4.2.16.1-21.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.1-21. Receipt Financial Transaction Adjustment
Our solution copies original financial transaction information to the adjustment. This capability is used for returning checks, adjustment receipt amounts, etc.

FSCM71
The Contractor's solution shall have the ability to transfer payment information to an Entity for producing payments (e.g., warrant, check, EFT, journal, prepaid debit card, EBT card) as defined by the Agency.

CMdS-Financial generates a custom interface file containing payment information for warrants, checks, EFTs, and the payment methods listed in this requirement. The warrant interface file contains information such as warrant type, payment type, payment amount, payment date, and payee ID, name, and address, all of which enable us to track the payment type and other related payment information to meet the needs of the State. The EFT file is generated in standard NACHA file format. The interface file is customizable through configurable business rules.

We send data files to the Agency and other entities as needed to facilitate payments. Whether the transmission of financial data is to a bank or to the Agency for third-party payment, we provide data interfaces that facilitate these payments.

FSCM72
The Contractor's solution shall allow multiple adjustments for each financial transaction as defined by the Agency.

While some types of financial transactions may logically stop after an adjustment (e.g., a check can only be voided once), there is no limit to the number of times you can adjust financial transactions as described in our response to ID FSCM70.

FSCM73
The Contractor's solution shall allow for the transfer of an accounts receivable when Payees go through change of ownership or other legal restructuring as defined by the Agency.

CMdS-Financial supports the transfer of an accounts receivable to another payee, including for change of ownership or other legal restructuring. Our solution creates a new financial claim transaction with a new

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FCN and TCN for the "Transfer To" entity. We can see the transfer details in history section of the original AR as shown in Figure 4.2.16.1-22.

Figure 4.2.16.1-22. Account Receivable Transfer
Enter the reason and new owner information to transfer an accounts receivable.

FSCM74
The Contractor's solution shall have the ability to manually or automatically identify, generate, and process refunds on a flexible schedule (e.g., specific day, date of the month, once a specific dollar amount has been reached) as defined by the Agency.

Our web-based user interface allows you to search for receipts for unapplied funds. Unapplied funds can be applied to an open AR or a refund can be issued. To generate the refund, you enter a payout from the receipt. The payout transaction is the request to issue the refund.

We can issue any payment through the payment cycle and can disburse refunds to payees at the Agency's direction. We can also hold refunds until a specific date or schedule using our fiscal pend capability. For payments issued outside our solution (i.e. manual check) but recorded within, the refunds can be processed at any time and are recorded with an appropriate financial reason so that our solution simply records the payment was made without issuing a second payment. For funds to be issued automatically but on a separate schedule than the regular financial cycle we can use our fiscal pend capability to limit the payment cycle to only those refunds.

We understand there may be circumstances in which you are trying to accelerate a refund, or you may wish to limit the frequency of refunds in order allow for additional scrutiny. Additionally, you may want to manage the timing of the payment of refunds based on meeting a certain dollar threshold. We have some different options to accomplish these objectives depending on the goals of the Agency. We look forward to discussing this requirement, and the options available, during the implementation.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM75
The Contractor's solution shall allow a single or group of financial transactions and related documents (e.g. statements, remittance advice, payments) to be held based on configurable business rules(e.g., member on review, provider on review, span dates).

In our response to ID FSCM65, we addressed our ability to use fiscal pend to hold payments or to place a provider/member under review to suspend payments or transactions. Currently the print-ready remittance advice would be created, but this can be made to be a configurable option if needed.

FSCM76
The Contractor's solution shall have the ability to deny, or cutback, the financial transaction (e.g. fund availability, contracted amounts) and reason will be noted on the invoice or remittance advice as defined by the Agency.

Our budget capability allows CMdS-Financial to limit expenditures according to your fund availability. Our solution will automatically fiscal pend transactions in the payment cycle to avoid exceeding the cap. We do not currently cutback payout financial transactions in this scenario, but we look forward to discussing this requirement during the implementation and determining the best approach to meet your need.

FSCM77
The Contractor's solution shall provide the ability to receive, record, and process all payments received for drug rebate in accordance with State and Federal requirements as defined by the Agency.

CMdS-Financial treats drug rebate payments just as another type of receivable financial transaction to be entered and satisfied by payments. The invoice amounts would be entered or loaded as receivables tied to the appropriate funding source, accounting codes, financial reason, and a financial entity that represents the manufacturer. As manufacturers submit payments our solution processes these as receipt financial transactions to be applied to the receivable.

FSCM78
The Contractor's solution shall ensure interfaces are initiated or accepted by a specific time of day based on configurable business rules.

We use an enterprise scheduler to control the timing of file-based interfaces processed by CMdS-Financial. We configure task execution schedules to set each process to run at the correct time. Our solution supports schedules based on recurrence or one-time activities and allows you to assign a specific time for execution.

FSCM79
The Contractor's solution shall capture journal details (e.g., journal ID, journal status, date) from the return file from another Entity as defined by the Agency.

In our experience with other state accounting systems, we do not normally receive responses to journal entries that we send, except in the event of an error. We look forward to discussing this requirement to better understand the issue and determine the best way to capture the journal details from a return file in our solution.

© 2020 Conduent State Healthcare, LLC

FSCM80
The Contractor's solution shall allow authorized users to manually initiate or generate any financial correspondence (e.g., statements, delinquency notices). Contractor will display the notice on-screen and submit the notice via the Payees preferred notification method as defined by the Agency.

While we can manually initiate correspondence online as a feature of CMdS, we do not use this functionality within our financial module. Financial correspondence tends to be structured and scheduled, and less ad hoc compared to other types. Our solution includes the flexibility already to support different templates based on the aging of a receivable. We also dynamically populate data on notices. We look forward to discussing this requirement so that we can formulate a solution that meets your need.

FSCM81
The Contractor's solution shall have the capability to upload attachments and associate the attachments to the payee or line level on the appropriate financial transaction as defined by the Agency.

All our major financial transactions receipts, receivables, and payouts support the upload and display of attachments. Attachments related to financial entities are indexed and available in ECM.

FSCM82
The Contractor's solution shall allow authorized users to manually create and modify journal entries as defined by the Agency.

Authorized users manually create and modify journal entries in CMdS-Financial by entering financial payout or receivable transactions in the web-based user interface. As these transactions process in the payment cycle journal entries are created and transmitted to the state accounting system and send a reporting listing all journal entries to ECM. A payout will create a credit transaction journal entry while a receivable will create a debit transaction.

FSCM83
The Contractor's solution shall allow users to manually apply recoupment rules across individual claims within a group of claims as defined by the Agency.

In CMdS-Financial, when you change the recoupment rules configured for a receivable, all the individual claims in the group attached to the receivable are affected by the change.

FSCM84
The Contractor's solution shall perform real-time audit/balance of interfaces (e.g. journals) within same business unit where the lines should balance to zero by fund and provide notification if they do not balance as defined by the Agency.

As interface files are processed, CMdS-Financial includes summary level reporting to indicate the results of all transactions processed, including any transactions that failed validation. If the interface file contains transaction summary information, we can include real-time balancing to ensure the detailed records within the file as processed balance to the summary information. While processing the payment file we ensure the payment amount and payee details match and balance. During payment processing, we execute a series of balancing processes within CMdS-Financial that validate not only the transaction counts and

© 2020 Conduent State Healthcare, LLC

amounts to the input claims and financial transactions, but that also ensure that amounts balance to zero within each step in the process to proactively identify any potential issues.

FSCM85
The Contractor's solution shall provide the ability to view detailed and consolidated history of all transactions (e.g., claims, invoices, payments, receipts, debt assessment, correspondence) applied to an account (e.g., Provider, Member, Payee). Allow the user to sort, filter, and group by transaction details (e.g., Payer, transaction type, date, status) as defined by the Agency.

CMdS-Financial provides several search options specific to different types of searches in the web-based user interface:

- Claims inquiry
- Payout search
- AR search
- Receipt search
- ECM search

Our solution allows users to specify criteria including the unique transaction number, the payee, or other attributes. If a single transaction is matched, the details of the result are immediately shown in the detail screen. If there are multiple matches, the response shows some details of each match and you can either select one of the results to display additional information or further modify the search criteria. All details on the response have sort capability in ascending or descending sequence that will group together like values. The search criteria remain visible so the request can either be adjusted, or the results further filtered with more specific criteria.

FSCM86
The Contractor's solution shall have the ability to assign unique Payee ID to each Payee who is uniquely identified by Tax ID as defined by the Agency.

CMdS-Financial assigns a unique Payee ID to each payee, which we can configure to be uniquely identified by Tax ID. We have an alternative identifiers table that allows us to link a Payee ID to other identifiers and types. This is where we store the Tax ID, and also link to state Medicaid IDs and NPI numbers. Sometimes your provider number scheme becomes our solution's unique identifier, depending on your preference.

FSCM87
The Contractor's solution shall receive, store, maintain, and display detailed information on bank accounts as defined by the Agency.

CMdS provides user interfaces for adding, maintaining and searching bank account details as seen in Figure 4.2.16.1-23. We also capture similar information for payees that are not providers.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.1-23. Provider Bank Account Information
Our provider screens capture and display bank account information, including the bank account and routing number.

FSCM88
The Contractor's solution shall have the capability to modify a Payee's bank account information (e.g. manually, automatically) within the system based on Agency policy using configurable business rules.

For providers, we typically expect to receive the provider information including bank account information from the provider module. We automatically process the provider information, store the data, display the information on our provider screens, and use the data in processing. Access to our user interface to view and modify data is controlled by role-based configuration. For arrangements where we are the source of truth or it is otherwise acceptable to update provider bank account information in our solution, access to authorized personnel to make updates requires a security configuration change to assign the appropriate role.

For other types of payees, our solution is more likely to be the source of truth, and we provide a user interface to add or update bank account information as seen in Figure 4.2.16.1-24.

Figure 4.2.16.1-24. Financial Entity Bank Account Information
For non-provider payees such as vendors, we support the capture of detailed information including bank account information.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM89
The Contractor's solution shall maintain effective dated payee information and link each payment to the payee information that was used at the time of payment as defined by the Agency.

All payments within CMdS-Financial are linked to the payee identifier, payment date, payment method, warrant number, remittance advice number, and payment amount in the financial warrant table. The warrant table data is one way we can link all payments to the payee as well as claims and financial data. The banking details maintain an effective date to ensure the EFT transactions are routed correctly at the time of payment and the EFT transaction details are stored in the warrant number.

FSCM90
The Contractor's solution shall have the ability for authorized users to produce or initiate payments in different formats (e.g., check, ACH, journal, prepaid debit card, EBT) retain detailed data related to the payment
(e.g., Payee identification, reason for issuance) as defined by the Agency.

In the State's Question & Answer Board response to *Attach F, FSCM90*, you indicated that Offerors are not responsible for issuing debit cards. Based on your guidance, we are assuming that we will be producing multiple interface files aligned to the type of payment. CMdS-Financial supports a warrant method to indicate the type of payment to be used for each payment. We use the warrant method to separate payments into different output files for routing to the appropriate financial institution/party that makes the payment.

The detailed data we capture in the warrant table for each payment includes:

- Payee
- Payee type
- Warrant number
- Warrant medium (i.e. EFT)
- Warrant date
- Payment amount
- RA number
- Count and amount of paid, denied, and suspended claims

We capture the reason for payment at a more granular level for financial transactions using a reason code, since an overall payment may be issued for multiple reasons.

FSCM91
The Contractor's solution shall have a process for all payments to be recorded and deposited daily, including payments from Payees who are not yet in the system, and link to an account receivable as defined by the Agency.

We designed CMdS-Financial to support quick turnarounds to log the receipt of funds as a separate activity from applying those funds against receivables. A user can enter a receipt financial transaction in the web-based user interface to record the payment. Each payment must be associated with a payee, but this can be satisfied by creating an initial payee record that can be updated later. This ease of entry of payee means paper checks can be deposited quickly.

© 2020 Conduent State Healthcare, LLC

FSCM92
The Contractor's solution shall calculate, receive, store, maintain, and display medical expenditure transactions processed outside of the Contractor's solution (e.g. spend-down, Member premium) as defined by the Agency.

CMdS-Financial supports receiving and maintaining financial transaction details for expenditures processed outside of our solution. These transactions are stored as history only payouts with unique financial reason codes to indicate the source of the payment. Conduent's Digital Hub (Enterprise Service Bus, or ESB) and SOA-based architecture allows for ready integration with other systems to accept these transactions. The payouts can be viewed through the payout user interface and all data is available for reporting.

FSCM93
The Contractor's solution shall automatically apply claims or financial transactions to a contract total based on configurable business rules and display a running total of the contract balance as defined by the Agency.

In the State's Question & Answer Board response to *Attachment F, FSCM93*, you clarified that the Offeror's solution should apply claims payments and other financial transactions (e.g., accounts receivable, SURS recovery) against a contract balance. CMdS-Financial captures budgets by fund code, funding source, category of service, and time period. Budgets can be entered, modified as authorized, and voided. During payment processing we apply updates to the budget expenditures. You can view budget information in our web-based user interface as seen in Figure 4.2.16.1-25.

Figure 4.2.16.1-25. Budget Totals to Date
CMdS-Financial capture running totals of claims and financial transactions paid for each funding source and time period. You can see the original budget, the current modified budget, and the running total of expenditures.

FSCM94
The Contractor's solution shall be scalable to receive additional financial transactions as defined by the Agency.

Processing financial transactions is not resource intensive in our solution given the relatively small amount of exception processing required for financial transactions compared to over a thousand claims edits. We can process financial transactions in batches using spreadsheets. CMdS-Financial includes configurable financial reasons and funding sources to be able to scale to support additional types of financial transactions without development changes. These configurable items are all modified from our web-based user interfaces and have an immediate impact on processing once configured.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM95
The Contractor's solution shall receive, store, maintain, and display payment request information with a unique identifier to trace the payment back to the source as defined by the Agency.

CMdS-Financial uses remittance advice (RA) number as the key which ties payment back to source. The RA number is generated during the financial cycle and uniquely identifies the payment along with the warrant number. The claim financial user interface allows you search for payee payment history where you can locate the RA number. The claims inquiry advanced search allows you to use the RA number to identify the source transactions that were part of the payment.

FSCM96
The Contractor's solution shall receive, store, maintain, and display payment suspension, rejection, or cancellation reasons (e.g., incomplete tax information, payment below minimum threshold from the payment processing system) as defined by the Agency.

CMdS-Financial fiscal pend process supports limiting the payment amount or suspending payment through configurable features as defined in the fiscal pend user interface. Configurable rules in the fiscal pend user interface enable you to configure criteria to limit, delay, or hold payments based on fiscal pend parameters set up by user. Each configuration is assigned a unique identifier. That fiscal pend identifier is saved on the transaction during the financial cycle when used to stop the payment. You can see the link from the transaction to the fiscal pend criteria on the claims inquiry screen.

FSCM97
The Contractor's solution shall allow authorized users to work and resolve suspended payments and release them for submission as defined by the Agency.

CMdS-Financial suspends payments for several reasons and there are corresponding specific resolutions related to each type of suspense. Some examples of issues and resolutions are in Table 4.2.16.1-4.

Table 4.2.16.1-4. Fiscal Pend Reasons and Resolution

Fiscal Pend Reason	Resolution
Insufficient budget	An approved updated budget is entered through the user interface
User defined fiscal pend	User ends the fiscal pend in the user interface
Fund code not assigned	Correct fund code configuration and update impacted claims
Header reimbursement is not equal line reimbursement	Conduent's core claims support staff advise how to correct in the event of this rare occurrence and a data correction is applied in CMdS-Financial

FSCM98
The Contractor's solution shall automatically reprocess system suspended transactions based on configurable business rules.

CMdS-Financial automatically reprocesses fiscally pended claims during financial payment cycles. During each cycle, the fiscal pend process looks at all active fiscal pend criteria and pends or releases all claims (new and prior fiscal pended) based on fiscal pend criteria and dates.

© 2020 Conduent State Healthcare, LLC

FSCM99
The Contractor's solution shall allow for a unique identifier for each transaction allowing users the ability to research and follow a transaction through the entire life cycle as defined by the Agency.

A unique Financial Control Number (FCN) is created in CMdS-Financial for every financial transaction type (receivable, payout, receipt). FCN is a 14-digit system generated number that combines creation date, financial transaction type, and batch number.

FSCM100
The Contractor's solution shall receive, store, maintain, and display summary and detail payment information (e.g., payment type, warrant number, voucher number, warrant status, date issued, date reconciled, date cashed, date cancelled, EBT status, EFT paid date, journal issued date) as defined by the Agency.

CMdS-Financial stores information from payment cycle including warrant number, payment amount, payment date, warrant status, and remittance advice (RA) number on the financial warrant table. This information as well as the remittance advice details can be viewed using the claims financial inquiry user interface. In Figure 4.2.16.1-26, we show a list of RA numbers from a search.

Figure 4.2.16.1-26. Payment Information on the Financial Inquiry Screen
You can look up RA numbers representing each payment on our web-based user interface.

Information regarding bank reconciliation of warrants, cleared payments, cancelled payments, and other financial data can be found on our bank reconciliation reports as shown in Table 4.2.16.1-5.

Table 4.2.16.1-5. Bank Reconciliation Reports

Report	Description
Warrant Resolution File Error Report	Provides a listing of all the redeemed warrants that were in error
Warrant Resolution File Update Report	Provides a listing of all the redeemed warrants that were successfully processed into the bank reconciliation process
Unredeemed Warrant report	Provides a listing of all the unredeemed warrants

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM101
The Contractor's solution shall support the prenote request process to another Entity, including determining when the process is required or overridden, using configurable business rules.

CMdS-Financial allows the user to set up EFT information for a payee in the financial entity user interface. When the provider EFT status is *Prenote*, our solution triggers the prenote process.

EFT Prenote Process. CMdS-Financial sends an EFT prenote transmission to the financial institution to verify the bank routing and account numbers. We continue to issue a paper check during the EFT prenote process and prenote test record is added to EFT file with a payment amount of zero. You can correct any EFT errors resulting from the prenote and repeat the verification process for accuracy. After a defined number of days from successful transmission of the second prenote set as seen in Figure 4.2.16.1-27, the financial cycle includes payee's payment amount in Automated Clearing House (ACH) payment file that is sent to the bank.

Figure 4.2.16.1-27. System Parameter for Number of Days in Prenote Status
You can configure the number of days that a payee stays in prenote status.

The solution does not generate EFTs or checks for zero-dollar payments. If the financial institution reports a failed EFT or the payee reports a change in the bank routing or account number, we update the payee EFT data and the EFT pre-note process starts over. The system allows the user to override the pre-note details based on user's roles and responsibilities.

FSCM102
The Contractor's solution shall allow for authorized system users to enter and modify prenote information as defined by the Agency.

If the financial institution reports a failed EFT or the payee reports a change in the bank routing or account number, you can update the payee EFT data in our web-based user interface and the EFT prenote process starts over. Like all our user interfaces, security is controlled by role-based access and only authorized users can update prenote information.

FSCM103
The Contractor's solution shall allow for authorized system users to enter and modify direct deposit information, including a comment field as defined by the Agency.

Depending on the modularity vision, the provider enrollment / provider module may be the source of truth for EFT information; however, our system does have the ability to store and edit that information. Depending on the model, we set role-based access appropriately so operational staff responsible for entering EFT information have access to do so.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

For financial entities that are not providers, CMdS-Financial includes a Financial Entity screen as shown in Figure 4.2.16.1-28 where authorized users can view and update payee banking information, including direct deposit.

Figure 4.2.16.1-28. Financial Entity Screen – Bank Details
For vendors or other non-provider financial entities, our user interface supports the entry of direct deposit information.

The user interface includes an option for entering notes as seen in Figure 4.2.16.1-29.

Figure 4.2.16.1-29. Financial Entity Screen – Notes
Many CMdS screens support the entry of notes, including the financial entity screen.

FSCM104
The Contractor's solution shall have the ability to display financial transactions that have not been paid and the reason for non-payment as defined by the Agency.

Financial transactions may not have been paid due to:

- No approval
- No financial cycle has been run since approval
- A fiscal pend was applied to the payment during the financial cycle

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Financial transactions that have not been paid can be located on the financial payout screen using the approval status as search criteria. Once approved, a corresponding claim number (TCN) for the financial transaction (FCN) will be created, and any claims waiting for a financial cycle are presented on the claims inquiry screen in a status of to-be-paid. If the payout financial transaction was held during the financial cycle for a fiscal pend, the fiscal pend criteria matched will be a link on the claims inquiry when viewing the claim.

FSCM105
The Contractor's solution shall use configurable business rules to allow for Agency payments to be offset against outstanding accounts receivable or credit balances within the same department in determining the payment amount as defined by the Agency.

To apply Agency payments specifically against the same department, any payment from the Agency can be entered as a receipt in CMdS-Financial. By choosing receivables with the appropriate fund code (department), you can apply the funds from the receipt specifically to those receivables. Receivables in CMdS-Financial can be satisfied from net payment activity, which prioritizes liens/levies and then applies oldest to newest to open receivables. We look forward to additional discussion in order to better understand the different types of Agency payments to which this process may be applied.

FSCM106
The Contractor's solution shall allow for withholding partial or full payments (e.g., reduce payment by percentage or by set amount, hold payments for a specific Provider type or specialty) based on configurable business rules. The Contractor's solution shall have the ability to send withheld amounts to a designated lien holder as defined by the Agency.

We can withhold partial or full payments based on configurable criteria with our fiscal pend function. To send the funds to another party you enter a financial receivable to capture the funds, remove the fiscal pend to allow the payments to apply to the receivable, and enter an offsetting financial payment transaction with an appropriate reason code to the financial entity representing the other party.

FSCM107
The Contractor's solution shall allow for the creation of multiple categories of accounts receivable (e.g., audit, overpayments, fraud) at the claim header and detail level, per Agency defined criteria.

Through customization of financial reasons, we have the flexibility to create categories for each type of receivable, including categories such as audit, overpayment, and fraud. The financial reason code identifies the reason for collection. Table 4.2.16.1-6 illustrates examples of how financial reasons are used with receivable types to support different categories of recoupments/collections.

© 2020 Conduent State Healthcare, LLC

Table 4.2.16.1-6. Financial Reasons

[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

FSCM108
The Contractor's solution shall have a flexible payment plan solution with automatic and manual options, per Agency defined criteria (e.g., start date of payment plans, exempt or include specific ARs, base payment amount on percentage of original AR or percentage of payment) with configurable business rules.

CMdS supports flexible recoupment criteria for applying provider payments to receivables. You can modify the recoupment features, including recoupment type, schedule, and amount, which can be established as a specific dollar amount, a percentage, no recoupment and payment schedule. Payment schedule options configuration can be seen in Figure 4.2.16.1-30.

Figure 4.2.16.1-30. Payment Schedules for Recoupments
Our solution supports configuring a payment schedule for a receivable.

FSCM109
The Contractors solution shall ensure that payments received are deposited and accurately applied within a timeframe determine by the Agency.

CMdS-Financial functionality provides several features that promote and ensure the timely deposit and accurate application of payments received. For example:

- Lockbox support as a secure and timely first step of the deposit process
- Quick and accurate logging and application of the receipt to the appropriate accounts receivable
- Creation of a placeholder financial entity if a check is from an unknown payee

These activities support our ability to meet the timeframe determined by the Agency. Using CMdS-Insights we produce reports listing receipts of funds that can be date filtered and matched up to deposit activity.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM110
The Contractor's solution shall automate a balancing process to ensure the amounts of a transaction that is split between different account codes balances to the total amount of the transaction as defined by the Agency.

The payment process will fiscal pend a claim if the sum of the line fund codes amount does not match the total transaction reimbursement amount. If this occurs, the fiscal pended claim will be routed to the claims operation team for correction.

FSCM111
The Contractor's solution shall allow users to sort (e.g., date, amount, program) and filter (e.g., payee, suspension reason, date range, program, amount range) suspended payments as defined by the Agency.

Our solution supports searching for fiscal pended transactions. Options include the ability to search based on provider, member, date parameters, status, remittance advice number, fiscal pend indicator, fund code, claim type, and other information. Additional filtering is accomplished by modifying the search criteria which remains available for editing after the initial search. The search results can be sorted as needed by the user. This is all performed using the advanced tab in claims inquiry as seen in Figure 4.2.16.1-31.

Figure 4.2.16.1-31. Advanced Inquiry for Fiscal Pend Transactions
You can identify transactions that are under a fiscal pend from our user interface using configurable criteria.

FSCM112
The Contractor's solution shall have the ability to configure (e.g., add, update, remove) fields/metadata to be collected or stored for financial transactions. Any change to the fields/metadata will have effective date and end dates as defined by the Agency.

CMdS-Financial includes an online data dictionary in the web-based user interface. You can add a field through the data dictionary, and to make the field usable Conduent will:

- Apply the database change to alter the table
- Determine where the field goes on the user interface
- Include the field in any applicable processing logic

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Metadata such as valid values are maintained through the user interface and have effective beginning and end dates. Values that are not active do not appear as a drop-down option when entering or changing data but will display if existing data matches the values. Additionally, there are several code sets such as fund codes and reference data that have effective beginning and end dates.

FSCM113
The Contractor's solution shall allow authorized users to manually suspend, correct, and release financial transactions based on configurable business rules as defined by the Agency.

CMdS-Financial supports placing a receivable on hold by configuring a recoupment type. You can also use recoupment start date to release the receivable from suspension. Given access based on defined roles and responsibilities, an authorized user will be able to adjust receivables and receipts with an outstanding balance. Payouts can be put on hold by removing the approval and released by re-approving.

FSCM114
The Contractor's solution shall ensure that Payees are eligible for payment before payment is generated, based on configurable business rules which can be specific for Payee type (e.g., Provider, Member, Vendor) or benefit (e.g., non-emergency transportation) as defined by the Agency.

Our financial solution determines payee eligibility by first ensuring the payee exists as a financial entity, and that valid banking information is present to support EFT transactions. Financial transactions for members, vendors and other payee types cannot be created until the payee information is present, and the data has passed the business rule validations. The CMdS-Claims adjudication processing ensures that providers and members on the claims are eligible for the dates of service submitted, prior to the claim being sent for payment processing. Benefit plan configuration in CMdS-Claims ensures that the member is enrolled in the benefit plan and that the provider is in the corresponding benefit plan network and therefore authorized to receive payment.

FSCM115
The Contractor's solution shall provide the ability for authorized users to search all financial transactions at any stage of processing (e.g., suspended, paid) based on one or more attributes (e.g., status, date range, Payee, type, amount range) as defined by the Agency.

We support the searching for financial transactions for our three major financial transaction types – receipts, receivables, and payouts. In Table 4.2.16.1-7, we provide the search criteria available in each.

Table 4.2.16.1-7. Searching Financial Transactions – Available Criteria

Transaction	Search Criteria
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM116
The Contractor's solution shall allow for multiple lines on a financial transaction and distinct account coding on each line as defined by the Agency.

CMdS-Financial currently supports a single accounting code on a single financial transaction. If you have a single payment that has multiple funding sources, we accomplish that today by creating multiple financial transactions. We can also do a single payout under a primary accounting code and use offsetting history-only transactions to move some of the funding to other accounting codes. We look forward to further discussions regarding this requirement and possible solutions for solving this business need.

FSCM117
The Contractor's solution shall have the ability to process recoupments using predefined methodologies (e.g., percentage hierarchy, oldest claim first, payee, provider) based on configurable business rules.

CMdS-Financial uses paid claims activity to recoup receivables from payees. During payment cycle processing, we first apply net payments to liens and levies, followed by any outstanding account receivables based on age (first in, first out). The payment cycle identifies the funds the payee owes and offsets the payee's payable funds toward the outstanding receivables. Recoupments are limited by the configured parameters of the receivable, including by percentage. To apply funds manually from the user interface, the user can override the hierarchy to apply funds according to Agency direction.

FSCM118
The Contractor's solution shall have the ability to allow for Electronic Funds Transfer (EFT) for payments received for drug rebate and provide the detail (e.g., claim detail, dispute detail, invoice detail) as needed to apply to the correct program (e.g., Medicaid, Federal, Supplemental, State Drug Program) as defined by the Agency.

Based on the State's Question & Answer Board response to *Attachment F, FSCM118*, we understand that the EFT funds will be deposited directly in the state's bank account and that we are expected to receive, process, and store supporting EFT data. Our solution supports the entry of those payments as receipts, either manually or through an interface. Based on the presence of drug rebate receivables with appropriate funding codes, the applicable receipt will connect to the appropriate funding source for accounting and federal reporting.

FSCM119
The Contractor's solution shall allow for multiple payments from multiple systems to be applied to one accounts receivable using an established hierarchy as defined by the Agency.

Considering the frequency and delivery method, we can apply payments to receivables according to your defined hierarchy. We can configure the processing schedule to apply received payments in a specific order, by running the jobs to process each payment type in an order that matches your hierarchy. If these are manually received payments, we can also apply them in the correct order. We look forward to discussing this requirement to understand which systems will be sending payments and the order in which they should be processed.

© 2020 Conduent State Healthcare, LLC

FSCM120
The Contractor's solution shall have the ability to input data that controls the amount an Entity (e.g. payee, provider) is paid, by uploading a file (e.g., Excel, comma or pipe delimited file) or manual entry as defined by the Agency.

Using our fiscal pend and budget functions, we can hold or limit payments. While we have not previously loaded fiscal pend criteria from a file, we can develop the structure for an import file that can be used for that purpose. Budget data can be loaded in bulk for annual updates or periodic changes. We will work out the details with you during the implementation.

FSCM121
The Contractor's solution shall have the ability to manually transfer all or selected Accounts Receivable balances from one payee to another based on Agency configurable business rules.

CMdS-Financial supports the transfer of an accounts receivable to another payee, including for change of ownership or other legal restructuring. By searching for a provider in the accounts receivable screen you can identify all the receivables for a provider and determine which ones should be transferred. Our solution creates a new financial claim transaction with a new FCN and TCN for the transfer to entity. We can see the transfer details in history section of the original AR. You can see the process for transferring a selected receivable in Figure 4.2.16.1-32.

Figure 4.2.16.1-32. Account Receivable Transfer
You enter the reason and new owner information to transfer an accounts receivable.

FSCM122
The Contractor's solution shall have the ability to manually and systematically change (e.g., retroactive, prospective, current) FFP for financial programs (e.g., Medicaid, CHIP, MCHIP, Family Planning, Refugee, Breast and Cervical Cancer, Money Follows the Person) as well as other elements (e.g., State Chart of Accounts) as defined by the Agency.

CMdS-Financial allows authorized users to configure budget information for each program using the web-based user interface as seen in Figure 4.2.16.1-33. Our budget structure supports the co-existence of

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Title XIX, waiver programs, and other Agency programs. This structure also supports multiple share allocations, including FFP. To limit payments by budget, a budget amount is set up for a fund code, which accumulates expenditures as payments are processed.

Figure 4.2.16.1-33. Budget Data User Interface
Our solution tracks the budget amounts and effective dates, fund codes, funding sources, and share allocation percentages.

FSCM123
The Contractor's solution shall provide an online view of all non-claim based financial transactions that are scheduled for payment but have not been processed for payment as defined by the Agency.

Once a payment (payout) is approved, an associated claim (TCN) is created that links to the financial transaction (FCN). You can search for these transactions using our web-based user interface on the claim inquiry screen by selecting claim type of financial and a claim status of to-be-paid.

FSCM124
The Contractor's solution shall systematically reverse all related transactions when a provider payment is cancelled, stale-dated or replaced as defined by the Agency.

If there is no replacement check, our solution voids related claims as part of entering the stale-date check or other type of cancellation as a receipt. This is accomplished by automatically creating adjustment requests that are processed by the claims module.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM125
The Contractor's solution shall process cash receipts (e.g., solicited and unsolicited) from providers and update records as defined by the Agency.

A cash receipt is entered in CMdS-Financial as a financial receipt transaction, similar to any other kind of payment. In the check number field, we can document the check number as *Cash*.

FSCM126
The Contractor's solution shall allow the Agency to determine which users are authorized to determine if an accounts receivable is applied in full or in part as defined by the Agency.

CMdS-Financial supports role-based access control (RBAC) and supports configurable restrictions to financial transaction access such as the permission included in this requirement.

FSCM127
The Contractor's solution shall have the ability to send recoupment notifications to the appropriate payee, department/division and system(s) in electronic or paper format based on the recipients communication preferences and as defined by the Agency.

Recoupment information appears on the print image remittance advice and is sent to the payee based on their communication preferences. During the implementation we will work with you to understand how you want notifications routed to department/division and system(s).

FSCM128
The Contractor's solution shall provide an online history view of all transactions (e.g., payments, transfers, charges, credits) made during a user-specified time period for each payee as defined by the Agency and in accordance with generally accepted accounting procedures.

Search options include searches based on provider, member, date parameters, status, remittance advice number, fiscal pend, fund code, claim type, and other information. Additional filtering is accomplished by modifying the search criteria – which remains available for editing after clicking search. This is all performed under the advanced tab in claims inquiry as seen in Figure 4.2.16.1-34.

Figure 4.2.16.1-34. Advanced Inquiry for Transactions
We provide an online view of transaction history on the Claims Inquiry screen.
The results include non-claim transactions.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM129
The Contractor's solution shall create, store, and maintain amortization schedules for repayment of recoupments (i.e. payee overpayment) as defined by the Agency.

CMdS supports flexible criteria for applying provider payments to receivables. Since there is no guarantee that a provider will generate the amount of payment activity expected by a schedule, we've created options that properly handle such a scenario by continuing to collect based on an amount per financial cycle or a percentage of the recoupment. In addition to being able to create a payment schedule for each receivable based on configuration options, we also support putting payments on hold and delaying repayment until an agreed-upon date. In Table 4.2.16.1-8, we provide a full list of the repayment options our solution supports.

Table 4.2.16.1-8. Receivable Recoupment Options

Recoupment Type	How It Works
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

FSCM130
The Contractor's solution shall have the capability to establish an annual expenditure allowance by category
(i.e. funding type, program category) for claims according to the timeframe designated for the program or waiver as defined by the Agency.

Our solution supplies a budget setup screen for establishing authorized budget amounts by user defined timeframes. We establish budgets using data elements such as category, business unit, division, department, fund code, category of service, and other information. At the fund code level within a budget, users can set up funding sources and expenditure amounts for the user defined periods.

During claims adjudication, our solution assigns the fund code/category of service to the claim based on state-defined fund code assignment criteria. During the financial cycle we accumulate expenditures by category and fiscal pend claims when expenditures exceed the annual expenditure allowance.

FSCM131
The Contractor's solution shall have the capability to establish an annual threshold allowance for claims according to the timeframe designated for the program or waiver as defined by the Agency.

We control threshold allowances using the fund code, budget, and fiscal pend capabilities of our solution like ID FSCM131. Besides fiscal pends created by exceeding a budget, we also support flexible criteria for holding or limited payments with a user entered fiscal pend request.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM132
The Contractor's solution shall have the ability to make payments for the Electronic Health Records Incentive Programs payments as defined by the Agency.

We process Electronic Health Record (EHR) incentive payments in CMdS-Financial using payout transactions. Since EHR incentive payments should be for Medicaid providers, our solution will leverage your provider information (i.e. bank information for EFT, address information for checks) to make payments. We'll configure payouts to have a reason available to support EHR incentive payments using our online data dictionary. We can create payouts from a spreadsheet, or they can be entered as required. An example of a manually entered EHR incentive payout can be seen in Figure 4.2.16.1-35.

Figure 4.2.16.1-35. EHR Incentive Payment
Using our solution's Payout screen, you can request a financial payout using a reason that identifies the payment is for an EHR incentive payment.

FSCM133
Contractor's solution shall have the ability to track specific AR's by case number for the Office of the Inspector General as defined by the Agency.

While we have some existing fields that could be leveraged to track an external identifier on a receivable financial transaction, we believe enhancing our product to store the Office of the Inspector General case number is appropriate for this project. During the implementation we'll work with you on adding appropriate fields for this data.

FSCM134
The Contractor's solution shall recoup or apply a receipt to any Accounts Receivable balance and the receipt and recoupment should be updated with the details from one or more account receivable(s) attributes of the AR
(e.g., COS, FFP, Dept ID, Program) for which the recoupment and receipt have been applied based on Agency defined business rules.

When a payment is received for an existing receivable, we create a receipt and disposition the receipt against the receivable. Our solution assigns a fund code to every receipt, providing the detail concerning budget assignment for attributes such as department ID and FFP. This enables us to apply the funds correctly based on the characteristics of the receivable.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM135
The Contractor's solution shall receive, capture, store, maintain, display, and track various types of fees (e.g., Hospital Fees, Nursing Home Provider Fees, etc.) for providers and non-providers based on manually entered or uploaded files of fees assessed or collected, and assign a unique identifier for each fee as defined by the Agency.

Our solution can support loading records of fees received based on a defined interface format. We create receipts and receivables and link the payment to the appropriate funding sources using fund codes and an appropriate financial reason to capture the purpose. We also support manual entry of these transactions through our web-based user interface. These payments can either be linked to providers or other financial entities. Both the receipt and receivable financial transactions created by this process will have a unique identifier (FCN).

FSCM136
The Contractor's solution shall have the ability to allow Nursing home to enter patient days, generate an invoice (e.g., based on the days submitted, provider tax), track payments not received and auto generate a reminder or a notification based on the provider's chosen notification method to those who have not submitted their patient days as defined by the Agency.

We believe this requirement relates to ID FSCM164 and ID FSCM165 as part of an overall solution to collect information from providers to calculate tax assessments, calculate tax owed, invoice, and receive and apply payments.

Capturing Patient Days. On the external portal, we will create a new page to collect patient days information from nursing homes. The exact layout and data to be captured will need to be determined during the implementation.

Generating an Invoice. Using the days submitted as well as the tax information captured as part of ID FSCM164, we will create receivables as described in ID FSCM165 for each nursing home to represent the tax owed. Using our notice generation capabilities, we will implement the layout of the approved invoice format and deliver to the provider based on communication preferences.

Tracking Progress. For providers that do not enter their patient days or pay their invoices, CMdS-Financial will send reminders using the communication preferences of the provider.

FSCM137
The Contractor's solution shall allow the state to manually add interest to any outstanding fees as well as manually add, change, and delete amounts owed as defined by the Agency.

CMdS-Financial accounts receivable screen allows you to update the receivable financial transaction to add and update interest and adjust the amount owed. This access is only available to authorized users.

FSCM138
The Contractor's solution shall have the ability to identify and track payees with AR balances and the payee status (e.g., uncollectable, Demand Letter, Program Integrity review) as defined the Agency.

CMdS-Financial stores receivables in our database including the balance and status information. We also track when the receivable was collected, the calculated interest amount, the most recent type of letter sent,

© 2020 Conduent State Healthcare, LLC

and other status information. You can see a receivable in our web-based user interface in Figure 4.2.16.1-36.

Figure 4.2.16.1-36. Financial Receivable User Interface
You can see fields that indicate balance, status, and activity information on the user interface when viewing an accounts receivable.

FSCM139
The Contractor's solution shall have the ability to apply a provider refund check to applicable claim(s) and systematically reduce the corresponding Accounts Receivables as defined by the Agency.

You enter refund checks in CMdS-Financial as a receipt financial transaction. You can select claims that the payment relates to and our solution will automatically tie the receipt to the claims and reduce the remaining funds available on the receipt. Any remaining funds can then be used to pay down any outstanding receivables the provider has.

FSCM140
The Contractor's solution shall identify and prevent claims that have had a cash receipt previously applied from being subsequently adjusted as defined by the Agency.

Payment receipts are usually applied through receipt financial transactions when the provider is requesting their claims be voided. Claims that are voided cannot be further adjusted regardless of the payment type. Adjusted claims generated by the adjustment process can be further adjusted. If there are other scenarios to be considered for this requirement, we look forward to discussing those business needs during the implementation.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM141
The Contractor's solution shall have the ability to identify and apply configurable financial reason codes to specific financial transactions as defined by the Agency.

CMdS-Financial supports the addition or modification of financial reason codes and their descriptions through configuration in our web-based user interface. We use a single master list of financial reasons for all financial transaction types with ranges designated for use by type. Sub-lists are used to assist in processing through specific business rules.

FSCM142
The Contractor's solution shall be able to refund withholding without affecting the 1099 balances using specific refund reason codes as defined by the Agency.

CMdS-Financial supports configuring the behavior of financial reasons, including whether a financial payout transaction is applied as history-only, and any impact on 1099 information. We refund withholding by issuing a payout. By selecting the appropriate configured financial reason for issuing the payment the 1099 balances of the payee will be unaffected.

FSCM143
The Contractor's solution shall allow for holding partial or full payments (e.g., reduce payment by percentage or by set amount, hold payments for a specific Provider type or specialty, provider, payee, program, or aid category) based on configurable business rules.

CMdS-Financial has multiple capabilities to support holding partial or full payments based on business rules. We can use budgets, enter a fiscal pend, or enter offsetting receivables/payouts to hold and later release funds. Depending on the specific scenario, we can recommend the best solution to meet this requirement.

FSCM144
The Contractor's solution shall calculate 1099s based on Federal Employee Identification Number (FEIN) or Social Security Number (Tax ID) and accumulate all payments to the same Tax ID on a single 1099 as defined by the Agency.

During payment processing, CMdS-Financial accumulates payment amounts by tax ID to support year-end tax processing. We track 1099 earnings and all other 1099 applicable amounts, produce 1099 statements, and report the data to the IRS annually in accordance with state and federal rules and regulations. The 1099 information is viewable through our solution's web-based user interface. As part of year-end processing, we roll up 1099s by tax ID so that multiple payees with the same tax ID receive a single 1099. CMdS-Insights contains several reports to assist in balancing and detailing amounts reported by tax ID.

© 2020 Conduent State Healthcare, LLC

FSCM145
The Contractor's solution shall provide the capability to void stale dated checks manually and automatically at a time period defined by the Agency.

CMdS-Financial supports the voiding of stale dated checks by entering a receipt and selecting the appropriate financial reason. Often through provider outreach the delayed deposit can be addressed by either a reminder to deposit or the issuance of a replacement check. We will enhance our product during the implementation to automatically cancel checks over a certain age.

FSCM146
The Contractor's solution shall have the ability to issue an amended 1099 and retain the original 1099 as defined by the Agency.

CMdS-Financial allows authorized users to update 1099 amounts, indicate the reason, and select the date of the update. The user interface supports both updating and voiding 1099s. An update requires the user to select "Yes" to the 1099 Correction Indicator as shown in Figure 4.2.16.1-37.

Figure 4.2.16.1-37. 1099 Correction
CMdS-Financial user interface allows an authorized user to make corrections to a payee's 1099.

Once the 1099 correction has been made, we generate a corrected 1099. The corrected 1099 will be sent to the ECM and the original 1099 is retained for archive purposes. The corrected 1099 can be mailed or distributed electronically to the payee.

FSCM147
The Contractor's solution shall allow for Accounts Receivable balances to be partially adjusted as defined by the Agency.

CMdS-Financial allows you to adjust a receivable financial transaction using the accounts receivable user interface. You can adjust the current balance and interest, do a write-off, refund an overpayment, or transfer balances. Our solution copies the original AR information while you perform any of these actions as seen in Figures 4.2.16.1-38.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.1-38. Receivable Financial Transaction Adjustment
Our solution copies original financial transaction information to the adjustment.
This capability is used for changing the amounts, writing off the receivable, and other adjustments.

FSCM148
The Contractor's solution shall maintain, process, store, and track capitation payments on a frequency defined by the Agency.

Our solution generates capitation payments for members based on the managed care enrollment information and the benefit plan configuration. The benefit plan configuration includes the cohort rate information. Cohort rates can be assigned type codes, which include the base capitation rate, newborn and maternity kick payment, and add-on payments for behavior health services. The business rules in the capitation claim creation process define the scenarios based on each managed care program supported. The rules indicate when additional service lines should be created to support additional payments beyond the base capitation payment for specific members. An example of this would be adding a second line item to support an additional payment beyond the base rate for behavioral health.

This is configured using mapsets, which allow for multiple criteria to be defined for each cohort rate. The mapset is where the detailed data elements and criteria to map a specific capitation payment to the cohort rate amount. Once the cohort rate criteria are defined and configured, the values within each cohort easily updated as required. The rates can be easily maintained via the online Web pages.

Capitation Creation. Our solution's capitation creation process includes the use of a capitation claim table. This table include the member, the benefit plan, dates of service and managed care program information. During the pre-process as the data is inserted into the table based on the member's enrollment for the capitation month, creation of duplicate claims is avoided because the table structure prevents duplicate entries. The entries in this table are created based on the member having active enrollment during the capitation processing month. If a member has lost eligibility, an entry for that member will not be created. All claims created during the capitation creation process are sent to the adjudication engine for editing and pricing. Each capitation claim is tracked with a transaction control number (TCN) including adjustments. The capitation payments are reported on the RA and X12 820 so the MCO can track the capitation payments to their membership.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM149
The Contractor's solution shall update each recoupment (e.g., payment amount, interest accrued this period, interest accrued to date, and receivable balance) after a payment is applied to the receivable, as defined by the Agency.

CMdS-Financial reduces the balance of receivables as we apply claim payments to the receivable during the payment cycle. The remaining balance is the difference between the original amount and the amount of any claim payments that have been applied. The history section of the accounts receivable screen includes the activity against the receivable.

FSCM150
The Contractor's solution shall maintain a historical record of recoupments (e.g., original amount due, interest by period, total accrued interest, payments received, and current balance) as defined by the Agency.

The history section of the accounts receivable screen includes all recoupment activity against the receivable including receipt dispositions, and recoupments generated during the payment cycle.

FSCM151
The Contractor's solution shall create and maintain positive or negative balance of a receivable; in the event of overpayment of a recoupment, use the recoupment data (e.g., payer, recoupment number, etc.) to create a payout as defined by the Agency.

CMdS-Financial supports the creation and maintenance of positive accounts receivable and supports generating an excess/AR refund when the total of claims and receipts applied exceed the outstanding balance. In the event of an overpayment, the excess can be included as part of the payee's weekly reimbursement or applied towards any outstanding receivables. Alternatively, the user can refund the payee using the receipt user interface to issue a payout as shown in Figure 4.2.16.1-39.

Figure 4.2.16.1-39. Issuing a Refund for an Overpayment
If a receivable has a positive balance, one of the options is to refund the provider.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM152
The Contractor's solution shall have the capability to bypass the automatic update of a receivable and route to a business unit for manual review based on configurable business rules as defined by the Agency.

Automatic update of a receivable is bypassed by designating the receivable as "no recoupment" on the AR user interface. Using our workflow capabilities as described in our response to ID FSCM41, page 4.2-762, we can route receivables using configurable business rules to queues and assign them to the appropriate reviewers.

FSCM153
The Contractor's solution shall provide, maintain, and apply a configurable workflow to systematically route financial transactions for review and approval as defined by the Agency.

In CMdS-Financial the financial transaction user interfaces have a built-in approval process based on business rules. There is an approval checkbox that is restricted based on security role configuration. We typically use this enhanced security on payout transactions to require an authorized approver to review user-entered payout requests.

Today, in compliance with current state policies, any receivable automatically created during the financial cycle, or manually entered, is automatically approved. We will be making system changes to activate a similar approval mechanism for receivables. Using our workflow capabilities as described in ID FSCM41, page 4.2-762, we can configure the system to automatically route financial transactions for review and approval.

FSCM154
The Contractor's solution shall allow recoupments to be applied at the claim line item detail level as defined by the Agency.

We consider claims down to the line item detail level when applying recoupments. The totals from each line item are included in the total recoupment. Receivable financial transactions related to claims are linked and you can select the claim to see the line item detail.

FSCM155
The Contractor's solution shall support the monitoring, verification, and validation of the timeliness and accuracy of all payouts for services (e.g., regular audits by state and federal auditors, an independent auditor) as defined by the Agency.

Our oversight of financial services follows strict procedures and guidelines put in place through careful coordination with the Agency. These processes are a product of our commitment to our responsibility as the Fiscal Agent, and our awareness of the sensitive nature of state and federal funds management. These processes include separation of duties as regards issuing or receiving financial information. Safeguards include monitoring and auditing by internal QA staff to ensure our conformance to approved processes. We respond with swift action to correct any issues identified by immediately defining the best course of action, sending proper notifications, and developing a corrective action plan. Actions can include employee performance coaching, additional training, and, if necessary, modifications to procedures or documentation.

© 2020 Conduent State Healthcare, LLC

Engaged Leadership. Our financial services leadership team provides additional support through their monitoring of day-to-day staff activities. Leadership oversight includes reviewing relevant CMdS reports for accuracy and compliance, providing coaching to support staff, and monitoring adherence to service level agreements.

Supporting Audits and Inspections. We operate with transparency and provide access to records related to our performance of the contract. We accommodate audits and on-site inspections as directed by the Agency. Once we receive notice of an audit or inspection, we proceed as follows:

- Meet to gather key information such as the subject of the audit and information we need to provide
- Appoint a lead for our participation
- Retrieve and provide the information required
- Continue participation to provide further information and assistance as needed
- Join state staff in meeting auditors or authorized representatives to help present information and answer questions
- Provide or put in place state-approved corrective action plans

FSCM156
The Contractor's solution shall withhold the federal share of payouts to Medicaid providers to recover Medicare overpayments as defined by the Agency.

Our solution supports a recovery of Medicare overpayments by entering the recovery information as a lien. Specific financial reasons can be configured in our online data dictionary to track the type of recovery for accounting and federal reporting purposes. The lien can be configured in line with our types of receivables with flexible criteria as seen in Table 4.2.16.1-9 to collect less than the full amount normally due from the provider during the payment cycle.

Table 4.2.16.1-9. Receivable Recoupment Options

[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]
[redacted]	[redacted]

Based on Agency direction, the appropriate parameters can be selected when creating a lien for the provider as seen in Figure 4.2.16.1-40.

Conduent Proprietary Information

Figure 4.2.16.1-40. Add Lien to recover Medicare Overpayment
CMdS-Financial supports Medicare overpayment recoveries as liens, a type of receivable.

FSCM157
The Contractor's solution shall process replacements for lost or stolen warrants and update records with new warrant information as defined by the Agency.

A lost or stolen check is a serious issue that needs immediate attention with the financial institution. This response is limited to your requirement to address handling these issues within our solution. In the State's Question & Answer Board response to *Attachment F, FSCM157,* you indicated that for the purposes of this requirement:

- A warrant and a check are considered synonymous
- Scenarios could include incorrect mailing address or incorrect receipt of a specific check or warrant
- Offeror is not expected to reissue an 835 or remittance advice but will update applicable financial records with new warrant information once issued

Voiding and Replacing Lost/Stolen Checks. When a check is being cancelled at the financial institution, the check should also be voided in the solution. You mark a check voided by entering the check information as a receipt in CMdS-Financial. By selecting the appropriate reason, a replacement check is requested. An example of a check void can be seen in Figure 4.2.16.1-41. The warrant table will be updated with the new check number, which will be associated with the remittance advice number.

Conduent Proprietary Information

Figure 4.2.16.1-41. Replacing a Warrant

You replace warrants on the Financial Recipient screen by selecting the correct payee and check number and using the appropriate financial reason to generate a check replacement.

FSCM158

The Contractor's solution shall create accounting extract files in a format that is suitable for upload to a third-party accounting system as defined by the Agency.

CMdS-Financial includes an outbound journal file-based interface we typically use to send journal entries to a state accounting system. We output journal entries that represent paid claims and financial transactions to a file, which is delivered to the third-party accounting system as defined by the Agency.

FSCM159

The Contractor's solution shall store enough accounting transaction detail to ensure that accounting transactions for each drug rebate program administered under the contract can be uniquely identified and maintained separately as defined by the Agency.

CMdS-Financial ties funding sources to accounting codes in our budget and fund code configuration. To track multiple drug rebate programs separately, a fund code is created for each rebate program. The invoices for each rebate program are loaded as receivables tied to the appropriate fund code.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM160
The Contractor's solution shall automatically post monies recouped to the principal and interest lines of a receivable as defined by the Agency.

CMdS-Financial currently tracks interest as a separate value on the receivable and does not reduce the interest specifically when monies are applied. We look forward to discussing with you the way you would like payments applied to principal versus interest so that we can make an enhancement to support your requirement.

FSCM161
The Contractor's solution shall accept, store, and maintain text notes associated with each recoupment as defined by the Agency.

CMdS-Financial supports an unlimited number of free-form notes and attachments that can be viewed, sorted, filtered, and reported on. Notes are associated with all the key financial screens – including recoupment related screens like receivables and receipts. All notes display the user, date, and time notes were entered. The system maintains notes indefinitely in date/time reverse chronological order and identifies the user who entered the notes. Users may sort the notes by user ID, usage type, or note text. An example of notes that have been added to a receipt can be seen in Figure 4.2.16.1-42.

Figure 4.2.16.1-42. Text Notes for Recoupments
Each of our major configuration items in CMdS-Financial support notes and attachments. Here you see an example of a note added for a receivable. A receivable represents a recoupment request.

Notes are maintained along with the associated system data so ad hoc queries of the note text can search for character strings to select notes for reporting. The solution also includes a global notes query function which allows authorized users to enter an entity ID, such as provider ID, and view the notes for that entity entered over time.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM162
The Contractor's solution shall have the ability to produce accurate annual 1099 forms in accordance with IRS specifications for all providers, vendors, and payees that reflect all payments and adjustments made (e.g. claims, adjustments, voids, and any other financial transactions) as defined by the Agency.

In accordance with IRS regulations, CMdS-Financial generates 1099's for all for-profit entities where the calculated 1099 amounts for the year are greater than the IRS defined threshold. To create transparency throughout the year and to promote accurate 1099 processing, our solution accumulates provider payment amounts by tax ID as part of each financial cycle. 1099 Totals for the current year and prior years are available on the claim financial summary user interface.

Including Appropriate Payments on 1099. CMdS-Financial provides configurability to include/exclude claims and financial transactions based on financial reason codes, lists of procedure codes, and other configurable values for services either exempt from taxes or separately taxed.

Producing 1099 Forms for Non-Providers. For financial entities that are not providers (e.g., vendors, payees) we do not currently maintain running 1099 totals or produce 1099's automatically. We are currently working on a product enhancement that we will deliver to support this capability.

Creation of 1099 Forms. Our solution creates individual 1099's for each financial entity receiving payments that meets the criteria to receive a 1099 in PDF format suitable for the ECM and placement on the portal. We may produce additional formats, such as XML, for the vendor printing and mailing the 1099's. We index 1099's, including any corrected 1099's, in the ECM for searching and viewing. As part of year end activities, a review of current IRS publications for that tax year is done to identify any potential changes needed to our 1099 template.

Reports Supporting 1099 Processing. CMdS-Financial includes the reports found in Table 4.2.16.1-10 to support 1099 activities. Based on the scope of our 1099 activities for a project, we use CMdS-Insights to create additional reports as needed.

Table 4.2.16.1-10. 1099 Report Library

Report Name	What is Included
[redacted]	[redacted]
[redacted]	[redacted]

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Support for IRS Interfaces. CMdS-Financial generates an electronic data file in the IRS format suitable for transmission to their Filing Information Returns Electronically (FIRE) system. We also support processing the IRS "B" Notice responses for any incorrect tax identification numbers to create appropriate notices and to place impacted entities receiving payments on backup withholding as required by IRS regulations.

FSCM163
The Contractor's solution shall create an account receivable, or account payable for differences in percent of billed charges paid and maximum allowable amounts resulting from a cost settlement reconciliation on a timeframe as defined by the Agency.

CMdS-Financial handles gross cost settlements by creating payouts for money due to the provider and receivables for money owed the Agency. Since Medicaid cost settlement payments as described would be for existing providers, our solution will leverage your provider information (i.e. bank information for EFT, address information for checks) to make payments. We configure payouts and receivables to have a reason available to support cost settlements using our online data dictionary.

We can create these financial transactions from spreadsheets, or they can be entered through the user interface as required. The upload process includes standard business rules for data integrity. Our solution supports the creation of notes and attachments for documentation purposes. An example of a manually entered cost settlement payout can be seen in Figure 4.2.16.1-43.

Figure 4.2.16.1-43. Requesting a Cost Settlement Payout
For a cost settlement where funds are due to the provider, the information is entered as a payout financial transaction. The user selects the appropriate cost settlement related financial reason.

FSCM164
The Contractor's solution shall receive, update, and store provider tax assessment amounts (e.g., Facility Reimbursement Allowance, Nursing Facility Reimbursement Allowance) as determined by the agency, by criteria (e.g., provider number, processing date, calendar year, and/or fiscal year) as defined by the Agency.

We will enhance our solution to support capturing this data by creating a new user interface and storing the provider tax assessment amounts. We look forward to discussing this with you during the implementation so that our design meets your business requirements. In these discussions, we can determine the appropriateness of storing the bed days collected in ID FSCM136 on this same screen. In line with our data and user interface standards in CMdS, we will consider creation, update, voiding, and searching of collected data.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FSCM165
The Contractor's solution shall allow updates to provider assessment amounts and/or allocation of the amounts to the Accounts Receivable using an automated and manual process as defined by the Agency.

Using our standard receivable capabilities and based on direction from the Agency, these assessments can be satisfied by the receipt of a payment or claims activity where providers have a net positive payment. During the implementation, we work with the Agency to better understand this requirement and what methods should be used to recover funds automatically and/or manually.

FSCM166
The Contractor's solution shall have the capability to maintain a history of refunds displayed that is searchable and filterable as defined by the Agency.

Refund payments issued are created as payout financial transactions and can be searched for from the financial payout web-based user interface. You can also see the linked payout when viewing the receipt financial transaction. A complete history of all receipt activity including funds applied to receivables and the payout of any refunds are linked and viewed from the receipt.

FSCM167
The Contractor's solution shall provide the capability to receive and process payments or have the ability to receive payments in different formats (e.g., check, ACH, cash, credit/debit card, e-check) as defined by the Agency.

We will have to enhance our external portal to collect the information needed to process payments online and disclose fees. Most Medicaid programs receive money through checks or money orders due to the sensitivity about payment methods that involve fees. Based on the State's Question & Answer Board response to *Attachment F, IF FSCM167*, we understand 1) we are responsible for the handling of payment information and processing payments and 2) we must present the fees to the entity attempting to make a payment and give them an opportunity cancel prior to processing the payment. Conduent is a major player in the government financial space, and we have public sector experience with all the payment types listed in this requirement.

4.2.16.2 Financial Reporting [RFP 3.10.16.2, Attachment F]

REQUIREMENT: RFP Section 3.10.16.2, Attachment F

This section outlines the requirements necessary to meet financial reporting requirements. The solution must have the capability for a user to view all financial transactions related to one payee, drill down to the details (e.g., remittance advice, accounts receivable, recoupments, recoveries, etc.), and create configurable reports. Information will be captured and shared for required state and federal processes. If the Offeror chooses to include these services in their proposal the Offeror must describe in detail their approach to meet each of the Option A Financial Reporting requirements in Attachment F, Requirements Matrix. The Offeror simply repeating the RFP requirements does not qualify as a good response as defined in Section 6.1.1 of this RFP.

The Medicaid financial reporting you need—when and how you need it.

The Conduent Medicaid Suite (CMdS) Financial solution stores and manages all financial transactions and their related information and makes this data accessible to other modules and for state and federal processes through Conduent's Digital Hub (Enterprise Service Bus, or ESB) and an SOA-based architecture that allows for ready integration with other systems.

CMdS-Financial Reporting

- User friendly interfaces for adding viewing, updating and extracting financial data
- Comprehensive data model stores all financial data needed for reporting
- Extensive out-of-the box reports designed to meet Medicaid reporting requirements
- Ad hoc reporting tool for viewing and developing specific reports

The CMdS-Financial data model draws upon the knowledge Conduent has gained through decades of experience supporting public healthcare programs. The data elements are classified as submitted data (submitted when entities are created, e.g., claim data, payee information) and evaluated data (identified during processing, e.g., fund code, account receivable balance, claim pricing, and other information). All financial data records are assigned a unique data key. The system stores additional data elements on the financial tables that allow all CMdS components to access the financial data.

The system generates reports and extracts based on any of the elements available in the data model, applying criteria defined by the State or other modular systems interacting with the CMdS product. Financial transaction details are viewable both through user interfaces and reports. As part of the financial cycle, reports run both during and at the end of the payment cycle. These reports can also be requested independently.

Controlling Displayed Fields and Criteria (i.e., the WHERE clause). Our reports are available in a report library in CMdS-Insights and can be copied and modified to provide different views of financial data if needed. You can zero in on the information you need from our on-demand reports by using the included user prompts and filtering, as shown in Figure 4.2.16.2-1. This filtering generates a WHERE clause within the SQL behind the scenes.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.16.2-1. CMdS-Insights On-Demand Criteria Selection
When using our on-demand library of reports, you can filter the results using prompts.

In the following pages, we respond to your detailed financial reporting requirements.

FS01
The Contractor's solution shall allow for collection of individual accounts receivable to be suspended but still reported and generate notices/invoices based on configurable business rules.

Money that a provider or other entity owes the State is maintained as *accounts receivables* (AR). The financial entity is expected to pay down the receivable balance until such balance reaches zero. During the payment cycle, CMdS-Financial automatically deducts the receivable amount from the payee's payment for claims processed in that payment cycle based on recoupment type and frequency. Recoupment type and frequency are configurable. Every AR is assigned a fund code.

Receivables are created manually in the AR user interface, or they are system generated based on the payment process. Our solution automatically generates and assigns a unique financial control number (FCN) for each receivable created. ARs can be viewed or updated in AR user interfaces. CMdS-Financial maintains an audit trail of all recoupment and collection activities.

Suspending a Recoupment. CMdS-Financial provides the capability to control the recoupment method and the frequency of the payee's payment to reduce the balance. We maintain the recoupment parameters in financial entity user interface. Table 4.2.16.2-1 shows the recoupment types. One of the options is no recoupment, in which case the claims payment process does not include that AR for recoupment processing.

Table 4.2.16.2-1. Receivable Recoupment Options

Recoupment Type	How it Works
[redacted]	[redacted]
[redacted]	[redacted]

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Recoupment Type	How it Works
[redacted]	[redacted]
[redacted]	[redacted]

Suspended Recoupment Reporting. ARs that are set to no recoupment are reported on the Suspended A/R Balance Report, as are ARs with an appeal indicator or bankruptcy indicator as shown in Figure 4.2.16.2-2. This reportshows lists accounts receivable that have a start date greater than 30 days from the report date. The report provides recoupment status by payee type, payee ID, financial reason code, financial control number, recoupment start date, and the outstanding balance of the AR.

Figure 4.2.16.2-2. Suspended A/R Balance Report
This report provides information on ARs established, but collection activity has been suspended.

Recoupment Notices/Invoices. CMdS-Financial comes with a library of financial related letter templates suitable for delivery on the portal or printing. We will work with you to customize these templates for this project. Our templates, letter content, and sending frequency are all configurable. Our standard is to send outstanding AR letters to payees who have ARs that are 30, 60, 90, and 120 days past due.

The letters notify the payee of their options to address the outstanding AR, which will reflect your AR policies, but typically include options such as:

- Submit a payment for the total amount due as identified in the letter
- Contact Conduent to set up a payment plan for a minimum monthly amount
- For inactive payees, to transfer the AR to an active, associated Medicaid account

As part of payment processing, an RA is created per payee. The RA contains all claim data and financial data, including claim adjustments, claim voids, accounts receivable, recoupments, withholdings, payouts, and a section that summarizes all activity for the payment period. Suspended ARs are included on the RA

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

until resolved. While we do not send recoupment letters if the payee is on a payment schedule, today we do continue to send recoupment letters for suspended recoupments. We look forward to discussing your requirement regarding the configuration for recoupment letters with suspended recoupments, so that we can make any necessary enhancements.

FS02
The Contractor's solution shall produce payment cycle reports, such as the Claims Payment Summary Report, per a schedule that is configurable (e.g., first business day after the payment cycle).

CMdS-Insights provides dashboard and reporting capabilities for all CMdS modules. We provide a standard library of reports, including visualization-ready reporting for dashboard views. For financial reporting, we provide information needed to manage payment cycle details, including reporting that summarizes the reimbursement amounts of claims processed during the current payment cycle, and reporting that summarizes claims paid and the associated payment amounts after each payment processing cycle.

Configurable Scheduling. While we try to maximize the use of both on demand reporting that supports prompts and filters, we run and save scheduled financial reports in the project document management solution (ECM solution) as a standard practice. Our schedule is completely configurable, but we recommend running financial reports at the first available opportunity to maximize the window for financial control and quality assurance activities.

Our Preliminary Payment Summary Report shown in Figure 4.2.16.2-3 provides summary reimbursement information for claims processed during the current payment cycle. The report separately summarizes payment claims, history-only claims, and includes a combined summary of all claims with both history-only and payment claims by claim type.

© 2020 Conduent State Healthcare, LLC

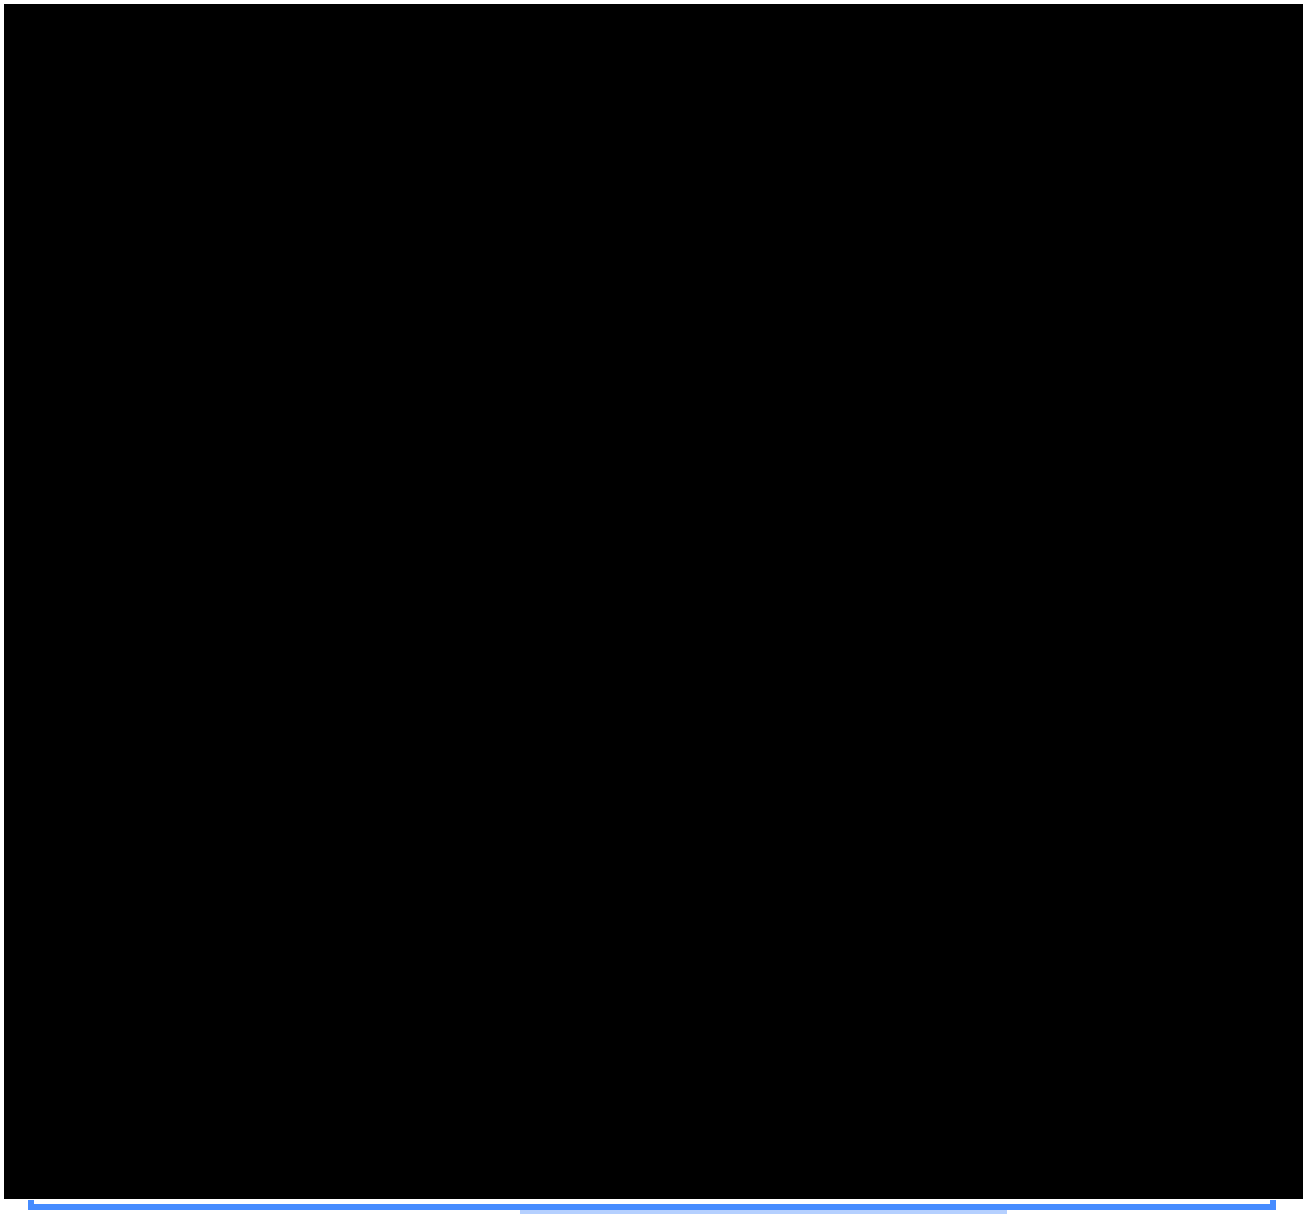

Figure 4.2.16.2-3. Preliminary Payment Summary Report

This report provides a preview/summary of claims to be paid in the current financial cycle that can be used for forecasting or for identifying items that need to be suspended from payment.

FS03

The Contractor's solution shall provide payment reports per Payee and summarized per Payee type (e.g., Provider, Member, Vendor) as defined by the Agency

We provide an existing report from our library, the Operational Medicaid Register Report, to meet this requirement. This report:

- Indicates payees which were issued payments in the financial cycle
- Includes the check or EFT number, Payee ID and name, and statistical details for claims paid, denied, and suspended
- Summarizes by provider type, financial entity type (e.g., member, provider, vendor)

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-4 shows the layout of the report.

Figure 4.2.16.2-4. Operational Medicaid Register Report
This report provides a summary view of the number of claims paid, denied, suspended by provider to include the average payment per claim.

FS04
The Contractor's solution shall display and provide a monthly report showing the amount of federal funds that are owed on accounts receivable as defined by the Agency.

We tie receivables to fund codes and budgets which track FMAP rates. We have all the information in CMdS-Financial needed to calculate the amount of federal funds owned on any receivable. During implementation, we will work with you to understand your specific requirements and create a report that meets this need.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FS05

The Contractor's solution shall display, and provide a report, with summary and detail information for accounts receivable balances by category as defined by the Agency.

We provide an existing report from our library, the Accounts Receivable Detail by Reason Code Report, to meet this requirement. The financial reason serves as our category for financial transaction types, indicating the category for the receivable. This report:

- Lists the outstanding accounts receivable grouped by financial reason
- Includes the financial transaction number (FCN), the most recent date funds were recovered, who owes the receivable, the original balance, current balance, cumulative amount applied, date applied and fund code
- Summarizes outstanding ARs by financial reason

Figure 4.2.16.2-5 shows the layout of the report.

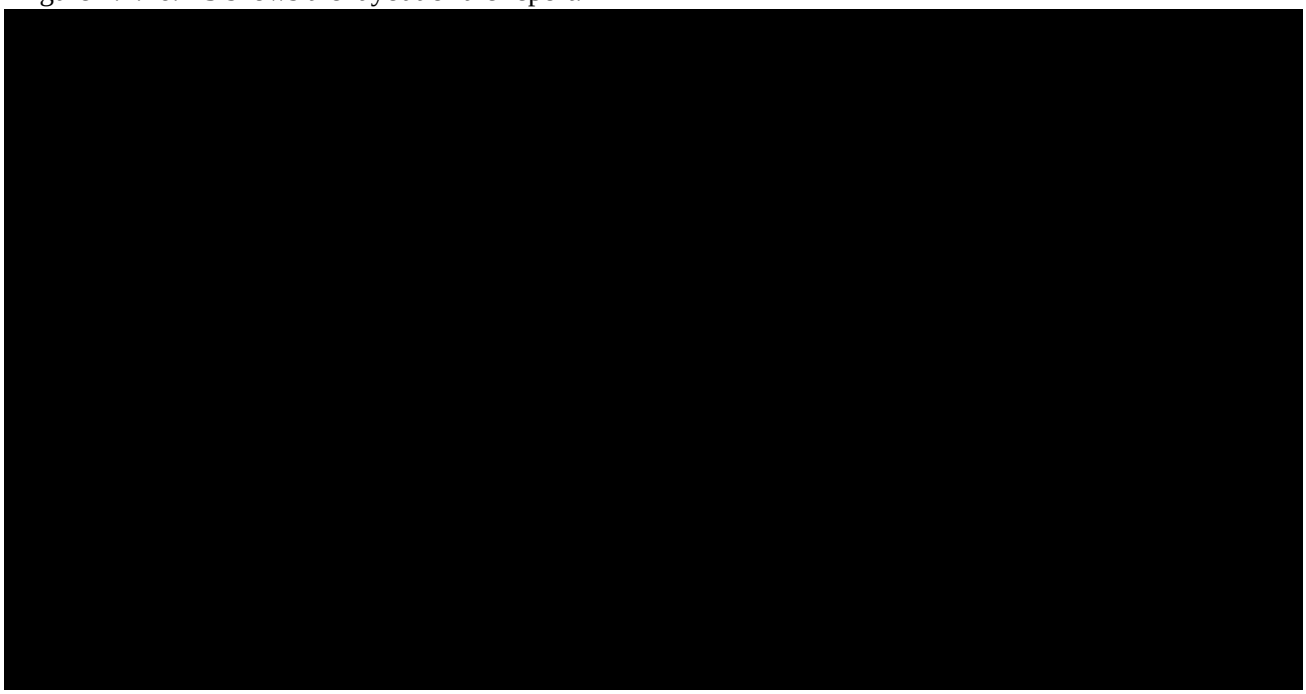

Figure 4.2.16.2-5. Accounts Receivable Detail by Reason Code Report
This report provides details on established receivables based on the current status of the receivable.

FS06

The Contractor's solution shall provide reports of cash receipts as defined by the Agency.

CMdS-Financial produces the Daily Receipt Log Report as seen in Figure 4.2.16.2-6, which lists all receipts for a specified day grouped by financial reason. This report includes all receipts regardless of payment type. We can quickly configure a copy of the report that is filtered to include only cash receipts.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-6. Daily Receipt Log Report
This report lists the receipts created on a specified day based on reason codes.

FS07
The Contractor's solution shall include summary and detail reports for analyzing and monitoring payments per all funding sources. Detail shall include, but not be limited to, warrant number, electronic funds transfer (EFT) number, type of transaction, Provider ID, Member ID, account coding, transaction status as defined by the Agency.

CMdS-Financial reporting includes the "Operational Final Payment Register Report" as seen in Figure 4.2.16.2-7 that provides both summary and detail level payment information upon finalization of the payment cycle (including Payee ID and EFT number).

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-7. Operational Final Payment Register Report
This report provides summary and details of payments made during the latest payment cycle.

CMdS-Financial supports full transaction-level reporting to meet your member/provider reporting requirements. We look forward to discussing this reporting need with you during the implementation so we can determine which report(s) from our library will meet your requirement, or the parameters for developing a new report.

FS08
The Contractor's solution shall display, and provide a report, of receivables and any financial transactions applied to each receivable.

We provide the "Accounts Receivable Detail by Payee/Payer ID Report" shown in Figure 4.2.16.2-8. This report lists each outstanding account receivable with any recoupments applied.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-8. Accounts Receivable Detail by Payee Report
This report lists outstanding accounts receivable for each payee with payment activity.

FS09
The Contractor's solution shall provide a report of Payers (e.g., Provider, Member, Vendor) receiving collection notices/letters as defined by the Agency.

CMdS-Financial tracks the last collection letter sent on each receivable as the *A/R Letter Sent* as shown in Figure 4.2.16.2-9. We can quickly configure a new report from our standard report template with CMdS-Insights that lists payees that have receivables with their letter status.

Figure 4.2.16.2-9. Financial Receivable User Interface
To the right side you can see the "A/R Letter Sent" value for this receivable is '1-LT30Days.' This indicates that the most recent collection letter sent was the 30-day letter.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FS10
The Contractor's solution shall provide a report of Payers (e.g., Provider, Member, Vendor) referred to the Agency or other collection agent for collection as defined by the Agency.

While we do have the capability to designate whether a receivable is eligible to be assigned to collections, we do not have a pre-built report for those that have been assigned. There are multiple options within CMdS-Financial to represent receivables that have been assigned to a collection agency. Once an option is chosen during the implementation, we will create a report to meet this requirement.

FS11
The Contractor's solution shall provide a report of accounts receivable related to bankrupt or deceased Payees and closed businesses

Receivables related to bankrupt or deceased payees are typically identified and addressed as part of a bankruptcy or provider closure process flow. CMdS-Insights can be used to quickly configure a report that ties the provider status to their receivables. We will work with you during the implementation to finalize the layout of this required report.

FS12
The Contractor's solution shall provide a report for failed electronic funds transfers for various reasons (e.g. Invalid account number, ABA number) as defined by the Agency.

Failed EFTs are a very rare event. We verify bank accounts using the prenote process, and payees rarely change bank accounts without first notifying us. We do not have an existing report for this process due to the rarity of this circumstance. We look forward to discussing your requirements and creating an appropriate report.

FS13
The Contractor's solution shall allow for automatic updates of Payee information based on a comparison of IRS data (e.g., from the annual IRS "no match" Provider file). The system shall use configurable business rules to identify which updates can be made automatically and log all mismatches, providing a report for exceptions requiring manual review.

During the implementation, we'll work with you to understand what types of data you would like updated from the IRS "no match" Provider file and who the source of truth for storing those data elements (i.e., a provider module). Historically in our fiscal agent accounts, we mail letters to providers on the "no match" file asking them to submit a new W-9, and we make updates based on that submission rather than the "no match" file. The only data we track is the history of recent appearances on the "no match" file so we can determine what type of warning letter to send and whether the provider must be placed on backup withholding.

© 2020 Conduent State Healthcare, LLC

FS14
The Contractor's solution shall provide for manual and automatic adjustments and history only changes to account coding (e.g., federal report coding) to single or multiple transactions to be done without requiring claims or financial transactions to be reprocessed, based on configurable business rules.

Our CMdS-Claims module assigns and stores funding sources to claims as part of claims adjudication. When funding sources are updated retroactively in the fund code configuration, we apply a history-only adjustment to those claims so that they reflect the updated accounting information. The provider will not have to resubmit their claims, and history-only adjustments do not appear on the provider's printed or downloadable remittance advice or 835.

FS15
The Contractor's solution shall include an online portal that will allow Payees to have online access to configurable views, parameter driven reports, and the ability to export financial data (e.g., payments, ARs).

Our external portal provides several standard functions such as a message center, access to links and documents, access to remittance advices, and other information. However, at this time the external portal does not have the capabilities, as indicated in this requirement, to run reports or export generated data. We will work with you during the implementation to determine how to provide these capabilities within our solution.

FS16
The Contractor's solution shall perform payment cycle balancing and the ability to verify the balancing through the portal and via reports as defined by the Agency.

CMdS-Financial is designed with balancing steps during and after every payment cycle so any accounting period interval will be in balance. The solution includes an automated balancing function to verify that transaction counts and dollar amounts remain in balance throughout the payment cycle, and that the daily adjudication processes balance with the weekly payment cycle. Our production staff are on call and ready to resolve discrepancies in transaction counts or payment amounts, should they occur.

During the financial cycle, we produce X12 835 remittance advices that are posted on the portal. The X12 835 remittance advice is automatically balanced.

The payment process creates a variety of reports used for balancing at every step, from claims load to the production of the RA. Some key reports from the financial cycle are identified in Figure 4.2.16.2-10.

© 2020 Conduent State Healthcare, LLC

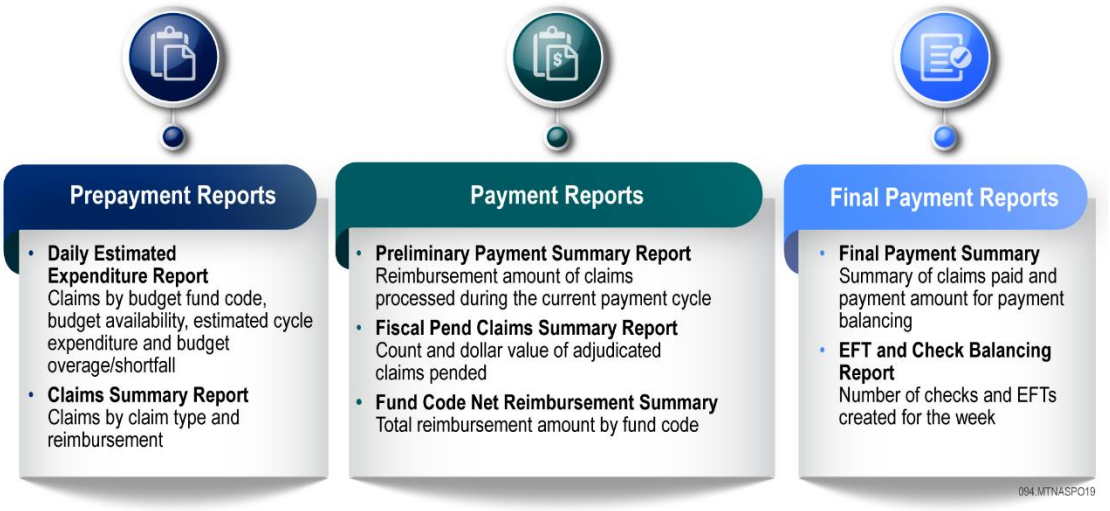

Figure 4.2.16.2-10. Balancing and Control Reports
By providing a standard library of reports that meet the financial reporting requirements of CMS and typical state needs, we maximize leverage opportunities and minimize the need for custom report development.

FS17
The Contractor's solution shall create financial reports which are required for monitoring Agency programs. The reports will present summary level information and allow the user to drill down to the supporting detailed financial transactions, claims, or lines of the claim as defined by the Agency.

We will utilize CMdS-Insights to develop and configure financial reports the Agency requires to monitor programs. During the implementation, we will conduct detailed knowledge gathering sessions to determine the specific report criteria and content needed to ensure the financial reporting is detailed and complete. Our reporting solution includes visualization and drill-down capabilities, as well as ad hoc reporting. CMdS-Insights has access to our full reporting data model, allowing us to create reports that include your required supporting detail.

FS18
The Contractor's solution shall have the ability to report financial information side-by-side comparisons (e.g., expenditures by program, receipts) on a defined time period (e.g., state fiscal year, calendar year, federal fiscal year, rolling year, quarter, month) as defined by the Agency.

Our solution has multiple capabilities that facilitate the comparison of data from different time periods. CMdS-Financial accumulates data by time period during financial cycle processing, allowing you to retrieve totals quickly for comparison rather than having to crunch numbers for a year's worth of transactions. Our reporting solution CMdS-Insights shows the results from multiple queries side-by-side to support building reports that show comparisons. Below we describe some reports that have already been created and are part of our report library.

Accumulating Payment Information by Time Periods. The CMdS-Financial solution claim financial inquiry user interface provides a summary of payments made to providers over a period going back up to four years. The user interface provides the ability to view different periods, such as a week, a quarter, or a year, including calendar year and state fiscal year. Details include the number and dollar amounts of

© 2020 Conduent State Healthcare, LLC

claims paid, denied, and suspended, as well as 1099 and withholding information. Numbers for receipts, receivables, and payouts are also reported, as is fiscal pend data.

Financial Comparison Reports. Our state fiscal year based "Year to Date Expenditures vs. Prior Year Comparison Report" is available at both the summary and detail levels. The summary-level report presents current year-to-date and previous year-to-date expenditures in side-by-side columns. This report also displays the total and percent difference between the two periods broken down shown in Figure 4.2.16.2-11.

Figure 4.2.16.2-11. State Fiscal Year to Date Expenditures vs. Prior Year Comparison
This report shows year-over-year comparisons of payments by funding source.

Other reports generated by CMdS-Insights include the "Year-to-Date Expenditures vs. Budget Report" shown in Figure 4.2.16.2-12. Organized by financial agency code, this report provides a side-by-side display of the annual adjusted authorized budget expenditures for the state fiscal year to date, the remaining budget, and the percentage of budget available for the state fiscal year to date. The reporting is also available at both the summary level and the detail level, which is broken down to the category of service level. Additional state fiscal year budget reports are available to display the state fiscal year initial, as well as the adjusted budget and historical data for funding source within each fund code, enabling us to put the information you need at your fingertips for ready comparison.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-12. Year-to-Date Expenditures vs. Budget Report
This report provides a quick view of all expenditures for a given budget utilized, amount remaining and the percent of remaining budget.

FS19
The Contractor's solution shall display, and provide a report, for collection activity of all accounts receivable that are federally funded as defined by the Agency.

CMdS-Insights includes reporting such as the "Accounts Receivable Detail by Reason Code Report," which presents receipts and collection activity according to financial reason code. We discuss this report in our response to ID FS05, where we also provide an example. The report displays detail for outstanding accounts receivable during a month, organizing the receivables by financial reason code. We can limit this report to only receivables that are tied to fund codes where a federal share is defined.

FS20
The Contractor's solution shall have the ability to track and report on payment types, per Agency defined criteria

Our response to ID FS03 discusses and displays an example of the "Operational Medicaid Register Report," which is available in our report library. This report provides summary and detail level payment information upon finalization of the payment cycle. The report content includes the method of payment (i.e., EFT/Check), number of payments made, and the amount paid by payment method.

FS21
The Contractor's solution shall provide and maintain a variety of processes and tools to identify, monitor, report on and resolve exceptions to routine fiscal processing (e.g., stale dating and canceling warrants, missing information, errors) as defined by the Agency.

We recommend using our workflow tool to assign and resolve exceptions to routine fiscal processing. Users can see the work available in each queue, including their current assignments as shown in Figure 4.2.16.2-13. We can configure queues according to their policies and desired work groupings for accounts receivable. Additionally, we have standard reports such as the "Unredeemed Warrant Report" and others designed to identify potential issues and exceptions to be monitored and resolved.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-13. Workflow Status at a Glance
The splash page provides the user with a summary of current events and information. The queues can be seen under the 'Workflows' grouping.

FS22
The Contractor's solution shall include an ad hoc reporting tool that allows users to create reports that include all types of financial transactions (e.g. Claims, Accounts Receivable, Cash Receipts, Levies, Holds, Withholds, Voids, Payments) at varying frequencies as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

CMdS-Insights includes ad hoc reporting that allows users to create reports. Our operational data store is available for selecting fields for reporting, representing all our financial transaction types, including all types included in your requirement. Reports can be scheduled, including recurring schedules.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS23
The Contractor's solution shall have the ability to process, view and report 1099 adjustments (e.g., address change, dollar amount) as defined by the Agency.

CMdS-Financial generates 1099s as a year-end process. During every payment cycle, our solution accumulates and stores all 1099 reportable amounts. CMdS-Financial supports the correction of 1099s through the web-based user interface as seen in Figure 4.2.16.2-14.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Figure 4.2.16.2-14. 1099 Correction

CMdS-Financial allows an authorized user to make corrections quickly and easily to a payee's 1099.

Our solution treats 1099 correction as a serious event that requires a formalized approval process. Once approved through the user interface, our solution can generate updated 1099's that will include any authorized corrections or updates.

FS24

The Contractor's solution shall have the ability to identify, process, pay, and report the federal share only claims as defined by the Agency.

Our CMdS-Financial module has several options to process and pay the federal share only on claims. Within the budget structure fund codes can be configured to specify 100% federal share. The specific claims or financial transactions that match to the configured fund code criteria would then apply the reimbursement amount to the federal share allocation. We also indicate if the provider is a state-run facility that should only be reimbursed the federal share of the claim reimbursement. In this scenario the state share would be reflected as a base rate change to reduce the reimbursement amount of the claim to only the federal share.

FS25

The Contractor's solution shall maintain federal tax Information for all Entities (e.g. providers, payees) and allow for exclusion of those Entities not subject to 1099 reporting as defined by the Agency.

During payment processing, CMdS-Financial accumulates provider payment amounts by tax ID to support year-end tax processing. We track 1099 earnings and all other applicable 1099 amounts, produce 1099 statements to providers, and report the data to the IRS annually in accordance with state and federal rules and regulations. The system enables the exclusion of entities not subject to 1099 reporting. The CMdS-Financial payment component uses configurable system lists, which provide the capability to further define the financial transactions, claims or claim lines that are included or excluded from the 1099 process. System lists are available for procedure codes, financial reason codes, and adjustment codes.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FS26
The Contractor's solution shall produce payment reports for individual programs (e.g. HIPP, CHIPRA) as defined by the Agency.

We track payments for specific programs by financial reason and funding source. By taking reports from our standard library and filtering them using these types of fields, we can produce payment reports for an individual program.

FS27
The Contractor's solution shall have the ability to identify transactions that are subject to 1099 reporting.

CMdS-Financial maintains indicators at the financial and non-financial detail level that enable the system to identify transactions that are 1099 applicable. Customizable financial reasons on financial transactions extend the solution's ability to track and report transactions that are 1099 reportable. Our solution is also sensitive to supplied provider codes that indicate whether a provider should receive a 1099. Some of the reports available for 1099 processing include the Operational 1099 Providers Paid report, 1099 Report of Providers Paid – By Provider Tax ID Number, and Operational Final Payment Register. The system obtains the provider financial summary information of 1099 amounts from the claims financial tables. Our solution generates 1099s and associated reports and sends the 1099 interface file to the IRS.

FS28
The Contractor shall produce a report detailing all checks that have met a certain aging threshold (e.g. 180 days) at a frequency as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Our CMdS-Financial product includes an "Unredeemed Warrant Report" as seen in Figure 4.2.16.2-15 that lists all unredeemed warrants. Report detail includes check number, date issued, amount of the check, the dates that the first and second unredeemed warrant letters were sent to the payee, payee ID, and payee name. We filter this report based on the warrant date to identify checks that have passed aging thresholds.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

Figure 4.2.16.2-15. Unredeemed Warrant Report
This report provides a view by line of business of all warrants that have been issued but not cleared.

Conduent Proprietary Information

FS29

The Contractor's solution shall produce a report which summarizes, and details provider/payee claims and financial transactions that have been placed on hold as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

CMdS-Financial provides both summary level and detail level reporting to present the information users need about transactions that have been placed on hold. Figure 4.2.16.2-16 shows the "Fiscal Pend Summary Report," which provides the count and dollar amount for adjudicated claims and financial transactions that are fiscal pended. Summary information includes claim type with counts and amounts by pended and processed by fund code.

Figure 4.2.16.2-16. Fiscal Pend Summary Report

The Fiscal Pend Summary report provides the financial transaction counts, pended dollar amounts, and processed amounts by line of business.

More detailed information is available through the "Fiscal Pend Criteria Set Transaction Report" seen in Figure 4.2.16.2-17. This report enables users to quickly research the reason an individual claim or transaction was fiscal pended. Reported details show each claim or financial transaction that has been fiscal pended. The detail provided for each transaction includes the transaction control number, adjudication date, fiscal pend date, fiscal pend aging (length of time in a fiscal pend status), and the amount pended.

Conduent Proprietary Information

Figure 4.2.16.2-17. Fiscal Pend Criteria Set Transaction Report
This report provides the specific details associated with financial pended transactions for research and reporting.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS30
The Contractor's solution shall produce a report detailing cash receipt dispositions at frequencies defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Our solution provides a Daily Report of Receipts and Cash Dispositions, shown in Figure 4.2.16.2-18, listing all items that have accounts receivable receipts with the current day's date. Data is reported by financial control number and includes financial reason code, check number, original amount of the receipt, the total accumulated amount dispositioned against the receipt, and the outstanding balance after the payment cycle.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

Conduent Proprietary Information

Figure 4.2.16.2-18. Daily Report of Receipts and Cash Dispositions
This report provides the viewer with information on money received and how the money has been posted.

FS31
The Contractor's solution shall produce a report summarizing and detailing other Entity (e.g. Department of Corrections, Department of Human Services) claim and financial transaction activity as define by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

We track payments for specific programs by the financial reason and funding source. By taking reports from our standard library and filtering them using these types of fields, we can produce payment reports for an individual program.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS32
The Contractor's solution shall generate a Payment Balancing and Reconciliation Report comparing data from various sources (e.g. Payments, Receipts, and other accounting information) as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

CMdS-Financial provides detailed reports that allow our team to balance each payment cycle. We review reports to balance payment steps to precursor steps and to reconcile financial data with internal and

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

external sources. The process is transparent and auditable. The payment process creates a variety of reports used for balancing at every step, from claims load to the production of the RA. Some key reports from the financial cycle are identified in Figure 4.2.16.2-19. During the implementation, we will review this collection of reports with you to determine if the existing reports meet your need for reporting of payment balancing and reconciliation.

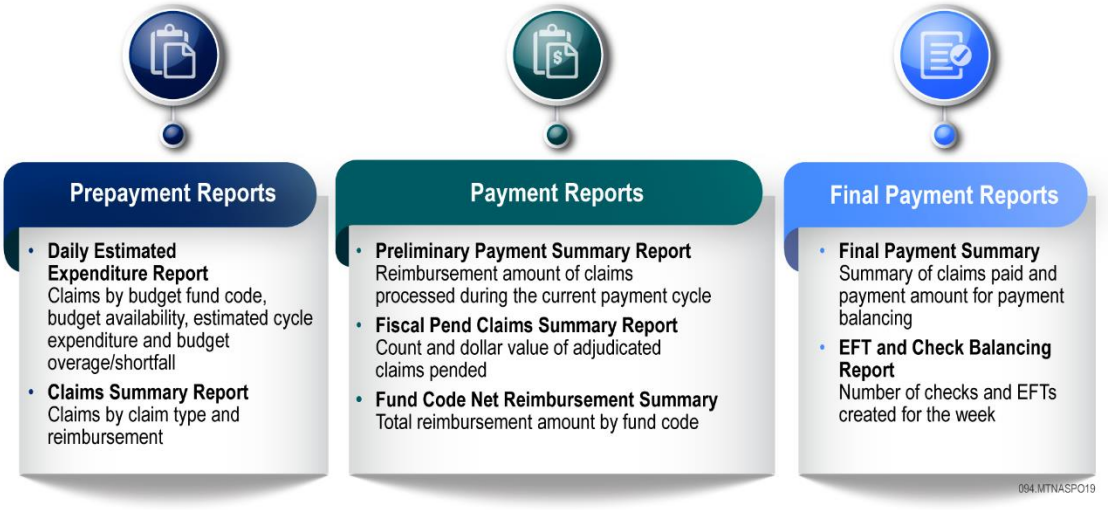

Figure 4.2.16.2-19. Balancing and Control Reports

By providing a standard library of reports that meet the financial reporting requirements of CMS and typical state needs, we maximize leverage opportunities and minimize custom report development.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS33

The Contractor's solution shall produce 1099 reports (e.g. reconciliation, detail, summary, threshold, dropouts, corrections) at a frequency as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Table 4.2.16.2-2 below summarizes the 1099 reports available from our existing report library. These reports can be scheduled and are typically run at the end of the year/beginning of the next year to coincide with the 1099 reporting period.

Table 4.2.16.2-2. CMdS-Financial 1099 Reports

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS34
The Contractor's solution shall produce an electronic 1099 report per federal guidelines as defined by the Agency. This report must be printable in a format approved by the Agency.

The capabilities we offer through CMdS-Financial in support of year-end 1099 processing include the system's ability to accumulate, store, and track the provider payment information necessary to generate 1099 statements and report accurate data to the IRS in keeping with state and federal requirements. The IRS file is produced based on the specifications in IRS *Publication 1220 – Specifications for Electronic Forms*. Once produced and validated, the 1099 electronic submission is delivered to the Filing Information Returns Electronically (FIRE) System at the IRS.

We produce two reports for you that capture the information sent to FIRE:

- Operational 1099 Providers Paid
- 1099 Report of Providers Paid – By Provider Tax ID Number

FS35
The Contractor's solution shall produce a report of Backup Withholding at a frequency as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Backup withholding is a rare event where a provider is being unresponsive to requests to provide an accurate W-9. Current IRS regulations require 24% withholding. Our solution supports backup withholding by entering a receivable with the appropriate financial reason. We provide our standard receivable reports, filtered for this specific reason code.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FS36

The Contractor's solution shall produce a report detailing the expenditures that were paid for the Medicaid Electronic Health Record Incentive Program as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Our solution supports the ability to process Electronic Health Record (EHR) incentive payments using the payout financial transactions assigned a financial reason designated for the EHR incentive payment. CMdS-Insights produces the Payouts by Payee ID Report, as shown in Figure 4.2.16.2-20. This report lists all payouts made by payers during the reporting period. Information available to display includes payee type, payee ID and name, financial reason code, payout creation date, payout amount, check number, fund code, and fiscal year. We will create a version of this report that is filtered by the financial reason for EHR incentive payments.

Figure 4.2.16.2-20. Payouts by Payee ID Report
This report lists details of all payouts grouped by payee type and payer id.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS37

The Contractor's solution shall produce a report detailing Money Follows the Person (MFP) transactions at a frequency defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Just like with ID FS36, we assign a financial reason to *Money Follows the Person* (MFP) transactions and create a payment report based on our existing report that filters by financial reason.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FS38

The Contractor's solution shall produce a forecasting report detailing all payments that will be paid during the payment cycle as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Our "Claims Processing Adjudication Summary" report, shown in Figure 4.2.16.2-21, displays all cumulative claims and other transactions that have completed adjudication and will be paid during financial cycle.

Figure 4.2.16.2-21. Claims Processing Adjudication Summary
This report displays all claim payments that will be paid during this cycle.

Please see the section introduction for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS39

The Contractor's solution shall produce a report detailing voided checks where the claim reimbursement is still owed as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Tracking payments owed due to a voided check is highly specific to state policy for check cancellation. Typically, there is an immediate reissuance of the payment with corrected addressee or bank account information (with temporary paper check as EFT goes through the prenote process). Our financial receipt screen supports payment reissuance and check cancellation as a single request. In other States, in the very rare event that a payment is not being reissued, we are asked to void the claims associated with the payment. The provider can later claim their payment by rebilling the claims. Depending on the specific state policy, the report criteria will vary. We look forward to discussing this scenario and providing a report that meets this requirement based on your check void handling instructions.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

FS40
The Contractor shall produce a report of all voided checks in the system at a frequency defined by the Agency.

CMdS-Financial includes a "Weekly Cumulative Voided Payment Report" and a "Monthly Cumulative Voided Payment Report" to be produced as defined by the Agency.

FS41
The Contractor's solution shall produce a report detailing providers under a payment review status as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

Our reports are available in a report library in CMdS-Insights and can be copied and modified to provide different views of financial data such as targeting providers under a payment review status. This allows the authorized user to configure the data specific to individuals under a payment review scenario, in order to ensure the required information is included in the report. You can zero in on the information you need from our on-demand reports by using the included user prompts and filtering, as shown in Figure 4.2.16.2-22. This filtering generates a WHERE clause within the SQL behind the scenes.

Figure 4.2.16.2-22. CMdS-Insights On-Demand Criteria Selection
When using our on-demand library of reports, you can filter the results using prompts.

Conduent Proprietary Information

FS42
The Contractor's solution shall produce a report detailing all checks that have not cleared at a frequency as defined by the Agency. The report should allow the user to configure the fields that are displayed as well as the criteria (i.e. the WHERE clause) for the report details.

The CMdS-Financial product includes an "Unredeemed Warrant Report," shown in Figure 4.2.16.2-23 that lists all unredeemed warrants. Report detail includes check number, date issued, amount of the check, the dates that the first and second unredeemed warrant letters were sent to the payee, payee ID, and payee name.

Please see the introduction to this section for a discussion of how our solution supports the user selection of display fields and criteria when running a report.

Figure 4.2.16.2-23. Unredeemed Warrant Report
This report provides a view by line of business of all warrants that have been issued but not cleared.

FS43
The Contractor's solution shall have the ability for non-emergency transportation transactions to be pre-paid based on configurable business rules. [Added per Amendment 4, dated 01/03/20]

CMdS-Financial allows advance payments (payout) for future services. The payment is assigned to a budget with a funding source where the accounting codes and matching information are captured. Some considerations for the implementation that we should discuss include:

- What is the process for verifying that the pre-paid services were delivered?
- What happens when the calculated payment for the service is different than the pre-payment?

If the payments are being made to a transportation broker/vendor with capitated payments, our solution supports capitated payments as a standard process.

Conduent Proprietary Information

4.2.17 Option B. Call Center [RFP 3.10.17]

REQUIREMENT: RFP Section 3.10.17

In addition to the Core scope of the Claims Processing and Management Services module, states may procure additional components and services for activities not categorized in Sections 3.10.1 through 3.10.15. Option B: Call Center includes requirements to support robust Call Center management functionality to address provider and member inquiries through telephone, secure email, and text chat including resources to perform a wide range of activities to support efficient access to services for a diverse population. The solution will provide sophisticated automated workflow processes and integrated interactive voice response capabilities.

Our Call Center technology suite, combined with our national call center expertise and experience, allows us to deliver innovative and enhanced capabilities to enhance the customer experience.

As an optional additional service to the Core scope of the Claims Processing and Management Services module, states may procure member and provider call center technology and services to support their programs. Delivering robust Call Center services requires an experienced contractor who can deliver excellent customer service, optimize CSR performance by providing productive tools, facilitate compliance, and reduce operational costs as states acquire member and provider call center services for their programs. Conduent is that partner.

Why Choose Conduent?

- Proven success integrating, implementing, and operating government call centers since 1982
- Handling over 30 million customer contacts annually supporting 200+ languages
- Innovative, flexible, and scalable telephony platform with extensive call routing and built-in business continuity capabilities
- Strong and stable company with solid history of numerous health care successes

Conduent is a trusted industry leader in providing customer service solutions. Across the country, our services and solutions facilitate collaboration and innovation that impact and improve the quality of care for public health assistance program applicants and clients. By choosing Conduent and our CMdS-Call Center product, you have the benefit of advanced, feature-rich technology, while having the peace of mind in working with a vendor whose experience and expertise prove that we can deliver on time, within budget, and with minimal risk.

Call Center Expertise and Experience

Serving as an entry point and "face" of the State's programs, the Call Center is a vital service component of the project. Providing excellent customer service support and assistance to applicants, clients, and other populations is at the core of Conduent's extensive healthcare customer service experience.

Conduent currently operates 30 healthcare call centers nationwide, including Medicaid customer service centers. We also operate health insurance exchange (HIX), Medicaid, and Children's Health Insurance Program (CHIP) eligibility and enrollment centers in Arizona, Connecticut, South Carolina, Kentucky, Mississippi, Indiana, New Jersey, and Virginia. Our call center operations range in size from five to approximately 1,200 agents per location and handle approximately 30 million calls annually. Our call center locations support individual government healthcare accounts that handle as few as 4,000 calls to as many as 9 million calls annually. We have operated customer service centers for Medicaid and other health and human services programs since 1982 and have demonstrated an outstanding record of excellence.

© 2020 Conduent State Healthcare, LLC

Why Conduent Call Centers are Successful

Best-in-class customer service is integral to business success; therefore, managing the caller's experience from beginning to end, no matter what the communication method or purpose, is essential to ensuring program satisfaction. Our success in delivering Call Center services is based on three major operational components: experienced people, streamlined processes, and ever-improving technology. Our skillful integration of these three elements has driven remarkable results for Call Centers across the nation. Figure 4.2.17-1 illustrates how our solution combines proven best practices and a well-trained staff.

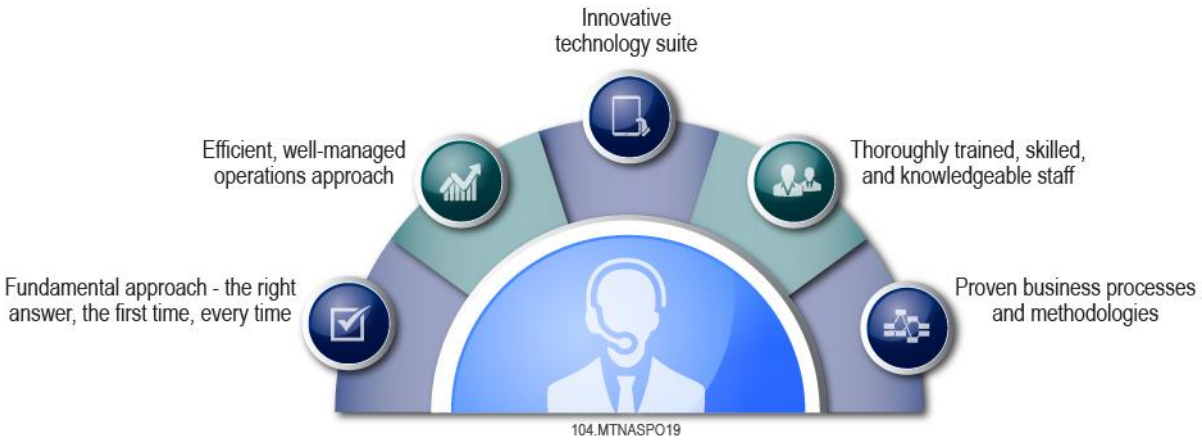

Figure 4.2.17-1. Why Conduent is the Best Choice for the Member and Provider Call Center
Conduent combines the right people, the right processes, and the right technology for your Call Center.

We offer an experience level that no other contractor can match. Serving as an entry point and "face" of State programs for members and providers, the Call Center is a vital service component of the project. Providing excellent call center support and assistance to members and providers is at the core of Conduent's extensive healthcare customer service experience. Call center management is more than a method for ensuring exceptional customer service—it cultivates a sense of respect for the callers' needs and underlines our desire for our team to meet those needs.

Key elements of our Call Center approach include (but are not limited to) the following:

- A knowledgeable, empathetic Call Center staff and leadership team that understands and supports the State's programs, goals, and initiatives
- Dedicated Call Center leadership focused on analyzing current and historical call volumes and occurrences, projecting future call volumes for staffing purposes, and managing team schedules so we consistently meet performance standards and goals
- Multiple channels for member and provider interaction and communication, including telephone, secure messaging, and chat
- A user-friendly communications framework housing details about calls and contacts made
- A full profile of standard reports along with functionality for creating customized ad hoc reports that are informative and easy to use

© 2020 Conduent State Healthcare, LLC

- Knowledge repository via our customer relationship management (CRM) solution, Microsoft Dynamics, to provide easy access for CSRs to reference material such as guided scripts, policy and procedures, workflows, Frequently Asked Questions, and resource telephone numbers, available within seconds to assist call center agents answer inquiries
- Use of Verizon's Virtual Contact Center, a cloud-based, hosted solution offering an integrated IVR/voice portal, call distribution and quality assurance management
- Integrated CRM solution to streamline and modernize the way we document and track each contact

Throughout the remainder of this section, we provide a detailed explanation of how we plan to address the RFP requirements for the member and provider Call Center. As we demonstrate in our response, we offer a comprehensive solution to support the RFP's requirements for a successful Call Center implementation.

4.2.17.1 Member and Provider Call Center [RFP 3.10.17.1, Attachment F]

REQUIREMENT: RFP Section 3.10.17.1, Attachment F

This section outlines the requirements necessary to meet call center functionality for providers and members. The call center solution must assist providers and billing agents with enrollment, application status, general billing questions, research and provide resolution advice for claims transactions, and verify member eligibility and benefit verification including service limits, service authorization, third party liability, and cost-share. Additionally, the solution shall support quality improvement activities including administering provider satisfaction surveys or collecting data necessary for performance measurement of Call Center staff.

This section also outlines the requirements necessary to provide call center services for state healthcare members. The call center must provide potential enrollees, new and existing members with instruction and information regarding benefits, accessing providers and services, in addition to directing members to other human service resources. The call center solution must assist members with claims-related inquiries including claims adjudication and payment status. If the Offeror chooses to include these services in their proposal the Offeror must describe in detail their approach to meet the Option B Call Center requirements in Attachment F – Requirements Response Matrix Requirements Matrix. The Offeror simply repeating the RFP requirements does not qualify as a good response as defined in Section 6.1.1 of this RFP.

Conduent understands the desire to have a member and provider call center that is designed to achieve streamlined customer service, increasing first call resolution, and overall customer satisfaction. Beyond answering calls and providing Call Center solutions, Conduent delivers the strategic consultative insight, technology, operational and back office expertise required to economically scale services for State programs of any size and scope. We provide knowledgeable staff, advanced telephony technology, and innovative solutions and services to accurately and efficiently address member and provider questions and issues, including:

- Providing potential enrollees, new, and existing members with instruction and information regarding benefits, accessing providers and services, and directing members to other human service resources
- Assisting providers and billing agents with general and billing questions
- Researching and providing details regarding claims status and resolution
- Verifying member eligibility and benefit verification including service limits, service authorization, third party liability, and cost-share
- Supporting quality improvement activities including administering provider satisfaction surveys or collecting data necessary for performance measurement of Call Center staff
- Assisting members with claims-related inquiries including claims adjudication and payment status

As an integrated component of our modular product, our CMdS-Call Center module supports multi-channel inbound and outbound interactions including phone, email, text messaging, chat sessions, and written correspondence. CMdS-Call Center includes advanced contact management and telephone

© 2020 Conduent State Healthcare, LLC

system technology that facilitates an enhanced customer experience. Our technology solution is a powerful combination of industry leading applications and tools.

Advanced, Innovative Call Center Solutions

Conduent is a reliable partner with a long history of providing comprehensive member and provider Call Center solutions, including telecommunications and internet infrastructure, call management solutions, and a customer relationship management (CRM) product. Our Call Center approach provides the system functionality, staff availability, infrastructure, and equipment necessary to meet or exceed your requirements for call center services. We provide a complete Call Center product to manage all contacts and multiple channels of communication.

Verizon's Virtual Contact Center

Our proposed Call Center technology product, CMdS-Call Center, includes Verizon's Virtual Contact Center, which provides an innovative telecommunications structure that allows us to deliver efficient and accurate customer service. Virtual Contact Center is a cloud-based, multimedia contact center offering. Fully-managed within application hosting facilities, Virtual Contact Center provides a comprehensive library of customer support capabilities without requiring a costly investment in software, hardware, and support personnel. With Virtual Contact Center, we can offer enhanced customer service through a variety of multimedia contact options and customer prioritization and intelligent contact routing tools. From hiring staff, training agents, staffing your contact center, and handling interactions, Virtual Contact Center provides your Call Center with the tools required to provide an exceptional customer experience.

Because Virtual Contact Center is a complete in-network product, customer service agents only require a PC, Internet Connection, and a telephone to get started. Backed by a strict Service Level Agreement, Conduent and the State can have confidence in our Call Center solution.

Key advantages of Virtual Contact Center include:

- 100% hosted in geographically redundant data centers
- Multimedia support including voice, email, chat, SMS, and social media channels
- Integration with 3rd party systems, such as our CRM solution, Microsoft® Dynamics
- Functionality to support integration of overflow call centers and/or remote call center agents

Features and Benefits

Virtual Contact Center is a complete cloud-based contact center product providing the Call Center with a comprehensive set of contact center tools. With this product, we can provide agent training, properly schedule and staff agents, and interact with members and providers through multiple channels, such as phone, email, chat, SMS, or social media. Callers can leave a voicemail, wait in queue for the next available CSR, or they can request a call back from an agent. With a comprehensive set of routing options, businesses can improve their customer's experience and increase first call resolution. Integrated contact reporting will provide the Call Center with real-time and historical reports ensuring internal contact handling metrics are met.

© 2020 Conduent State Healthcare, LLC

Through Virtual Contact Center, our Call Center has access to an advanced set of capabilities. Agents have easy access to e-Learning modules which will increase their knowledge when not handling active calls. Supervisors can properly forecast and schedule contact center agents through embedded Workforce Management capabilities. Virtual Contact Center provides a comprehensive set of tools that work for call centers of any size.

As required by the RFP, in the remainder of this section we have provided detailed responses that describe our approach to meeting the Option B Call Center requirements in Attachment F – Requirements Response Matrix Requirements Matrix.

MPCC01
The Contractor shall staff, operate, and maintain a call center for members and providers with staff that are experienced, knowledgeable, and certified (if necessary) on the Agency's policies and claims solution as defined by the Agency

Conduent staff operates and maintains the member and provider Call Center with staff that have the necessary knowledge and tools to provide exceptional customer service. Our Call Center training and quality management programs produce customer service representatives (CSRs) that are experienced, knowledgeable, and certified on the Agency's policies and claims solutions.

Qualified and Knowledgeable Staff

Conduent is committed to providing exceptionally qualified staff to provide all deliverables and services required for this project. We recognize the need to have access to the right people in order to provide best-in-class service and solutions. Our staffing plan, like our organization, delineates formal lines of authority, communication, and responsibility; clearly assigning duties and responsibilities in a collaborative environment. We have experts to support our operations in the areas of technology, human resources, workforce management, recruiting, training, and operational excellence, among others.

Our staffing plan is data driven. We utilize historical statistics, performance indicators, and projected volumes to determine the optimal staffing levels needed to meet performance goals. Our plan incorporates contingency planning to address workload variations and potential disruptions. We identify potential risks early and take steps to mitigate the occurrence and impact of any risks, including complexity factors and documented assumptions such as work volume estimates for peak periods. We consistently analyze data to identify and implement changes to our staffing structure or processes to help ensure we meet or exceed performance goals. In addition, we set thresholds that exceed requirements so that we can proactively address potential problems before they affect our service or performance.

We employ a proven recruiting strategy that allows us to fulfill staffing requirements quickly and efficiently as call volumes rise and fall over the life of the contract. We incorporate the necessary activities to hire, train, and schedule agents at the appropriate times to address expected and unusual fluctuations in call volumes and back office activities.

© 2020 Conduent State Healthcare, LLC

Our staffing plan guides us in recruiting and training CSRs who:

- Assist with customer service inquiries and problem resolution
- Have excellent verbal and vocal skills (proper grammar, tone, volume, rate, sentence structure, use of positive language, and transitions)
- Have exceptional listening, questioning, and call control techniques
- Handle challenging telephone and customer service situations
- Possess strong computer and technical skills
- Answer phones professionally and respond to telephone inquiries using available resources
- Compose professional correspondence, including verbal, email, and electronic communications without requiring additional training
- Identify and appropriately escalate priority and difficult issues and route inquiries to appropriate resources
- Accurately and efficiently process information and tasks

Conduent's CSRs have the right skills and client-service mindset to handle calls courteously and accurately. We train our CSRs to provide members and providers with accurate guidance in a one-stop-shop approach. Our Quality Assurance (QA) program randomly selects calls and compares them to rigorous standards set by Conduent and the State. In addition, our product includes post-call survey functionality, which can deliver a survey right after every customer interaction and provide users the ability to review feedback in near-real time. This allows us to monitor program health, implement improvements to processes, and mentor CSRs as needed.

Exceptional Customer Service through One-Call Resolution

Conduent empowers its staff to deliver "One-Call Resolution." This means resolving issues raised in a telephone interaction in one call – the first time. We train our CSRs to view notices and case notice history, explain the notices, and provide information and next steps involved in the application process. Our training program emphasizes understanding resolution pathways.

The resolution pathway begins with our CSRs confirming the reason for the call. We instruct CSRs to first acknowledge the caller's concern so they can properly address the issue. They then conduct the necessary research, either while talking to the caller or placing them on a brief hold to conduct more in-depth analysis. While conducting their research, they rely on their job aids, scripting, training tools, and the program's policy manuals to provide accurate information to the caller. The CSRs may need to refer some callers to other departments or agencies depending on the situation. When necessary for CSRs to transfer calls, they follow call transfer procedures to attempt a warm transfer to the appropriate call center or staff member. If the warm transfer is successful, they provide all the details regarding the issue to the State worker so the caller will not have to repeat or restate the issue. In rare cases where our CSR is not able to resolve an issue through approved procedures or a transfer to an appropriate resource, they follow escalation procedures to route the consumer to a supervisor or the appropriate department.

To encourage a One-Call Resolution culture, Conduent provides our employees with a complete understanding of programs and processes, desktop access to training material and job aids, and supervisor support readily available to perform their job. Having successfully delivered similar services to more than 37 states, Conduent has developed standard responses for typical contact-centered questions, and escalation paths to efficiently resolve issues. If CSRs cannot resolve an issue, they have immediate access

© 2020 Conduent State Healthcare, LLC

to supervisors for assistance. Our supervisors can explain the details of these programs in a manner that callers can understand and have access to subject-matter experts (SMEs) for the more difficult issues. Our staffing model supports specialized units for unique populations and provides subject matter experts in those areas. We work with the State to define the number of SMEs for each unit for optimal first call resolution. These proven processes allow our CSRs to deliver answers to more than 95% of common client questions.

MPCC02
The Contractor shall provide an Automated Call Distribution (ACD) solution that intelligently prioritizes, sequences, and routes calls, via configurable workflow processes, in an order (e.g., agent availability, skill level, call type) as defined by the Agency.

Our product is designed to get the caller to the right CSR, quickly. Verizon's Virtual Contact Center Automated Call Distribution (ACD) uses advanced, configurable workflows to intelligently prioritize, queue, and route calls. The ACD works with the IVR to assign incoming calls to available staff efficiently and equitably with consideration for specialized tasks, language proficiency, or other skills using "queues," as shown in Figure 4.2.17.1-1. Since the ACD stores current CSR skill information in the system, the first available, trained CSR with the appropriate skill set receives the call to match the caller's specific needs. For example, if a Spanish speaking caller is requesting assistance with an eligibility question, our system can connect the caller with a Spanish speaking CSR well-trained on application processing, eligibility, and enrollment.

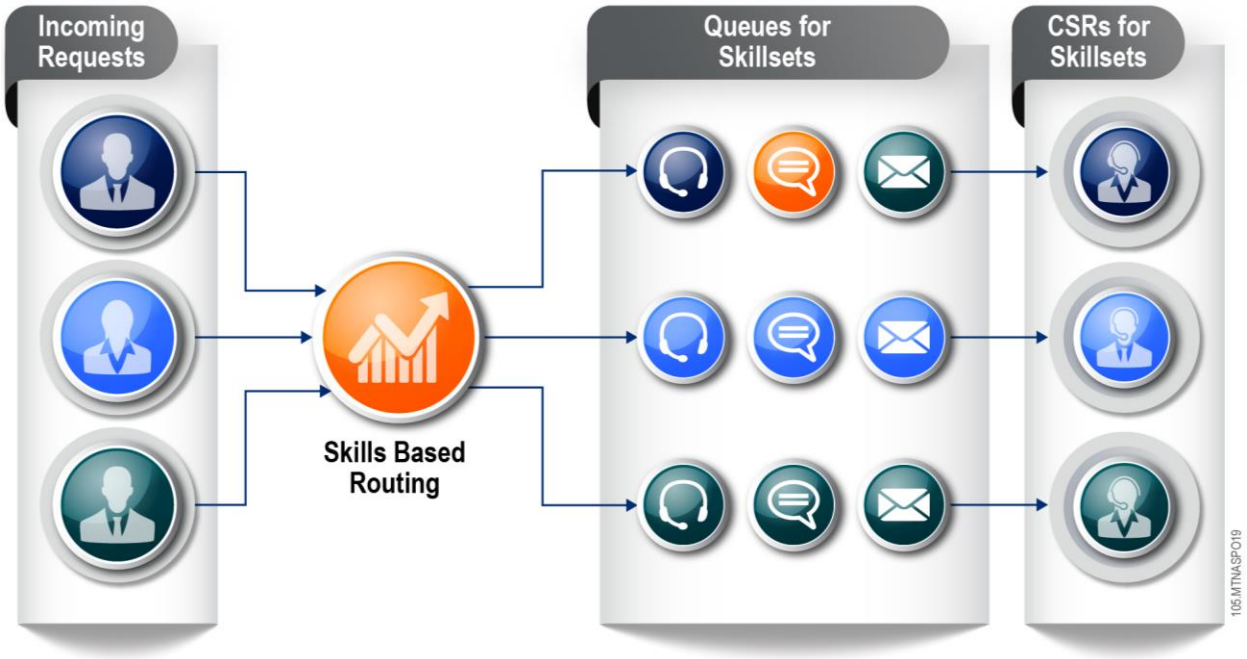

Figure 4.2.17.1-1. Call Center Call Routing Capabilities
Skills-based routing is critical to the optimum efficiency of the Montana Member and Provider Call Center.

© 2020 Conduent State Healthcare, LLC

Pre-recorded scripts welcome the caller, validate the caller's identity, prompt the caller to determine the nature of the call, direct the caller to select menu choices matching their area of interest, and collect the necessary information to route the call to the CSR best able to help. The ACD routes the call to an available CSR via an appropriate queue. Navigation paths can route calls to specific individuals or groups based on severity, priority, escalation criteria, and caller information needs. In addition, our IVR provides clear instructions for callers who wish to opt-out of the IVR and be transferred directly to a CSR.

MPCC03
The Contractor's solution shall provide the software and services to enable and support interactive communications via SMS, chat, and email between the call center staff, Agency staff, the Agency's designee, and member and provider stakeholders as defined by the Agency.

Members, providers, agency staff, agency's designees, and other stakeholders use several communication tools to reach our Call Center staff. Our Call Center product fully supports interactive communications and contact routing via SMS, chat, and email. Virtual Contact Center empowers CSRs to productively interact with customers in voice and digital channels with the ability to quickly deploy and route changes in very short durations.

Inbound Voice uses call characteristics, data, and CSR skills to segment, route and queue toll-free calls or local calls to any agent regardless of their physical location.

SMS is a fully-integrated channel within the solution, allowing us to receive and respond to customer feedback via text messaging or initiate SMS message campaigns to reach members or providers.

Web Chat reduces calls to CSRs by serving members and providers through the State's website or Web Portals. The chat solution queues, routes, and distributes customer-initiated chat sessions to the CSR or specifically skilled CSR group.

Email uses scripting tools to design routing rules for all media. Virtual Contact Center queues and routes email to the appropriately skilled agent/agent group, whether on-site or remote. With the embedded email management system, we can quickly respond to provider, member, or other stakeholder inquiries without changing screens or waiting for email delivery. The email functionality is also configurable to provide an automated response to the sender letting them know we have received their email and can provide an estimated timeframe to expect a reply.

MPCC04
The Contractor's solution shall provide HIPAA-compliant interactive communication methods (e.g., email, text chat) as defined by the Agency.

Verizon's partner, NICE inContact, follows HIPAA standards and provides HITRUST Security Statement, to assert their alignment with HIPAA requirements for operational and technical controls. Additionally, the Virtual Contact Center for Government is built with the high availability required by a cloud-platform, which means that security is a critical ingredient of the product.

© 2020 Conduent State Healthcare, LLC

The product's security framework includes:

- Architecture based on FedRAMP security requirements; government-defined SLAs for resolving security events
- Data is protected both in flight and at rest with critical security controls at the network and database layers
- Redundant architecture helps improve fault-tolerance and uptime
- Dedicated infrastructure for US government customers or entities requiring the additional security benefits of a FedRAMP audited platform
- FIPS 140-2 compliant encryption used for all data traffic and data at rest
- Regularly audited by independent FedRAMP 3rd party assessment organization; monthly reviews of security posture with sponsoring agency.

MPCC05

The Contractor's solution shall provide automatic screen presentation of member/provider data (e.g., name, provider or member ID, phone number, email address, preferred language, associated documents, historical call records) when the call is answered as defined by the Agency.

Verizon's Virtual Contact Center's integration with our CRM solution allows for screen pop functionality, which means the call is transferred to a CSR with screens displaying the purpose of the call and essential identifying data entered by the caller. This Computer Telephony Integration (CTI) is accomplished by adding attributes to the call interaction as it flows through the IVR. Call attributes include information such as language preference, IVR exit point, contact ID, and call reason. Caller specific data, such as data retrieved through web services, is attached to the call interaction after the caller has been authenticated in the IVR. When the IVR directs the call into the queue and/or delivered to a CSR, customized CRM screen pop scripts encode the data and pass it to the CRM. As the CSR answers the call, the CRM screen pop opens a contact incident. Web services in both the IVR and CRM extract data from other systems, such as CMdS or external eligibility systems, to allow caller specific data to be played back to the caller in the IVR. The additional data is displayed on the caller's contact record to assist the CSR in handling the call, expediting the caller identification process, and allowing us to provide swift, enhanced customer service.

MPCC06

The Contractor's solution shall provide multiple language options (e.g., English, Spanish) and services for the hearing impaired (TTY/TTD) as defined by the agency

Providing culturally sensitive service in the caller's preferred language is integral for clear communication and achieving high customer satisfaction results. Conduent seeks potential employees with cultural backgrounds and language skills that match those of the consumers we serve. To help provide the best service to every individual who contacts the Call Center, we staff a portion of our call centers with bilingual English-Spanish CSRs. Our bilingual staff are certified in both their program knowledge and language specialty. This provides callers who request a language other than English with the same level of quality and experience as those speaking in English.

© 2020 Conduent State Healthcare, LLC

Translation Services

To address additional language needs, we contract with a third-party vendor, United Language Group, to provide telephone-based translation services for languages other than English, including the State's prevalent and non-prevalent languages. Call Center CSRs are trained on conferencing in the language translation services and our long-term partner is accustomed to translating the unique terminology needed to support the project.

United Language Group (ULG) provides translation services in 200 languages and has been providing high quality support for our Medicaid and other Health and Human Service contact centers for more than a decade. ULG works with over 10,000 specialized linguists throughout the world. All ULG language professionals are degreed and certified within their industry and can demonstrate a track record of effectiveness. All translators and interpreters must go through ULG's rigorous screening process, followed by industry-specific language testing. ULG utilizes a proprietary language mastery platform (Octave Technology Suite) – which is more robust than standard translation management. ULG meets multiple International Organization for Standardization (ISO) certification categories related to process, quality, and security in the translation field.

If a caller requires assistance in a language other than English or Spanish, the CSR follows specific processes to conference in the appropriate translator to help complete the call as shown in Figure 4.2.17.1-2.

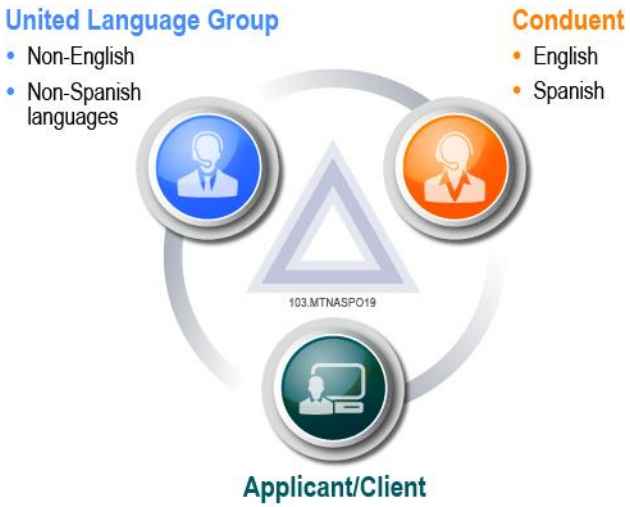

Figure 4.2.17.1-2. United Language Group
To effectively serve callers, we rely on our longtime partner ULG to provide translation services for languages other than English and Spanish.

To access ULG translation service, the CSR conferences in ULG dialing their toll-free telephone number, requests the specific language of the caller, provides the unique Conduent access code, and begins the three-way call when the interpreter joins the line. There is no need for the caller to hang up or redial to access translation services, and this service is provided at no fee to the caller or the State.

© 2020 Conduent State Healthcare, LLC

TTY/TDD Compatibility

Our CSRs and supervisors receive training in assisting individuals with hearing impairments, developmental disabilities, or other special needs. We leverage readily available services such as the State's local Relay service to help support these individuals, as well as the technology tools and best practices which enable the appropriate delivery of general assistance via alternative channels such as chat or asynchronous messaging.

Additionally, our Virtual Contact Center telephony platform offers an integrated telephony soft-phone solution that provides seamless connectivity to CSRs interacting with individuals with a vocal or hearing impairment. The Virtual Contact Center provides integrated TTY conversation support for CSRs that detects the text tones from the TTY and displays it as text to the CSR. Similarly, a CSR can type characters and the system converts the text to tones for conversion by the individual's TTY/TDD.

MPCC07
The Contractor's solution shall provide and maintain industry standard quality monitoring capability (e.g., silent monitoring, assignment of unique tracking numbers, voice and screen/multi-media capturing) to analyze the entire call experience as defined by the Agency.

Virtual Contact Center's core offering provides supervisors the ability to silently monitor agent calls, coach agents, interrupt, or take over calls. Additionally, with Virtual Contact Center, you can identify the right agents and calls for evaluation, capture employees' feedback, and share across peers and groups with Quality Management. Verizon's Virtual Contact Center offers multiple Quality Management options.

Verizon's Call Center Quality Management Essentials package includes:

- Evaluations and calibration
- Form designer
- Call flow analysis (CTI)
- Coaching
- QM reports
- My Universe/Dashboards
- Monitor
- Quality planner

Verizon's Quality Management Advanced package includes:

- All of the features of QM Essentials
- Out of the box KPIs
- Scorecards
- KPI-based interaction drill down

State-of-the-art, industry-leading quality management tools are critical to the success of any Call Center. Using tools such as Verizon's Virtual Contact Center for call recordings and screen captures, allows us to increase CSR efficiency and the client experience, while improving business performance. Quality Management Pro software is used to record, monitor, and audit the performance of each CSR. Callers receive a prerecorded message to notify them the call may be recorded for quality assurance (QA)

© 2020 Conduent State Healthcare, LLC

purposes. Our proposed tool provides synchronized voice and data recording to capture conversations between callers and CSRs and the corresponding activities taking place on the CSR's desktop, such as keystrokes, data entry, and screen navigation.

The CSR's screen activities are recorded during calls for quality monitoring and training purposes, as shown in Figure 4.2.17.1-3. Intelligent call recording uses a web-based interface to enable Conduent, Agency, or other authorized personnel to find and review recordings of voice and screen data. We routinely analyze call and screen recording data and adjust training protocols, desk level procedures, etc., accordingly to support continuous process improvement.

Figure 4.2.17.1-3. Recording of Both Calls and Desktop Activity
Intelligent call recording features live call monitoring and recording of both voice and screen activities.

Our quality management staff performs monitoring reviews using these recordings and standard monitoring evaluation forms approved by the State, while providing completed forms to Call Center leadership. Supervisors review the evaluation results and provide feedback when warranted on CSR performance. Our supervisors can also live-monitor calls and coach CSRs on the spot.

© 2020 Conduent State Healthcare, LLC

MPCC08
The Contractor's solution shall track, store, monitor, maintain, report and display on a dashboard call center statistics at intervals as defined by the Agency (e.g., real time, weekly, monthly, quarterly, and annually) to include, but not limited to:
a) Abandon rate
b) Availability and agent utilization
c) Average speed of answer (ASA)
d) Call duration (e.g., minutes, seconds)
e) Call volume
f) Customer satisfaction
g) Contact time (e.g., minutes, seconds)
h) One call resolution rate
i) Peak hour statistics
j) Identification of historical trends
k) Busy signal
l) Disconnected calls
m) Other areas as defined by the Agency

Verizon's Virtual Contact Center Reporting, the integrated reporting component of our Call Center solution, provides real-time information on call center unit performance. The Virtual Contact Center reporting technology guides smarter, more informed decisions with real-time and historical insights on key business metrics and trends through fully integrated reporting and data access tools. Real-time dashboards provide instant, relevant information to track operational and performance metrics, including but not limited to outgoing calls, calls waiting, and CSR availability and login times. The reporting functionality provides a full array of call statistics, including average wait time, average handle time, abandonment rates, hold time, etc. In addition, we can provide authorized users at the State with access to run and view both real-time and historical reports from the Virtual Contact Center solution.

Virtual Contact Center's real-time dashboards can be displayed on wallboards/contact center walls, supervisor and agent displays, or anywhere that is needed with appropriate web access. Figure 4.2.17.1-4 provides a sample dashboard.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.17.1-4. Sample Reporting Dashboard
Real-time dashboards are configurable and allow users to determine what information and trends they would like to view and track.

The dashboards can be customized to display historical or real-time data and can be filtered by team or skill to display information pertinent to the audience. Virtual Contact Center also has flexible, REST application program interfaces (APIs) that can be leveraged to feed directly into wallboards, desktop widgets, and data warehouses, as necessary.

Additionally, through the optional inView solution, provides users with the ability to create wallboards showing data from the Virtual Contact Center platform, as well as data pulled from other third-party applications such as CRMs. This capability allows managers to truly understand what is occurring in their call center in real-time.

MPCC09
The Contractor's solution shall provide searchable and viewable communication management system that tracks all call center activities and communications, including all correspondence that is generated to and received from providers and members.

Managing the member or provider experience from beginning to end, no matter what the communication method or purpose, is critical to providing program satisfaction for stakeholders and program success for the State. Our Call Center solution supports multiple channels for communicating information to clients, including phone calls, text messages, email, online chat, web portal, and paper copy. It serves as a searchable and viewable communication management system that tracks all call center activities and communications.

Our approach to correspondence automates the design, creation, and production of vital business communications ranging from a single letter to mass mailings. Our Call Center staff easily creates,

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

produces, and stores templates for standard letters and notices to communicate with program clients. We scan and track inbound and outbound correspondences (e.g., notices, letters, emails, and facsimiles) in our enterprise content management (ECM) solution. Microsoft Dynamic's search functionality makes it easy for Call Center staff to locate needed communications by various search elements (e.g., client name, Medicaid ID, date, or keyword). A contact record index is created in the system for each generated notice. This index enables the search function and then links the document image directly to the associated correspondence record as an attachment—providing real-time access to previously generated notices. These notices can be viewed on the web portal by the client ID, date, notice/letter type, or worker.

Reporting. Virtual Contact Center reports display current data about agents, where the agents are located, the number of agents who are in the different states, detailed information about contacts, and current queue information. The Virtual Contact Center menu opens when users right-click the inTouch icon in the Microsoft Windows system taskbar. These reports are updated from the internet every five seconds. The following is a list of the available reports:

- Agent Count by State
- Agent Counter
- Agent List
- Contact List
- Contacts States by Skill
- Queue Counter
- Queue Trend

There are over 100 available standard reports. A small sample of these reports include:

- **All Agents.** The Agent list enables appropriate users to view the agents that are logged in and their current state. The colored box next to each agent indicates their state: Red agents are unavailable, green agents are available, purple means an agent is handling an ACD contact, and yellow designates an outbound call. By right clicking on this report you can filter the list by team or agent. The appearance of the report can be modified through the Agent Zoom feature.
- **Queue Counter.** This report is a basic numerical display of the calls in queue. Conduent can resize the report as desired (this report is frequently resized to the full screen dimensions and displayed in the contact center as a live queue counter for agents). The queue counter can be filtered by media, campaign, and skill or can display the number of calls in queue or longest wait in queue.
- **Service Level.** This report shows the percentage of calls answered within the configured time (Service Level Threshold) for each skill. Conduent can filter the report by campaign and skill.
- **Active Contacts.** This report shows a list of current active contacts and details about each one. This report will display the skill needed to assist each contact, state of the contact, time spent in current state, agent handling the contact, the contact's total time in the network, and the campaign and media type. Yellow contacts are in a pre-queue state (i.e., navigating an IVR). Red contacts are in queue, routing to agents or have requested a call back. Green contacts are active with an agent (this state will also display hold time.). Blue contacts are post agent contacts (i.e., transferred calls or contacts that have been routed back into the network after speaking to an agent).

© 2020 Conduent State Healthcare, LLC

- **Agent.** This report is a numerical display of the total agents working and how many agents are in each state. This report can be filtered by team.
- **Agent Status Chart.** This current bar chart report shows the total number of agents in each state for your entire business.

MPCC10
The Contractor's solution shall provide, maintain and operate a secure interactive voice response system (IVRS) with a Contractor-supplied telephone number(s) (e.g., local, toll-free), as defined by the Agency.

Virtual Contact Center's secure IVR solution interacts with callers, gathers information, and delivers the right data to the caller and agent. Available through a Conduent-supplied toll-free and/or local telephone number, the IVR solution triages all incoming calls, directing callers to the information and/or the CSR who can best assist them. The solution is operational 24/7/365, providing a convenient way for members and providers to access program information around the clock. Callers can always access State-approved recorded information and self-service options in English or other languages required by the State, 24/7/365. Available functionality of the Virtual Contact Center IVR solution includes:

- **Visual call workflow development** to quickly and efficiently define how each contact needs to be driven to completion, as well as to quickly respond to program and process changes by updating the IVR and routing flows.
- **CRM integration** to support efficient contact routing and screen pop functionality, which means the call is transferred to a CSR with screens displaying essential data and the purpose of the call.
- **Text-to-speech** functionality to support automated interactions, allowing the IVR to read text back to the caller and provide self-service options.
- **IVR reporting** to monitor and analyze effectiveness and program trends, as well as improve caller satisfaction by improving IVR flows and caller interactions.
- **Self-service capabilities** that save time and money by offloading routine activities that do not require agent intervention allowing agents to be more readily available to assist callers for technical and in-depth questions.
- **Advanced Speech Recognition (ASR)** allows callers to use voice prompts with their own voice, instead of the phone pad, to interact and access a wide variety of information. Instead of listening to long menus and pressing keys to choose the desired service, the user can say the service's name and the IVR connects the user to their desired destination.
- **Auto Attendant** to smoothly and efficiently route calls within the system and to the appropriate call center agent.

Our IVR solution receives and handles incoming calls from toll-free and local program telephone numbers. The call is transferred to the appropriate queue through integration with the ACD skills-based routing business rules.

Figure 4.2.17.1-5 presents an overview of the process for a caller to request information through the IVR.

© 2020 Conduent State Healthcare, LLC

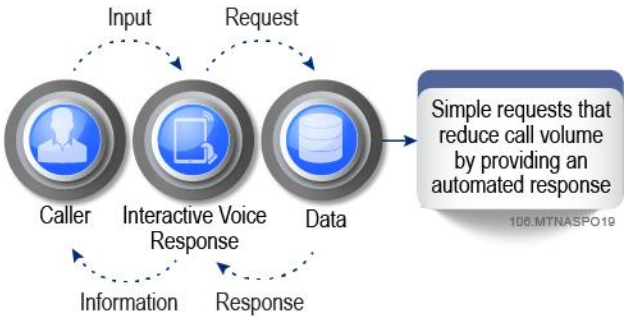

Figure 4.2.17.1-5. IVR High Level Flow

Our IVR solution answers every call and enables self-service in a simple, user friendly way—regardless of the time of day or volume of calls handled.

To provide scalability, availability, and continuity, the IVR platform is cloud-based and continuously monitored for performance consistency. This approach allows NICE inContact to scale the IVR quickly in times of high traffic volume, in addition to helping to ensure business continuity and disaster recovery, if needed.

Verizon's IVR solution improves caller satisfaction by simplifying IVR flows and caller interactions, allowing the caller to access the information and/or the person they need quickly. It automates basic information and tasks, such as providing address information, phone numbers for county offices, or website addresses, and it automatically identifies a caller's primary language if the system knows the caller's telephone number. The IVR provides full reporting capabilities, including real-time and summary caller activity and performance information. By reviewing caller activity within the IVR (for example, the options the caller chose or where they transferred out of the IVR or dropped the call), Conduent can continuously improve IVR choices, reduce the volume of calls that transfer to a CSR, and improve caller experience.

MPCC11

The Contractor shall provide an Interactive Voice Response System (IVRS) that allows a caller to select an option to reach a live call center representative during hours of operation with the ability to support call center integration with a configurable menu-driven design, as defined by the Agency, that allows for efficient navigation to the appropriate resource(s). In addition the IVRS shall support configurable scripts for announcements and messages (e.g., regarding hours of operation, emergencies, and system availability) as defined by the Agency.

Verizon's solution promotes first-call resolution and allows callers to select an option to reach a live call center representative during hours of operation. The solution provides the ability to support call center integration with a configurable menu-driven design. The IVR solution is designed to reduce call answering and overall handling times and provides metrics and reports to monitor performance and support continuous improvement of IVR functionality. The solution provides flexible scripting, defined call flows, and IVR trees, all delivered in required languages as defined by the Agency.

The features and functionality provided by Verizon's IVR solution include:

- **Automated, Self-Service Options.** Callers can obtain automated information 24 hours a day, 7 days a week through the IVR. Virtual Contact Center can create automated, self-service customer interactions, saving time and money by offloading routine activities that do not require agent

© 2020 Conduent State Healthcare, LLC

intervention, allowing agents to be more readily available to assist callers for technical and in-depth questions. The IVR can extract variable information from a database, or from the web, and convert it to audible speech. By responding to prompts provided by the IVR, speech recognition capabilities allow callers to use voice prompts with their own voice, instead of the phone pad, to interact and access a wide variety of information. Instead of listening to long menus and pressing keys to choose the desired service, the user can say the service's name and the IVR connects the user to their desired destination. For example, the caller can simply say "application status", and the IVR will be provided with their application status in natural language. Through this use of a voice interface, callers can complete simple tasks quickly, with a hands-free experience, while navigating the IVR. Speech recognition by Virtual Contact Center greatly reduces the steps a user takes to accomplish a task which will increase customer satisfaction.

- **Language and Accessibility.** The IVR menus, program information, and self-service options can be made available in English and Spanish and provide the same caller experience in both languages. In addition, ULG can provide support in Spanish and other languages as needed. The IVR automatically identifies a caller's primary language if the system knows the caller's telephone number and provides the ability for the caller to change their language preference. It automatically routes the caller to an English or Spanish speaking caller. If the caller speaks a language other than English or Spanish, the IVR directs the caller to a CSR who can conference in translation services.
- **Screen Pop Functionality.** Virtual Contact Center's integration with our customer relationship management (CRM) solution allows for screen pop functionality, which means the call is transferred to a CSR with screens displaying the purpose of the call and essential identifying data entered by the caller. This integration is accomplished by adding attributes to the call interaction as it flows through the IVR. Call attributes include information such as language preference, IVR exit point, member ID, and call reason. Caller-specific data, such as data retrieved through web services, is attached to the call interaction after the caller has been authenticated in the IVR. When the IVR directs the call into the queue or to a CSR, customized CRM screen pop scripts encode the data and pass it to the CRM. As the ACD call is answered by the CSR, the CRM screen pop opens a contact incident.
- **Fast and Efficient Call Routing.** The ACD works with the IVR to assign incoming calls to available staff efficiently and equitably during business hours, with consideration to specialized tasks, language proficiency, or other skills using "queues." Since the ACD stores current CSR skill information in the system, the first available, trained CSR with the appropriate skill set receives the call to match the caller's specific needs. For example, if a Spanish speaking caller is requesting assistance with an eligibility question, we want them to be connected to a Spanish speaking CSR well trained on application processing, eligibility, and enrollment. Pre-recorded scripts welcome the caller, validate the caller's identity, prompt the caller to determine the nature of the call, direct the caller to select menu choices matching their area of interest, and collect the necessary information to route the call to the CSR best able to help. The ACD routes the call to an available CSR via an appropriate queue. Navigation paths can route calls to specific individuals or groups based on severity, priority, escalation criteria, and caller information needs.
- **Adaptability to Incorporate Changes and Updates.** One of the most useful features of Verizon's IVR solution is its agility and adaptability as program changes and updates are necessary. We can configure the IVR menus and incorporate changes and updates with minimal effort. Virtual Contact Center Studio provides a visual, user-friendly drag-and-drop interface for authorized project staff to make IVR updates when needed.

© 2020 Conduent State Healthcare, LLC

- **Emergency Messages.** Should we need to temporarily deliver messages to callers, for example, regarding unexpected closings, change of hours, or other notices at the State's direction, we can quickly implement a temporary message to be provided to callers. The adaptability of Verizon's solution enables us to modify emergency messages within the IVR, in as little as a few minutes —allowing us to quickly react to emergencies with minimal disruption or confusion for callers.
- **Informational and Educational Messages.** The phone messages within the IVR solution are fully configurable and we can implement or change prerecorded informational and educational messages with minimal effort. Informational and educational messages about topics such as program changes, application processing requirements, health education (such as flu shot reminders), or other helpful messages (such as estimated wait time) can quickly be added into the IVR menus to deliver the messages with logical timing within the call flow.

MPCC12
The Contractor's solution shall provide configurable role-based menus to authorized users that restricts the user's access to information appropriate for the user type as defined by the Agency.

Verizon's Virtual Contact Center solution is a roles-based, permissions-based platform. Conduent can create customized security profiles for the State's user community, i.e., agents, supervisors, admins, reporting personnel, quality management, etc. Virtual Contact Center also provides audit trails for any change made within the platform, providing varying levels of details about the change that occurred.

MPCC13
The Contractor shall create, configure, and maintain Agency approved IVRS voice messages, messages, responses, prompts by the required implementation date.

Verizon's Virtual Contact Center solution allows for Conduent to upload customized, professionally pre-recorded announcements, internally pre-recorded announcements, ad-hoc messages recorded on-the-fly, as well as using the Text-to-Speech (TTS) capabilities within the Studio call flow design tool.

MPCC14
The Contractor's solution shall provide the appropriate and scalable number of in-bound and out-bound access lines to meet caller demand based on monthly statistics as defined by the Agency.

Our solution provides the appropriate number of inbound and outbound access lines to meet caller demand. We determine this amount based on our experience in providing call center services and by analyzing monthly statistics as defined by the Agency. We provide enough lines to ensure that we have the capacity to handle the call volume and that callers do not receive busy signals. Virtual Contact Center is only limited based on the available bandwidth into the application from the network. The Verizon Virtual Contact Center solution provides for one port per agent and supervisor license. When needed, we can quickly procure additional ports for queuing during peak call times or for anticipated spikes in traffic.

© 2020 Conduent State Healthcare, LLC

MPCC15

The Contractor's solution shall provide the ability to log and track incoming calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.

Our customer relationship management (CRM) solution, Microsoft Dynamics, serves as our telephone call and correspondence tracking solution to log and track incoming calls with call reason and queue codes. It provides a comprehensive, electronic repository of all contacts made with the Call Center while offering efficient data entry, research, and reporting capabilities. Using Microsoft Dynamics, Call Center staff log incoming calls; maintain call histories for audit purposes; and track the date/time of the call. In addition, incoming caller information, purpose of call, actions taken to achieve resolution of the caller's issue, and escalation status is also logged. Contacts are recorded in a ticket with identifying information, including type of contact (i.e., call, fax, email correspondence, etc.). With Microsoft Dynamics, users have convenient access to a complete contact history for callers. Reports are easily generated and shared with the State, as needed, to show comprehensive call center results.

MPCC16

The Contractor's solution shall provide the ability to log and track outgoing calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.

Our CRM solution, Microsoft Dynamics, serves as our telephone call and correspondence tracking solution to log and track outgoing calls with call reason and queue codes as defined by the Department. With Microsoft Dynamics, users have convenient access to a complete contact history for callers. Reports are easily generated and shared with the State, as needed, to show comprehensive call center results. Figure 4.2.17.1-6 shows a sample tracking screen from Microsoft Dynamics.

Figure 4.2.17.1-6. Microsoft Dynamics

Using Microsoft Dynamics, call center staff log incoming and outgoing calls; maintain call histories for audit purposes; and track the date/time of the call, incoming caller information, purpose of call, actions taken to achieve resolution of the caller's issue, and escalation status.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

MPCC17

The Contractor's solution shall provide the capability to store, track, prioritize, and maintain a configurable log (e.g., date/time reported, issue, description, follow up completed, resolution, escalation contact and workflow) of member and provider complaints received by the call center through the resolution and closure of the complaint. The Agency will have real-time access to detailed information about all complaints.

Our CRM solution provides the functionality to maintain an electronic log of all member and provider complaints as defined by the Agency, as well as a task management component to track, escalate, and report actions taken and the final resolution of each complaint. The complaints are categorized as defined by the Department and thoroughly notated following a standardized process. Reporting within our CRM allows for each complaint to be tracked on a daily basis until a final resolution or a referral is recorded. Our CRM solution provides pre-determined scripting to assist CSRs in properly managing the inquiry. Web-based monitoring tools assist supervisors and/or leads in monitoring talk times and provide electronic notification methods for contact center staff to ask for assistance or to quickly escalate calls to a Supervisor's attention, so an agent can obtain help while an interaction is occurring. We also provide the Agency with real-time access to complaint tracking tools and reporting.

MPCC18

The Contractor's solution shall capture, store, maintain, and report detailed information, including a unique transaction number, for all inquiries made to the ACD, IVRS and FAXBACK including information requested and conveyed, as defined by the Agency.

Verizon's Virtual Contact Center reporting produces start-to-finish contact center statistics by capturing information surrounding each contact from the beginning to the end of the transaction, whether inbound or outbound, including IVR, email, chat, SMS interactions.

Each contact is assigned a unique ContactID number for reporting and this identifier is carried with the contact throughout the entire time the contact is in the system. Individual or groups or ContactIDs may be traced in the Call Detail reports where all ContactID history is logged for further analysis.

Conduent also utilizes RightFax to support incoming and outgoing faxes, each of which is captured, stored, maintained, and reported on using a unique transaction number.

MPCC19

The Contractor's solution shall capture, record, store, and maintain call information (e.g., time and date of call, duration, name and contact information, reason for calling, agent response, status of resolution, resolution description) for operations staff to utilize for research and/or auditing purposes as defined by the Agency.

Verizon's Virtual Contact Center solution readily captures time, date, duration, and the phone number of callers. Additionally, Conduent can enable Dispositions and/or Tags and customize these on a skill-by-skill basis. These can be optional or mandatory for agents during interaction handling. Virtual Contact Center also supports the ability for agents to enter comments into the comments field.

© 2020 Conduent State Healthcare, LLC

MPCC20
The Contractor's solution shall capture, store, monitor, maintain, report and display all unique transactions (e.g., ACD, IVRS, Faxback) on a dashboard by transaction type with the ability to search and filter (e.g., call type, provider or member ID, name, representative's ID or name, or a combination of these data elements) and view the audit trail of each transaction as defined by the Agency.

Verizon's Virtual Contact Center's real-time dashboards provide information about the number dialed, Automatic Number Identification (ANI) of the caller, and the skill, i.e., call type based on menu prompt selected, number dialed, etc. Any provider or member ID entered by the caller, will not be displayed in any real-time dashboards as this info is being temporarily stored (buffered) to be used only if there is backend/computer telephony integration in use.

MPCC21
The Contractor's solution shall have the ability to automatically or manually route calls (e.g., internal, external, IVRS/FaxBack, voicemail) between the IVRS and the ACD as defined by the Agency.

Verizon's Virtual Contact Center solution utilizes rules-based routing which are managed in the solution's Studio call flow design tool. Conduent can create/modify call flow routing scripts based on the Call Center's business needs.

The integration between the IVR and ACD functionality allows us to dynamically route customer interactions, both internally and externally, between the two components.

MPCC22
The Contractor's solution shall have the ability to update callers within the queue regarding how long the anticipated wait time is until their call is answered, with a routing option to leave a voicemail as defined by the Agency.

The telephone messages within the IVR solution are fully configurable and we can implement or change prerecorded informational and educational messages with minimal effort. Verizon's Virtual Contact Center Studio design tool allows us to create customized routing strategies which can include messages that announce estimated wait time, the caller's place in queue, and other custom wait messages and announcements. The solution allows callers to select an option to leave a voicemail as defined by the Agency.

MPCC23
The Contractor shall conduct quality call monitoring on a randomly selected sample of daily calls (a minimum of one half of one percent (0.005%) and no less than one call per agent, per day). The Contractor shall document and retain results of the quality call monitoring and submit the reports to the Agency.

We record inbound and outbound calls and of their associated screens at a percentage agreed upon by the State and Conduent. Our quality management staff performs quality call monitoring on a randomly selected sample of daily calls (a minimum of one half of one percent (0.005%) and no less than one call per agent, per day).

Our quality management staff performs monitoring reviews using call recordings and standard monitoring evaluation forms approved by the State, while providing completed forms to Call Center leadership.

© 2020 Conduent State Healthcare, LLC

Supervisors review the evaluation results and provide feedback when warranted on CSR performance. Our supervisors can also live-monitor calls and coach CSRs on the spot.

We document and retain results of the quality call monitoring and submit required and custom reports to the Agency.

MPCC24
The Contractor shall provide certified language interpretation (for verbal communication) and translation (for written communication) services for all callers and correspondence.

To enable accessibility and provide culturally sensitive service to all, regardless of language or special needs, we provide accurate written and verbal interpretation and translation for all callers and correspondence. We produce and distribute correspondence in a variety of media formats appropriate for the needs of vision impaired individuals. We include clear instructions on all written materials that describe how applicants and members can access materials in different formats and how to receive translation and interpretation services, both oral and written, in additional languages. We include multi-language taglines on written communications in prevalent languages as defined by the State.

Conduent contracts with ULG to provide oral, written, and even sign language translation services should the need arise. ULG is one of the largest translation, localization, and interpreting providers in the world, with offices based in seven countries on three continents. ULG provides translation services in 200 languages and has been providing high-quality support for our Medicaid, Child Support, and other Health and Human Service contact centers for more than a decade.

ULG works with over 10,000 specialized linguists throughout the world. All ULG language professionals are degreed and certified within their industry and can demonstrate a track record of effectiveness. All translators and interpreters must go through ULG's rigorous screening process, followed by industry-specific language testing. ULG meets multiple International Organization for Standardization (ISO) certification categories related to process, quality, and security in the translation field. Conduent customer service representatives (CSRs) are trained in working with ULG, and as our long-term partner, ULG is accustomed to translating the unique terminology needed to support our Call Centers.

Reporting for Translation Services. We document and monitor all translation and accessibility services through our CRM solution, Microsoft Dynamics. Our CSRs and other staff document each contact, including language preferences, use of our translation services, and requests for alternate formats of our written materials and correspondence. Through Microsoft Dynamics, we track and report on the number of Limited English Proficiency (LEP) persons served, primary languages, language assistance service requested, and the provision of those services.

MPCC25
The Contractor's solution shall utilize the same call center solution for both provider and member help line.

Conduent agrees to utilize the same Call Center technology and solutions to support both the provider and member help lines.

© 2020 Conduent State Healthcare, LLC

MPCC26
The Contractor's solution shall provide users the ability to attach or link one or more associated documents (e.g., MS Word, Excel, PDF, image) to one or more unique call records and allow for viewing, printing, emailing, or faxing of documents from within the call or linked call record, as defined by the Agency.

Our CRM solution provides our call center staff and other authorized users with the ability to quickly attach or link documents and correspondence in a variety of formats to one or more unique call records. Our document management software integrates with the CRM, allowing us to link scanned documents to the appropriate call record in the CRM. Users can view, print, email, or fax documents from within the call or linked call record in the CRM.

MPCC27
The Contractor's solution shall provide the ability to survey callers to rate performance measures (e.g., quality, timeliness, and other service delivery elements carried out by the Call Center) as defined by the Agency. The Contractor's solution shall capture caller satisfaction scores to determine the average satisfaction percentage score.

Customer feedback is a vital part of how we evaluate and improve the quality of the calls our CSRs handle. Verizon's Virtual Contact Center includes post-call survey functionality, which can deliver a survey right after every customer interaction and provide authorized users, such as our project management, call center leadership, and designated Agency staff, the ability to review feedback in near-real time.

Virtual Contact Center's survey functionality measures the customer's experience and delivers strong analytics and actionable information right down to the agent level in near-real time. This enables Conduent and the State to focus on agent improvement, and helps to drive the right behaviors in agents, to self-correct, if needed, pinpoint service recovery opportunities, and to identify improvement initiatives for the organization as a whole. Virtual Contact Center's survey functionality allows us to:

- Improve service recovery with detailed data on service breakdowns
- Accurately measure customer retention using statistical methods
- Create dashboard reporting to allow users to create, name and move the data they want to see with ease–users can save as a homepage
- Share dashboards with other users to increase awareness around customer experience

MPCC28
The Contractor shall capture, store, and maintain a multimedia recording of each distinct call center agent interaction with supporting index information (e.g., agent, topic, authorized user id, member id, provider id, date/time) as defined by the Agency. Upon request, provide the Agency with electronic copies of multimedia recordings which shall be archived according to Agency defined retention requirements.

Verizon's Virtual Contact Center solution can be configured to record up to 100% of calls, specific dialed numbers, or specific skills. Each interaction routed into Virtual Contact Center is assigned a Master ContactID. This ContactID follows the interaction from start-to-finish throughout the platform. Authorized Conduent users can search the Contact History within Virtual Contact Center's Central tool

© 2020 Conduent State Healthcare, LLC

for specific interactions, i.e., voice, chat, email, SMS, etc., using filters such as: ContactID, media type, dialed number, ANI, agent, skill, team, email to/from address, among others.

Virtual Contact Center offers flexible storage options to meet the Call Center's needs:

- **Standard Storage** – which provides the ability to retrieve and review call recordings on-demand. This option includes storage of multiple types of interactions and information associated with each call, including voice prompts, scripts, images, log files, voice mails, email, chat transcripts.
- **Archive Storage** – which provides economical, long-term storage. This option requires retrieval to view files. Automation is available to set archive rules for files based on age, type, etc.
- **Retrieval Storage** – which allows authorized personnel to retrieve files from archive storage and return them to standard storage.

4.2.18 Option C. Federal Reporting [RFP 3.10.18]

REQUIREMENT: RFP Section 3.10.18

In addition to the Core scope of the Claims Processing and Management Services module, states may procure additional components and services for activities not categorized in Sections 3.10.1 through 3.10.15. The Offeror's solution will need to provide comprehensive Federal Reporting functionality, including receiving and storing data and generating reports, to satisfy a state's reporting Federal requirements.

The Agency can rely on Conduent to produce federal reporting that is accurate and compliant with current federal and state regulations and guidelines.

Managing data and leveraging the power it brings to your programs are the driving forces behind the Conduent Medicaid Suite (CMdS)-Federal Reporting module. Our solution helps you manage your health care programs at optimal levels using state-of-art technology and tools. Our solution provides easy access to program data with flexible, user-friendly capabilities for administrative, financial, and clinical program analysis, modeling, and reporting. End users can easily learn and perform functions ranging from standard reporting to advanced ad hoc queries and analytics.

Our Federal Reporting Solution

- Extensive repository of program data
- Connects users to the right level of reporting
- Meets federal and state reporting requirements, including MARS/T-MSIS and Program Integrity/SURS
- Garnered CMS "Best Practices" recommendation for CMS federal reporting
- Configurable business rules allow easy customization and support future program growth

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Our Federal Reporting Solution Components

With a top-rated business intelligence platform, our CMdS-Federal Reporting solution provides scalability and flexibility to support your data and analytic needs, now and in the future. Our solution includes advanced COTS products aligned with MITA goals for implementing industry standards and products in the Medicaid environment. The solution seamlessly integrates with other modules including: CMdS-Claims and CMdS-Financial. The major components of CMdS-Federal Reporting include:

- Management and Administrative Reporting System (MARS)
- Transformed Medicaid Statistical Information System (T-MSIS)
- Fraud and Abuse Detection System (FADS)
- Surveillance Utilization Review System (SURS)

MARS

The MARS component consolidates data to produce a suite of reports required by federal and state regulations. MARS presents details on eligibility, participation, expenditures, usage, and claims processing. These statistics are presented for the current month but may be used in comparison with other timeframes so that users can evaluate progress, make forecasts, and determine the effectiveness and financial health of program policies relative to goals.

Authorized users access MARS reports through an online web portal where they can view summary to detail levels of information, use advanced graphics, and develop trend analyses and expenditure projections. Our MARS solution is easy to use and efficient. It is web-based and provides anytime access to program data and financial reports. From an operational standpoint, the solution offers several major benefits to states: immediate access to reports, built-in automated balancing, and easy import/export of data (e.g., budget data) in different formats.

The MARS portal includes features that go beyond traditional reporting by providing users with drill-down reporting capabilities that present the underlying details of summary information. Users can easily select a subset of data, instead of viewing an entire report. Data is available for viewing using pie charts, line charts, and advanced graphics. Users can target information and be confident that the results are accurate. The reports present statistics for the current month and users can compare current statistics to other timeframes to evaluate progress, make forecasts, and determine the effectiveness and financial health of Medicaid policies relative to goals. MARS produces CMS-certified reports using six reporting components:

- **Administrative Reporting.** These reports provide financial details, program activity status, and analyses of expenditures, Medicare participation, and claims processing performance. Program administrators use these details to evaluate program status, make financial policy decisions, and forecast program activity for planning purposes.
- **Operations Reporting.** This component provides detailed reports on the efficiency, accuracy, and timeliness of claims processing functions. Reports provide complete breakdowns of claims processing activity, adjudication activity, and the types and frequency of processing errors that might indicate training opportunities.

© 2020 Conduent State Healthcare, LLC

- **Member Reporting.** These reports show details of member activity within the Medicaid program, including participation, eligibility benefit usage, cost sharing, and geographical comparisons. This information helps to evaluate the effectiveness of the program in reaching eligible members and allows policy makers to make decisions based on trends and forecasts.
- **Provider Reporting.** This component provides detailed reports about enrollment and participation, cost settlement, claims filing, third party payment, and error frequency.
- **Drug Reporting.** These reports evaluate the cost of different types of drugs within the Medicaid program and evaluate the effectiveness of drug coverage for different eligibility groups.
- **Federal Reporting.** This component generates CMS federal reports and T-MSIS extract files that meet federal reporting requirements (including the CMS-64/CMS-21 Expenditure reports). These reports are used for analytical research, planning, budgeting, and policy analysis.

CMdS-Federal Reporting uses state-of the art reporting and database technology to provide the most advanced features to support your federal reporting requirements. The solution interfaces with third-party independent sources to load final payment summary information to the MARS component. The solution balances expenditures for a given time period to the penny. If the dollars don't balance, we stop the load for remediation. Surprisingly, our competitors still haven't achieved this balancing requirement. Correct balancing and the ability to substantiate report summary expenditures are key to providing confidence in the MARS data and reports.

T-MSIS

The T-MSIS national database provides CMS with information essential for monitoring and oversight of the Medicaid and CHIP programs. T-MSIS data includes information about member eligibility, member and provider enrollment, service utilization, claims and managed care data, and expenditures for Medicaid and CHIP. CMS continues to enforce and demand T-MSIS data quality compliance and may reduce enhanced Federal Financial Participation (FFP) for operational costs of systems unable to produce timely, accurate, and complete T-MSIS data.

Conduent's solution includes systematic early detection of data integrity issues and the ability to provide mandatory CMS data elements historically unavailable. Further, Conduent brings some of the most talented T-MSIS experts to this project. As the T-MSIS extracts have evolved over the last five years, Conduent developers and experts have been on the ground helping states translate their data based on federal regulations and meet the requirements for a successful MECT certification. Conduent's Federal Stamping process allows for the derivation of T-MSIS required data items, using state-based configuration for accurate reporting and mapping. It takes a meticulous and proactive approach to maintain compliance with all federal and state regulations like T-MSIS. Healthcare administration is constantly changing and so are the laws governing that administration. The Agency can rely on Conduent to keep processes and systems in compliance with ever-changing federal regulations.

In Figure 4.2.18-1, we provide an overview of our MARS and T-MSIS solution.

© 2020 Conduent State Healthcare, LLC

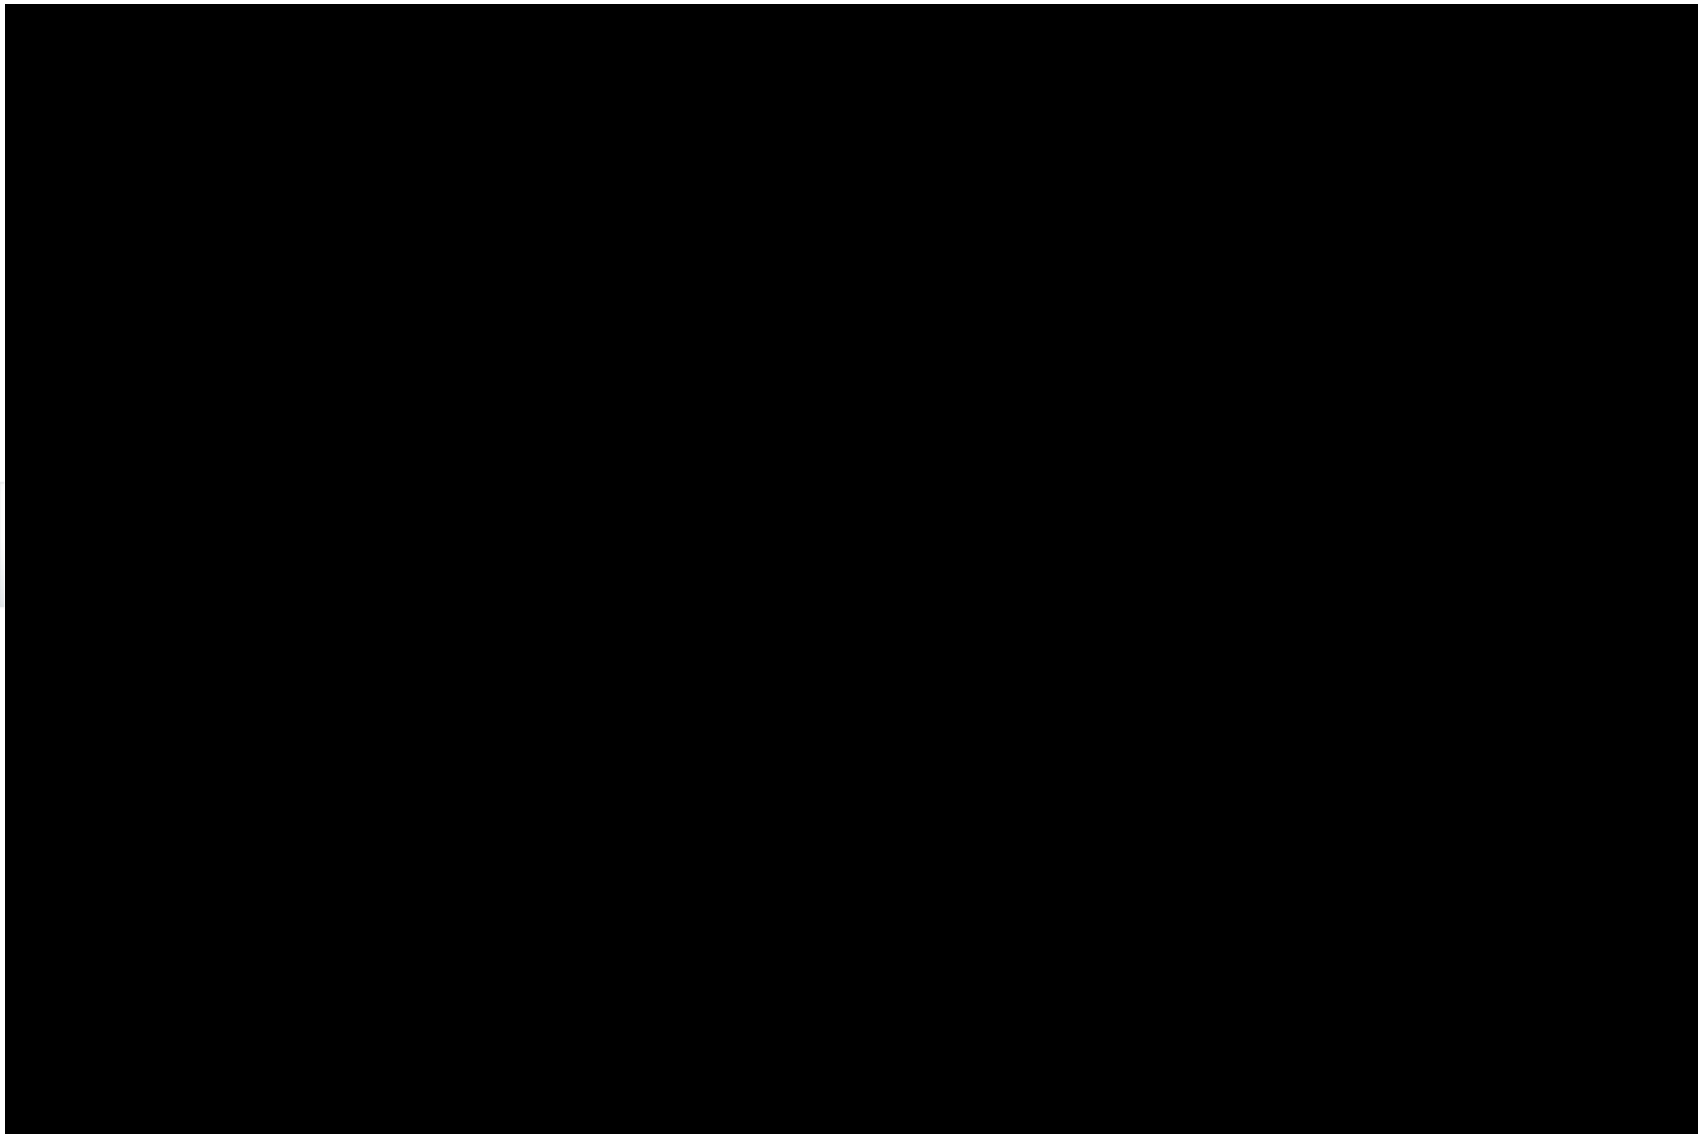

Figure 4.2.18-1. Our MARS and T-MSIS Solution Overview

Our MARS and T-MSIS components provide the Agency with data that is accurate, reliable, and easily substantiated.

FADS and SURS

To assist the state in meeting the challenges of reducing fraud, waste, and abuse, we propose our FADS solution that provides a suite of comprehensive analytical tools using advanced technologies to detect suspect claims, non-compliance, and complex healthcare fraud, waste, and abuse. FADS consolidates technologies while leveraging the many combined years of MMIS experience and in-depth knowledge of fraud and analytics within our staff to benefit the state in its fraud and abuse detection efforts. We provide the state with an integrated set of software tools, presented in a web environment, backed by a knowledgeable and proactive staff, working together to deliver to state users "assembled information," not just data. This information provides the ability to research aberrant behaviors, with a minimum of false positives, and confidently pursue suspicious providers and members, in order to enable the state to increase their recovered dollars. Table 4.2.18-1 identifies the FADS integrated components.

Table 4.2.18-1. FADS Components

ID	Description
FADS Research Tools	This component aids investigators and analysts in researching and analyzing fraud leads. Users can view the claims in the FADS data mart using various search criteria. (both headers and details), and related providers and members. The component also produces random sampling reports, case tracking reports, and other useful reports. The FADS Portal provides links to a library of reports and documents that have proven useful to investigators and other users. The portal also includes links to historical user meeting materials, provider billing manuals if they are available, and links to external information about fraud and abuse news. The User Manual and Training Guide is also available from the FADS portal.
SURS Peer Grouping	SURS offers flexibility in the creation of meaningful peer group profiles that quickly deliver actionable results. SURS compares the behavior of a provider or member to others in the same peer group to identify statistically abnormal or abhorrent behavior. SURS has a user-friendly interface and includes features that simplify the use of the tool (e.g., embedded online help, hover text, drill downs to supporting reports, code translations, etc.). SUR studies can be run on a scheduled or on-demand basis.
Spike Detection	The Spike Detection component automatically detects providers who have had large increases (or decreases) in billing activity. By proactively surfacing these providers after each weekly data load, analysts can quickly identify hit-and-run scams that often remain undetected until it is too late.

Together the FADS components:

- Provide on request profiles of health care providers and members to assess the quality, quantity, service timelines, and access to services
- Detect and substantiate provider and participant fraud and abuse
- Develop statistical profiles of health care services and utilization patterns to identify the potential over-utilization, under-utilization, and inappropriate health care services by participating provider or member
- Identify potential problems with the level of care or quality of services provided under Medical Assistance programs

© 2020 Conduent State Healthcare, LLC

- Support management in the process of ensuring that only medically necessary and covered services and items are provided in the appropriate setting and at the lowest cost
- Provide administrators with information needed to initiate appropriate corrective action, possibly resulting in policy changes as directed by the state

The FADS components are accessible from a single FADS Home Page. The components are web-based, easily accessible through an Internet connection by authorized users.

4.2.18.1 Federal Reporting [RFP 3.10.18.1, Attachment F]

REQUIREMENT: RFP Section 3.10.18.1, Attachment F

This section outlines the requirements necessary to meet Federal reporting in compliance with applicable guidelines. The solution must collect, group, and analyze data to generate all applicable federal reports and processes (e.g., CMS-64, CMS-21, CMS-416, CMS-372, Transformed Medicaid Statistical Information System (T-MSIS), Payment Error Rate Measurement (PERM)). If the Offeror chooses to include these services in their proposal the Offeror must describe in detail their approach to meet each of the Federal Reporting requirements in Attachment F, Requirements Response Matrix. The Offeror simply repeating the RFP requirements does not qualify as a good response as defined in Section 6.1.1 of this RFP.

In the remainder of this section we provide detailed responses that describe our approach to meeting the Option C Federal Reporting requirements in Attachment F – Requirements Response Matrix.

FDRP01
The Contractor's solution shall maintain, track, and report claims data (e.g., prompt payment of clean claims, claims inventory) to support compliance with 42 CFR 447.45

CMdS-Federal Reporting maintains, tracks, and reports claims data (e.g., prompt payment of clean claims, claims inventory) to support compliance with 42 CFR 447.45. The standards contained in 42 CFR 447.45 require:

- Providers to submit claims no later; than 12 months from date of service
- Agency to Pay 90% of clean claims within 30 days of date of receipt
- Agency to Pay 99% of all clean claims within 90 days of the date of receipt
- Agency to pay all other claims within 12 months of the date of receipt with certain exceptions

Our Monthly Adjudicated Timely Processing reports listed in Table 4.2.18.1-1 track claims data to support compliance with 42 CFR 447.45. These reports measure overall claim processing performance and efficiency by claim type. The reports show detail and summary information.

Table 4.2.18.1-1. Monthly Adjudicated Timely Processing Reports

ID	Title	Description
MR-O-30A	Monthly Adjudicated Timely Processing Detail	Shows claims processing information by claim type within program (i.e., FFS, encounter) across different time spans. Figure 4.2.18.1-1 shows a sample report.
MR-O-30B	Monthly Adjudicated Processing Summary	Shows summary claims processing information by claim type within program. Figure 4.2.18.1-2 shows a sample report.

FDRP02
The Contractor's solution shall track, maintain, and report recoveries for the federal share of overpayments to support compliance with 42 CFR 433.320.

CMdS-Federal Reporting is seamlessly integrated with CMdS-Claims and CMdS-Financial to report the right information, at the right time, and in the right format according to Agency and federal policy, guidelines, and regulations. Provider overpayments occur for a variety of reasons. We designed our solution to track, maintain, and report recoveries for the federal share of overpayments in compliance with 42 CFR 433.320.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Federal Stamping Logic

We continually review, and refine as needed, our process for working with the Agency to record overpayment incidents and report them on the correct reports, whether the provider overpayment is reported within the quarter of recovery or within a year of discovery. Our federal stamping logic provides an audit trail of every federally reportable expenditure, indicating at the detail level:

- **Where** the expenditure was reported, including the report form, line, and column
- **When** the expenditure was reported, including the Federal Fiscal Quarter (FFQ) and reporting period date
- **What** the federal, state, county and other amounts were for that payment, based on the appropriate Federal Medical Assistance Percentage (FMAP) in place for each payment

The federal match amount for every federally reportable expenditure is stored with that expenditure in the CMdS-Federal Reporting database, so that the dollars expected from the federal government are identified and do not need re-calculation. We designed our solution to support each state's unique requirements, and to easily support continual changes in regulations and guidelines.

Managing Overpayments

There are several approaches we use to manage overpayment reporting. Our federal reporting specialists and design team work closely with the Agency from the start of the project to understand your policies and integrate our solution's various components both procedurally and systematically so that the state's finance staff is completely prepared to submit reports to CMS.

Our solution systematically generates the various CMS64 reports and allows staff to drilldown to specific claims or claim lines reimbursed on every report line, whether it is a current quarter expenditure or an adjustment to a prior period expenditure. The detail quarter information from the CMS64 Expenditure reports feeds the overall quarterly summary page, and any related reports such as the CMS64.9O Overpayment reports and the CMS.9C Fraud, Waste and Abuse report.

The following list provides examples of the actions and activities to consider, whether the overpayments are the result of a specific audit, recovery or collection, or identified through some other means:

- Uncollected overpayments can be reported through interactions with the finance system, configured to state procedures, and are based on dates of discovery and uncollected dollars
- Lump sum payments or scheduled interim payments can be reported based on state specific requirements and policies
- All reports carry a built-in audit feature that allows the state to easily pull back expenditures represented by any sum or sub-total
- Overpayments can be reported whether collected at a lump sum level or recorded with every individual claim as an adjustment

Our team works with the Agency to understand and provide the best approach to use when reporting overpayments.

FDRP03
The Contractor's solution shall create, update, store, and maintain required and supplemental information to identify and group all claims transactions and non-claim transactions for completion of specified federal and state report (e.g. CMS-64 report) per Agency defined criteria.

Our solution creates, updates, stores, and maintains required and supplemental information to identify and group claims transactions and non-claim transactions for completion of specified federal and state reports (e.g., CMS-64 reports) per Agency defined criteria. Our solution uses data marts to store data required for reports, as defined by the Agency and in the Medicaid Enterprise Certification Toolkit (MECT) fee-for-service (FFS) Claims and Adjudication Checklist:

- **OM.CL4.10.** The system verifies that required data items are present and retained, including all data needed for state or federal reporting requirements
- **OM.CL4.38.** State Medicaid Agency (SMA) assigns a federal report code on all transactions processed through an adjudication cycle based on the State provided business rules. The federal report code must cross walk to the correct report, report page, report line and report column.

Federal Stamping – CMS Best Practice Recommendation

The design of our federal reporting solution garnered a CMS Best Practice recommendation for federal reporting with the implementation of our solution for the District of Columbia in 2012. The Federal Stamping process used by our MARS federal reporting was the basis for MECT checklist item OM.CL4.38. Conduent is the only vendor today to incorporate the concept of Federal Stamping and the requirements for quality state and federal reporting into all components to provide Agency staff with confidence that reports are accurate.

Federal Stamping uses state driven configurable business rules and applies them to the data from the source systems to assign custom fields that support federal and state reporting requirements.

- **Configuration.** One of the biggest barriers to federal reporting success is translating business practices for the Agency into the information that conforms to the format and values required by CMS for federal reporting. CMdS-Federal Reporting employs a series of configuration processes that use state criteria to define custom fields used for reporting.
- **Flexibility, Maintainability, and Growth.** The introduction of configurable business rules for the state allows policy and administrative staff to seamlessly integrate changes to programs over time. New data is incorporated into the federal and state reporting tables and stamped correctly to appear in the correct reporting categories.
- **Consistency.** The use of Federal Stamping supports consistent definitions across time and between organizations for programs. If reporting tools are using different definitions or sources for identification of criteria to categorize information, the impact can have unpredictable consequences depending on the scope of data involved.

Federal Stamping assigns custom fields for managing state and federal reporting from the database details in core tables to the summarization procedures that turn raw source data into reporting. It doesn't matter if the report is expenditure based, like the CMS 64, service based, like the CMS 372, or a combination, like the CMS 416. Federal Stamping consistently defines and stamps program data between reports, across the

© 2020 Conduent State Healthcare, LLC

Enterprise, and when extracted to CMS, as mandatory for meeting T-MSIS criteria and quality data initiatives.

For example, waiver services are reported on the CMS 372 according to when the services were rendered, on the CMS 64 when the services were paid and under the same waiver program, and those services are extracted to T-MSIS using the same values reported on both reports. In addition, the CMS 64 has drilldown features that match the data extracted to T-MSIS and the related CMS 372 services. The stamping designates where the data was reported, including the report, column, form, and file that corresponds to the federal reporting mandates. Historically, it was very difficult to demonstrate that a service reported on the CMS 372 was reported under the same waiver definition for the CMS 64. Some examples of the values derived through Federal Stamping to supports state and federal reporting requirements include:

- The waiver ID (including the information for the renewal year)
- The waiver year associated with the services rendered
- The CMS64 Report Form corresponding to the payment of the waiver expenditure (CMS 21, CMS 64, CMS 64.21, CMS 64.9W, etc.)
- The column on the CMS 64 reports associated with the service (IHS, breast and cervical cancer, family planning, etc.)
- The row or CMS type of service associated with the expenditure on the CMS 64
- The MBESCBES-CATEGORY-OF-SERVICE associated with the service as extracted for T-MSIS

In summary, Federal Stamping enforces consistency and auditability in reporting across the Agency and between organizations exchanging data, allowing substantiation of data in reports and exports at any point in time.

FDRP04
The Contractor's solution shall have the ability to gather, store, and report data, as required by CMS specification, for T-MSIS (Medicaid Statistical Information System) data reporting.

The T-MSIS reporting is a subset of the MARS functionality in our CMdS-Federal Reporting module. T-MSIS functionality collects and disseminates information on members, utilization, and payments for services covered by Montana Medicaid and other state programs. Currently, CMS requires that Medicaid programs provide T-MSIS interface files, which CMS uses to produce their own reports. Our solution gathers, stores, and reports data, as required by CMS T-MSIS specification for data reporting, including submitting T-MSIS files monthly to CMS. Our systems operational staff monitors submissions to verify that data meets the mandated data quality and timeliness standards. CMS uses the T-MSIS files produced by our MARS solution to audit and validate the mandatory federal reports submitted by the Agency.

CMS intends for T-MSIS to provide the Agency, states, and the federal government with a national Medicaid data repository that would, among other functions, support program management, financial management, and program integrity functions. CMS wants a system that can implement regular changes quickly and provide a quick turnaround as federal direction requires. Approved users from the Agency, states, and CMS would have access to the data using a variety of tools to support analytical needs as required by each agency.

© 2020 Conduent State Healthcare, LLC

T-MSIS Extract Files

The T-MSIS workflows are automated and scheduled as part of the normal MARS month-end processes. Once extracted, we submit the files to CMS through the T-MSIS portal. Our solution produces and forwards to CMS these extract files on a monthly basis as required by CMS:

- **Member Eligibility.** This file contains eligible members enrolled in the Montana Medicaid program regardless of service utilization. It includes information such as birth date, sex, race, days of eligibility, maintenance assistance status, basis of eligibility, dual eligibility status, and plan enrollment.
- **Drug Claims.** This file contains adjudicated drug claims that include drug codes, date prescribed, drug units, drug days supplied, and prescribing provider. The file also contains encounter records for prescription services provided under a capitated plan.
- **Inpatient Claims.** This file contains adjudicated acute inpatient hospital claims. Information includes types of coverage/service, dates of service, diagnosis, procedures, provider IDs, third party payments, and Medicaid payment amounts. The file also contains encounter records for inpatient services provided under a capitated plan.
- **Long Term Care Claims.** This file contains adjudicated claims for long-term institutional care, including ICF-MR, NF, psych hospitals, or independent wings for acute care hospitals. Information includes types of coverage/service, dates of service, diagnosis, procedures, provider IDs, third party payments, and Medicaid payment amounts. The file also contains encounter records for long-term care services provided under a capitated plan.
- **Other Claims.** This file contains adjudicated claims not included in the claim files listed above. Information includes types of coverage/service, dates of service, diagnosis, procedures, provider IDs, third party payments, and Medicaid payment amounts. The file also contains premium payments and encounter records for services provided under a capitated plan.
- **Provider.** This file contains provider details including demographic, credentialing, licensure, taxonomy, plan participation, and enrollment details.
- **TPL.** This file contains third party liability insurance arrangements related to Medicaid members. It includes detailed carrier information, coverage types, dates, and member financial responsibility details.
- **Managed Care.** This file provides details of the managed care plans, reimbursement arrangements, service areas, and percent penetration.

Our technical manager oversees the systems and processes used to generate and deliver the T-MSIS extract files. A vital task among the technical manager's responsibilities includes maintaining system uptime so automated processes and reports run as scheduled. Our technical staff configures the updates and tests them through the CMS portal. We also maintain and update the mapping documents required to convert Montana data to the required federal reporting categories. The documents have release dates and versions that we must submit through the CMS portal, where they are used by T-MSIS for automated business rules and data validation. Conduent is committed to meeting all deadlines for producing and submitting T-MSIS extract files.

FDRP05

The Contractor's solution shall have the ability to meet all Agency and federal reporting guidelines, requirements, and periodicity. Any new CMS reporting requirements must be accommodated at no additional cost to Agency.

CMdS-Federal Reporting meets Agency and federal reporting guidelines, requirements, and periodicity. We understand the regulations that govern federal reporting. Our proposed federal reporting solutions are certified in multiple states using the MECT checklist. [redacted]

Our Certified Solutions

Our proposed MARS solution is CMS MECT certified in:

- Alaska
- The District of Columbia
- New Hampshire
- North Dakota

Our proposed FADS solution is CMS MECT certified in:

- Alaska
- Colorado
- The District of Columbia
- New Hampshire
- New Mexico
- North Dakota
- Wyoming

Our solution includes reports and tools that provide valuable insight, features, and functionality. The solution goes beyond simply producing mandatory canned reports as required by CMS certification. The MARS and FADS solutions are web-based, intuitive and flexible, allowing Agency staff to run reports either interactively or as scheduled jobs. The solution includes a series of tools to mine data, create random samples, browse data, build cases or to craft studies to support the varied needs and requirements encountered during day-to-day operations. A key design component that provides flexibility to absorb change and growth is the use of custom built Agency configuration tables that allow staff to manage most program changes without system enhancements or code changes.

When there are new reporting requirements, we work to understand them and update our solution. New CMS reporting requirements are accommodated following the guidelines described in Amendment 4's Attachment B - MPATH Claims Contract NASPO ValuePoint Cooperative Procurement Master Agreement, Section 11.9, as required by the State's Question & Answer Board response to *Federal Reporting, FDRP05*.

FDRP06

The contractor's solution shall have the ability to provide data to the State to satisfy the federal MARS reporting requirement.

Our solution provides data to the State to satisfy the federal MARS reporting requirements. In our previous response to ID FDRP03, we provided a graphic of our overall solution and the data marts that store data required for federal MARS reporting requirements.

FDRP07

The Contractor's solution shall have the ability to produce CMS 64 (MAR) report as specified by Agency.

CMdS-Federal Reporting produces the CMS 64 (MAR) reports listed in Table 4.2.18.1-2 using configurable business rules that allow the Agency to easily update the reporting criteria. The CMS 64 reports are produced quarterly. Federal legislation requires that state health care programs report their

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

budgeted and actual expenditures to CMS using the CMS 64 reports. CMS uses the information to compute the amount of Federal Financial Participation (FFP) they will provide to fund program operations.

Our analysts work with Agency program and policy staff to update business rules to accurately report expenditures required by Agency and federal reporting requirements. The solution provides drilldown capabilities to view detail reports for expenditures reported for each of the CMS type of service (TOS) lines on the CMS 64 reports. Doing so provides immediate substantiation of the dollars reported.

Table 4.2.18.1-2. CMS 64 Reports

ID	Title	Description
CMS64.9 Base	Medical Assistance Expenditures by Type of Service in this Quarter	Tracks Medicaid program expenditures for the quarter. Figure 4.2.18.1-3 shows a sample report.
CMS64.21U (CMS21)	Quarterly Medical Assistance Expenditures by State Children's Health Insurance Program Report	Tracks SCHIP program expenditures for the quarter. Figure 4.2.18.1-4 shows a sample report.
CMS64.9 Waiver	Medical Assistance Expenditures by Type of Service in this Quarter Report	Tracks waiver program expenditures. Figure 4.2.18.1-5 shows a sample report.
CMS64.9A	Third Party Liability Collections and Cost Avoidance Report	Tracks third party expenditures for the quarter. Figure 4.2.18.1-6 shows a sample report.

FDRP08

The Contractor's solution shall have the ability to produce CMS 21 (MAR) report as specified by Agency.

Our solution produces the CMS 21 (MAR) report listed in Table 4.2.18.1-3 using configurable business rules that allow the Agency to easily update the reporting criteria. The CMS 21 report is produced quarterly and details the state's actual expenditures and the disposition of federal funds under Title XXI. Expenditures reported primarily include those made to initiate and expand health insurance coverage to uninsured, low-income children through a separate Children's Health Insurance Program (CHIP).

Our analysts work with Agency program and policy staff to update business rules to accurately report expenditures required by Agency and federal reporting requirements. The solution provides drilldown capabilities to view detail reports for expenditures reported for each of the TOS lines on the CMS 21 report. Doing so provides immediate substantiation of the dollars reported.

This report tracks Medicaid CHIP expenditures for the quarter.

FDRP09
The Contractor's solution shall have the ability to produce CMS 21e and CMS 64ec (MAR) statistical eligibility reports.

Our solution produces the CMS 21e and CMS 64ec (MAR) statistical eligibility reports listed in Table 4.2.18.1-4. Users can generate the reports through the MARS web portal. These reports provide enrollment information about children served in the various programs (Medicaid CHIP, State CHIP, and Medicaid). The solution produces the detail and summary versions of these reports.

Table 4.2.18.1-4. CMS 21E Statistical Eligibility Reports

FDRP10
The Contractor's solution shall have the ability to support Health Check edits and reporting on fee for service and encounter claims as required by DCH and CMS (CMS-416 report). The Contractor must provide CMS-416 interface extracts to third party contractors as required by DCH.

Our solution supports Health Check edits and reporting on fee for service (FFS) and encounter claims as required by DCH and CMS to produce the annual Early and Periodic Screening, Diagnostic and Treatment (EPSDT) Participation CMS-416 report described in Table 4.2.18.1-5. The report is produced quarterly. CMS uses the information to assess the effectiveness of the EPSDT program in terms of the number of individuals under the age of 21 (by age group and basis of Medicaid eligibility) who are provided child health screening services, referred for corrective treatment, and receiving dental services.

The solution uses Agency configurable business rules to produce the report. Users can easily generate the report through the MARS web portal for the current federal reporting period and prior reporting periods as needed. The report information is easily extracted and exported to third party contractors as required by DCH.

FDRP11
The Contractor's solution shall supplement into T-MSIS data from outside sources if required (e.g. Capitation payment records from enrollment process, Eligibility characteristic data from eligibility intake process, Medicaid services processed by non-MMIS State departments, such as mental health services, Utilization based on Managed Care encounters) as defined by the Agency.

The T-MSIS solution is comprehensive and incorporates data from outside sources as well as data from other state agencies for producing T-MSIS data extracts as required by Agency and federal mandates. For example, we can include information, as needed, for federal and state reporting from the Department of Corrections, Veteran's Affairs, immigration, Vital Statistics, eligibility information from waiver programs, or information from different agencies, as directed by the Agency.

FDRP12
The Contractor's solution shall have the ability to provide data to the State to satisfy reporting requirement (e.g., SURS, EPSDT, MARS, TMSIS) as defined by the Agency.

As described in ID FDRP03, the solution uses data marts to store data required for reporting requirements, including SURS, EPDST, MARS, and T-MSIS as defined by the Agency and in the MECT FFS Claims and Adjudication Checklist.

FDRP13
The Contractor's solution shall have the ability to meet federal and state TPL reporting requirements as defined by the Agency.

Our solution produces several reports designed to meet federal and state third party liability (TPL) reporting requirements as defined by the Agency and described in Table 4.2.18.1-6.

Table 4.2.18.1-6. TPL Reports

ID	Title	Description
MR-O-17A	Cost Recovery Analysis	Shows third part payments over time by provider type. Figure 4.2.18.1-15 shows a sample report.
MR-O-17B	Cost Avoidance Analysis by Exception Code of Cost Recovery Claims	Reports costs avoided by denying claims for TPL reasons and lists the information by TPL exception codes. Figure 4.2.18.1-16 shows a sample report.
MR-O-17C	Third Party Payment Analysis by Provider Type	Lists third party payments by provider type and compares claims with TPL payments to overall payments by provider type. Figure 4.2.18.1-17 shows a sample report.

FDRP14

The contractor's solution shall have the ability to provide data to comply with CMS TMSIS data reporting guidelines and its timelines (e.g., Eligible, OT(Other), IP(Inpatient), RX(Pharmacy), LTC(Long Term Care), TPL, Provider and Managed Care) and incur no additional costs for future enhancements as defined by the Agency.

Our solution provides data to comply with CMS T-MSIS data reporting guidelines and timelines. The T-MSIS component generates extract files required by Federal T-MSIS reporting requirements, including the extracts described earlier in our response to ID FDRP04, for:

- Eligibility
- Drug Claims
- Inpatient Claims
- Long Term Care Claims
- Other Claims
- Provider
- TPL
- Managed Care

[redacted] New T-MSIS requirements are accommodated following the guidelines described in Amendment 4's Attachment B - MPATH Claims Contract NASPO ValuePoint Cooperative Procurement Master Agreement, Section 11.9, as required by the State's Question & Answer Board response to *Federal Reporting, FDRP05*.

FDRP15

The Contractor's solution shall have the ability to produce the CMS 21 Expenditures Processed Through MMIS System report as specified by Agency.

Our solution produces the CMS 21 Expenditures Processed Through MMIS System report as specified by the Agency and described in Table 4.2.18.1-7. The CMS 21 report is produced quarterly and details the state's actual expenditures and the disposition of federal funds under Title XXI. Expenditures reported primarily include those made to initiate and expand health insurance coverage to uninsured, low-income children through a separate Children's Health Insurance Program (CHIP). The solution provides drilldown capabilities to view detail reports for expenditures reported for each of the TOS lines on the CMS 21 report. A sample report was provided in response to ID FDRP08.

FDRP16
The Contractor's solution shall have the ability to produce the CMS 64 Expenditures Processed Through MMIS System report as specified by Agency.

Our solution produces the CMS 64 Expenditures Processed Through MMIS System report as specified by the Agency. The solution provides drilldown capabilities to view detail reports for expenditures reported for each of the TOS lines on the CMS 64 report. A sample report was provided in ID FDRP07.

FDRP17
The contractor's solution shall have the ability to balance and report MAR counts/amounts to the designated state's data source as specified by Agency.

Conduent's CMdS-Federal Reporting module has the features to balance and report MAR counts and amounts to the designated state's data source as specified by the Agency. Our solution is based on the foundation of data credibility and integrity. To be valuable, a reporting solution must be credible, and the users must have confidence in its data and reports. Balancing to source systems is a key concept that is often overlooked. The solution may need improvements or supplemental data to solidify balancing. At the end of the day, when the source system and reporting solution provide different answers to the same question, additional audit and validation steps are required to prove where the systems differ.

The MAR and SUR federal mandates were initially created to report Medicaid information to help state and federal agencies manage the program. Conduent never forgets this driving factor. One of the key features of our solution for providing database integrity is the automated balancing that determines if there are data issues potentially threatening the credibility of the data and tools. Our developers employ best practices for balancing data from source systems, verifying record counts and dollar amounts back to source systems to make sure we successfully capture all data correctly.

Additionally, we balance to an independent third party source system report, which is not influenced by CMdS-Federal Reporting processes for receiving and loading data. In most states, we use the Final Payment Summary report generated by the financial system's payment cycle to perform third party balancing. This report contains claim counts and amounts for paid, suspended, and denied claims, and financial transactions. By doing this balancing, the Agency and Conduent have confidence in the MAR data and reports. We stop the load process immediately for remediation if the counts or dollars do not match exactly. This process has stood the test of time. It was taken from its original use for UAT balancing prior to Go Live and incorporated into load balancing for every implementation we do for both development and ongoing operations. Conduent works with the Agency to solidify the balancing procedures from the start of the project and have always considered this process an essential MAR feature.

The Contractor's solution shall have the ability to produce the Provider Participation Analysis Detail report as specified by Agency.

Our solution provides Agency staff with the ability to produce the Provider Participation Analysis reports listed in Table 4.2.18.1-15 from the MARS web portal. These reports provide an analysis of billing provider participation by showing payments, services rendered, and members served by provider type and specialty. The computations are presented by time periods to establish service and participation trends.

Table 4.2.18.1-15. Provider Participation Analysis Reports

ID	Title	Description
MR-O-12A	Provider Participation Analysis – Provider Type	Reports provider participation by provider type. Figure 4.2.18.1-34 shows a sample report.
MR-O-12B	Provider Participation Analysis – Provider Specialty	Reports provider participation by provider specialty. Figure 4.2.18.1-35 shows a sample report.

Conduent Proprietary Information

Our experience in delivering CMS certified reporting solutions and user satisfaction with the reports we customize, provides us with the ability and expertise to understand report content, even if we didn't develop the original report. The Top Twenty-five Providers by Assignment Plan report fits right in with the types of reports Conduent likes to deliver to states, especially when we understand the value it provides to the state.

FDRP43
The Contractor's solution shall have the ability to produce the MRDD Provider Services Rendered Report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the MRDD Provider Services Rendered Report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP44
The Contractor's solution shall have the ability to produce the MRDD Self-Directed Services Report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the MRDD Self-Directed Services Report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP45
The Contractor's solution shall have the ability to produce the Provider Ranking List by Claims-County report as specified by Agency.

CMdS-Federal Reporting produces the Provider Ranking List by Claims-County report as specified by the Agency and described in Table 4.2.18.1-24. A sample report was provided in response to ID FDRP33.

The Contractor's solution shall have the ability to produce the CMS 372 Annual Report on ICWP-TBI Waiver report as specified by Agency.

Our solution produces the CMS 372 Annual Report on the ICWP-TBI Waiver as specified by the Agency and described in Table 4.2.18.1-28. Our solution generates a separate CMS 372S Annual Report for each Home and Community Based Services (HCBS) 1915(c) waiver as specified by the Agency. Each report is produced according to the requirements of the particular waiver including each waiver's specific year beginning and ending dates, G and G´ factors, and waivered services. The purpose of the 372S is to report all services provided to waiver members and confirm that the waiver is cost-neutral -- that is the waiver cost does not exceed the cost of providing services without the waiver.

Our solution provides custom configuration tables that are easy to update and designed to apply consistent definitions of waivers and waiver services, whether it is 1915 or 1115 waivers, to use for the CMS 372 reports and the appropriate form for reporting the waiver expenditures on the quarterly CMS 64 reports. The configurable criteria supports changes to waiver programs over time, to include the addition of new waivers, updates to existing waivers, waiver renewals or the discontinuation of waivers.

Table 4.2.18.1-28. CMS 372 Annual Report

FDRP93

The Contractor's solution shall have the ability to produce Provider Increase Monthly report as specified by Agency.

Our solution produces the Provider Increase Monthly report, also referred to as the Provider Spike Activity Report, as specified by the Agency. The spike report compares providers against their peers and against their own claims history (i.e., claims activity during the most recent load of data against the provider's activity over the past 25 weeks). Figure 4.2.18.1-98 shows a sample report. The report enables investigators to:

- Quickly identify providers working a 'hit and run' scam, where they dump a large volume of claims into the program at one time (or over a few weeks), make a quick windfall, and then disappear before investigative staff notice
- Find those providers taking a more controlled, but no less expensive, approach to fraud, where they gradually but steadily increase their claim volume (and therefore their revenue stream), thereby avoiding a 'spike' detection

As an example, the federal Health and Human Services Office of Inspector General (HHS/OIG) has previously warned states that at least eight different organized crime groups are moving into the healthcare arena quickly and efficiently, because it is a safer way to make profits compared to traditional markets, and the revenue possibilities are potentially greater over time. A group obtains an ID using the name of a front person with no criminal record or buys an ID from a provider who is retiring or selling the business or practice. Once enrolled, the front person "sells" the business to the group, usually within a few days. The group then immediately begins to submit excessive amounts of claims to the program over the first few weeks, and then disappears. Typical losses are in the low millions over just a few weeks.

Another report produced by the Provider Activity Spike Detection component is one that details those "new" provider IDs that have not been paid in previous weeks. This gives investigators an early warning of those Provider IDs that they should more closely watch over the coming weeks for excessive dumping of claims.

FDRP96
The Contractor's solution shall have the ability to produce SUR CASE GROUP NOT USED REPORT QUARTERLY report as specified by Agency.

Our solution produces the SUR Case Group Not Used Report quarterly as specified by the Agency. Our Fraud and Abuse Detection System (FADS) home page provides a link to several pre-formatted summary reports that show a breakdown of dollars paid by year, quarter, and month for members and providers. This basic information is among the most frequently needed, so this link provides a quick reference for users. We can add the SUR Case Group Not Used Report to the home page. We develop the report as specified by the Agency and make it available to end users through the re-formatted reports links as shown in Figure 4.2.18.1-101.

Figure 4.2.18.1-101. CMdS-Federal Reporting FADS Home Page
The Home Page provides authorized users with a consolidated menu of functions for easy access.

FDRP97
The Contractor's solution shall have the ability to produce SUR CASE TYPE NOT USED REPORT QUARTERLY report as specified by Agency.

Our solution produces the SUR Case Type Not Used Report quarterly as specified by the Agency. The FADS home page provides a link to several pre-formatted summary reports that show a breakdown of dollars paid by year, quarter, and month for members and providers. We can add the SUR Case Type Not Used Report to the home page. The report is developed as specified by the Agency and made available to end users through the re-formatted reports links.

FDRP98
The Contractor's solution shall have the ability to produce SUR Quarterly Aberrant Providers Summary Report as specified by Agency.

Our solution produces the SUR Quarterly Aberrant Providers Summary Report as specified by the Agency. One of the cornerstones of the FADS component is the classic SUR peer grouping functionality. Traditionally run as a quarterly report, the Conduent solution allows much greater flexibility in time periods allowing users to run the report when needed, for any time frame. Some advanced features and capabilities supported by FADS include:

- Ability to identify behavior patterns reflecting over-utilization, under-utilization, and other aberrant patterns according to an established exception process
- Drill-down capability providing a hyperlink from report values about a provider or member profile to a list of the claims supporting the profile
- An online, user-defined parameter library of rules, behavior patterns, and reporting items for use in any combination in peer group studies
- As many as five time periods of varying lengths per study, enabling "seasonal" studies accounting for anticipated volume changes during the year
- The ability to include or exclude providers or members to studies who might not otherwise qualify for the peer group, or exclude ones who normally qualify, for a more accurate profile of activity
- The ability to scan claims, providers, and members twice in a study so that a given peer group is aggregated by a separate set of criteria
- Accepted and excepted report

FDRP99
The Contractor's solution shall have the ability to produce Claim Details by Member report as specified by Agency.

Our solution produces the Claim Details by Member report as specified by the Agency. In addition to the studies and profiling, SUR provides standard variance analysis and comparisons on each study run. There are several reports produced for each study providing staff with the statistics necessary to support comparisons and variance analysis. Within these reports are the claim details as available through the member summary profile. Users can drill into the claim detail by member.

- **Ranking Report.** This report ranks the suspect providers or members in descending order of total exception weight (a measure of the severity of the suspicion level for each provider/member, based on an assessment of all the behaviors defined by the user for this study). This gives the user a quick way to compare the overall behaviors across the entire peer group in order to determine those with the highest likelihood of aberrant behaviors.
- **Summary Profiles for Each Provider/Member.** Drilling down, by using a hyperlink in the Ranking Report, takes the investigator to a summary profile of a ranked provider/member. The investigator can review, in depth, the apparent aberrancies that caused the provider/member to rank.
- **Study Group Profile.** This report provides all of the statistics to support variance analysis for each behavior studied: total number of providers/members compared, numerical assessment of the average of that behavior, width of one standard deviation, calculated upper and lower limits, any overrides in effect (user option) that may influence those limits, the percentage and number of those who

© 2020 Conduent State Healthcare, LLC

excepted, and a list of those who excepted for this behavior (from which the user can drill down to view specific profiles).

- **Frequency Distribution Histogram.** This is a graphical representation, by behavior studied, of the distribution of the peer group population. This graph either informs the investigator that the distribution is "normal" (i.e., follows a bell curve shape) and, therefore, that the standard deviation methodology is valid, or alerts the investigator to an unusual population distribution and suggests that exception overrides be employed.

FDRP100
The Contractor's solution shall have the ability to produce Claim Details by Member Quarterly report as specified by Agency.

Our solution produces the Claim Details by Member monthly, quarterly, and yearly reports as specified by the Agency and shown in Figure 4.2.18.1-102. The FADS component contains several tools and features to support investigative and analytical needs. In addition to providing intuitive and flexible access to query primary tables as needed for research and review, the product also provides reports designed to meet the needs of the majority of end users, as well as features within those reports to allow maximum flexibility such as the ability to query detail data to substantiate results on a report by providing drill through to detail claims information without having to exit the report and use another tool.

For example, one of the standard reports within the report library is the Member Dollars by Calendar Quarter. This summary report, by member, allows the analyst to see patterns of utilization of services in a time period. The blue hyperlinked details allow the user to dig deeper into the information with the ability to return member demographics or claims details for the time period as needed. Our reporting team works with the Agency during implementation and throughout development to configure the reports to best meet the needs of the Agency.

This report shows expenditures by member for the calendar quarter.

FDRP101
The Contractor's solution shall have the ability to produce Disease Global View report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the Disease Global View report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP102
The Contractor's solution shall have the ability to produce Disease Quick View report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the Disease Quick View report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP103
The Contractor's solution shall have the ability to produce Distribution Analysis report as specified by Agency.

Our solution produces the Distribution Analysis report as specified by the Agency, also referred to as the Frequency Distribution Histogram (Figure 4.2.18.1-103) that we produce for our FADS solution SUR peer group studies. This report provides a graphical representation, by behavior studied, of the distribution of the peer group population. This graph either informs the investigator that the distribution is "normal" (i.e., follows a bell curve shape) and the standard deviation methodology is valid, or alerts the investigator to an unusual population distribution and suggests that the investigator use exception overrides.

The report provides a graphical display of the utilization patterns (Report Items) found on the Peer Profile across all peers for a selected time period for one Report Item. The graph makes it easy, visually to inspect the data values, and to see trends hidden in the data. Frequency distribution is a type of descriptive statistic. More specifically it is a relative frequency distribution, as it shows the proportion of Study Group peers for each range of values for a Report Item.

The Frequency Distribution Histogram provides a graphical tool to determine whether the statistical distribution of a Study Group, for any Report Item for any time period, is normal or skewed. If the distribution of values across the Study Group is skewed (that is, does not look like a "bell curve" when graphed), then the use of the default standard deviation to set the upper limit of acceptability may be inappropriate. It may be more statistically valid to use one of the other methods (percentile, a set range of values, or a different Standard Deviation). The graph is also used to identify statistical outliers.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.18.1-103. Frequency Distribution Histogram
This report provides a graphical representation, by behavior studied, of the distribution of the peer group population.

Interpretation of the graph is simple:

- **If the graph shows a symmetrical distribution** around the value of the Study Group average, or appears to display roughly as a bell-shaped curve, then the population of Values for this Report Item is considered statistically normal and employing the usual exception processing techniques of default standard deviations is valid.
- **If the graph shows an asymmetrical distribution** around the value of the Study Group average, or the values appear to display in a skewed shape, a J-shape, or evenly distributed across the graph, then the population of Values for this Report Item does not fall in a statistically normal distribution, implying that the use of the default standard deviations to detect abnormal behaviors probably won't produce the desired results. In this situation, overrides to the normal exception processing techniques are used to set the upper and lower limits, and the Study re-run. Overrides to using the default number of standard deviations that are available are:
  - Using a different number of standard deviations
  - Using percentile
  - Specifying a from/to value range

Access to the Frequency Distribution Histogram is available from either the Study Profile Report from the Frequency Histogram hyperlink or the Peer Profile Report from the Z-score hyperlink. The report does not display if there are less than 20 peers that qualified for inclusion in the Report Item, since the graph would be statistically meaningless and potentially misleading.

FDRP104

The Contractor's solution shall have the ability to produce Inpatient Claim Details By Provider report as specified by Agency.

Our solution produces the Inpatient Claim Details By Provider report as specified by the Agency. The CMdS-Federal Reporting module provides a wide variety of features within the FADS component to arm the investigator with more than just the ability to craft and execute traditional SUR peer grouping studies quickly. The FADS Dashboard portal page, shown in Figure 4.2.18.1-104, provides a one stop shop for additional features and tools such as claims sampling, query options, data mining results, and support materials to provide the investigators with comprehensive and maximum flexibility.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.18.1-104. FADS Dashboard Portal Page
The dashboard provides a one stop shop for additional features and tools.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

Several of the features will produce the Inpatient Claims Details by Provider reports, in addition to reports that would be generated as the result of a SUR Peer Group Study.

Two of the features most used by analysts are the Reference Reports and the FADS Report Library, both of which provide flexible reporting that can be manipulated by the end user as needed for investigation and review, providing the confidence of accurate and consistent reports that are delivered with a "canned report", but also containing Ad Hoc type filters and criteria, that allow the analyst the freedom to revise and change the filter criteria beyond those normally available in a predefined report.

- **Reference Reports.** These reports provide descriptive information for many of the codes used in claims systems such as NDC, Diagnosis, Procedure, etc. These reports can be accessed and searched much like Browse and Search reports although they are often used as the target of a drill-down from a larger claims report.
- **FADS Report Library.** These reports enable you to view summarized information that may prove useful in your fraud investigations.

The FADS Portal page allows easy and intuitive access to Institutional claims through the Claims Browse and Search opportunities in the Reference Reports, while also providing Institutional summarized reports in the FADS Reports Library.

Figure 4.2.18.1-105 provides an example of the Institutional Claims Browse and Search report. The filter boxes allow users to specify the any combination of criteria required to be applied against the Institutional Claims table.

Figure 4.2.18.1-105. Institutional Claims Browse and Search Report
This screen shot shows the details claims associated with the criteria entered by the user.

Conduent Proprietary Information

Drill Down Reports

All SURS and MARS reports use of drilldown features from within reports or as stand-alone reports. Drilling down to supporting data is a mouse click away. Users can click on any blue underlined text to see the underlying data. For example, if the blue underlined text is a member Medicaid identification number, then the link drills down to retrieve more detailed information on that specific Medicaid member. If the blue underlined text is an address, then the link drills down to a map of that address.

FDRP105
The Contractor's solution shall have the ability to produce Inpatient Claim Details By Provider Quarterly report as specified by Agency.

Our solution produces the Inpatient Claim Details By Provider monthly, quarterly, and yearly reports as specified by the Agency and shown in Figure 4.2.18.1-106. Users can configure these reports to meet their needs.

Figure 4.2.18.1-106. Billing Provider Dollars by Calendar Quarter Report
This report shows expenditures by billing provider for the calendar quarter.

FDRP106
The Contractor's solution shall have the ability to produce Inpatient Exception Quarterly report as specified by Agency.

Our solution produces Inpatient Exception Quarterly report as specified by Agency. Conduent leverages state-of-the-art technology to allow investigators to move from the legacy system of running peer grouping studies once a quarter, for a small number of designated data elements, to today's unprecedented flexibility. Fraud analysts or investigators can set exception processing for just about any field available in the source system, and no longer are restricted to the prior constraints that limited time periods to quarterly comparisons.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

The traditional SUR Peer Group Profiling tool within the FADS component uses an Exception Processing technique to identify those providers (or members) who have one or more behaviors whose calculated values lie above an upper limit of tolerance or below a lower limit of tolerance. Typically, these limits are determined by the calculated values for average and standard deviation for a peer group, and exception weight assigned to those providers (or members) who are outliers. The user can override the system default of 2.0 standard deviations for providers or 3.0 standard deviations for members by using a different value for standard deviation, by employing a percentile, or by specifying a set of from/to values.

FADS enables the user to define up to five time periods for each SUR study. The time periods can be of varying length, overlap each other, be non-consecutive, and be defined out of chronological order, giving the user great flexibility for reporting purpose:

- Study Detail - General
- All Claims Browse and Search

Since the reports are produced on demand, the user controls the frequency upon which they are produced. For this requirement, the user could choose quarterly time periods or any other as deemed appropriate for the behavior under review. In addition, the user can define "Inpatient" using a wide variety of fields available for peer grouping, using any combination of provider type, claim type, or other criteria as required for the targeted Inpatient group. This list of reports combines to support:

- SUR Ranking
- SUR Individual Profile
- SUR Frequency Distribution Histogram
- SUR Claims Header

The exception processing is the means by which the SURS Peer group studies are created and run. One of the reports that is generated out of the Study Group Peers (Figure 4.2.18.1-107) report identifies all the peers that met the criteria you established for the Study Group (peer group). This report is similar in format of the Ranking Report. However, this report lists all peers, in ID order, whether they Excepted or Accepted. A summation of the number of peers that had acceptable and exceptable behavior established for the Study is also displayed in the top portion of this report.

- Clicking on a hyperlinked provider or member ID will take you to that provider's/ member's detailed profile.
- Clicking on the last column on the right will take you to a summary (by month) of the dollars paid to this provider. This will let you determine those peers whose paid dollar amount is so small that further investigation is not warranted.
- Entering an ID or name (either full name or partial name using the wildcard %) in the white filter boxes will narrow the list. When entering characters, note that they are case sensitive and upper case.

© 2020 Conduent State Healthcare, LLC

This report shows the people who excepted and accepted out.

FDRP107
The Contractor's solution shall have the ability to produce Member Case Group Ranking Quarterly report as specified by Agency.

Our solution produces the Member Case Group Ranking Quarterly report as specified by the Agency. Our product's flexible and innovative Peer Grouping capabilities provide a vast improvement on prior legacy SUR solutions that restrict the time periods to quarterly comparisons, with limited fields available for peer grouping. The Conduent SUR product does allow the user to produce the Ranking report Quarterly, or for any combination of time periods that make sense for the services to be evaluated, and users can define a peer group using criteria from just about any field available on the claims, provider and member tables, to include Member Case.

One of the key functional advantages the SUR solution offers is its ability to produce comprehensive statistical profiles by provider peer groups and member peer groups using various criteria. Provider peer groups can be grouped not only by the traditional provider type and/or specialty, but also by any other characteristic that the user desires (e.g., procedure codes, or diagnosis codes, waiver services, or place of service, etc.). The grouping characteristic is not limited to fields from the provider table. Fields from the claim header table, the claim detail table, or even the member table can be used as grouping characteristics to study provider service and billing practices. In addition, fields from all these tables can be combined to construct focused peer groups to find specific patterns. SUR studies can be defined to automatically identify exceptions to norms of utilization or quality of care standards established by the Agency for any type of member covered by the state plan. Additionally, our SUR component supports encounter claims as well allowing the ability to ensure MCOs are not paying fraudulent claims.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

This report identifies the providers or members who have met the user established criteria for the Study Group (peer group) and whose behavior for at least one Report Item is outside the norm determined during Exception Processing. This report aids the user in identifying the providers or members most likely to have aberrant behavior.

Members can be grouped with peers, where 'peers' can be defined by any field in the provider table, the member table, the claims table, or a combination of these data sources. Therefore, member peers could be defined by having the same age range, same gender, same program code, claims with the same procedure code or diagnosis code, claims where the rendering provider was a certain provider type, living in the same zip code, receiving the same NDC, etc. Member studies are built using the following browser pages:

- Data Rule Detail
- Study Group Detail
- Behavior Pattern Detail
- Report Item Detail
- Report Section Detail
- Study Detail – General
- Study Detail – Exception Processing

The following reports identify exceptions to norms:

- SUR Ranking
- SUR Study Profile (Provider and Member)
- SUR Profile (Provider and Member)

SUR Profiling can produce profiles of members (or providers) based on the following data:

- Any logical field carried in the provider table
- Any logical field carried in the member table
- Any logical field carried on a claim table
- Any logical combination of fields from any of these sources

"Logical" is included in the bullets above to imply that not all fields in the source tables are available in SUR for use as criteria to define a SUR study, only those that are reasonable for a user to select (reduces user confusion and possibility that they will make an illogical decision). For example, a provider's telephone number is carried in the provider table, but it is not reasonable for a user to try to build a peer group on that field, so it is not presented to the user as a grouping criterion.

The ability to build criteria based on any of the fields described above opens a virtually unlimited number of potential peer groupings. The Data Rule Detail page enables the user to define the basic qualifying criteria using individual data elements from the Provider, Member or Claims tables. A Data Rule can be combined with other Data Rules to narrow the focus of a SUR study.

© 2020 Conduent State Healthcare, LLC

FDRP108
The Contractor's solution shall have the ability to produce Member Case Type Comparison by Peer Group report as specified by Agency.

Our solution produces the Member Case Type Comparison by Peer Group report as specified by the Agency. Refer to FDRP107 for a detailed explanation of creating Peer Group studies based on member demographic and enrollment data. The Conduent SUR solution allows for maximum flexibility in defining peer groups for comparison, ranking and exception processing, and Member Case Type would be available as an option so long as source data exists.

FDRP109
The Contractor's solution shall have the ability to produce Member Case Type Comparison by Peer Group Quarterly report as specified by Agency.

Our solution produces Member Case Type Comparison by Peer Group report as specified by Agency. ID FDRP107 provided a detailed explanation of creating Peer Group studies based on member demographic and enrollment data. The Conduent SUR solution allows for maximum flexibility in defining peer groups for comparison and ranking and exception processing. Member Case Type would be available as an option if source data exists. The option to select up to five time periods for comparison and the ability to run on demand immediately allows investigative teams the flexibility to produce reports for the time periods and according to any schedule that meets the needs of the agency.

FDRP110
The Contractor's solution shall have the ability to produce Member Exception Quarterly report as specified by Agency.

Our solution produces the Member Exception Quarterly report as specified by Agency. ID FDRP107 provided the detailed explanation for creating Peer Group studies based on member demographic and enrollment data. The Conduent SUR solution allows for maximum flexibility in defining peer groups for comparison, ranking and exception processing, and any logical field on the member table, along with criteria to define services and providers if desired, would be available as an option so long as source data exists.

Members can be grouped with peers, where peers can be defined by any field in the provider table, the member table, the claims table, or a combination of these data sources. Therefore, member peers could be defined by having the same age range, same gender, same program code, claims with the same procedure code or diagnosis code, claims where the rendering provider was a certain provider type, living in the same zip code, receiving the same NDC, etc.

Those members identified in the study meeting the peer group definitions are compared to each other, in order to identify the statistical outliers in order to surface potential fraud, waste or abuse in the behavior of the member compared to the behavior of the member's peers. Those members who are statistically "abnormal" in comparison to their peers, based on standard deviations, will appear on the ranking report as exceptions. Member Exception reports can be run based on widely flexible user-driven criteria, using up to five time periods for comparison, and produced according to any type of schedule that best meets the needs of the state.

© 2020 Conduent State Healthcare, LLC

Once a SUR Study is run for a member driven peer group, the exceptions are identified in the SUR Ranking report as shown in Figure 4.2.18.1-108.

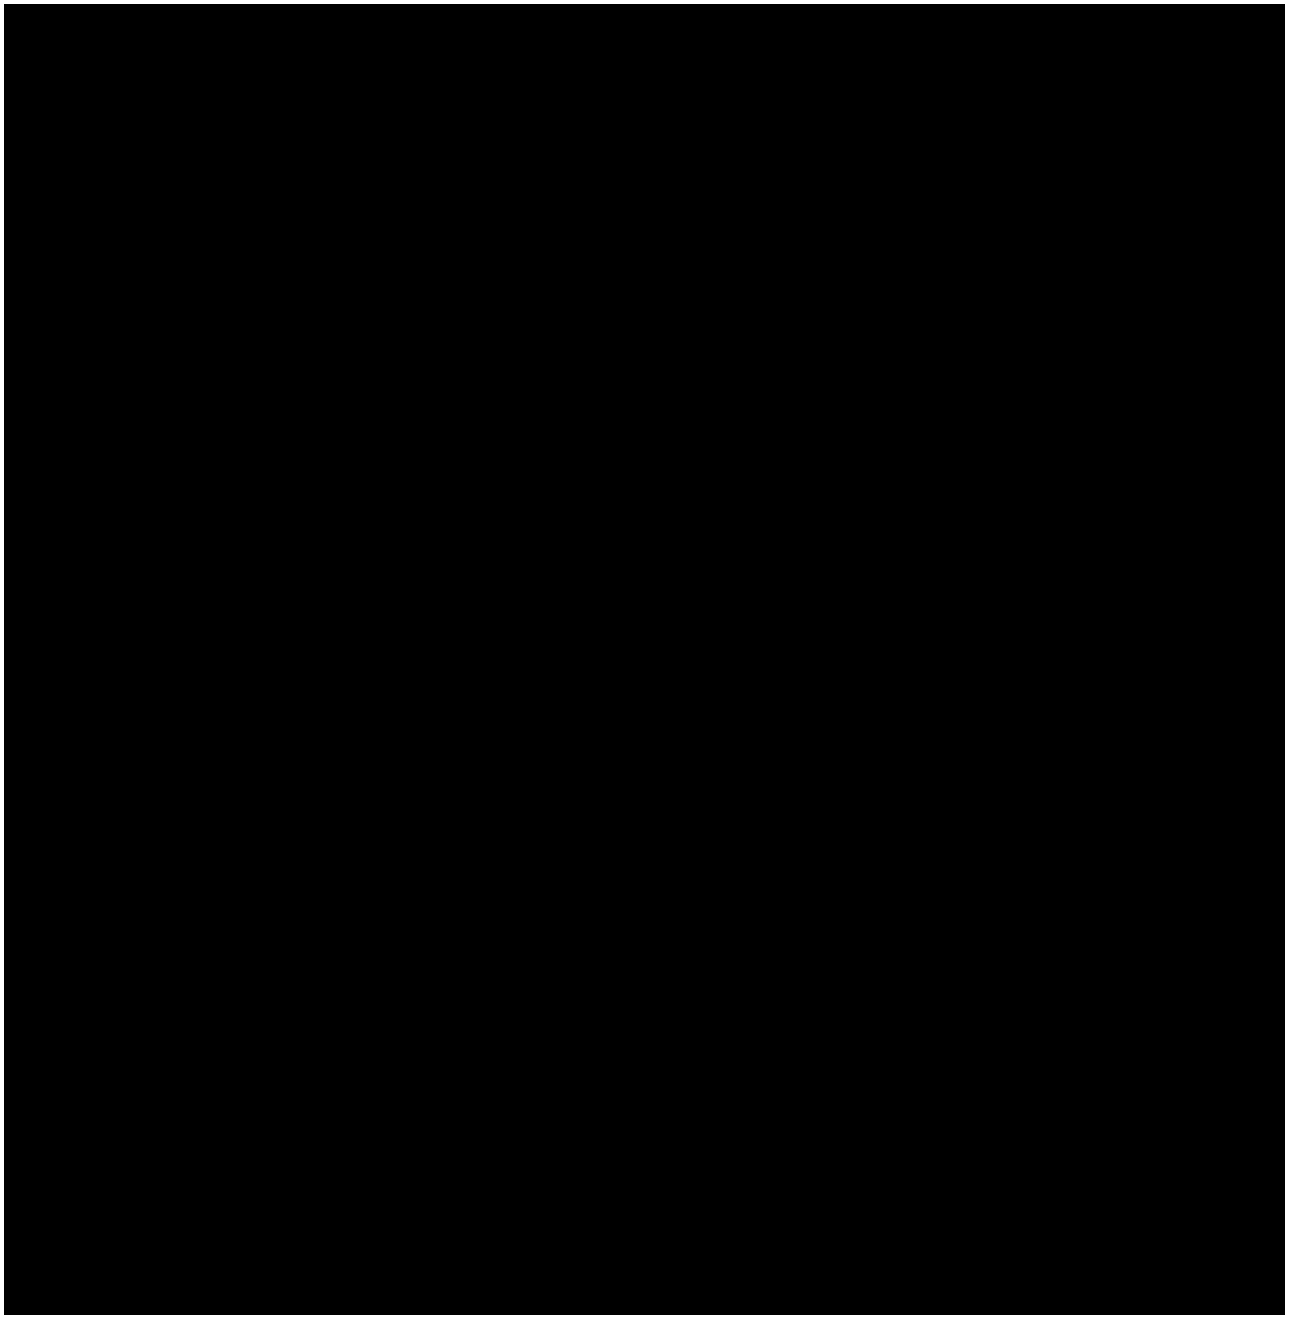

Figure 4.2.18.1-108. SUR Ranking Member Report
Once a SUR Study is run for a member driven peer group, the exceptions are identified in the SUR ranking report.

In addition to the exceptions identified within the SUR ranking report, the SUR study profile report supports the exception processing statistical techniques employed in the production of the peer profile report. It also provides a means by which the statistical validity of the library and study parameters may

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

be verified and by which realistic exception criteria may be established. This report is created for any completed study.

This report is secondarily intended to provide management and administrative personnel with a detailed presentation of the overall utilization patterns of the various services provided by the program. Because the Report Items for which statistics are generated are derived from user parameters, the Report Items displayed will vary according to the criteria you established for your study.

This report as shown in Figure 4.2.18.1-109 displays information horizontally by time period, and vertically by Report Section. Within each Report Section, the Report Items defined for the Study are listed in the order defined when the user built the Report Section.

Figure 4.2.18.1-109. SUR Profile Provider Report
This report is the details behind the ranking for the provider.

FDRP111
The Contractor's solution shall have the ability to produce Member Frequency Distribution report as specified by Agency.

Our solution produces the Member Frequency Distribution report (Figure 4.2.18.1-110) as specified by the Agency. The frequency distribution shows the proportion of Study Group peers for each range of values for a Report Item. This report provides the user with a graphical tool to determine whether the statistical distribution of a Study Group, for any Report Item for any time period, is normal or skewed. It

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

may also assist users to identify studies for which the standard deviation defined may be inappropriate. The graph can also be used to identify statistical outliers.

Figure 4.2.18.1-110. SUR Frequency Distribution Histogram Member Report
This report provides a graphical tool to determine whether the statistical distribution of a Study Group, for any Report Item for any time period, is normal or skewed.

FDRP112
The Contractor's solution shall have the ability to produce Member Frequency Distribution Quarterly report as specified by Agency.

Our solution produces the Member Frequency Distribution Quarterly report as specified by the Agency. Refer to our response to FDRP111 for further details.

FDRP113
The Contractor's solution shall have the ability to produce Member Peer Group Comparison report as specified by Agency.

Our solution produces the Member Peer Group Comparison report as specified by the Agency. The Study Group Peers report identifies all the peers that met the criteria you established for the Study Group (peer group). This report (Figure 4.2.18.1-111) is similar in format to the Ranking Report. However, this report lists all peers, in ID order, whether they Excepted or Accepted.

Conduent Proprietary Information

FDRP114
The Contractor's solution shall have the ability to produce Member Peer Group Comparison Quarterly report as specified by Agency.

Our previous response to ID FDRP113 provides the detailed explanation for generating Member Peer Group Comparison reports. The Conduent SUR solution allows for maximum flexibility in defining peer groups for comparison, ranking and exception processing, according to any time frame and schedule desired.

FDRP115
The Contractor's solution shall have the ability to produce Member Profile report as specified by Agency.

Our solution produces the Member Profile report (Figure 4.2.18.1-112) as specified by the Agency. The profile report displays the summary of the utilization patterns of each peer (provider or member) who met the criteria you established for the Study. This profile is produced for each "excepted" and "accepted" peer. This report is used to support reviews or investigations of peers.

The Report Items shown in this report are user-determined and correspond to the Report Items you included in the Report Section(s) that you selected for the Study. Because the Report Items for which statistics are generated are derived from your parameters, the items and their corresponding titles can vary according to your needs.

To display the Peer Profile, navigate to either the Peer Ranking or Study Group Peer report. The Peer Profile is displayed after clicking a hyperlinked peer ID from the ID column on the Ranking Report.

When viewing the profile report, note the following:

- The Suppress Participant Identification option can be set to "YES", allowing you to mask all peer demographic data in order to protect the identity of the peer.
- The hyperlink drill through is available from the HTML format as well as the PDF format. When the drill through is activated from a PDF, the output report will also be rendered as PDF.

The report is presented vertically in ascending order by Report Section, then by Report Item, and horizontally by Time Periods 1 through 5. The far right column is a summary of the exception weights across all time periods. Any Report Item with a non-zero weight in this column indicates that the peer's behavior for this aggregation was above or below the acceptable limits in one or more time periods. One or more non-zero weights will cause a peer to be included on the Ranking Report. Table 4.2.18.1-55 explains more details about the report.

Table 4.2.18.1-55. Member Profile Report Definitions

Term	Definition
Value	The Value of the Report Item accumulated during a time period. This number is calculated by using this peer's totals for the Behavior Pattern requested, combined arithmetically as specified in the definition of the Report Item and, if required, converted to a percent or ratio format. If the Value is immediately preceded by an asterisk, then the Exception Processing logic was applied to this Report Item to determine if the peer was above or below acceptable limits for this aggregation. If the peer excepted, then you will see a number in the Total Exception Weight on the far right column. If there is no asterisk, then this Report Item is considered informational only.

© 2020 Conduent State Healthcare, LLC

Term	Definition
	If the Value is immediately followed by an 'L', then a minimum denominator was specified but not met, and this Report Item's weight is not included in the Total Exception Weight for this peer.
Z or Z-score	This is a statistical term indicating, in units of 'Standard Deviation', how far away from the mean or average (for this Report Item for this time period for this Study Group) this Report Item's Value was.
Vol or Volume Weight	The volume weight is calculated for the Report Item, for this time period, for the Peer being displayed. Volume weight provides a means for assigning more significance to an exception for peers with high utilization of a Report Item. Volume Weight = peer's value for a Report Item divided by the Report Item's mean within this Study Group. Volume Weight = PV/MV • For ratio or percent items: – PV = peer's value for the Report Item's denominator – MV = Study Group average for the Report Item's denominator • For summation items: – PV = peer's value for the Report Item – MV = Study Group average for the Report Item
Dev or Deviation Weight	The deviation weight is calculated for the Report Item, for this time period, for the Peer being displayed. Deviation Weight is a measure of how much the peer's value for this Report Item varied from the normal range of values for this Report Item. If the peer's value for a Report Item fell within the upper/lower limits set for the Report Item, the peer's Deviation Weight for this Report Item is zero. Deviation Weight = | PV - LIM |/SD • PV = peer's value for the Report Item • LIM = lower or upper limit on which the exception is based • SD = value of one standard deviation for this Report Item for this Time Period for this Study Group

If the user turned on Exception Processing for a time period when the user built the Study, the user sees a small asterisk to the left of that time period. If Exception Processing was on, the Total Exception Weight (in the rightmost column) for one Report Item is calculated by the system as follows:

- Multiply together the *Dev Wt*, the *Vol Wt*, and the *Relative Column Weight* (shown directly underneath the time period dates) within one time period.
  - The Deviation Weight is calculated by the system and is the difference between this peer's Z-score and the upper limit (usually 2.0 standard deviations for providers, and 3.0 standard deviations for members).
  - The Volume Weight is calculated by the system and reflects the proportional volume for this peer of all the claims considered for this Report Item across the whole peer group.
  - The Relative Column Weight enables you to assign more importance in the weighting process to one time period over the others.
- If there are multiple time periods defined, perform the same multiplication for each time period.
- Add the results of the time period calculations together.
- Multiply the answer above by the Relative Item Weight (in the next to last column). This factor enables you to assign more importance in the weighting process to some Report Items over others when you build the Study. See the Study>General Information tab. This answer should be very close to the number displayed in the last column.

© 2020 Conduent State Healthcare, LLC

- The numbers displayed are rounded to two decimal points (due to limited print space) but stored as four decimal points (to retain accuracy). To be able to display as accurate a Total Exception Weight as possible, the calculations are performed using the full 4-decimal point numbers. Therefore, if you were to hand-calculate the Total Exception Weight, your number would be only very slightly different than what is shown.

Figure 4.2.18.1-112. SUR Member Profile
Once a SUR Study is run for a member driven peer group, the exceptions are identified in the SUR ranking report.

FDRP116
The Contractor's solution shall have the ability to produce Member Profile Quarterly report as specified by Agency.

Our previous response to ID FDRP115 provides the detailed explanation for generating the Member Profile Quarterly report. The Conduent SUR solution allows for maximum flexibility in defining member profile reports for comparison, ranking and exception processing, according to any time frame and schedule desired.

© 2020 Conduent State Healthcare, LLC

FDRP117
The Contractor's solution shall have the ability to produce Nursing Facility Claim Details by Provider report as specified by Agency.

The FADS component provides several features to support the ability to produce Nursing Facility Claim Details for providers. The Reference Reports section of the FADS Portal has Browse and Search features, as well as claims-based reports targeted to specific claims groupings, such as institutional, professional, pharmacy. Additionally, users can drilldown to the claim details for the provider in any of the predefined reports and the reports generated by the SUR Peer Group Studies.

FDRP118
The Contractor's solution shall have the ability to produce Nursing Facility Claim Details by Provider Quarterly report as specified by Agency.

As described in ID FDRP117, the Nursing Facility Claim Details report is available through several avenues. Users can generate a SUR Peer Group Study for a Nursing Facility on any schedule and run the report to compare up to five time periods as defined by the use. The claims details are available within the ranking reports, profiles or exception reports, as used in the study, for the provider.

FDRP119
The Contractor's solution shall have the ability to produce Nursing Facility Exception Quarterly report as specified by Agency.

The SUR Reports generated by a SUR Peer Grouping Study, run quarterly or on demand for up to five time periods defined by the analyst. Our solution meets the ID FDRP119 requirement by producing these reports:

Peer Ranking Report. This report identifies the peers (providers or members) who have met the criteria established for the Study Group (peer group) and whose behavior for at least one Report Item is outside the norm determined during Exception Processing. This report aids in identifying the peers most likely to have aberrant behavior. Peers are listed in descending order by Total Exception Weight.

Study Group Peer Ranking Report. This report identifies all the peers that met the criteria established for the Study Group (peer group). This report is similar in format to the Ranking Report. However, this report lists all peers, in ID order, whether they excepted or accepted.

FDRP120
The Contractor's solution shall have the ability to produce Nursing Facility Provider Profile report as specified by Agency.

Individual profile reports are available to the investigator, from either the Peer Ranking or Study Group Peer report for every Peer Group Study job that has one or more peers selected based on the user defined criteria. The Profile displays the summary of the utilization patterns of each peer (provider or member) who met the criteria established for the Study. This profile is produced for each excepted and accepted peer and is used to support reviews or investigations of peers.

FDRP121
The Contractor's solution shall have the ability to produce Outpatient Claim Details By Provider report as specified by Agency.

The FADS component provides several features to support the ability to produce the Outpatient Claim Details for providers. The Reference Reports section of the FADS Portal has Browse and Search features, as well as claims based reports targeted to specific claims groupings, such as Institutional, Professional, Pharmacy. In addition, users can drilldown to the claim details for the provider in any of the reports generated by the SUR Peer Group Studies.

FDRP122
The Contractor's solution shall have the ability to produce Outpatient Claim Details By Provider Quarterly report as specified by Agency.

As described in ID FDRP121, the Outpatient Claim Details report is available to the analysts through several avenues. Users can generate the SUR Peer Group Study for a Nursing Facility on any schedule and run the report to compare up to five time periods as defined by the user. The claims details for the results are available within the ranking reports, profiles or exception reports, as used in the study, for the provider.

FDRP123
The Contractor's solution shall have the ability to produce Outpatient Exception Quarterly report as specified by Agency.

The SUR Reports generated by a SUR Peer Grouping Study, run quarterly or on demand for up to five time periods defined by the analyst. Our solution meets the ID FDRP123 requirement by producing these reports:

Peer Ranking Report. This report identifies the peers (providers or members) who have met the criteria established for the Study Group (peer group) and whose behavior for at least one Report Item is outside the norm determined during Exception Processing. This report aids in identifying the peers most likely to have aberrant behavior. Peers are listed in descending order by Total Exception Weight.

Study Group Peer Ranking Report. This report identifies all the peers that met the criteria established for the Study Group (peer group). This report is similar in format to the Ranking Report. However, this report lists all peers, in ID order, whether they excepted or accepted.

FDRP124
The Contractor's solution shall have the ability to produce Pharmacy Claim Details by Provider report as specified by Agency.

The FADS component provides several features to support the ability to produce the Pharmacy Claim Details for providers. The Reference Reports section of the FADS Portal has Browse and Search features, as well as claims based reports targeted to specific claims groupings, such as Institutional, Professional, Pharmacy. In addition, users can drilldown to the claim details for the provider in any of the reports generated by the SUR Peer Group Studies.

© 2020 Conduent State Healthcare, LLC

FDRP125
The Contractor's solution shall have the ability to produce Pharmacy Claim Details by Provider Quarterly report as specified by Agency.

As described in ID FDRP124, the Pharmacy Claim Details report is available to the analysts through several avenues. Users can generate the SUR Peer Group Study for pharmacy services on any schedule and run the report to compare up to five time periods as defined by the user. The claims details for the results are available within the ranking reports, profiles or exception reports, as used in the study, for the provider.

FDRP126
The Contractor's solution shall have the ability to produce Pharmacy Exception Quarterly report as specified by Agency.

The SUR Reports generated by a SUR Peer Grouping Study, run quarterly or on demand for up to five time periods defined by the analyst. Our solution meets the ID FDRP126 requirement by producing these reports:

Peer Ranking Report. This report identifies the peers (providers or members) who have met the criteria established for the Study Group (peer group) and whose behavior for at least one Report Item is outside the norm determined during Exception Processing. This report aids in identifying the peers most likely to have aberrant behavior. Peers are listed in descending order by Total Exception Weight.

Study Group Peer Ranking Report. This report identifies all the peers that met the criteria established for the Study Group (peer group). This report is similar in format to the Ranking Report. However, this report lists all peers, in ID order, whether they excepted or accepted.

FDRP127
The Contractor's solution shall have the ability to produce Professional Claim Details By Provider report as specified by Agency.

The FADS component provides several features to support the ability to produce the Professional Claim Details for providers. The Reference Reports section of the FADS Portal has Browse and Search features, as well as claims based reports targeted to specific claims groupings, such as Institutional, Professional, Pharmacy. In addition, users can drilldown to the claim details for the provider in any of the reports generated by the SUR Peer Group Studies.

FDRP128
The Contractor's solution shall have the ability to produce Professional Claim Details by Provider Quarterly report as specified by Agency.

As described above in ID FDRP127, the Professional Claim Details report is available to the analysts through several avenues. Users can generate the SUR Peer Group Study for professional claims on any schedule and run the report to compare up to five time periods as defined by the user. The claims details for the results are available within the ranking reports, profiles or exception reports, as used in the study, for the provider.

© 2020 Conduent State Healthcare, LLC

FDRP129
The Contractor's solution shall have the ability to produce Professional Exception Quarterly report as specified by Agency.

The SUR Reports generated by a SUR Peer Grouping Study, run quarterly or on demand for up to five time periods defined by the analyst. Our solution meets the ID FDRP129 requirement by producing the Peer Ranking Report and Study Group Peer Ranking Report.

FDRP130
The Contractor's solution shall have the ability to produce Professional Referrals Claim Details By Provider report as specified by Agency.

The FADS component provides several features to support the ability to produce the Professional Referral Claim Details for providers. The Reference Reports section of the FADS Portal has Browse and Search features, as well as claims based reports targeted to specific claims groupings, such as Institutional, Professional, and Pharmacy. In addition, users can drilldown to the claim details for the provider in any of the reports generated by the SUR Peer Group Studies.

FDRP131
The Contractor's solution shall have the ability to produce Professional Referrals Claim Details By Provider Quarterly report as specified by Agency.

As described in ID FDRP130, the Professional Referral Claim Details report is available to the analysts through several avenues. Users can generate the SUR Peer Group Study for professional referral claims on any schedule and run the report to compare up to five time periods as defined by the user. The claims details for the results are available within the ranking reports, profiles or exception reports, as used in the study, for the provider.

FDRP132
The Contractor's solution shall have the ability to produce Professional Referrals Exception Quarterly report as specified by Agency.

The SUR Reports generated by a SUR Peer Grouping Study, run quarterly or on demand for up to five time periods defined by the analyst. Our solution meets the ID FDRP132 requirement by producing by the Peer Ranking Report and Study Group Peer Ranking Report.

FDRP133
The Contractor's solution shall have the ability to produce Provider Case Group Ranking Quarterly report as specified by Agency.

The SURS Peer Grouping component provides a great deal of flexibility for defining the peer group for providers and provides the capability to profile provider groups and individual providers within group practices as well. Items such as the provider case can also be used to define the peer group criteria, so long as the data is available.

All ranking reports generated by the SURS studies are based on the peer group definitions. The SUR reports generated by a SUR Peer Grouping Study can be run quarterly or on demand for up to five time periods defined by the analyst including the Peer Ranking Report and Study Group Peer Ranking Report.

© 2020 Conduent State Healthcare, LLC

FDRP134
The Contractor's solution shall have the ability to produce Provider Case Type Comparison by Peer Group Quarterly report as specified by Agency.

The SURS Peer Grouping component provides a great deal of flexibility for defining the peer group for providers and provides the capability to profile provider groups and individual providers within group practices as well. Items such as the provider case type can also be used to define the peer group criteria, so long as the data is available.

All ranking reports generated by the SURS studies are based on the peer group definitions. The SUR reports generated by a SUR Peer Grouping Study can be run quarterly or on demand for up to five time periods defined by the analyst including the Peer Ranking Report and Study Group Peer Ranking Report.

FDRP135
The Contractor's solution shall have the ability to produce Provider Case Type Comparison by Peer Group Yearly report as specified by Agency.

As referenced in ID FDRP134, the SURS Peer grouping features support the production of these comparison reports. The analyst can define up to five time periods within a study for comparison, as well as selecting any time frame overall for the comparison of behavior patterns for peers.

FDRP136
The Contractor's solution shall have the ability to produce Provider Frequency Distribution report as specified by Agency.

The SUR component produces a comprehensive statistical profile of provider health care practices by peer groups for all services authorized under the Medicaid program. One of the reports provided for a SURS Peer Group Profiling Study is the Frequency Distribution Report.

The Frequency Distribution Histogram is a graphical display of the utilization patterns (Report Items) found on the Peer Profile across all peers for a selected time period for one Report Item. The graph makes it easy to visualize and inspect the data values, and to see trends hidden in the data. Frequency distribution shows the proportion of Study Group peers for each range of values for a Report Item. The report (Figure 4.2.18.1-113) provides a graphical tool that can be used to determine whether the statistical distribution of a Study Group, for any Report Item for any time period, is normal or skewed. If the distribution of values across the Study Group is skewed (that is, does not look like a "bell curve" when graphed), then the use of the default standard deviation to set the upper limit of acceptability may be inappropriate. It may be more statistically valid to use one of the other methods (percentile, a set range of values, or a different Standard Deviation). The graph can also be used to identify statistical outliers.

© 2020 Conduent State Healthcare, LLC

Figure 4.2.18.1-113. SUR Frequency Distribution Histogram Provider Report

This report provides a graphical tool to determine whether the statistical distribution of a Study Group, for any Report Item for any time period, is normal or skewed.

Access to this report is available from either the Study Profile Report from the Frequency Histogram hyperlink, as shown in Figure 4.2.18.1-114, or the Peer Profile Report from the Z-score hyperlink shown in Figure 4.2.18.1-115. This report does not display if there are less than 20 peers that qualified for inclusion in the Report Item, since the graph would be statistically meaningless and potentially misleading.

Conduent Proprietary Information

Figure 4.2.18.1-115. SUR Provider Profile
This report shows the study results.

FDRP137
The Contractor's solution shall have the ability to produce Provider Frequency Distribution Quarterly report as specified by Agency.

As detailed in ID FDRP136, the Provider Frequency Distribution report is available through a variety of means. The Conduent approach for generating SUR Peer Group Profiling Studies allows investigators the flexibility to run reports as needed, whether according to the traditional quarterly schedule, or on demand, for up to five time periods within the study, defined to be any span of time as required for analysis.

FDRP138
The Contractor's solution shall have the ability to produce Provider Peer Group Comparison report as specified by Agency.

Conduent meets this requirement with the SUR product which is accessible from the FADS Home Page. The Provider Peer Group Comparison is a process that produces a series of reports that combine to provide a comprehensive statistical profile of provider health care practices.

The purpose of the SUR processing is to use statistical methodologies to surface potential fraud, waste or abuse for investigation or review by analysts within a program integrity unit. The peer group comparison process creates a SUR Peer Group Study, which contains a series of reports with supporting details, so

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

that the analyst can substantiate that the issue requires investigation, eliminate the behavior as a concern, or further adjust the peer group study as needed.

Provider Peer Group profiling is accomplished by comparing the behavior of a provider to others in the same peer group in order to identify statistically abnormal or abhorrent behavior, defined to be those who stand out compared to their peers as shown in the bell curve in Figure 4.2.18.1-116. The behavior that calculates as statistically deviant from the norm are considered "exceptions" and providers are ranked in a descending order of weight to denote the relative severity of suspicion for each provider.

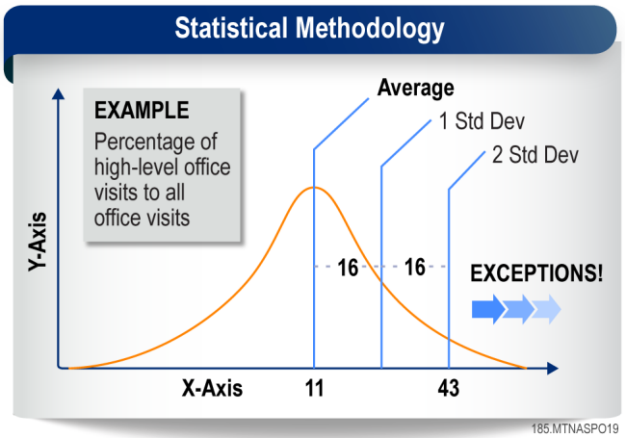

Figure 4.2.18.1-116. Bell Curve
This bell curve indicates the distribution is normal and the standard deviation methodology is valid.

SUR uses a peer grouping methodology to detect potential fraud and aberrant behavior patterns among both providers and members. Peer groups are providers or members who are grouped together by a common characteristic(s) that is user-defined from the analyst's desktop and easily modified from one study to another. This makes it easier to study different subpopulations quickly, construct very specific sub groups for focused studies, detect potential fraud and investigate tips in a dynamic and timely manner.

The SUR solution has the following features:

- Produces a ranked list of the providers or members based on the degree of abnormal behavior compared with the rest of the defined peer group
- Produces profiles for both the accepted and excepted providers and/or members included in the Study Group
- Requires less than an hour to build fraud studies that users can run on demand
- Allows fraud studies to run from the user's desktop PC with no dependency on mainframe computer schedules
- Provides results of the fraud studies to the user's desktop within a few hours (or sooner)

SUR is not a tool for claim-to-claim comparisons, or to query specific claims data directly. It is a tool to compare overall behaviors among a population with common characteristics. Once SUR produces the ranked list of potential suspects, then an ad-hoc query tool can be used to provide a closer look at specific claims data to help determine whether there is a legitimate justification for the abnormal activity.

FDRP139
The Contractor's solution shall have the ability to produce Provider Peer Group Comparison Quarterly report as specified by Agency.

SUR Provider Profile reports are available to the investigator from either the Peer Ranking or Study Group Peer report for every Peer Group Study job that has one or more peers selected based on the user defined criteria. The Provider Profile report shown in Figure 4.2.18.1-117 displays the summary of the utilization patterns of each peer (provider or member) who met the criteria established for the study. This profile is produced for all providers in the peer group, whether "excepted" and "accepted" and is used to support reviews or investigations of peers. The Provider Profile is accessed by clicking on the hyperlink in the Peer Ranking Report or the Study Group Peer Ranking Report.

Figure 4.2.18.1-117. SUR Provider Profile
This report shows the study results.

FDRP140
The Contractor's solution shall have the ability to produce Provider Profile report as specified by Agency.

Our solution produces the Provider Profile report as specified by the Agency and described in ID FDRP139.

© 2020 Conduent State Healthcare, LLC

Conduent Proprietary Information

FDRP141
The Contractor's solution shall have the ability to produce Provider Profile Quarterly report as specified by Agency.

The Provider Profile report as described in ID FDRP139 is available for any timeframe, including quarterly.

FDRP142
The Contractor's solution shall have the ability to produce Balance Report as specified by Agency.

The Conduent FADS and SURS components are supported by balancing procedures performed during database loads which produce balancing reports as specified by the Agency. The data mart is loaded with newly paid and denied claims, updated provider and member data, and valid values (reference/assigned codes) from the source system. We perform balancing procedures every time we load information. Balance reports with discrepancies alert our technical support team to investigate the discrepancy.

FDRP143
The Contractor's solution shall have the ability to produce Case Group Report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the Case Group Report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP144
The Contractor's solution shall have the ability to produce Case Type Report as specified by Agency.

Our solution produces the Case Type Report as specified by the Agency. Once a user identifies inappropriate billing behaviors and decides to pursue further investigation, the user can create a case to collect information and document the various activities. Through the case tracking functionality of the FADS component, users can track and report on these activities online from the time of initial suspicion and assignment to an investigator, through the investigative process to possible appeals. Examples of the functions supported within case tracking include:

- Ability for authorized users to establish audit cases, manage the activities within the case and historically track and report the audit activities and results, including auditor ID, party being audited, findings, etc.
- Automated assignment of case control numbers for each created case
- Permits user defined capability (via business rules) for required and optional case data fields and for user defined edit criteria for all case data fields

© 2020 Conduent State Healthcare, LLC

- Includes a comprehensive view of case history and actions taken by whom with links to help features to support the analysis and review of case detail
- Supports data audit and reporting and analysis requirements for onsite audits; web connectivity allows the auditor to access the application in the field
- Schedule events related to the case, including reminders
- Tracks claims selected for review, the status of the review, the resource conducting the review and any other attributes necessary to coordinate the investigation. Provides the ability to assign or reassign cases based on workload or specialization

FDRP145
The Contractor's solution shall have the ability to produce Peer Group Report as specified by Agency.

Our solution produces the Peer Group Reports, as specified by the Agency. Some advanced features and capabilities supported by SUR Peer Group reporting include:

- Ability to identify behavior patterns reflecting over-utilization, under-utilization, and other aberrant patterns according to an established exception process
- Drilldown capability providing a hyperlink from report values on a provider or member profile to a list of the claims supporting the profile
- An online, user-defined parameter library of rules, behavior patterns, and reporting items for use in any combination in peer group studies
- As many as five time periods of varying lengths per study, enabling "seasonal" studies accounting for anticipated volume changes during the year
- The ability to add providers or members into studies who might not have otherwise qualified for the peer group or exclude ones who normally would for a more accurate profile of activity
- The ability to scan claims, providers, and members twice in a study so that a given peer group is aggregated by a separate set of criteria

FDRP146
The Contractor's solution shall have the ability to produce SUR case type reports as specified by Agency.

Conduent has completed extensive research of the requirement to produce the SUR case type reports, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. FDRP156
The Contractor's solution shall have the ability to produce CMO Early Warning Report as specified by Agency.

One of the valuable features within the FADS suite of analytical tools is the Spike Detection reports, which are the Early Warning reports of high cost services and service misutilization based on current payment data to quickly identify high volume practices.

FADS contains a Provider Activity Spike Detection component that generates reports each weekend after the claims data is refreshed. These reports alert the user to providers who, during the last payment cycle, exceeded user-defined thresholds for increases in paid amount, number of claims, or number of distinct members. The Provider Activity Spike Detection Increase/Decrease report contains providers with a marked increase or decrease in claim activity. A prompt page enables the user to select the week ending date, the activity type, and one or more provider types. The type of report generated, increase or decrease, is dependent on the parameters entered. The report displays the parameters entered and used to generate the report. Refer to our response to ID FDRP93, page 4.2-977, for more information about the spike report.

FDRP157
The Contractor's solution shall have the ability to produce COS Quarterly Ranking report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the COS Quarterly Ranking report, including reviewing the procurement library and the answers to questions. We understand that this is a current Georgia report that our solution needs to produce. In the State's Question & Answer Board response to *Attachment F, Option C Federal Reporting Reqs*, you indicated you were unable to provide further information about this report beyond the title. We use our CMdS data model and our solution's ad hoc reporting capabilities to deliver additional reports required by the project, often based on our reporting library's existing reports that are a close match to the requirements. The data in our data model is comprised of CMdS-Claims and CMdS-Financial data needed to support federal reporting, including stamping and T-MSIS data quality. We are confident our experienced federal reporting specialists can configure this required report using our solution's capabilities.

FDRP160
The Contractor's solution shall have the ability to produce Early Warning Report as specified by Agency.

One of the valuable features within the FADS suite of analytical tools is the Spike Detection reports, which are the Early Warning reports of high cost services and service misutilization based on current payment data to quickly identify high volume practices.

FADS contains a Provider Activity Spike Detection component that generates reports each weekend after the claims data is refreshed. These reports alert the user to providers who, during the last payment cycle, exceeded user-defined thresholds for increases in paid amount, number of claims, or number of distinct members. The Provider Activity Spike Detection Increase/Decrease report contains providers with a marked increase or decrease in claim activity. A prompt page enables the user to select the week ending date, the activity type, and one or more provider types. The type of report generated, increase or decrease, is dependent on the parameters entered. The report displays the parameters entered and used to generate the report. Our response to ID FDRP93, page 4.2-977, provides more information about the spike report.

FDRP161
The Contractor's solution shall have the ability to produce Excessive Hours Per Day report as specified by Agency.

Conduent has completed extensive research of the requirement to produce the Excessive Hours Per Day report, including reviewing the procurement library and the answers to questions. 4.3 Section 4: Offeror Qualifications [RFP Section 4]

REQUIREMENT: RFP Section Section 4

All subsections of Section 4 require a response. The Offeror must indicate certification of understanding for Sections and the offeror must restate the subsection number and the text immediately prior to your written response.

With nearly five decades in the Medicaid industry, Conduent's extensive qualifications testify to our leadership in the healthcare industry.

Conduent is pleased to provide DPHHS our credentials and qualifications for performing the scope of services requested in the State's Claims Processing and Management Services request for proposal (RFP). As a trusted operations and technology partner to DPHHS for 35 years, we are uniquely positioned to provide the State a successful approach to meeting requirements both for Core Services and all Optional Services. In addition to our Montana-specific experience, we bring nearly half a century of experience providing the same or similar services to numerous Medicaid programs nationwide.

Committed to Montana and Medicaid

- Strong, stable company with a solid history of numerous healthcare successes
- Key Personnel already providing experienced leadership and knowledgeable resources
- Supporting MT Medicaid for more than 35 years

Our commitment to and reputation in the government healthcare market allows us to work in partnership with clients to create solutions that meet their current healthcare program needs while preparing for the future—focusing on key issues such as healthcare outcomes, care management, federal regulations, and cost containment.

Conduent certifies our understanding of this section and provides responses to all subsections in Section 4 in the order cited Table 4.3-1. For all responses, we restate the subsection number and RFP text prior to our response.

Table 4.3-1. Cross-Reference of Conduent Responses to Section 4 Requirements

RFP Section	Proposal Section Number (including Subsections)	Proposal Section
4	4.3	Section 4: Offeror Qualifications
4.1	4.3.1	State's Right to Investigate and Reject
4.2	4.3.2	Offeror Qualifications

4.2.2	4.5	Company Profile and Experience
4.2.3	4.6	Resumes
4.2.4	4.7	Offeror Financial Stability
4.2.5	4.8	Disclosure of Dark Money Spending Compliance
4.2.6	4.10	Oral Presentation/Product Demonstration/Interview
4.2.7	4.9	Equal Pay for Women Certificate

© 2020 Conduent State Healthcare, LLC

4.3.1 State's Right To Investigate And Reject [RFP 4.1]

REQUIREMENT: RFP Section 4.1

The State may make such investigations as deemed necessary to determine the Offeror's ability to provide the supplies and or perform the services specified. The State reserves the right to reject a proposal if the information submitted by, or investigation of, the Offeror fails to satisfy the State's determination that the Offeror is properly qualified to perform the obligations of the contract. This includes the State's ability to reject the proposal based on negative references.

Conduent acknowledges the State's right to conduct the necessary investigations to confirm our ability to deliver the supplies and services as required for this project. Further, we acknowledge the State's right to reject a proposal if the State determines an Offeror is not qualified to perform the obligations of the contract based the information submitted by or an investigation of the Offeror. Additionally, the State reserves the right to reject a proposal based on negative references.

4.3.2 Offeror Qualifications [RFP 4.2]

REQUIREMENT: RFP Section 4.2

To enable the State to determine the capabilities of an Offeror to provide the services specified in the RFP, the Offeror shall respond to the following regarding its ability to meet the State's requirements. THE RESPONSE, "(OFFEROR'S NAME) UNDERSTANDS AND WILL COMPLY," IS NOT APPROPRIATE FOR THIS SECTION.

NOTE: Each item must be thoroughly addressed. Offerors taking exception to any requirements listed in this section may be found nonresponsive or be subject to point deductions.

For the purposes of Offeror Qualifications, the Offeror must include company information, references, financial information, and other qualification information and materials for the entity that will be the actual Contracting Entity. For example: if corporation XYZ chooses to bid, and it plans to have its wholly owned affiliate ABC sign the contract, the proposal must include references, qualifications, financial and other reference information for the ABC affiliate. XYZ can also submit qualification material from XYZ Corporation but it won't be considered in evaluating the actual Contracting Entity.

Conduent State Healthcare, LLC (Conduent), the bidding entity under this procurement, is a leading provider of healthcare technology and operations services to government-sponsored healthcare programs nationwide. Our principal line of business is delivering program administration solutions for government-funded healthcare programs with a primary emphasis on state-administered Medicaid programs.

Since our founding in 1970, we have focused on helping Medicaid agencies improve the administration of their programs. We are a pioneer in the development of MMIS and managed care solutions, dating back to the 1970s, including establishing the federal government standard for MMIS in 1971. Half a century later, we remain focused on the Medicaid market—developing innovative, advanced healthcare solutions. We have the only CMS-certified tool that uses a rules engine as well as the most recently certified Claims Processing System in the nation. The State of Montana and other participating states in the NASPO procurement can count on our responsiveness, know-how, and dedication as we support you in replacing aging legacy components as part of your ambitious Medicaid modernization efforts.

The combination of our highly qualified staff with operational procedures tailored to DPHHS processes provides an unparalleled skill base, stability, and real-world experience to tackle the Department's challenges and resolve them successfully. Due to our long-term experience with the State, we understand the state policies and offer reduced risk in rules configuration.

© 2020 Conduent State Healthcare, LLC

Qualifications Overview

Conduent delivers mission-critical services and solutions for businesses and governments—creating exceptional outcomes for our clients and the millions of people who count on them. We offer our State clients the broadest range of innovative healthcare technology and administrative services targeted directly for Medicaid—setting us apart from our competitors in terms of length and depth of experience.

In addition to serving Montana, we currently hold healthcare-related contracts with government agencies in **23 states, the District of Columbia (DC), and Puerto Rico**—providing a broad range of healthcare technology and services that positively impact the lives of millions of citizens in the United States

Conduent State Healthcare, LLC

- Backed by the parent corporation, Conduent Inc., with a total revenue of $5.4 billion
- Supports State healthcare programs in 23 states, the District of Columbia (DC), and Puerto Rico
- Currently administering two contracts in Montana: MMIS/FA services and PBM services

We currently provide MMIS and/or fiscal agent (FA) services for the following Medicaid programs: Alaska, California, Hawaii, Mississippi, Montana, New Hampshire, New Mexico, Virginia, Wyoming, and the District of Columbia. Additionally, we currently provide prescription benefits management (PBM) services including claims processing, drug rebate, drug utilization review (DUR), and/or clinical services for **18 accounts nationwide,** including 12 Medicaid agencies and the United States Department of Labor.

Our national Medicaid experience brings additional value to our program administration approach by providing us a broad knowledge of the issues facing Medicaid programs nationwide and of the best practices for effectively addressing them. We understand how to translate complex Medicaid policy into our systems and operational processes, and we can respond quickly, responsibly, and knowledgably to evolving policy and programmatic needs. We offer DPHHS and other state clients the expertise of a long-term Medicaid services contractor with a proven performance history of providing the scope of services cited under the Claims Processing and Management Services contract.

Many of our current contracts represent multiple consecutive contract awards or renewals—testifying to our ability to maintain strong positive relationships with our customers and meet their immediate and long-term needs. The State benefits from selecting a strong, stable contractor with nationwide experience and the ability to leverage best practices and lessons learned from multiple other projects.

Corporate Commitment

Just as Medicaid continues to be the focus for Conduent, the commitment to and investment in the government healthcare market is foundational to our corporate parent. Conduent Incorporated provides innovative health and human services (HHS)-related business process services to government agencies and all 20 of the largest managed healthcare payers in the United States.

Our parent recognizes the importance of Medicaid in our overall business portfolio and is dedicated to ensuring we continue to play an instrumental role in assisting our Medicaid clients improve the administration of their healthcare programs and the healthcare outcomes of their program members.

© 2020 Conduent State Healthcare, LLC

Experience in Montana

Conduent has provided technology and operations services for the Montana Medicaid program since 1984, representing six contracts across a 35-year partnership with DPHHS. The State currently holds two separate contracts with Conduent: one for MMIS/FA services and one for prescription benefits management (PBM) services.

Under our initial MMIS/FA contract with DPHHS in 1984, we developed Montana's first MMIS and have maintained, enhanced, and operated it since that time—providing fiscal agent services without interruptions. In July 2007, we began providing enrollment broker services for Passport to Health, the State's Primary Care Case Management (PCCM) program, and for Team Care, the State's Medicaid managed care program. We also implemented our web-based state level registry (SLR) software-as-a-service (SaaS) solution and services for Montana in July 2011. To date, our SLR has facilitated payment to over 1,640 Montana providers, supplying Montana's health communities with over $48 million in incentives.

During our third contract, Conduent implemented a claims-based medical history system solution—an initiative recognized by CMS as the *nation's first Electronic Health Record (EHR) program*. Additionally, we implemented Montana's Medicaid Expansion Program which went live January 1, 2016—*on time and on budget.*

In Figure 4.3.2-1 we list the services we currently operate under our current Montana MMIS/FA contract:

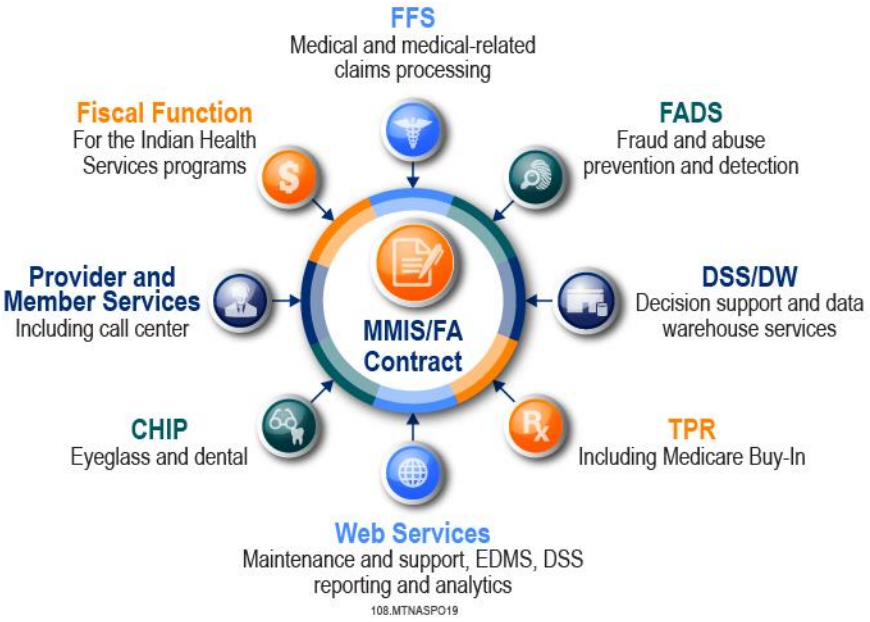

Figure 4.3.2-1. MMIS/FA Services
Our current services under the MMIS/FA contract.

© 2020 Conduent State Healthcare, LLC

Additionally, we have provided PBM services since 1996. Under our current PBM contract, awarded in 2012, we implemented a suite of modular pharmacy applications—on time and on budget—including:

- **Conduent Flexible Rx.** Our MITA-compliant, modular pharmacy point-of-sale (POS) claims processing system
- **Conduent SmartPA.** Our automated prior authorization (PA) processing system
- **Conduent Drug Rebate Analysis System (DRAMS).** Our web-based rebate administration system

The Flexible Rx PBM module received federal certification on February 15, 2017, retroactive to its first day of operation (December 6, 2015). This is the first time that certification has been granted to an individual pharmacy Medicaid management module. The Conduent Flexible RX pharmacy solution is the first pharmacy Medicaid management module to receive CMS certification based on the latest federal checklists for modular solutions in the MECT. We are proud to have led the Medicaid industry in our preparation for and execution of this landmark certification.

References

To demonstrate our experience providing services consistent with the Claims Processing and Management Services scope of work, we provide reference projects for Conduent and for each of our subcontractors. We provide five references for Conduent and three references for each of our subcontractors in Proposal Section 4.4 References.

Financial Information

Backed by the significant resources of our corporate parent Conduent Incorporated—with approximately **$5.4 billion** in annual revenue for 2018—we bring DPHHS the corporate strength and financial stability to achieve the successful and timely completion of all project requirements, with no financial risk to Montana Medicaid. The financial results of Conduent State Healthcare, LLC (Conduent) are included in Conduent Incorporated's reporting. For additional details, please refer to Proposal Section 4.7 Financial Stability.

4.4 References [RFP Attachment C and Section 4.2.1]

REQUIREMENT: RFP Sections Attachment C and Section 4.2.1

Offerors must provide a list of references. Detailed instructions can be found in Section 4.2.1.

REQUIREMENT: RFP Section 4.2.1

Offeror shall provide a minimum of 3 (three) references that are currently using or have previously used products and/or services of the type proposed in this RFP. The references may include state governments, universities, or comparable private sector projects for whom the Offeror, within the last 5 (five) years, has successfully implemented scope similar in nature to the MPATH Claims Processing and Management Services scope of work. At a minimum, the Offeror shall provide the company name, location where the products and/or services were provided, contact person(s), contact telephone number, e-mail address, and a complete description of the products and/or services provided, and dates of service. These references will be contacted to verify Offeror's ability to perform the contract. The State reserves the right to use any information or additional references deemed necessary to establish the ability of the Offeror to perform the contract. Negative references or the inability to contact the reference may be grounds for proposal disqualification. Provide the information above for each proposed subcontractor.

4.5 RFP Section 4.2.2 Company Profile and Experience [RFP Attachment C]

REQUIREMENT: RFP Section Attachment C

Offeror shall provide documentation establishing the individual or company submitting the proposal has the qualifications and experience to provide the supplies and/or services specified in this RFP. Details regarding minimum criteria of this documentation can be found in Section 4.2.2.

DPHHS benefits from a contractor offering both 49 years of nationwide Medicaid and 35 years of Montana-specific experience.

DPHHS is undertaking a significant transition to new technology as part of your overall vision of modernizing your Medicaid enterprise to promote increased modularity and flexibility as well as improved service delivery to your program stakeholders. The on-time implementation of the new Claims Processing and Management Services solution and its certification are also top priorities for the State. Because expectations are high for the contract and the selected contractor, DPHHS benefits from selecting a strong, stable contractor both with Montana-specific and with national experience. As a trusted, reliable technology and operations partner to the State for 35 years and for numerous Medicaid programs nationwide, Conduent brings the qualifications and experience to help you achieve your vision while reducing risk.

An Experienced Partner in Montana

- 35 years of experience with Montana Medicaid
- 49 years of experience in Medicaid
- Reduced risk in State configurations

We Know Montana

As a trusted operations and technology partner to Montana for more than three decades, Conduent is uniquely positioned to provide DPHHS a successful approach to meeting the services required under this procurement. We know the Montana Medicaid environment and our staff have in-depth practical experience supporting Montana Healthcare Programs, the groups of individuals these programs serve, and the healthcare benefits these programs cover. We developed and managed the systems that support Montanans' access to care and as Montana Medicaid has grown and evolved, we have assisted DPHHS in incorporating new benefit programs and covered services consistent both with evolving State-specific and federal initiatives. As shown Figure 4.5-1, we have maintained a commitment to improving both technology and operations in terms of quality, efficiency, and cost containment.

Figure 4.5-1. Our Commitment to Improvement of Technology and Operations

© 2020 Conduent State Healthcare, LLC

We are eager to continue our working relationship with you to leverage our knowledge and understanding of your Medicaid Program to maximize the investment you are making in moving toward modularity consistent with your MPATH vision.

4.5.1 Company Profile and Experience [RFP 4.2.2]

REQUIREMENT: RFP Section 4.2.2

Offeror shall provide documentation establishing the individual or company submitting the proposal has the qualifications and experience to provide the supplies and/or services specified in this RFP, including, at a minimum:

- a detailed description of any similar past projects, including the product/service type and dates the products and/or services were provided;
- the client for whom the services were provided; and
- a general description of the company including its primary source of business, organizational structure and size, number of employees, years of experience performing services similar to those described within this RFP;
- Provide the information above for each proposed subcontractor.

Backed by 49 years of Medicaid experience, Conduent has the necessary qualifications and experience to provide the full scope of services for the Claims Processing and Management Services project.

As the leading provider of healthcare technology and operational services for government-sponsored health care programs, Conduent maintains a continuous commitment to helping state Medicaid agencies improve their program administration. Our nationwide Medicaid experience brings additional value to the services we offer by bringing best practices from numerous accounts nationwide. We focus on working with our clients to improve the administration of their programs by developing and operating healthcare solutions with a proactive emphasis on innovative technology and cost management.

We continually invest in our healthcare service offerings to provide you the most comprehensive and advanced solutions available.

Design, Development, and Implementation (DDI) Experience: 49 Years

Our DDI and/or operation of MMIS solutions and other large-scale solutions spans **49 years** and ranges from the DDI of new MMIS systems to the implementation and re-engineering of transferred MMIS systems.

Additionally, we were **one of the first contractors** to respond to state initiatives to procure Medicaid functionality as stand-alone modules. We have designed, developed, implemented, and operated carve-out systems spanning pharmacy point-of-sale (POS); decision support system/data warehouse (DSS/DW); management and administrative reporting/surveillance and utilization review (MAR/SUR); electronic health records (EHR); fraud and abuse detection (FAD); and provider enrollment system (PES) modules, as well as Medicaid-related eligibility systems supporting Children's Health Insurance Programs (CHIP). In each case, we executed transitions successfully with no disruption of services to the Medicaid enterprise.

Fiscal Agent (FA) Operations Experience: 38 Years

After building a strong foundation in MMIS development and implementation starting in 1971, we entered the arena of Medicaid FA operations in 1982. Throughout our 38 years as an FA, we have performed services similar to those that we currently perform for Montana Medicaid for numerous state

© 2020 Conduent State Healthcare, LLC

healthcare clients across the country. Given the length and depth of our FA experience, we understand the concerns of our clients and design and operate systems with our client end-users in mind. Our operations expertise helps our clients to focus on their members and the strategic direction of their programs.

We are currently the FA for the following Medicaid programs: Alaska, California, Hawaii, Mississippi, Montana, New Hampshire, New Mexico, Virginia, Wyoming, and DC. In these states, our FA teams operate various Medicaid solutions and provide claims administration and technical support for systems operations, maintenance, and enhancements.

Our technology helps us deliver highly efficient, quality-driven Medicaid operations for our state clients. The following list summarizes the types of FA support we currently provide or have provided for current and former clients:

- Claims processing, management, and payment, including encounter processing and capitation payments
- Electronic Data Interchange (EDI)
- Financial services, including accounts payable and receivable
- Customer call centers and contact management, including recipient and provider web portals
- Decision Support System (DSS)/Executive Information System (EIS)
- Data entry and mailroom services
- Early and Periodic Screening, Diagnostic and Treatment (EPSDT) support services
- Prior authorization
- Print and mail fulfillment
- Member ID card production

Certification Experience: Unblemished Record of Success

Obtaining and maintaining federal certification of the Claims Processing and Management solution to achieve maximum federal financial participation (FFP) is an absolute priority of DPHHS. Conduent brings a 100% successful record of federal certification in 15 MMIS implementations for Alaska, Colorado, Florida, Georgia, Iowa, Minnesota, Mississippi, Montana, New Hampshire, New Mexico, North Dakota, Washington, and Wyoming Medicaid and twice for the District of Columbia Medicaid Program. We ensure that all Conduent-developed MMIS solutions—as well as the MMIS solutions we take over, enhance, and operate—continually meet federal certification requirements. No Conduent MMIS has ever failed to receive certification retroactive to the date requested.

Additionally, with the certification of Conduent's Flexible Rx pharmacy solution in Montana, we were the first vendor to have a Medicaid pharmacy management module certified using the latest federal checklists for modular solutions in the Medicaid Enterprise Certification Toolkit (MECT).

National Footprint in Healthcare

As a provider of Medicaid technology for 49 years and FA services for 38 years, Conduent has supported numerous Medicaid and Medicaid-related healthcare programs. We currently have healthcare-related contracts with government customers in **23 states, the District of Columbia (DC), and Puerto Rico**—providing a range of healthcare services that positively affect the lives of millions of people, as shown in Figure 4.5-2. In several of these states, we provide healthcare services under more than one contract.

© 2020 Conduent State Healthcare, LLC

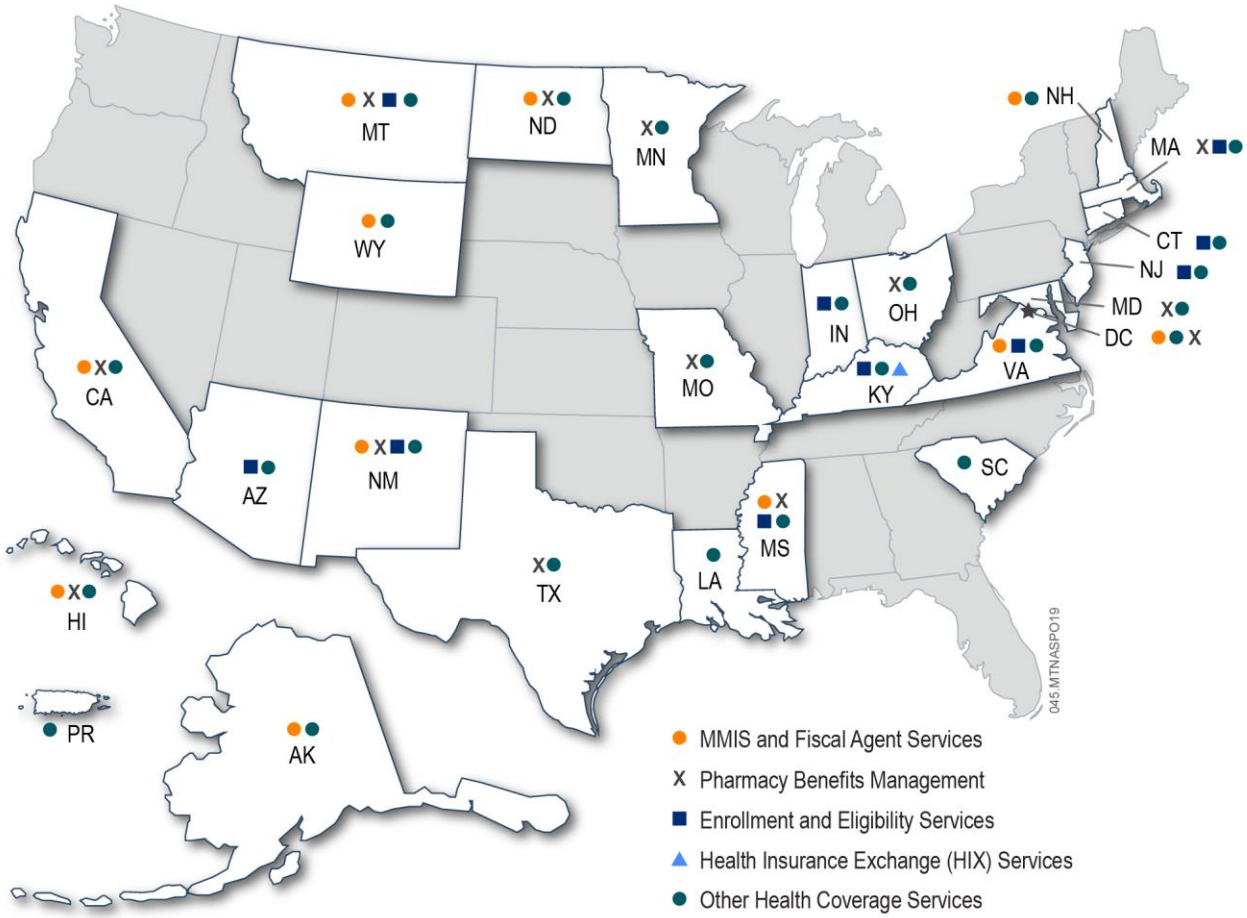

Figure 4.5-2. Nationwide Government Healthcare Experience
Our breadth of experience gives us a strong overall perspective of national healthcare trends.

Our national Medicaid experience brings additional value to our program administration approach by providing us a broad knowledge of the issues facing Medicaid programs nationwide and of the best practices for effectively addressing them. We understand how to translate complex Medicaid policy into our systems and operational processes, and we can respond quickly, responsibly, and knowledgably to evolving policy and programmatic needs.

Conduent Similar Projects

Conduent provides details of 11 current Medicaid projects where we provide services that are the same or similar to the scope of services specified in the RFP for both Core and Optional Services. For ease of evaluation, in the Products/Services Type column of the table, we include the project name, a high-level view of services, and a delineation of specific services.

We provide descriptions for the following Medicaid programs: Alaska, California, District of Columbia, Hawaii, Mississippi, Montana, New Hampshire, New Mexico, North Dakota, Virginia, and Wyoming.

Table 4.5-1 details our past projects similar to Montana.

Conduent Company Description

Conduent was established in 1970 as Consultec, Inc., in Georgia—making us one of the two oldest firms in the Medicaid marketplace. On March 25, 1999, Consultec, Inc. was registered in the State of Delaware as a limited liability company (LLC) and its name was changed to Consultec, LLC. The name Consultec, LLC was changed to ACS State Healthcare, LLC on May 29, 2001, after the company's acquisition by Affiliated Computer Services, Inc.

On September 28, 2009, Affiliated Computer Services, LLC (ACS) and Xerox Corporation entered into an Agreement and Plan of merger providing for the acquisition of the former by Xerox. On February 5, 2010, Xerox Corporation officially acquired ACS and then retired the ACS brand on January 25, 2012. The name ACS State Healthcare, LLC was changed to Xerox State Healthcare, LLC, effective April 1, 2012.

In January 2016, Xerox Corporation announced it would separate its technology and services businesses into two independent, publicly traded companies. The separation concluded and as of January 1, 2017, the business process services (BPS) division of Xerox Corporation is now part of and is being conducted under the new name Conduent Incorporated. Effective February 15, 2017, the business name of Xerox State Healthcare, LLC changed to Conduent State Healthcare, LLC. Today, Conduent State Healthcare, LLC (Conduent) is a wholly-owned subsidiary of our parent company, Conduent Incorporated.

Although our company name has changed over the years, both our healthcare focus and Medicaid-specific experience and expertise have remained steadfast across five decades.

© 2020 Conduent State Healthcare, LLC

Primary Source of Business

Conduent's principal line of business is providing program administration solutions for government-funded healthcare programs with a primary emphasis on state-administered Medicaid programs. Our Medicaid business history dates back to 1970 and our focus remains on Medicaid to this day. Since our development of the first MMIS prototype in 1971 and provision of fiscal agent (FA) operations in 1982, we have transformed our technology and enhanced our service offerings to address the challenges of Medicaid administration for the future.

Since Conduent's development of the first MMIS prototype in 1971 and provision of fiscal agent (FA) operations in 1982, we have transformed our technology and enhanced our service offerings to address the challenges of Medicaid administration for the future. Across our history, we have designed, developed, and implemented several generations of MMIS, including powerful, reliable mainframe systems; the first truly multi-payer MMIS; and the first web-based, MITA-aligned MMIS. Today, our Medicaid information technology service offering is anchored by our Conduent Medicaid Suite (CMdS)—components of which we are bidding to support both the Core and Optional Services scope of work. CMdS is a flexible SOA-based modular platform that provides the ability to easily configure technology to meet the evolving business needs of Medicaid programs.

For Medicaid, our healthcare solutions integrate a full spectrum of systems and services, including MMIS solutions, fiscal agent (FA) services, provider enrollment and support, pharmacy benefits management (PBM), clinical services, care coordination and management, eligibility and enrollment services, children's health administration (CHIP), fraud and abuse detection (FAD), and more, as shown in Figure 4.5-3.

© 2020 Conduent State Healthcare, LLC

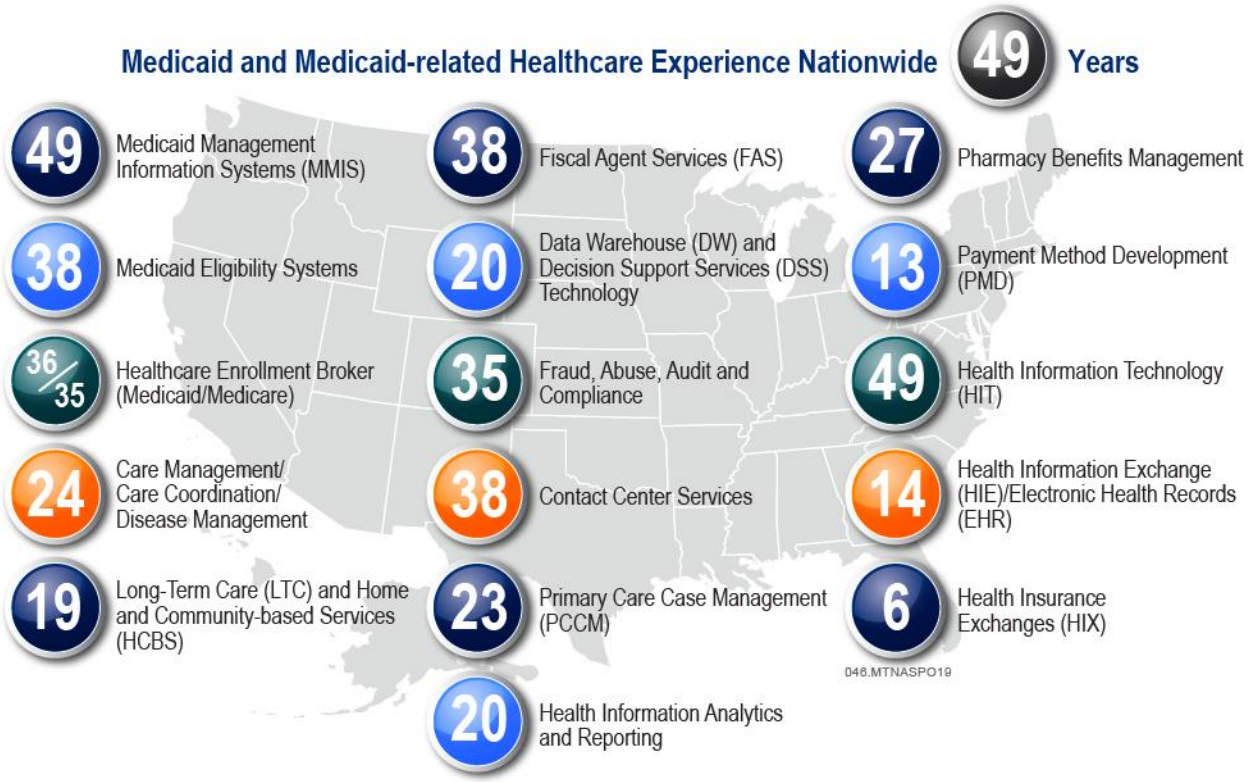

Figure 4.5-3. Nationwide Healthcare Leader for 49 Years

Serving state governments since the beginning of Medicaid, we support the technical and business needs of the Medicaid enterprise and accommodate changes in program direction.

With Conduent, state customers can rely on a contractor who provides services across the Medicaid enterprise and is quick to adapt to an evolving healthcare landscape to help customers sustain their programs for the future.

Healthcare Service Offerings: Spanning the Medicaid Enterprise

We offer the broadest array of healthcare services available today—a comprehensive approach, which sets us apart from our competitors. We provide highlights of these services in Table 4.5-2.

Table 4.5-2. Conduent Healthcare Service Offerings

Service Offering	Brief Description
Medicaid Management Information Systems (MMIS)	We provide full MMIS services including: • MMIS design, development, and implementation (DDI), maintenance, enhancement/modernization, and operation • MMIS takeover, operation, and maintenance • Web portal design and maintenance • MITA framework

© 2020 Conduent State Healthcare, LLC

Service Offering	Brief Description
Fiscal Agent/Intermediary Services	We provide full FA/FI operations services, including but not limited to: • Claims processing, management, and payment • Provider services • Financial services, including accounts payable • Member services, including recipient ID card production • Electronic data interchange (EDI) • Web portal support services • Call center and contact management • TPL services • Data entry and mailroom services • Print and mail fulfillment • Prior authorization • Utilization management (UM) • EPSDT support services
Certification: MMIS Systems and Stand-alone Medicaid Module	We bring a 100% success record of MMIS system certification in 13 states: Colorado, Florida, Georgia, Iowa, Minnesota, Mississippi, Montana, New Hampshire, New Mexico, Washington, West Virginia, Wyoming, and twice in the District of Columbia. No Conduent MMIS has ever failed to receive certification retroactive to the date requested. In fact, in 2012 the District of Columbia MMIS became the first Conduent MMIS certified under the new CMS guidelines in the Medicaid Enterprise Certification Toolkit (MECT) and we became the first MMIS vendor to have a system certified based wholly on MECT criteria. Additionally, our latest generation PBM module—Conduent Flexible Rx System—received federal certification in the State of Montana, making this the first time that certification has been granted to an individual Pharmacy Medicaid management module. The certification was based on a complete virtual review of the system's capabilities—a first for CMS—and the latest federal checklists for modular solutions in the MECT. Flexible Rx was certified in February 2017, retroactive to December 6, 2015, our go-live date.
Pharmacy Benefits Management (PBM)	We provide a comprehensive pharmacy benefits management system and solution that supports the entire prescription cycle, including: • Claims adjudication, management, and payment processing • Prospective and retrospective drug utilization review (DUR) • Drug rebate administration • Prescribing patterns • Prescriber and patient education • Preferred drug list development/maintenance • Prior authorization (PA) • Pharmacy/desk auditing • Clinical consulting
Health Information Exchange/Electronic Health Records (HIE/EHR)	We created solutions to specifically support State-level Medicaid and public health programs. Our HIE solution consolidates both clinical and administrative data, creating a rich patient health history while supporting a wide array of analytics, reporting, and clinical decision support programs. We were the first HIE/EHR vendor to provide an aggregated comprehensive continuity of care document with embedded clinical alerts and we created the first "defined contribution" insurance exchange for employers.

© 2020 Conduent State Healthcare, LLC

Service Offering	Brief Description
	Our HIE/EHR solution provides: • Infrastructure for accessing patient data • Actionable point-of-care information • Alerts, notifications, and gaps-in-care identifications • e-Prescribing • Real-time clinical algorithms
State Level Registry (SLR)	Our low-risk, cost-effective solution is a fully-hosted web-based software-as-a-service (SaaS) SLR solution that fully supports the Medicaid EHR Provider Incentive Program and allows our customers to interact with the CMS Registration and Attestation System (formerly known as the National Level Registry), providers, and other state systems. • Multi-state SaaS solution that supports: – Incentive payment administration – Program oversight and auditing – Tracking meaningful use – Pursuit of initiatives to encourage the adoption of certified EHR technology including provider outreach and training – Web-based solution that allows interaction with the CMS Registration and Attestation system, providers, other State systems • Business support staffing services for administrative processing of provider attestations
Payment Method Development (PMD) and Consulting Services	The Payment Method Development (PMD) team at Conduent specializes in understanding standard industry payment methods such as Diagnosis Related Group (DRG), Resource-Based Relative Value Scale (RBRVS), Ambulatory Payment Classification (APC), Resource Utilization Group (RUG) and fee schedules.
Provider Credentialing	• Full-service provider credentialing including provider enrollment operation based on nationwide best practices, and highly efficient provider services to support the enrollment, credentialing, re-credentialing, and continuous monitoring requirements. • Credentialing System which supports: – Provider Portal – Screening/Verification System – Rules Engine – State's View of the Process – Provider Site Visits – Provider Appeals
Eligibility and Exchange Services	Through our eligibility and exchange services, we help state government clients and agencies inform their underinsured and uninsured citizens of their healthcare options—Medicaid, CHIP, and others. We help citizens enroll in a plan and educate them on positive behaviors that yield improved health outcomes and lower costs.
Audit and Compliance Solutions that reduce fraud and abuse	Our subject matter experts provide results-oriented support to our clients in identifying, detecting, and preventing fraud, waste, and abuse. • Pharmacy audits (desk and on-site audits, systematic prescription claims check, patient verification services, and specialty/mail order pharmacy audits) • Durable medical equipment (DME) • Home infusion therapy • Hospice and home health provider audits • Claims overpayment audit and recovery We have helped our clients recover hundreds of millions of dollars in non-compliance

© 2020 Conduent State Healthcare, LLC

Service Offering	Brief Description
	and fraud in the past three decades. Using automated tools that provide a complete, easily accessible view of audit status, we are an effective partner for a broad spectrum of healthcare programs at every stage of auditing, from initial analysis to final recovery.
Coordinated Care Services	Our customized population management solutions monitor and measure healthcare trends, costs, and quality across the continuum of healthcare—providing a "whole person" view that helps our state government clients manage their care plans more effectively. Our coordinated care services include pre-certification processes (including medical necessity reviews) based on national guidelines. We also provide URAC-accredited case and condition (disease) management programs that use clinical expertise to provide customized large-scale data-driven management solutions for modeling, profiling, and health-risk prediction.
Long-Term Care (LTC) and Home- and Community-Based Services (HCBS)	We are a national provider of Home and Community Based Services (HCBS) administration support. We have a proven history of reducing costs and automating administrative processes in scalable long-term care and home-and community-based services which include: • Automated level-of-care (LOC) assessments • Individual service plan development
Care Management/Care Coordination/Disease Management	We empower our clients to leverage our clinical expertise and portfolio of technology tools—including our automated prior authorization solution (SmartPA)—to improve healthcare delivery and quality, promote medical best practices, and reduce costs. • Suite of modeling, profiling, benchmarking, reporting, and health risk prediction tools • Identification of recipients and gaps in care • Assessment of levels of care • Clinical quality outcomes reports • Utilization and case management • Wellness and preventative care program support • Targeted interventions and messaging
Decision Support Services (DSS) and Data Warehouse (DW) Technology	We provide our Medicaid clients highly successful Conduent-developed services in: • Decision support • Fraud protection • Surveillance utilization review solutions
Primary Care Case Management (PCCM)	We have provided PCCM services that include providing management and technical services in support of state managed care programs, including: • Contracting with health plans • Overseeing performance • New program development

Organizational Structure

Figure 4.5-4 provides a high-level view of our corporate organization structure and the placement of the Claims Processing Management and Services contract within it. As with our Montana MMIS/FA contract today, the new contract occupies a high-visibility position within our overall corporate executive structure and demonstrates that your contract is a top priority for us.

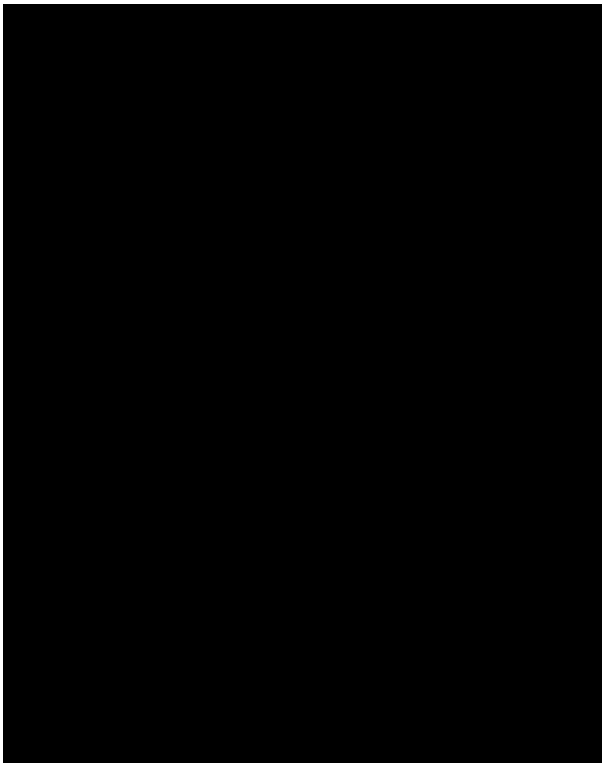

Figure 4.5-4. Conduent Organizational Structure
Conduent senior leadership is available as a direct channel of communication and support for DPHHS.

Our corporate structure provides Project Manager Ralph Choate ready access to executive decision makers—ensuring swift responses to the State's needs in the event corporate attention is required.

Size. Conduent State Healthcare, LLC (Conduent) currently provides health-care related technology and services across 23 states, the District of Columbia, and Puerto Rico. We are backed by the significant resources of our corporate parent, Conduent Incorporated, with $5.4 billion in annual revenue.

Number of Employees. Conduent employs approximately 2,900 people nationwide that support our state healthcare business.

Years of Experience Performing Similar Services. Conduent brings to the project more than 49 years of experience delivering Medicaid solutions.

Subcontractors

The success of a contract in large part hinges on the core competencies and strengths of its project team. Realizing this, Conduent has selected partners whose experience, expertise, technologies, and processes would best assist us in performing the contract scope of services at the highest level of quality. All our subcontractors have worked with government healthcare organizations on large-scale projects and offer significant experience in their respective roles for the contract.

Conduent Proprietary Information

Their expertise and industry-leading capabilities in areas critical to the success of the project enable Conduent to bring the best possible solution for Montana:

- **The Cadence Group.** Penetration Testing
- **CPS Cards.** Recipient ID Card Production and Mailing (new & replacement cards)
- **Ernst & Young.** Audits
- **United Language Group.** Translation Services
- **Infinite Computer Solutions Inc.** Staff Augmentation, Operations & Maintenance
- **Infosys.** Staff Augmentation, Implementation support

Each of our subcontractors delivers quality services and brings extensive work experience on similar critical projects. Their demonstrated success and excellence in their areas of expertise add value and reduce risk for Montana and the other states participating in the NASPO procurement.

We include required information for each of our subcontractors below.

The Cadence Group (Cadence)

For the Montana Claims Processing and Management Services project, The Cadence Group (Cadence) will provide annual vulnerability assessment and network penetration testing.

Similar Projects

Cadence has provided third party penetration testing services to clients across various industries and locations since 2005.

Table 4.5-3. Cadence: Similar Projects to Montana

Client	Product/Service Type	Dates Product/Services Provided
Conduent	Penetration testing services for over 40 separate business units, including many state and local government agencies, performing over 100 individual penetration tests spanning the last eight years.	2011 – Present

Cadence Company Description

The Cadence Group (Cadence) provides a wide range of advisory and compliance services. Cadence specifically focuses on security/compliance consulting, testing, and assessing.

During the initial push to prepare for Sarbanes-Oxley compliance, Cadence saw a need for pragmatic, knowledgeable and seasoned professionals—true practitioners in the compliance space. Since then, Cadence has applied those same principles to SOC reporting, PCI compliance, and other advisory and compliance-based services.

© 2020 Conduent State Healthcare, LLC

Cadence Primary Source of Business

The Cadence Group performs information security related services for various industries, including many state and local government entities.

Core services include:

- Sarbanes-Oxley Compliance
- PCI Compliance
- SOC Reporting
- Financial Accounting and Technical Reporting
- Business Valuation Services
- Enterprise Risk Management
- Internal Audit
- Financial Institution Regulatory Compliance
- Security Penetration Testing
- FedRAMP
- HIPAA

Cadence Organizational Structure

Headquartered in Salt Lake City, Utah, The Cadence Group's clients are spread across the country, but concentrated in the intermountain west and west coast.

Cadence has been in operation for over 15 years, assisting clients across all industries in meeting their financial and information security compliance needs. Cadence has particularly deep experience in serving SaaS/Cloud, Healthcare, and State & Local government clients in the areas of Penetration Testing, PCI, SOC Reporting, ISO and HITRUST. Presently Cadence provides services to over 200 clients, primarily in the United States, as well as in Central America and EMEA.

Number of Employees. Presently, The Cadence Group has 48 employees across offices in Salt Lake City, Utah and in San Francisco, California.

Years of Experience Performing Similar Services. The Cadence Group was founded in 2005.

Card Personalization Solutions Company, LLC (CPS Cards)

For the Montana Claims Processing and Management Services project, CPS Cards will produce and mail Medicaid member ID cards and replacement cards, including card stock, letter stock, envelopes, personalization, and fulfillment.

CPS Similar Projects

Table 4.5-4 highlights CPS Cards 'experience across various projects.

© 2020 Conduent State Healthcare, LLC

Table 4.5-4. CPS Cards: Projects Similar to Montana

Client	Product/Service Type	Dates Product/ Services Provided
United HealthCare Community Plan	• Process datafile for card mailing to issue 260,000 cards to end users for new program in January of 2019 • Manage cards for enrollment purposes, lost or stolen cards, or replacement cards • Maintain proper inventory levels of cards, letters, and envelopes to support ongoing daily / weekly / monthly levels	• Rollout of program in January of 2019 completed in less than 15 business days • February 2019 ongoing card program to present
The Metropolitan Companies	• End to End – Print, personalize, fold, insert, fulfill, and mail Medicare/Medicaid kits • Materials management for 384 SKUs (stockkeeping units) • Manage daily, weekly, monthly new and replacement kits in addition to annual enrollment programs • Daily reporting to show SLA goals met 99.8% of the time	2013 – 2019
RRD, Moran Printing	• Card Personalization and Fulfillment on the Darden Restaurant Gift Card program for the entire relationship period • Product has evolved from a thermal printed card boxed in hundreds, and only sold in the restaurant, to a card ink jetted and affixed into a fold over carrier that is secure and sold in third party locations, in store, and ordered online • As recent as 5 years ago, CPS began to source/print the actual plastic card and provide it through preferred vendors	2003 – 2019
Pilot Flying J	• Print, personalize, fulfill and mail all card and card related programs for the entire 800+ locations • CPS manages the entire process from end to end, including materials management, reporting, tracking and integration with the client's custom order platform • Shipping directly to all stores	2006 – 2019

CPS Cards Company Description

Founded in 1998, CPS Cards brings a 21-year track record of outstanding performance providing card production and fulfillment services including 11 years serving the healthcare ID card market. CPS' healthcare clients include Managed Care Organizations (MCOs), healthcare providers and large-scale insurers—with a history of success delivering ID cards to intended recipients within required timeframes. By partnering with CPS Cards, Conduent provides you a well-proven solution for recipient ID card production from a leader in the card production industry.

The company's substantial investment in technology and security initiatives helps to safeguard electronic Protected Health Information (PHI) as outlined in the Health Insurance Portability and Accountability Act of 1996. The company's facilities (Pennsylvania and Illinois) are HIPAA-compliant in adherence with

© 2020 Conduent State Healthcare, LLC

ePHI data guidelines and CPS undergoes annual HIPAA and InComm penetration testing—which allows CPS to confidently provide card products to the healthcare industry without the concern of unauthorized access. CPS has successfully managed ePHI data following the HIPAA guidelines—without incident—and lives up to its commitments, large and small, better than anyone in the card production industry.

CPS Cards has been working with Conduent/Xerox on various projects since 2010. CPS Cards pledges to work seamlessly with the Conduent team in fulfilling their role for producing and personalizing and fulfilling and mailing Medicaid cards and letters for Montana members for all phases of the project.

Highlights of our solution include:

- Custom-built Quality Management System (QMS) with a camera-verification system that provides a 100% guaranteed card-to-carrier match every time
- One to many, ongoing fulfillment of many types for a fully scalable service
- Up to four cards of variable personalization (20, 24, and 30 mil) per carrier, integrated in sheet cards on letter with digital options on demand
- Ability to provide additional inserts
- Multi-level security – Secure FTP, HIPPAA compliance, secure entrances and over 60 cameras in the facility
- Online data proofing
- File hold and release capabilities
- Multiple types of back end reporting
- Multiple shipping options such as presort mail, bulk shipments and accelerated delivery
- Redundant facilities for disaster recovery

CPS Cards Primary Source of Business

New and replacement cards, annual renewals, and kits including but not limited to:

- Thermal, Inkjet and/or embossed two sides and encoded magstripe with client specific data on paper to PVC cards
- Personalized 8.5" X 11" (and 14") letter (2 side option) matching card
- Mailing of cards and letters to the intended recipients

CPS Cards Organizational Structure

Size. With facilities in Allentown, Pennsylvania and Glendale Heights, Illinois, CPS Cards has served the needs of both channel partners and direct clients for more than 20 years. CPS Cards offers a full range of card printing, personalization, and fulfillment services. This unique, integrated production model saves clients time, money, and hassle**;** eliminates the miscommunications and inaccuracies that come with multiple vendors; ensures the security of sensitive customer data; and gives us the flexibility to complete extremely complex projects on deadline and on budget. CPS Cards serves as a "one-stop shop" for the entire card printing, personalization and production process. Their team of experts manages the entire production process, from design to delivery.

Number of Employees. CPS employs anywhere from 109-140 professionals depending on their workload.

© 2020 Conduent State Healthcare, LLC

Years of Experience Performing Similar Services. CPS has an outstanding 21-year track record of providing comprehensive production and fulfillment services to produce personalized ID cards, letters, and kits for Health Insurance Providers in all markets. CPS brings to the project an experienced team that understands the important role that quality and timing play in delivering a positive end user experience.

Ernst & Young

For the Montana Claims Processing and Management Services project, Ernst and Young will perform SSAE-18 SOC 2 Type II audits annually.

Ernst & Young Similar Projects

Table 4.5-5 highlights Ernst & Young's experience across various projects.

4.7 RFP Section 4.2.4 Offeror Financial Stability [RFP Attachment C]

REQUIREMENT: RFP Section Attachment C

Offerors shall demonstrate their financial stability to supply, install, and/or support the services. Details regarding minimum criteria of this documentation can be found in Section 4.2.4.

REQUIREMENT: RFP Section 4.2.4

Offerors shall demonstrate their financial stability to supply, install, and/or support the services specified by: (1) providing annual financial statements, preferably audited (for publicly traded companies), audited financial statements (for privately held companies), or unaudited financial statements and tax returns (for privately held companies for which audited statements are not available), for the three consecutive years immediately preceding the issuance of this RFP. If an Offeror does not have three (3) years of such documentation, it shall submit the documentation that it does have going back no more than three Offeror fiscal years; and (2) providing copies of any quarterly financial statements that have been prepared since the end of the period reported by its most recent annual report. If financial statements aren't publicly available, Offeror must meet the requirements of Sections 2.3.1 and 2.3.2 to have the information kept confidential.

The bidding entity, Conduent State Healthcare, LLC, is a wholly owned subsidiary of Conduent Incorporated, a financially strong and reputable organization with a solid business practice foundation.

Our extensive and diverse corporate resources support our ability to adequately staff projects and meet all of our contractual obligations. Conduent prides itself on a management infrastructure that includes stringent financial controls, project manager accountability, and continuous performance oversight at all levels of the organization.

As a subsidiary of Conduent, Inc., Conduent State Healthcare, LLC does not maintain its own financial statements. The financial results of Conduent State Healthcare, LLC are included in Conduent, Inc.'s reporting. Conduent's consolidated financial statements are prepared in accordance with Generally Accepted Accounting Principles (GAAP), independently audited by PricewaterhouseCoopers, and submitted to the Securities and Exchange Commission (SEC).

As required, we provide audited financial statements for the three consecutive years immediately preceding the issuance of this RFP. These three years of statements are provided in the following documents:

- Our most recent Conduent Incorporated Form 10-K for the year ending 12/31/2018 (also includes year 2017)
- Conduent Incorporated Form 10-K for year ending 12/31/2017 (also includes year 2016)

We also include our most recent Quarterly Financial Statements from March, June and September of 2019.

FORWARD-LOOKING STATEMENTS

From time to time, we and our representatives may provide information, whether orally or in writing, including certain statements in this Annual Report on Form 10-K, which are deemed to be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expressed or implied herein as anticipated, believed, estimated, expected or intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make.

Such factors include, but are not limited to: government appropriations and termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information, and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our information systems or security systems or any service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our continuing emphasis on and shift toward technology-led digital transactions; customer decision-making cycles and lead time for customer commitments; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to modernize our information technology infrastructure and consolidate data centers; our ability to comply with data security standards; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. We do not intend to update these forward-looking statements, except as required by law.

Table of Contents

PART I

ITEM 1. BUSINESS

In this Annual Report on Form 10-K, unless the content otherwise dictates, "Conduent", the "Company", "we" or "our" mean Conduent Inc. and its consolidated subsidiaries.

Our Business

Conduent is a leading provider of business process services with expertise in managing operations involving high volume, repeatable and individualized interactions. The Company's portfolio covers both front office and back office operations; however, the majority of its revenue and differentiation derives from engagements where it serves on behalf of its clients to manage end-user interactions across a wide-range of domains. Examples include payments, collections, benefit administration and end-user communication services. The Company creates value for its clients through more efficient service delivery combined with a personalized and seamless experience for the end-user. The Company applies its expertise, technology and innovation to continually modernize its offerings for improved customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics.

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement between the Company and Xerox Corporation (Separation). As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

With approximately 82,000 employees globally as of December 31, 2018, we provide differentiated services to clients spanning small, medium and large businesses and to governments around the world.

Our Transformation

We have a portfolio of businesses that we are optimizing and effectively targeting attractive growth areas in a rapidly evolving business process services industry. We have taken significant actions to improve our profitability and drive growth with a more focused portfolio of services.

Key initiatives include:

- ***Realigned Delivery.*** During 2018, we reorganized the business to better align to our vertical go-to-market strategy and to our global delivery capabilities. We believe this operating structure will allow us to better integrate and tailor business solutions for our customers.
- ***Divested Non-Core Assets.*** We divested four businesses in 2018 for aggregate proceeds of $703 million in cash. These divestitures enabled us to increase our focus on areas where we have a competitive advantage.
- ***Increased Use of Automation.*** We have developed and deployed a set of advanced software-based automation tools as part of our service delivery operations. These tools reduce the amount of repetitive, manual labor required to deliver many of our services and improve service quality through lower error rates and faster processing times.
- ***Real Estate, Infrastructure and Selling, General and Administrative (SG&A).*** We have significantly reduced the number of our leased and owned properties from 339 to 266 and reduced our information technology infrastructure spending. We have also reduced our SG&A costs from $611 million in 2017 to $560 million in 2018.

We continue to execute on our strategic transformation program to deliver cost savings through infrastructure optimization, labor productivity and automation initiatives, restructuring of unprofitable contracts and other efficiencies. This transformation program has and will enable us to better capitalize on our differentiated service offerings, industry expertise and global delivery excellence and position us for long-term shareholder value creation.

Our Market Opportunity

We estimate our addressable market size in the global business process service industry at approximately $201 billion in 2018, according to third party industry reports, and we are a leader across several segments of this large, diverse and growing market. Providing business process services is complex and multi-faceted with services that span many industries.

Ongoing competitive pressures and increasing demand for further productivity gains have motivated businesses to outsource elements of their day-to-day operations to accelerate performance and innovation. As a result, our clients have become more focused on their core businesses and the range of outsourced activities has expanded greatly. Increasing globalization has also required many companies to optimize cost structures to retain competitiveness and business process services have become a key component of this strategy.

The ongoing shift to next-generation software and automation technologies is driving greater demand for, and expectation of, efficiency and personalization by the constituents and customers of the businesses and governments we serve. Addressing these business and operational challenges is necessary for business process services companies to capitalize on these trends. In addition, business process services have the potential to meaningfully enhance productivity for businesses and governments and satisfaction for their constituents and customers.

Segments

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

- Our *Commercial Industries* segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

- Our *Government Services* segment provides government-centric business process services and subject matter experts to U.S. federal, state and local and foreign governments.

- Our *Transportation* segment provides systems and support to transportation departments and agencies globally. Primary offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other represents our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

We present segment financial information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference. The discussion below highlights our segment revenues for the year ended December 31, 2018.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Commercial Industries

Our Commercial Industries segment is our largest segment, with $2.5 billion in revenues in 2018, representing 47.2% of total revenues. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services. These services are complemented by innovative industry-specific services such as payment integrity solutions to clients in the healthcare payer space, care and quality analytics, workflow solutions and software adoption services to healthcare provider clients, personalized product information for clients in the automotive industry, source-to-pay solutions for clients in the manufacturing industry, revenue generation and clinical services for clients in the pharmaceutical and life sciences industries, end-user engagement and marketing services for clients in the Retail industry, and mortgage and consumer loan processing for clients in the Financial Services industry.

Government Services

Our Government Services segment generated revenues of $1.4 billion in 2018, representing 25.1% of our total revenues. This segment provides government-centric business process services to U.S. federal, state and local governments for public assistance program administration, transaction processing and payment services. In order to provide targeted support to our government clients, our Government Services segment is organized into several primary businesses:

- ***Federal, State and Local Government:*** We support our government clients with services targeting key civilian agencies within federal, state and local governments, as well as government administrative offices. Our depth of agency-specific expertise combined with our scale allows us to deliver and manage programs at all levels of government. Our broad set of services includes public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies.

- ***Payments:*** With more than $75 billion disbursed annually, we are a leader in government payment disbursements for federally sponsored programs like Supplemental Nutritional Assistance Program (SNAP, commonly known as food stamps) and Women, Infant and Children (WIC) as well as government initiated cash disbursements such as child support, unemployment and federal social security. We provide our payment card services which include branded prepaid debit card (Visa and Mastercard), Electronic Benefit Transfer (EBT for SNAP and WIC) and Electronic Child Care to 35 states and the U.S. Treasury with a diversified portfolio consisting of 165 different payment programs nationwide.

- ***Government Healthcare:*** We provide medical management and fiscal agent care management services to Medicaid programs and federally-funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia. Our services include a range of innovative solutions such as Medicaid management fiscal agent, pharmacy benefits management and clinical program management. These services help states optimize their costs by streamlining access to care and improve patient health outcomes through population health management and help families in need by improving beneficiary support.

Transportation

Our Transportation segment generated revenues of $0.7 billion in 2018, representing 13.5% of our total revenues. This segment provides revenue-generating transportation services to government clients in 24 countries. Our services include support for electronic toll collection, public transit, parking and photo enforcement. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting. These innovative services significantly improve individual travel experiences, optimize how vehicles and goods move efficiently within cities, digitize integrated modes of transportation and help our government clients to better serve their constituents.

Other

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018. In 2018, Other accounted for $0.8 billion of revenues, representing 14.2% of total revenues.

Our Service Offerings

Our portfolio of business process services includes a combination of industry-specific and multi-industry services. We have subject matter experts who are responsible for implementing each of these services, delivering service excellence to clients, ensuring best practices to improve cost competitiveness, innovating our next generation offerings and supporting worldwide sales.

Industry-Specific Services

Commercial Industry-Specific Services

Examples of the services we offer include personalized product information for automotive clients, source to pay solutions for manufacturing clients, care integration and coordination, member health risk assessments and payment integrity (such as recovering claims from the appropriate payers) for healthcare clients, mortgage and consumer loan processing for financial institution clients and customized workforce learning solutions for aerospace clients.

Transportation Services

The transportation services we offer include support for electronic toll collection, public transit, parking and photo enforcement. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting.

Government Services

Our broad set of public sector services includes public assistance program administration, pension administration, records management, disease management and software offerings in support of federal, state and local government agencies. It also includes fiscal agent administrative services and providing management information systems in support of Medicaid programs or pharmacy benefits management for Government Healthcare clients.

Multi-Industry Services

Transaction Processing Services

We help our clients to improve communications with their customers and constituents, whether it is on paper, on-line or through other communication channels. By supporting our clients' customer communication processes, we help our clients deliver a better experience to their customers and operate with improved efficiency and greater effectiveness.

We offer a broad array of flexible transaction processing services that include data entry, scanning, image processing, enrollment processing, claims processing, high volume offsite print and mail services and file indexing. Our multi-channel communication capabilities (including secure print, email, text and web) enable the delivery of personalized and targeted communications that are designed to elicit the desired response from customers or other end-users (*e.g.*, on-time bill payment and increased marketing response rates). Our service offerings utilize both proprietary and commercially available third-party technologies, combined with our expertise to ensure continued quality and innovation for our clients.

Payment Services

Prepaid Cards: We are an extensive provider of VISA and MasterCard prepaid debit cards, as well as other electronic payment cards in support of U.S. government benefit programs such as Social Security, the Supplemental Nutrition Assistance Program (formerly known as food stamps), the Special Supplemental Nutrition Program for Women, Infants and Children and other specialized Electronic Benefits Transfer programs. Our secure payment services reduce fraud and eliminate paper checks by disbursing electronic payments directly to end-users, even those without bank accounts. Our proprietary processing platform, significant operational expertise, advanced fraud analytics and adoption of Europay, MasterCard and Visa chip-enabled technology put us in the forefront of the Prepaid Card industry.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Health Savings Accounts (HSA): We provide clients with a simplified approach to help their employees manage their health care costs and accumulate wealth with tax-advantaged accounts. We consolidate administration of all health spending accounts onto one common platform, including HSA, Health Reimbursement Arrangements, Flexible Spending Accounts and Health Incentive Accounts. By consolidating and integrating the management of health spending accounts, we help our clients improve benefit enrollment and account opening, consolidate customer service, simplify communications and streamline account funding and management. As of December 31, 2018, we had approximately 1 million active HSA accounts and $2.5 billion of assets under management within our HSA offering.

Child Support Payments: We are an industry leader of State Government Disbursement Units in the U.S. for child support payments. We collect payments from non-custodial parents via check, credit card and transfers from employee payroll systems and disburse payments to the beneficiaries.

End-User Engagement

We offer a range of services that help our clients support their end-users. This includes in-bound and out-bound call support for both simple and complex transactions, technical support and patient assistance. We also provide multi-channel communication support (both print and digital) across a range of industries.

Human Resources Services

We help our clients support their employees at all stages of employment from initial on-boarding through retirement, as well as HSA administration. We offer clients a range of customized advisory, technology and administrative services that improve the ability of employees to manage their benefits, professional development and retirement planning. Also, we assist our clients with workers' compensation claims management.

Finance and Accounting Services

We serve clients by managing their critical finance, accounting and procurement processes. Our services include general accounting and reporting, billing and accounts receivable and purchasing, accounts payable and expense management services. We also offer wholesale and retail lockbox services and process auto and mortgage loans in the United States. With a global, dedicated team, we manage the core, end-to-end process areas of finance, accounting and procurement for some of the world’s most recognized brands.

Legal Business Services

We have been providing client support to law firms and corporate legal departments for over 20 years. We work across the litigation lifecycle, with particular focus on the legal discovery and review process. Our offerings include litigation support services, compliance and risk review and managed services support.

Workforce Learning Services

We are a provider of end-to-end learning services, designed to accelerate the productivity and development of our clients’ employees and extended work forces. Our global presence, superior innovation and expertise allow us to deliver performance-based learning services tailored to our clients’ unique strategic business goals. Our offerings include learning strategy and assessment, instructor management and learning administration.

Applied Automation and Analytics Solutions

Many of our service offerings described above incorporate our applied automation and analytics solutions to increase their value and effectiveness to clients across all industries. We deploy these solutions to personalize millions of interactions, optimize service delivery and simplify complex processes. For example, our customer care services harness the power of applied analytics and automation to help our customer service agents work more efficiently across different communication channels. Our applied automation solutions track and learn the most efficient means to address common customer service needs as they occur in real time so that we can solve the same problem faster the next time around. The combination of applied automation and analytics allows us to identify new service demand patterns and opportunities quickly so that we can proactively address them on behalf of our clients.

Our Competitive Strengths

We possess a number of competitive strengths that distinguish us from our competitors, including:

Leadership in attractive growth markets. We are a leader in business process services. Our clients continue to outsource key business processes to accelerate performance and innovation. Additionally, clients are moving beyond services for back-office functions in order to drive customer satisfaction and loyalty, as well as productivity and efficiency. The increase in globalization and cost competition continues to accelerate, forcing companies to seek ways to stay ahead of the competition. These factors, along with clients and their customers demanding more personalized, seamless and secure solutions, are collectively driving the ongoing shift to next-generation software and automation technologies.

- ***Healthcare.*** U.S. healthcare spending was estimated to have represented 17.9% of GDP in 2017 and is projected to grow at an average rate of 5.5% per year for 2017-2026. As one of the most regulated industries, healthcare providers must balance increased utilization with heightened complexity and new financial pressures such as government budget challenges to significantly reduce reimbursements, reimbursement penalties for hospital readmissions and a shift from fee-for-service to “value-based” population health management. We are widely recognized by industry analysts as a leader in healthcare payer operations, serving 19 of the top 20 U.S. managed healthcare plans and providing administrative and care management solutions to Medicaid programs and federally funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia.

- ***Transportation.*** Traffic congestion continues to increase as urbanization and changing demographics take hold globally. As a result, optimized transportation systems are becoming critical to increase efficiency while maintaining strict safety requirements. Electronic toll collection, public transit and parking all represent key growth drivers as governments at all levels increasingly focus on transportation infrastructure. We are an award-winning innovator in parking management.

- ***Transaction Processing.*** We provide high volume print and mail services, enrollment processing and personalized and targeted marketing and communications, to large corporations and we believe we are a leading provider in this market.

- ***Prepaid Cards***: We are the leading provider of prepaid payment card services in support of the U.S. government prepaid card services market.

Global delivery expertise. Our scale and global delivery network enables us to deliver our proprietary technology, differentiated service offerings and service capabilities expertly to clients around the world. We have operations in India, Philippines, Jamaica, Guatemala, Mexico, Romania, Dominican Republic and several locations within the United States, giving our customers the option for "onshore" or "offshore" outsourced business process services. This global delivery model enables us to leverage lower-cost production locations, consistent methodologies and processes, time zone advantages and business continuity plans. As of December 31, 2018, 49% of our employees were located in high cost countries and 51% were located in low cost countries.

Differentiated suite of multi-industry service offerings at scale. We manage transaction-intensive processes and work directly with end-users to meet their needs often in real-time. We are unique in our ability to offer our clients these business process services on a large scale and with high quality. Additionally, we are able to leverage our multi-industry services to bring the same scale and quality to our portfolio of industry-specific service offerings, such as healthcare claims management, employee benefits management and public transit fare collection.

Innovation and development. We innovate by developing and acquiring new technologies and capabilities that improve business processes. We are constantly creating the next generation of simple, automated and touchless business processes to drive lower costs, higher quality and increased end-user satisfaction. Analytics allow us to transform big data into useful information that helps identify operational improvements and constituent insights. Additionally, we leverage robotic process automation and predictive analytics and combine this with our deep subject matter expertise to create intelligent services that improve security, increase speed and improve accuracy, quality and regulatory compliance, and uncover insights that support better decision making and outcomes for our clients.

Stable recurring revenue model supported by a loyal, diverse client base. We have a broad and diverse base of clients in 26 countries across geographies and industries, including Fortune 1000 companies, small and midsize businesses and governmental entities. Our close client relationships and successful client execution support our stable recurring revenue model and high renewal rates. Excluding our strategic decision not to renew certain contracts, renewal rates for 2018 and 2017 were 95% and 94%, respectively.

Our Strategies

Our strategy is to drive leadership in attractive markets by leveraging and building on our competitive strengths. We intend to execute our strategy through increased business portfolio focus and operating discipline, enhanced sales and delivery capabilities and tightly aligned investments. Our strategy is designed to deliver value by delivering profitable growth, expanding operating margins and deploying a disciplined capital allocation strategy.

Specific elements of our strategy include the following:

Expand within attractive industries. The industries in which we operate have attractive revenue growth rates, generally in the mid-single digits. We intend to sharpen our focus and expand our business in industries with strong growth and profitability characteristics. We will employ a disciplined approach to portfolio management to complement our competitive strengths and build depth and breadth in our core businesses. Within the Healthcare industry, we intend to leverage our data analytics, differentiated service offerings and industry know-how to continue to service payer, provider and core government healthcare clients. Within the Transportation industry, we will leverage our global, end-to-end platforms to continue to deliver seamless travel experiences while providing back-end Transaction Processing and Call Center services for government clients globally.

Optimize and strengthen our services capabilities. We plan to optimize our services capabilities and strengthen several core areas, including Transaction Processing, Finance and Accounting and Prepaid Card services by building out our services offerings and continuing to improve our competitive strengths. We have divested non-core assets, refocused our business towards higher margin growing segments and consolidated delivery operations to enable greater productivity. Within Transaction Processing, we intend to continue to build industry-specific service offerings and advance inbound and outbound processing capabilities. Within End-User Engagement, we intend to capitalize on our global scale, cost efficiencies and our ability to provide seamless communications between our clients and their end-users through traditional (e.g., voice) and digital (e.g., web, mobile and Internet of Things) channels. In Prepaid Cards, we plan to continue to leverage our scalable platform to help our clients simplify their payment disbursement processes.

Continue to advance next-generation platforms and capabilities. We intend to maintain our focus on innovation to create next-generation solutions aligned with our clients' future needs and our growth strategies. We plan to advance our current platforms, further automate and personalize business processes and enhance data analytics capabilities to deliver value-added services for our clients.

Engage, develop and support our people. We intend to increasingly develop our employees by investing in training, processes and systems to equip them with modern tools that enable them to perform their jobs more efficiently. Furthermore, we plan to strengthen our sales teams throughout improved and optimized coverage and effective talent management.

Competition

Although we encounter competition in all areas of our portfolio, we lead across many areas of our principal businesses. We compete on the basis of technology, performance, price, quality, reliability and customer service and support. In the current political environment in the U.S. and other territories, we also consider our "onshore" delivery capacity to be a competitive advantage. We participate in a highly competitive and rapidly evolving market, driven by changes in industry standards and demands of customers to become more efficient. Our competitors range from large international companies to relatively small firms. Our competitors include:

- Large multinational service providers such as CGI Group, Accenture, Aon Hewitt, Cognizant, Hewlett-Packard Enterprise, IBM, Teletech and Teleperformance;
- Traditional Business Process Outsourcing companies such as Genpact, ELX Services, Exela Technologies and WNS Global Services;
- Payroll processing and human capital management providers such as ADP and Paychex;

Past financial performance is no guarantee of future results.

- Healthcare-focused IT and service solutions providers such as Cerner and Maximus;
- U.S. Federal focused government services such as CACI International and DXC Technology;
- Transportation multi-nationals such as Roper/TransCore, Cubic and Kapsch; and
- Smaller niche business processing service providers and in-house departments that perform functions that could be outsourced to us.

Sales and Marketing

We market our business process services to both potential and existing clients through our worldwide sales force and our business development team. Additionally, we have dedicated “solution architects” who work with clients to better understand their situation and develop a custom-tailored solution to meet their unique needs.

Our sales and marketing strategy is to go to market by industry to deliver key industry-specific and multi-industry service offerings to our clients. We focus on developing new prospects through market research and analysis, renewing expiring contracts and leveraging existing client relationships to offer additional services. We leverage our broad, multi-industry service offerings to package solutions through enterprise selling, while maintaining a disciplined approach to pricing and contracting. Our sales efforts typically involve extended selling cycles and our expertise in specific industries is critical to winning new business.

Our Geographies

We provide services globally and we have a diversified geographic delivery network, including a significant presence within the U.S. In 2018, approximately 12% of our revenues were generated by clients outside the United States. In 2018, our revenues by geography were as follows: $4,748 million in the United States (88% of total revenues), $497 million in Europe (9% of total revenues) and $148 million from the rest of the world (3% of total revenues). We present geographical information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference.

Innovation and Research and Development

Our innovation and research and development (R&D) capabilities are critical to our client value proposition and competitive positioning. Our investments in innovation align with our growth strategies and are driven by a view of future needs and required competencies developed in close partnership with our clients and R&D partners. We are investing in attractive markets, such as healthcare and transportation, and building on proven platforms to create services that distinguish us from our competitors.

Our innovation and R&D are focused on three key areas: automation, personalization and analytics.

Automation—Create simple, automated and touchless business processes to drive lower costs, higher quality and increased agility. Businesses require agility to quickly respond to market changes and new customer requirements. To enable greater business process agility, our R&D goals are to simplify, automate and enable business processes via flexible platforms that run on robust and scalable infrastructures. Automation of business processes benefits from our strong image, video and robotic processing, as well as our machine learning capabilities. Application of these methods to business processes enables technology to perform tasks that today are performed manually. Examples include providing automation solutions in transportation by aggregating and automatically applying business rules to simplify toll payments, using our state-of-the-art video and image analytics to reduce the need for manual review of license plates in tolling and toll adjustment scenarios, analyzing data on eligibility claims and checking for correctness on applications. The scope of automation is applied across our portfolio of services and is a key element of our ongoing strategy of modern, efficient services.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Personalization—Augment humans by providing secure, real-time and context-aware personalized products and services. Whether business correspondence, personal communication, manufactured items or information service, personalization increases the value to the recipient. Our R&D investments lead to technologies that improve the efficiency, economics and relevance of business services, such as customer care and health and welfare services. For example, in our current customer care service offerings, the human touch is seamlessly added as our software automatically takes telephony data and merges it with customer records pulled from multiple sources to seamlessly create targeted scripts and flows. This allows the agent to have the caller's data readily available and provide a more personal experience to the customer —whether on the phone or online. In toll systems, our systems automatically pull up a customer's name, verify their information and prompt them for unpaid tolls. In transit systems, our mobile app aggregates and calculates the time, cost, carbon footprint and health benefits from walking, biking, driving, parking and taking public transit. For health and welfare, our systems provide state-of-the-art personalized delivery to ensure the best utilization of funds for the neediest populations.

Analytics—Transform big data into useful information to support better decision making. Competitive advantage can be achieved by better utilizing available and real-time information. Today, information resides in an ever increasing universe of servers, repositories and formats. The vast majority of information is unstructured, including text, images, voice and videos. We seek to better manage large data systems in order to extract business insights to provide our clients with actionable recommendations and new services. Tailoring these methods to various industry applications leads to new customer value propositions. In hospitals, we mine usage and clinical indicators to improve patient experiences. We also help our healthcare clients identify waste and fraud by identifying networks of providers and patients with suspicious behavior, such as sudden and dramatic increases in a provider's level of business or unusual or illogical patient treatment sequences. In transportation, we enable transport and parking operators to better understand and predict commuter needs, including adherence to schedules, passenger loading levels, car park utilization rates and the impact of varying factors, such as weather and schedule variations. In our card payment services business, we perform geo location analytics to predict potential fraud behaviors to assure monies are being distributed to the intended recipients.

Intellectual Property

Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. We own approximately 1,011 patents and pending applications. Our patent portfolio evolves as new patents are awarded to us and as older patents expire. These patents expire at various dates, generally 20 years from their original filing dates. While we believe that our portfolio of patents and applications has value, in general, no single patent is essential to our business or any individual segment. In addition, any of our proprietary rights could be challenged, invalidated or circumvented, or may not provide significant competitive advantages.

Our business relies on software provided to an approximately equal extent, by both internal development and external sourcing to deliver our services. With respect to internally developed software, we claim copyright on all such software, registering works which may be accessible to third parties. In addition, we rely on maintaining source code confidentiality to assure our market competitiveness. With respect to externally sourced software, we rely on contracts assuring our continued access for our business usage.

In the United States, we own 87 trademarks, which are either registered or applied for, reflecting the many businesses we participate in. These trademarks may have a perpetual life, subject to renewal every 10 years and may be subject to cancellation or invalidation based on certain use requirements and third party challenges, or on other grounds. We vigorously enforce and protect our trademarks.

People and Culture

We draw on the business and technical expertise of our talented and diverse global workforce to provide our clients with high-quality services. Our business leaders bring a strong diversity of experience in our industry and a track record of successful performance and execution.

Conduent established its own diversity and inclusion program post-separation, which is overseen by Conduent's human resources department. Conduent promotes understanding and inclusion through a comprehensive set of diversity initiatives and strategies, including addressing under-representation by identifying shortfalls and developing action plans to close those gaps and through work-life programs that assist employees in certain aspects of their personal lives. Additionally, Conduent informs and educates all employees on diversity programs, policies and achievements. As an independent company, we intend to continue our commitment to diversity and inclusion and implement similar policies and programs.

In the United States, Conduent complies with Equal Employment Opportunity guidelines and all applicable federal, state and local laws that govern the hiring and treatment of our employees.

As of December 31, 2018, we had approximately 82,000 employees globally, with 43% located in the United States and the remainder located primarily in India, Philippines, Jamaica, Guatemala and Mexico.

Training and Talent Development

We believe our people are our most important asset, which is why we invest in employee growth and development programs. We are focused on building a workplace where our people can do their best work and have access to the tools and resources they need to perform their jobs more effectively. We are building a culture of learning and have shifted from delivering training to incorporating learning into day-to-day work.

We have a strong performance management system in place that requires all employees to engage with their managers on goal-setting and performance feedback, enabling personal and professional development. There is a strong emphasis on mentorship and coaching, both formal and informal, to help employees get to the next level in their careers. We enable this by developing management capability for our frontline leaders to ensure they are able to coach and mentor their teams and engage in constructive and continuous two-way dialogue.

Corporate Ethics

Our commitment to business ethics represents more than a declaration to do the right thing. It has become an integral part of the way we do business. We operate according to our ethics and compliance program, which is designed to meet general governance and specific industry and regulatory requirements with a focus on values, culture and performance with integrity. Conduent has a business ethics program, which is overseen by the business ethics office, and a code of business conduct (Code), which serves as the foundation of our business ethics program. The Code sets forth our expectations for ethical leadership, performance with integrity and compliance with company policies and the law. In addition, the Code embodies and reinforces Conduent’s commitment to integrity and helps employees resolve ethics and compliance concerns consistent with operating principles and legal and policy controls. In addition, our employees are required to complete business ethics training annually and we periodically solicit their input to gauge the state of Conduent’s ethical culture and help identify areas for improvement.

Our directors must act in accordance with our Code of Business Conduct and Ethics for Members of the Board; our principal executive officer, principal financial officer and principal accounting officer, among others, must act in accordance with our Finance Code of Conduct; and all of our executives and employees must act in accordance with our Code of Business Conduct. Each of these codes of conduct can be accessed through our website at www.conduent.com/corporate-governance. They are also available to any shareholder who requests them in writing addressed to Conduent Incorporated, 100 Campus Drive Suite 200, Florham Park, NJ 07932, Attention: Corporate Secretary. We will disclose any future amendments to, or waivers from, provisions of our Code of Business Conduct and Ethics for members of the Board and, our Code of Business Conduct and our Finance Code of Conduct for our officers on our website as promptly as practicable, and consistent with the requirements of applicable U.S. Securities and Exchange Commission (SEC) and New York Stock Exchange rules.

Seasonality

Our revenues can be affected by various factors such as our clients’ demand pattern for our services. These factors have historically resulted in higher revenues and profits in the fourth quarter.

Other

Conduent Incorporated is a New York corporation, organized in 2016. Our principal executive offices are located at 100 Campus Drive, Florham Park, New Jersey 07932. Our telephone number is (844) 663-2638.

In the Investor Information section of our Internet website, you will find our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. We make these documents available as soon as we can after we have filed them with, or furnished them to, the SEC.

Our Internet address is www.conduent.com.

ITEM 1A. RISK FACTORS

Our government contracts are subject to appropriation of funds, termination rights, audits and investigations, which, if exercised, could negatively impact our reputation and reduce our ability to compete for new contracts.

A significant portion of our revenues is derived from contracts with U.S. federal, state and local governments and their agencies, and some of our revenues are derived from contracts with foreign governments and their agencies. Government entities typically finance projects through appropriated funds. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, failures to enact appropriation legislation (e.g., a government "shut-down"), government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt or funding constraints, could result in lower governmental sales and in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Additionally, if the government discovers improper or illegal activities or contractual non-compliance (including improper billing), we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with the government. Any resulting penalties or sanctions could materially adversely affect our results of operations and financial condition. Moreover, government contracts are generally subject to audits and investigations by government agencies. If the government finds that we inappropriately charged any costs to a contract, the costs are not reimbursable or, if already reimbursed, the cost must be refunded to the government. Further, the negative publicity that could arise from any such penalties, sanctions or findings in such audits or investigations could have an adverse effect on our reputation in the industry and reduce our ability to compete for new contracts and could materially adversely affect our results of operations and financial condition.

We derive significant revenue and profit from commercial and government contracts awarded through competitive bidding processes, including renewals, which can impose substantial costs on us, and we will not achieve revenue and profit objectives if we fail to accurately and effectively bid on such projects.

Many of these contracts are extremely complex and require the investment of significant resources in order to prepare accurate bids and proposals. Competitive bidding imposes substantial costs and presents a number of risks, including: (i) the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may or may not be awarded to us; (ii) the need to estimate accurately the resources and costs that will be required to implement and service any contracts we are awarded, sometimes in advance of the final determination of their full scope and design; (iii) the expense and delay that may arise if our competitors protest or challenge awards made to us pursuant to competitive bidding and the risk that such protests or challenges could result in the requirement to resubmit bids and in the termination, reduction or modification of the awarded contracts; and (iv) the opportunity cost of not bidding on and winning other contracts we might otherwise pursue. If our competitors protest or challenge an award made to us on a government contract, the costs to defend such an award may be significant and could involve subsequent litigation that could take years to resolve.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our ability to recover capital and other investments in connection with our contracts is subject to risk.

In order to attract and retain large outsourcing contracts, we sometimes make significant capital and other investments to enable us to perform our services under those contracts, such as purchases of information technology equipment, facility costs, labor resources and costs incurred to develop and implement software. The net book value of certain assets recorded, including a portion of our intangible assets, could be impaired, and our results of operations and financial condition could be materially adversely affected in the event of the early termination of all or a part of such a contract or a reduction in volumes and services thereunder for reasons such as a customer's or client's merger or acquisition, divestiture of assets or businesses, business failure or deterioration or a customer's or client's exercise of contract termination rights.

We rely to a significant extent on third-party providers, such as subcontractors, a relatively small number of primary software vendors, utility providers and network providers; if they cannot deliver or perform as expected or if our relationships with them are terminated or otherwise change, our results of operations and financial condition could be materially adversely affected.

Our ability to service our customers and clients and deliver and implement solutions depends to a large extent on third-party providers such as subcontractors, a relatively small number of primary software vendors, software application developers, utility providers and network providers meeting their obligations to us and our expectations in a timely, quality manner. Recently, we have experienced suboptimal performance from an inherited legacy technology vendor, which has caused certain operational challenges and customer delivery performance issues that we have been aggressively addressing. Our results of operations and financial condition could be materially adversely affected and we might incur significant additional liabilities (a) if we are unable to adequately renegotiate these legacy contracts, or (b) if any of our third-party providers (1) do not meet their service level obligations, (2) do not meet our or our clients' expectations, (3) terminate or refuse to renew their relationships with us, or (4) offer their products to us with less advantageous prices and other terms than previously offered.

Failure to deliver on our contractual obligations properly and on time could materially adversely affect our results of operations and financial condition.

Our business model depends in large part on our ability to retain existing and attract new work from our base of existing clients, as well as on relationships we develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to meet those needs. In order for our business to grow, we must successfully manage the provision of services under our contracts. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client or obtain new work from other potential clients. In particular, many of our contracts with non-government clients may be terminated by the client, without cause, upon specified advance notice. Accordingly, clients who are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date, which may result in our inability to fully recover our up-front investments. In addition, clients could direct future business to our competitors. We could also trigger contractual credits to clients or a contractual default. Failure to properly transition new clients to our systems, properly budget transition costs or accurately estimate contract operational costs could result in delays in our contract performance, trigger service level penalties, impair fixed or intangible assets or result in contract profit margins that do not meet our expectations or our historical profit margins.

In addition, we incur significant expenditures for the development and construction of system software platforms needed to support our clients' needs. Our failure to fully understand client requirements or implement the appropriate operating systems or databases or solutions which enable the use of other supporting software may delay the project and result in cost overruns or potential impairment of the related software platforms, which could materially adversely affect our results of operations and financial condition.

We face significant competition and our failure to compete successfully could materially adversely affect our results of operations and financial condition.

To remain competitive, we must develop services and applications; periodically enhance our existing offerings; remain cost efficient; and attract and retain key personnel and management. If we are unable to compete successfully, we could lose market share and important customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our significant indebtedness could materially adversely affect our results of operations and financial condition.

We have and will continue to have a significant amount of debt and other obligations. Our substantial debt and other obligations could have important consequences. For example, it could (i) increase our vulnerability to general adverse economic and industry conditions; (ii) limit our ability to obtain additional financing for future working capital, capital expenditures, acquisitions and other general corporate requirements; (iii) require us to dedicate a substantial portion of our cash flows from operations to service debt and other obligations thereby reducing the availability of our cash flows from operations for other purposes; (iv) limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate; (v) place us at a competitive disadvantage compared to our competitors that have less debt; and (vi) become due and payable upon a change in control. If new debt is added to our current debt levels, these related risks could increase.

Our ability to make payments on and to refinance our indebtedness, as well as any future debt that we may incur, will depend on our ability to generate cash in the future from operations, financings or asset sales. Our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

The terms of our indebtedness may restrict our current and future operations, particularly our ability to incur debt that we may need to fund initiatives in response to changes in our business, the industries in which we operate, the economy and governmental regulations.

The terms of our indebtedness include a number of restrictive covenants that impose significant operating and financial restrictions on us and our subsidiaries and limit our ability to engage in actions that may be in our long-term best interests. These may restrict our and our subsidiaries' ability to take some or all of the following actions:

- incur or guarantee additional indebtedness or sell disqualified or preferred stock;
- pay dividends on, make distributions in respect of, repurchase or redeem, capital stock;
- make investments or acquisitions;
- sell, transfer or otherwise dispose of certain assets, including accounts receivable;
- create liens;
- enter into sale/leaseback transactions;
- enter into agreements restricting the ability to pay dividends or make other intercompany transfers;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our or our subsidiaries' assets;
- enter into transactions with affiliates;
- prepay, repurchase or redeem certain kinds of indebtedness;
- issue or sell stock of our subsidiaries; and/or
- significantly change the nature of our business.

As a result of all of these restrictions, we may be:

- limited in how we conduct our business and pursue our strategy;
- unable to raise additional debt financing to operate during general economic or business downturns; or
- unable to compete effectively or to take advantage of new business opportunities.

A breach of any of the restrictive covenants, if applicable, could result in an event of default under the terms of this indebtedness. If an event of default occurs, the lenders would have the right to accelerate the repayment of such debt and the event of default or acceleration may result in the acceleration of the repayment of any other of our debt to which a cross-default or cross-acceleration provision applies. Furthermore, the lenders of this indebtedness may require that we pledge our assets as collateral as security for our repayment obligations. If we were unable to repay any amount of this indebtedness when due and payable, the lenders could proceed against the collateral that secures this indebtedness. In the event our creditors accelerate the repayment of our borrowings, we may not have sufficient assets to repay such indebtedness, which could materially adversely affect our results of operations and financial condition.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our business is dependent on continued interest in outsourcing.

Our business and growth depend in large part on continued interest in outsourced business process services. Outsourcing means that an entity contracts with a third-party, such as us, to provide business process services rather than perform such services in-house. There can be no assurance that this interest will continue, as organizations may elect to perform such services themselves and/or the business process outsourcing industry could move to an as-a-Service model, thereby eliminating traditional business process outsourcing tasks. A significant change in this interest in outsourcing could materially adversely affect our results of operations and financial condition. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

Our profitability is dependent upon our ability to obtain adequate pricing for our services and to improve our cost structure.

Our success depends on our ability to obtain adequate pricing for our services that will provide a reasonable return to our shareholders. Depending on competitive market factors, future prices we obtain for our services may decline from previous levels. If we are unable to obtain adequate pricing for our services, it could materially adversely affect our results of operations and financial condition. In addition, our contracts are increasingly requiring tighter timelines for implementation as well as more stringent service level metrics. This makes the bidding process for new contracts much more difficult and requires us to adequately consider these requirements in the pricing of our services.

In order to meet the service requirements of our customers, which often includes 24/7 service, and to optimize our employee cost base, including our back-office support, we often locate our delivery service and back-office support centers in lower-cost locations, including several developing countries. Concentrating our centers in these locations presents a number of operational risks, many of which are beyond our control, including the risks of political instability, natural disasters, safety and security risks, labor disruptions, excessive employee turnover and rising labor rates. Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of such centers outside of the United States could materially adversely affect our results of operations and financial condition. These risks could impair our ability to effectively provide services to our customers and keep our costs aligned to our associated revenues and market requirements.

Our ability to sustain and improve profit margins is dependent on a number of factors, including our ability to continue to improve the cost efficiency of our operations through such programs as robotic process automation, to absorb the level of pricing pressures on our services through cost improvements and to successfully complete information technology initiatives. If any of these factors adversely materialize or if we are unable to achieve and maintain productivity improvements through restructuring actions or information technology initiatives, our ability to offset labor cost inflation and competitive price pressures would be impaired, each of which could materially adversely affect our results of operations and financial condition.

We may be subject to claims of infringement of third-party intellectual property rights which could adversely affect our results of operation and financial condition.

We rely heavily on the use of intellectual property. We do not own all of the software that we use to run our business; instead we license this software from a small number of primary vendors. If these vendors assert claims that we or our clients are infringing on their software or related intellectual property, we could incur substantial costs to defend these claims, which could materially adversely affect our results of operations and financial condition. In addition, if any of our vendors' infringement claims are ultimately successful, our vendors could require us to (i) cease selling or using products or services that incorporate the challenged software or technology, (ii) obtain a license or additional licenses from our vendors or (iii) redesign our services which rely on the challenged software or technology. In addition, we may be exposed to claims for monetary damages. If we are unsuccessful in defending an infringement claim and our vendors require us to initiate any of the above actions, or we are required to pay monetary damages, then such actions could materially adversely affect our results of operations and financial condition.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

We are subject to laws of the United States and foreign jurisdictions relating to individually identifiable information and personal health information, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and negatively impact our operations.

We receive, process, transmit and store information relating to identifiable individuals, both in our role as a service provider and as an employer. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations designed to protect both individually identifiable information as well as personal health information, including the Health Insurance Portability and Accountability Act of 1996, as amended ("HIPAA") and the HIPAA regulations governing, among other things, the privacy, security and electronic transmission of individually identifiable health information, and the European Union Directive on Data Protection (Directive 95/46/EC). The EU General Data Protection Regulation (GDPR) replaced the Data Protection Directive 95/46/EC (with an enforcement date of May 25, 2018) and is designed to harmonize data privacy laws across Europe, to protect and empower all EU citizens data privacy, to reshape the way organizations across the region approach data privacy and will have a significant impact on how we process and handle certain data. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of individually identifiable information. These laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. For example, the invalidation of the U.S.-EU Safe Harbor regime and the GDPR have required us to implement alternative mechanisms in order for some of our data flows from Europe to the United States to comply with applicable law. Changes to existing laws, the introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to obtain and process information and allegations by our customers and clients that we have not performed our contractual obligations, any of which could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and materially adversely affect our results of operations and financial condition.

We process, support and execute financial transactions, and disburse funds, on behalf of both government and commercial customers, often in partnership with financial institutions. This activity includes receiving debit and credit card information, processing payments for and due to our customers and disbursing funds on payment or debit cards to payees of our customers. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations, including the Electronic Fund Transfer Act, as amended, the Currency and Foreign Transactions Reporting Act of 1970 (commonly known as the Bank Secrecy Act), as amended, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (including the so-called Durbin Amendment), as amended, the Gramm-Leach-Bliley Act (also known as the Financial Modernization Act of 1999), as amended, and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of certain financial transactions and related support services. These laws are subject to frequent changes, and new statutes and regulations in this area may be enacted at any time. Changes to existing laws, the introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process and support financial transactions and allegations by our customers, partners and clients that we have not performed our contractual obligations. Any of these could materially adversely affect our results of operations and financial condition.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our data systems, information systems and network infrastructure may be subject to hacking or other cybersecurity threats and other service interruptions, which could expose us to liability, impair our reputation or temporarily render us unable to fulfill our service obligations under our contracts.

We are a leading provider of business processing services concentrated in transaction-intensive processing, analytics and automation. We act as a trusted business partner in both front office and back office platforms, providing interactions on a substantial scale with our customers and other third-parties. Our customers include global commercial clients and government clients who depend upon our operational efficiency, non-interruption of service, and accuracy and security of information. We also use third-party providers such as subcontractors, software vendors, utility providers and network providers, upon whom we rely for our business processing services, to deliver uninterrupted, secure service. As part of our business processing services we also develop system software platforms necessary to support our customers' needs, with significant ongoing investment in developing and operating customer-appropriate operating systems, data bases and system software solutions. We also receive, process, transmit and store substantial volumes of information relating to identifiable individuals, both in our role as a service provider and as an employer, and we are subject to numerous laws, rules and regulations in the United States (both federal and state) and foreign jurisdictions designed to protect both individually identifiable information as well as personal health information. We also receive, process and implement financial transactions, and disburse funds, on behalf of both commercial and government customers, which activity includes receiving debit and credit card information to process payments due to our customers as well as disbursing funds to payees of our customers. As a result of these and other business processing services, the integrity, security, accuracy and non-interruption of our systems and information technology and that of our third-party providers and our interfaces with our customers are extremely important to our business, operating results, growth, prospects and reputation.

We have implemented security systems and controls, both directly and with third-party subcontractors and service providers, with the intent of maintaining both the physical security of our facilities and the data security of our customers', clients' and suppliers' confidential information and information related to identifiable individuals (including payment card and debit and credit card information and health information) against unauthorized access through our information systems or by other electronic transmission or through the misdirection, theft or loss of physical media. These include, for example, the appropriate encryption of information. Despite such efforts, we are susceptible to breach of security systems which may result in unauthorized access to our facilities and those of our customers and/or the information we and our customers are trying to protect. Cybersecurity failure might be caused by computer hacking, malware, computer viruses, worms and other destructive software, "cyber-attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Operational or business delays may also result from the disruption of network or information systems and subsequent remediation activities.

Because the techniques used to obtain unauthorized access are constantly changing and becoming increasingly more sophisticated and often are not recognized until launched against a target, we or our third-party service providers may be unable to anticipate these techniques or implement sufficient preventative measures. Hacking, malware, phishing, viruses and other "cyber-attacks" have become more prevalent, have occurred in our systems in the past, and may occur in our systems in the future. Although we have implemented and intend to continue to implement what we believe to be appropriate cyber practices and cybersecurity systems, these systems may prove to be inadequate and result in the disruption, failure, misappropriation or corruption of our network and information systems. Notwithstanding the preventative and protective measures we have in place, it may not be possible for us to fully or timely know if or when such incidents arise, or the full business impact of any cybersecurity breach.

Additionally, with advances in computer capabilities and data protection requirements to address ongoing threats, we may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by security breaches. Moreover, employee error or malfeasance, faulty password management or other irregularities may result in a defeat of our or our third-party service providers' security measures and a breach of our or our third-party service providers' information systems (whether digital, cloud-based or otherwise).

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

If unauthorized parties gain physical access to one of our or one of our third-party service providers' facilities or electronic access to our or one of our third-party service providers' information systems or such sensitive or confidential information is misdirected, lost or stolen during transmission or transport, any theft or misuse of such information could result in, among other things, unfavorable publicity and significant damage to our brand, governmental inquiry, oversight and possible regulatory action, difficulty in marketing our services, loss of existing and potential customers, allegations by our customers that we have not performed our contractual obligations, litigation by affected parties and possible financial obligations for substantial damages related to the theft or misuse of such information, any of which could materially adversely affect our results of operations and financial condition. Moreover, a security breach could require us to devote significant management resources to address the problems created by the security breach and to expend significant additional resources to upgrade further the security measures that we employ to guard such personal information against "cyber-attacks" and to maintain various systems and data centers for our customers. Often these systems and data centers must be maintained worldwide and on a 24/7 basis. Although we endeavor to ensure that there is adequate backup and maintenance of these systems and centers, we could experience service interruptions that could result in curtailed operations and loss of existing and potential customers, which could significantly reduce our revenues and profits in addition to significantly impairing our reputation. If our information systems and our back-up systems are damaged, breached or cease to function properly, we may have to make a significant investment to repair or replace them, and we may suffer interruptions in our operations in the interim, each of which could materially adversely affect our results of operations and financial condition and diminish the value of our shares.

In addition, our and our customers' systems and networks are subject to continued threats of terrorism, which could disrupt our operations as well as disrupt the utilities and telecommunications infrastructure on which our business depends. To the extent any such disruptions were to occur, our business, operating results and financial condition could be materially adversely affected.

If we underestimate the scope of work or the costs of performance in our contracts, or we mis-perform our contracts, our results of operations and financial condition could be materially adversely affected.

In order to stay competitive in our industry, we must keep pace with changing technologies and customer preferences. Many of our contracts require us to design, develop and implement new technological and operating systems for our customers. Many of these systems involve detailed and complex computer source code which must be created and integrated into a working system that meets contract specifications. The accounting for these contracts requires judgment relative to assessing risks, estimating contract revenues and costs and making assumptions for schedule and technical issues. To varying degrees, each contract type involves some risk that we could underestimate the costs and resources necessary to fulfill the contract. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances has resulted, in reduced profits or in losses. In addition, many of our contracts contain complicated performance obligations, including, without limitation, designing and building new integrated computer systems. These contracts carry potential financial penalties or could result in financial damages or exposures if we fail to properly perform those obligations and could result in our results of operations and financial condition being materially adversely affected.

Our continuing emphasis and shift toward technology-led digital transactions, rather than more labor intensive commoditized services, could impact our type and timing of the customer contracts that we enter into, particularly in the short-term.

We have made the strategic decision to increase our focus on technology-led digital transactions and focus less on historic labor-intensive commoditized services and customer contracts. We believe technology-led digital transactions are becoming, and will become, the type of services required by many of our customers and those in the industry. We believe that our continuing focus on digital transactions will better create long-term value and increased profitability. However, this increased emphasis on technology-led digital transactions has resulted in and will continue to result in our exiting certain services and contracts, and could adversely impact our revenues and our results of operations, particularly in the short-term.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our customers' decision-making cycles are changing and the lead time for customers to commit to contracts with us has been lengthening.

As our services industry and our service offerings change and evolve, particularly with our customers increasing their focus on digital offerings, our customers are spending increased time and resources evaluating technology and other investments needed to obtain optimal results and performance, including from their outsourcing providers including the Company. This has led to longer sales lead time cycles for contract commitments from our customers, which can adversely affect the timing of customer commitments and our revenues and results of operations.

If we are unable to collect our receivables for unbilled services, our results of operations and financial condition could be materially adversely affected.

The profitability of certain of our large contracts depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. Actual losses on client balances could differ from current estimates and, as a result, may require adjustment of our receivables for unbilled services. Our receivables include long-term contracts. Over the course of a long-term contract, our customers' financial condition may change such that their ability to pay their obligations, and our ability to collect our fees for services rendered, is adversely affected. Additionally, we may perform work for the federal, state and local governments, with respect to which we must file requests for equitable adjustment or claims with the proper agency to seek recovery in whole or in part, for out-of-scope work directed or caused by the government customer in support of its project, and the amounts of such recoveries may not meet our expectations or cover our costs. Timely collection of client balances also depends on our ability to complete our contractual commitments (such as, our ability to achieve specified milestones in percentage-of-completion contracts) and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our results of operations and financial condition could be materially adversely affected.

A decline in revenues from or a loss or failure of significant clients could materially adversely affect our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by the loss or failure of significant clients. Some of our clients are in business sectors which have experienced significant financial difficulties or consolidation, and/or the reduction of volumes or their inability to make payments to us, as a result of, among other things, their merger or acquisition, divestiture of assets or businesses, contract expiration, nonrenewal or early termination (including termination for convenience) or business or financial failure or deterioration. Economic and political conditions could affect our clients' businesses and the markets they serve.

We have non-recurring revenue, which subjects us to a risk that our revenues and cash flows from operations may fluctuate from period to period.

Revenue generated from our non-recurring services may fluctuate due to factors both within and outside of our control. Our mix of non-recurring and recurring revenues is impacted by acquisitions as well as growth in our non-recurring lines of business, as well as our strategic decisions to exit or reduce our services in particular service areas. There is less predictability and certainty in the timing and amount of revenues generated by our non-recurring services and, accordingly, our results of operations and financial condition could be materially adversely affected by the timing and amount of revenues generated from our non-recurring services.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The failure to obtain or maintain a satisfactory credit rating could adversely affect our liquidity, capital position, borrowing costs, access to capital markets and ability to post surety or performance bonds to support clients' contracts.

Any future downgrades to our credit rating could negatively impact our ability to renew contracts with our existing clients, limit our ability to compete for new clients, result in increased premiums for surety or performance bonds to support our clients' contracts and/or result in a requirement that we provide collateral to secure our surety or performance bonds. Further, certain of our commercial outsourcing contracts provide that, in the event our credit ratings are downgraded to specified levels, the client may elect to terminate its contract with us and either pay a reduced termination fee or, in some limited instances, no termination fee. Such a credit rating downgrade could adversely affect these client relationships.

There can be no assurance that we will be able to maintain our credit ratings. Any additional actual or anticipated downgrades of our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position and access to capital markets.

A failure to attract and retain necessary technical personnel and qualified subcontractors could materially adversely affect our results of operations and financial condition.

Because we operate in intensely competitive markets, our success depends to a significant extent upon our ability to attract, retain and motivate highly skilled and qualified technical personnel and to subcontract with qualified, competent subcontractors. If we fail to attract, train and retain sufficient numbers of qualified engineers, technical staff and sales and marketing representatives or are unable to contract with qualified, competent subcontractors, our results of operations and financial condition could be materially adversely affected. Experienced and capable personnel in the services industry remain in high demand, and there is continual competition for their talents. Our ability to renegotiate certain of our legacy third-party contracts which we view as unfavorable, or to improve the service levels we expect from these contracts and third-party providers, is key to our ability to timely, efficiently and profitably deliver our services to our customers. Additionally, we may be required to increase our hiring in geographic areas outside of the United States, which could subject us to increased geopolitical and exchange rate risk. The loss of any key technical employee, the loss of a key subcontractor relationship or our inability to renegotiate or obtain required service levels from legacy and other third-party providers, could materially adversely affect our results of operations and financial condition.

Increases in the cost of telephone and data services or significant interruptions in such services could materially adversely affect our results of operations and financial condition.

Our business is significantly dependent on telephone and data service provided by various local and long distance telephone and data service providers around the world. Accordingly, any disruption of these services could materially adversely affect our results of operations and financial condition. We have taken steps to mitigate our exposure to service disruptions by investing in redundant circuits, although there is no assurance that the redundant circuits would not also suffer disruption. Any inability to obtain telephone or data services at favorable rates could materially adversely affect our results of operations and financial condition. Where possible, we have entered into long-term contracts with various providers to mitigate short-term rate increases and fluctuations. There is no obligation, however, for the vendors to renew their contracts with us, or to offer the same or lower rates in the future, and such contracts are subject to termination or modification for various reasons outside of our control. A significant increase in the cost of telephone or data services that is not recoverable through an increase in the price of our services could materially adversely affect our results of operations and financial condition. In addition, a number of our facilities are located in jurisdictions outside of the United States where the provision of utility services, including electricity and water, may not be consistently reliable, and while there are backup systems in many of our operating facilities, an extended outage of utility or network services could materially adversely affect our results of operations and financial condition.

Past financial performance is no guarantee of future results.

If we fail to successfully develop new service offerings, including new technology components, and protect our intellectual property rights, we may be unable to retain current customers and gain new customers and our revenues would decline.

The process of developing new service offerings, including new technology components, is inherently complex and uncertain. It requires accurate anticipation of customers' changing needs and emerging technological trends. We must make long-term investments and commit significant resources before knowing whether these investments will eventually result in service offerings that achieve customer acceptance and generate the revenues required to provide desired returns. For example, establishing internal automation processes to help us develop new service offerings will require significant up-front costs and resources, which, if not monetized effectively, could materially adversely affect our revenues. In addition, some of our service offerings rely on technologies developed by and licensed from third-parties. We may not be able to obtain or continue to obtain licenses and technologies from these third-parties at all or on reasonable terms, or such third-parties may demand cross-licenses to our intellectual property. It is also possible that our intellectual property rights could be challenged, invalidated or circumvented, allowing others to use our intellectual property to our competitive detriment. We also must ensure that all of our service offerings comply with both existing and newly enacted regulatory requirements in the countries in which they are sold. If we fail to accurately anticipate and meet our customers' needs through the development of new service offerings (including technology components) or if we fail to adequately protect our intellectual property rights or if our new service offerings are not widely accepted or if our current or future service offerings fail to meet applicable worldwide regulatory requirements, we could lose market share and customers to our competitors and that could materially adversely affect our results of operations and financial condition.

The Company's business, operating results and reputation may be negatively impacted by failures or delays in our efforts to modernize our information technology infrastructure and to consolidate to fewer data centers.

We have experienced certain disruptions in our operations and service delivery performance issues as a result of some of our information technology infrastructure that is outdated and needs to be enhanced and updated, which disruptions have adversely impacted client and delivery performance. As a result we are investing in modernizing a significant portion of our information technology infrastructure with new systems and processes and consolidating our data centers as part of our transformation initiatives. This also includes investments in our data center and networks, enhancement, modernization and consolidation of our IT infrastructure and customer-facing technologies, enhanced cybersecurity and movement to cloud-based technology. We expect that these changes will provide greater strategic and operational flexibility and efficiency and better control of our systems and processes. There is a risk, however, that our modernization efforts and data center consolidations could materially and adversely disrupt our operations and our service delivery to customers, could result in contractual penalties or damage claims from customers, could occur over a period longer than planned, and could require greater than expected investment and other internal and external resources. It may also take longer to realize the intended favorable benefits from an enhanced technology infrastructure than we expected, or that disruptions may continue to occur while we enhance this infrastructure.

The process of consolidating our data center involves inherent risks and may cause disruptions to our operations. In October 2018, we suffered a significant outage as a result of a data center migration, which resulted in unplanned system unavailability and disruption for our customers. We plan to undertake several data center migrations in the future and, in the course of these data migrations, could potentially experience significant service outages. Future service disruptions could hinder our ability to attract new customers, cause us to incur legal liability, contractual penalties or issue service credits to our customers and cause us to lose current customers, each of which could have a material adverse effect on our business, financial condition and results of operations.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

If we fail to meet industry data security standards, our ability to meet contractual obligations may be impaired and result in contractual damage or contract breach claims.

In some of our services lines, we are contractually subject to industry data security standards. These industry data security standards include Card Brand (Visa, Mastercard, American Express, Discover and JCB) operating rules, certification requirements and rules governing electronic funds transfers, including Payment Card Industry Data Security Standard (PCI DSS), a data security standard applicable to companies that collect, store or transmit payment card data. These standards also include the Health Information Trust Alliance (HITRUST) which applies to aspects of the healthcare industry and components of which is being used in other industries as well. While we are taking steps to achieve future compliance and/or certification for our systems, we may not be compliant now, and in the future we may not be able to maintain compliance with PCI DSS, HITRUST and other applicable industry standards. We are taking steps to achieve compliance and/or certification for our systems, but we cannot assure that these efforts will be successful in the time period required or at all. Any failure to comply fully or materially with PCI DSS, HITRUST and other applicable industry standards now or at any point in the future may provide customers the right to terminate contracts with us or to enforce provisions obligating us to reimburse them for any penalties or costs incurred by them as a result of our non-compliance, or subject us to other fines, penalties, damages or civil liability, each of which could have a material adverse effect on our business, financial condition and results of operations. In addition, failure to meet PCI DSS standards could result in the loss of our ability to accept credit card payments and the failure to meet HITRUST standards could impact our ability to service customers in the healthcare and other industries, both of which could have a material adverse impact on our business, financial condition and results of operations.

We are a holding company and, therefore, may not be able to receive dividends or other payments in needed amounts from our subsidiaries.

Our principal assets are the shares of capital stock and indebtedness of our subsidiaries. We rely on dividends, interest and other payments from these subsidiaries to meet our obligations for paying principal and interest on outstanding debt obligations, paying corporate expenses and, if determined by our Board, paying dividends to shareholders and repurchasing common shares. Certain of our subsidiaries are subject to regulatory requirements of the jurisdictions in which they operate or other restrictions that may limit the amounts that these subsidiaries can pay in dividends or other payments to us. No assurance can be given that there will not be further changes in law, regulatory actions or other circumstances that could restrict the ability of our subsidiaries to pay dividends to us. In addition, due to differences in tax rates, repatriation of funds from certain countries into the United States could have unfavorable tax ramifications for us.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Our results of operations and financial condition could be materially adversely affected by legal and regulatory matters.

We are potentially subject to various contingent liabilities that are not reflected on our balance sheet, including those arising as a result of being involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental and non-governmental entity contracting, servicing and governmental entity procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act of 1974 (ERISA); and other laws, regulations and contractual undertakings, as discussed under Note 14 – Contingencies and Litigation in our Consolidated Financial Statements. If developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual or materially increase an existing accrual, or if any of these matters result in an adverse judgment or are settled for significant amounts above any existing accruals, it could materially adversely affect our results of operations and financial condition in the period or periods in which such change in determination, judgment or settlement occurs. There can be no assurances as to the favorable outcome of any claim, lawsuit, investigation or proceeding. It is possible that a resolution of one or more such proceedings, through judgment, settlement or otherwise, could require us to make substantial payments to satisfy judgments, fines or penalties or settlement amounts, any of which could materially adversely affect our results of operations and financial condition. Additionally, the terms of dismissal, settlement, release or other resolution may permit certain claims to be reopened under certain conditions. For example, we entered into an agreement with the State of Texas and the Texas Health and Human Services Commission to settle all claims resulting from alleged failures by Conduent State Healthcare LLC and Texas Medicaid & Healthcare Partnership to properly perform obligations under two contracts entered into with the Texas Health and Human Services Commission in 2003 and 2010. The settlement amount is $236 million, which is payable in installments in 2019, 2020 and 2021; however, the settlement agreement does not prevent the Company from prepaying the entire amount. Pursuant to that agreement, the release of the State of Texas's claims is not effective until the Company pays the settlement amount in full. Accordingly, if the Company fails to make any of the required installment payments, the State of Texas has the right to reopen the claims and move forward with the litigation. Claims, lawsuits investigations and proceedings involving the Company could also result in reputational harm, criminal sanctions, consent decrees or orders preventing us from offering certain services, requiring a change in our business practices in costly ways or requiring development of non-infringing or otherwise altered products or technologies. In addition, it can be very costly to defend litigation and these costs could materially adversely affect our results of operations and financial condition. See Note 14 – Contingencies and Litigation to our Consolidated Financial Statements.

Our results of operations and financial condition may be materially adversely affected by conditions abroad, including local economics, political environments, fluctuating foreign currencies and shifting regulatory schemes.

A portion of our revenues is generated from operations outside the United States. In addition, we maintain significant operations outside the United States. Our results of operations and financial condition could be materially adversely affected by changes in foreign currency exchange rates, as well as by a number of other factors, including, without limitation, changes in economic conditions from country to country, changes in a country's political conditions, trade controls and protection measures, financial sanctions, licensing requirements, local tax issues, capitalization and other related legal matters. The ultimate manner in which Great Britain withdraws from the European Union, and the resulting impact on cross-border transactions and operations between Great Britain and the European Union member states, could materially and adversely affect our operations and financial condition. We generally hedge foreign currency denominated assets, liabilities and anticipated transactions primarily through the use of currency derivative contracts. The use of derivative contracts is intended to mitigate or reduce transactional level volatility in the results of foreign operations, but does not completely eliminate volatility. We do not hedge the translation effect of international revenues and expenses, which are denominated in currencies other than our U.S. parent functional currency, within our Consolidated Financial Statements. If we are unable to effectively hedge these risks, our results of operations and financial condition could be materially adversely affected.

Risks related to the spin-off:

We may be unable to achieve some or all of the benefits that we expect to achieve from the spin-off.

We believe that, as an independent, publicly traded company, we will be able to, among other things, design and implement corporate strategies and policies that are targeted to our business, better focus our financial and operational resources on our specific business, create effective incentives for our management and employees that are more closely tied to our business performance, provide investors more flexibility and enable us to achieve alignment with a more natural shareholder base and implement and maintain a capital structure designed to meet our specific needs. However, as a result of separating from Xerox, we may be more susceptible to market fluctuations and other adverse events. As an independent entity, we have an arm's-length relationship with Xerox and we may not be able to obtain supplies from Xerox on terms as favorable to us as those we had as a wholly owned subsidiary of Xerox prior to the spin-off. As a smaller, independent company, Conduent has a narrower business focus and may be more vulnerable to changing market conditions as well as the risk of takeover by third parties. In addition, we may be unable to achieve some or all of the benefits that we expected to achieve as an independent company in the time we expect, if at all. Furthermore, Xerox used to guarantee our and our subsidiaries' performance under certain services contracts and real estate leases. Following the spin-off, we expect that Conduent will provide such performance guarantees, and we may be unable to retain or renew contracts or real estate leases or a failure to renew such contracts or leases on favorable terms and conditions could materially adversely affect our results of operations and financial condition. If we fail to achieve some or all of the benefits that we expected to achieve as an independent company, or do not achieve them in the time we expect, our results of operations and financial condition could be materially adversely affected.

We may be unable to make, on a timely or cost-effective basis, the changes necessary to operate as an independent, publicly traded company, and we may experience increased costs after the spin-off.

We had historically operated as part of Xerox's corporate organization, and Xerox had provided us with various corporate functions. Following the spin-off, Xerox has no obligation to provide us with assistance other than the transition services described under "Certain Relationships and Related Party Transactions -Transition Services Agreement." These services do not include every service that we have received from Xerox in the past, and Xerox is only obligated to provide these services for limited periods following completion of the spin-off. Accordingly, following the spin-off, we have needed to provide internally or obtain from unaffiliated third parties the services we had received from Xerox. These services include senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services, the effective and appropriate performance of which are critical to our operations. We may be unable to replace these services on terms and conditions as favorable as those we received from Xerox. Because our business had operated as part of the wider Xerox organization, we may incur additional costs that could adversely affect our business. If we fail to obtain the quality of services necessary to operate effectively or incur greater costs in obtaining these services, our results of operations and financial condition could be materially adversely affected.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

We have no recent operating history as an independent, publicly traded company, and our historical and pro forma financial data are not necessarily representative of the results we would have achieved as an independent, publicly traded company and may not be a reliable indicator of our future results.

We derived certain of the historical financial data included in this Annual Report from Xerox's consolidated financial statements, and this data does not necessarily reflect the results of operations and financial condition we would have achieved as an independent, publicly traded company during the periods presented, or those that we will achieve in the future. This is primarily because of the following factors:

- Prior to the spin-off, we operated as part of Xerox's broader corporate organization and Xerox performed various corporate functions for us, including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services. Our historical financial data reflect allocations of corporate expenses from Xerox for these and similar functions. These allocations may not reflect the costs we have incurred and in the future will incur for similar services as an independent, publicly traded company.
- We entered into transactions with Xerox that did not exist prior to the spin-off, such as Xerox's provision of transition services, which will cause us to incur new costs.
- Such historical financial data does not and in the future may not reflect changes that we have experienced and expect to experience in the future as a result of our separation from Xerox. As part of Xerox, we enjoyed certain benefits from Xerox's operating diversity, size, purchasing power, credit rating, borrowing leverage and available capital for investments. Many of our services contracts, particularly those for our transportation service offerings in our Public Sector business, require significant capital investments, and after the spin-off, we may not have access to the capital (from both internal and external sources) necessary to fund these services contracts. As an independent entity, we may be unable to purchase goods, services and technologies, such as insurance and health care benefits and computer software licenses, or access capital markets on terms as favorable to us as those we obtained as part of Xerox prior to the spin-off

Following the spin-off, we are now responsible for the additional costs associated with being an independent, publicly traded company, including costs related to corporate governance, investor and public relations and public reporting. For additional information about our past financial performance and the basis of presentation of our financial statements, see "Selected Historical Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical financial statements and the notes thereto included in this annual report on Form 10-K.

We may have been able to receive better terms from unaffiliated third parties than the terms we receive in our agreements with Xerox.

We entered into agreements with Xerox related to our separation from Xerox, including the Separation and Distribution Agreement, Transition Services Agreement, Tax Matters Agreement, Employee Matters Agreement and any other agreements, while we were still part of Xerox. Accordingly, these agreements may not reflect terms that would have resulted from arm's-length negotiations among unaffiliated third parties. The terms of these agreements relate to, among other things, allocations of assets, liabilities, rights, indemnifications and other obligations between Xerox and us. We may have received better terms from third parties. See "Certain Relationships and Related Party Transactions-Agreements with Xerox."

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The spin-off could result in significant tax liability to Xerox and its shareholders.

Completion of the spin-off required Xerox's receipt of a written opinion of Cravath, Swaine & Moore LLP to the effect that the Distribution should qualify for non-recognition of gain and loss under Section 355 of the Internal Revenue Code (the "Code") and the receipt and continuing effectiveness and validity of the IRS Ruling.

The opinion of counsel did not address any U.S. state or local or foreign tax consequences of the spin-off. The opinion assumed that the spin-off was completed according to the terms of the Separation and Distribution Agreement and relied on the facts as stated in the Separation and Distribution Agreement, the Tax Matters Agreement, the other ancillary agreements, the Information Statement included in our registration statement on Form 10 and a number of other documents. In addition, the opinion was based on certain representations as to factual matters from, and certain covenants by, Xerox and us. The opinion cannot be relied on if any of the assumptions, representations or covenants are incorrect, incomplete or inaccurate or are violated in any material respect.

Xerox received an IRS ruling in connection with the spin-off (the "IRS Ruling"). The IRS Ruling relies on certain facts, assumptions, representations and undertakings from Xerox and us regarding the past and future conduct of Xerox's and our businesses and other matters. If any of these facts, assumptions, representations or undertakings is incorrect or not otherwise satisfied, Xerox may not be able to rely on the IRS Ruling. In addition, the IRS Ruling is not a comprehensive ruling from the IRS regarding all aspects of the U.S. federal income tax consequences of the transactions.

Accordingly, notwithstanding the opinion of counsel and the IRS Ruling, there can be no assurance that the IRS will not assert, or that a court would not sustain, a contrary position.

If the distribution in connection with the spin-off were determined not to qualify for non-recognition of gain and loss for U.S. federal income tax purposes, U.S. holders who received our common stock could be subject to tax. In this case, each U.S. holder who received our common stock in the distribution would generally, for U.S. federal income tax purposes, be treated as having received a distribution in an amount equal to the fair market value of our common stock received, which would generally result in (i) a taxable dividend to the U.S. holder to the extent of that U.S. holder's pro rata share of Xerox's current and accumulated earnings and profits; (ii) a reduction in the U.S. holder's basis (but not below zero) in Xerox common stock to the extent the amount received exceeds the shareholder's share of Xerox's earnings and profits; and (iii) a taxable gain from the exchange of Xerox common stock to the extent the amount received exceeds the sum of the U.S. holder's share of Xerox's earnings and profits and the U.S. holder's basis in its Xerox common stock.

We could have an indemnification obligation to Xerox if the Distribution were determined not to qualify for non-recognition treatment, which could materially adversely affect our results of operations and financial condition.

If it were determined that the distribution in connection with the spin-off did not qualify for non-recognition of gain and loss under Section 355 of the Code, we could, under certain circumstances, be required to indemnify Xerox for the resulting taxes and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

In addition, Section 355(e) of the Code generally creates a presumption that the distribution would be taxable to Xerox, but not to shareholders, if we or our shareholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the distribution, unless it were established that such transactions and the distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the distribution were taxable to Xerox due to such a 50% or greater change in ownership of our stock, Xerox would recognize gain equal to the excess of the fair market value of our common stock distributed to Xerox shareholders over Xerox's tax basis in our common stock and we generally would be required to indemnify Xerox for the tax on such gain and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

We agreed to numerous restrictions to preserve the non-recognition treatment of the Distribution, which may reduce our strategic and operating flexibility.

We agreed in the Tax Matters Agreement to covenants and indemnification obligations that address compliance with Section 355 of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic transactions or engage in new businesses or other transactions that may otherwise maximize the value of our business, and might discourage or delay a strategic transaction that our shareholders may consider favorable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We lease and own numerous facilities worldwide with larger concentrations of space in Kentucky, New Jersey, California, Mexico, Guatemala, the Philippines, Jamaica, Romania and India. Our owned and leased facilities house general offices, sales offices, service locations, call centers and distribution centers. The size of our property portfolio as of December 31, 2018 was approximately 8.2 million square feet at an annual operating cost (lease costs and expenses) of approximately $217 million and comprised 260 leased properties and 6 owned properties. We believe that our current facilities are suitable and adequate for our current businesses. Because of the interrelation of our business segments, each of the segments uses substantially all of these properties at least in part.

In addition to the 8.2 million square feet of our real estate property portfolio, we also had 1.4 million square feet of our leased and owned properties that became surplus in 2018 due to the implementation of our strategic transformation program as well as various productivity initiatives to consolidate our real estate footprint. We aggressively managed our surplus properties through early terminations and subleasing of leased properties and the sale of owned properties. As a result, approximately 1.0 million square feet of the surplus property portfolio were resolved as of December 31, 2018. Additional leased and owned properties may become surplus over the next three years as we continue the strategic transformation program. We are obligated to maintain our leased surplus properties through required contractual lease periods and plan to dispose of or sublease these properties.

ITEM 3. LEGAL PROCEEDINGS

The information set forth under Note 14 – Contingencies and Litigation in the Consolidated Financial Statements in Part II, Item 8 is incorporated herein by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated. This MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes. This MD&A provides additional information about our operations, current developments, financial condition, cash flows and results of operations.

Throughout the MD&A, we refer to various notes to our Consolidated Financial Statements which appear in Item 8 of this 2018 Form 10-K, and the information contained in such notes is incorporated by reference into the MD&A in the places where such references are made.

Overview

With revenues of $5.4 billion, we are a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience.

Headquartered in Florham Park, New Jersey, we have a team of approximately 82,000 people as of December 31, 2018, servicing customers in 26 countries. In 2018, 12% of our revenue was generated outside the U.S.

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

- **Commercial Industries -** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include transaction processing, end-user engagement, human resource management, omni-channel communications and finance and accounting services.
- **Government Services -** Our Government Services sector provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.
- **Transportation -** Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Significant 2018 Actions

Dispositions

In 2018, we completed divestitures of: (1) our Commercial Vehicle Operations business; (2) our off-street parking business; (3) our U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the United Kingdom; and (4) our local and municipal constituent government software solutions business. The aggregate proceeds for these divestitures was $703 million in cash. The businesses sold represented $304 million and $500 million of 2018 and 2017 revenue, respectively. We recorded a pre-tax gain of $78 million on these divestitures for the year ended December 31, 2018.

Significant 2017 Actions

Dispositions

In 2017, we completed divestitures of: (1) our Firehouse business and suite of emergency records management products used by fire departments across the country for their incident reporting and Emergency Management System information and records management; (2) our healthcare provider consulting services business, which advises healthcare organizations on IT application optimization; (3) the Breakaway Group business, which provides advisory project services to assist healthcare organizations optimize their health IT applications; (4) the mobile device management business of Wireless Data Services Limited; and (5) the Global Mobility business. The aggregate proceeds for these divestitures was $56 million in cash. The businesses sold represented $60 million and $82 million of 2017 and 2016 revenue, respectively. We recorded a pre-tax gain of $16 million on these divestitures for the year ended December 31, 2017.

In addition, in 2017, we sold a property located in Dallas, Texas, which was formerly the Affiliated Computer Services (ACS) headquarters, for a pre-tax gain of $24 million. This was part of our effort to consolidate our real estate footprint.

Health Enterprise Settlement

On November 28, 2017, we entered into a definitive settlement agreement with the State of New York regarding resolution of the HE platform project. Under the terms of the settlement: (1) our contract with the State of New York terminated effective December 15, 2017 and we were released from all liabilities and obligations in connection with the contract at such time; and (2) paid or incurred costs on behalf of, the State of New York in the amount of approximately $20 million. As we have previously reserved this amount, we incurred no additional charges as a result of the settlement.

Significant 2016 Actions

Separation

On December 31, 2016, Conduent Incorporated spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement. The separation was completed by way of a pro rata distribution of Conduent Incorporated shares held by Xerox to Xerox's shareholders. As a result of the spin-off we operate as an independent, publicly traded company on the New York Stock Exchange under the ticker "CNDT".

Goodwill Impairment Charge

Our Commercial Industries reporting units operating results declined in 2016 versus our expectations, including a weak fourth quarter 2016. In performing our annual impairment test during the fourth quarter of 2016, we determined that the carrying value of the Commercial Industries reporting unit exceeded its fair value by 53%, which resulted in a goodwill impairment of $935 million. This has been presented as Goodwill impairment, a separate line item in the Consolidated Statements of Income (Loss). Refer to Note 6 – Goodwill and Intangible Assets, Net, in the Consolidated Financial Statements for additional information.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Health Enterprise Charge

In February 2017, we determined that it was not probable that the New York Medicaid Management Information System (NY MMIS) project would be completed. As a result of this determination, we recorded a pre-tax charge (NY MMIS charge) of $161 million ($98 million after-tax) in the fourth quarter of 2016. The charge included $83 million for the write-off of contract receivables which were recorded as a reduction of revenue and $78 million recorded in Cost of services including $36 million for wind-down costs, $28 million related to the non-cash charge for the impairment of software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements and notes thereto. In preparing our Consolidated Financial Statements, we have made our best estimates and judgments of certain amounts included in the Consolidated Financial Statements giving due consideration to materiality. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Senior management has discussed the development and selection of the critical accounting policies, estimates and related disclosures included herein with the Audit Committee of the Board of Directors. We consider these as critical to understanding our Consolidated Financial Statements, as their application places the most significant demands on management's judgment, since financial reporting results rely on estimates of the effects of matters that are inherently uncertain. In instances where different estimates could have reasonably been used, we disclose the impact of these different estimates on our operations. In certain instances, the accounting rules are prescriptive; therefore, it would not have been possible to reasonably use different estimates. Changes in assumptions and estimates are reflected in the period in which they occur. The impact of such changes could be material to our results of operations and financial condition in any quarterly or annual period.

Specific risks associated with these critical accounting policies are discussed throughout the MD&A, where such policies affect our reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements.

Revenue Recognition

Application of the accounting principles in U.S. GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies — Revenue Recognition in the Consolidated Financial Statements for additional information regarding our revenue recognition policies.

Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale. Upon determining that a long-lived asset (disposal group) meets the criteria to be classified as held for sale, the Company reports the assets and liabilities of the disposal group in the line items Assets held for sale and Liabilities held for sale, respectively, in the Consolidated Balance Sheets.

In 2018, management approved the disposal through sale of certain assets and businesses, which were a mix of both Commercial Industries, Government Services and Transportation. This action was taken as a result of our evaluation of these businesses as they represent businesses in markets or with services that we did not see as strategic or core. As of December 31, 2018, most of these businesses have been sold. At December 31, 2018, we reclassified $15 million to assets held for sale and $40 million to liabilities held for sale relating to a portfolio of select standalone customer care contracts that was not yet sold. See Note 3 – Assets/Liabilities Held for Sale and Divestitures for additional information.

Intangible Assets

The fair values of identifiable intangible assets are primarily estimated using an income approach. These estimates include market participant assumptions and require projected financial information, including assumptions about future revenue growth and costs necessary to facilitate the projected growth. Other key inputs include assumptions about technological obsolescence, customer attrition rates, brand recognition, the allocation of projected cash flows to identifiable intangible assets and discount rates. We regularly review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

- significant underperformance relative to historical or projected future operating results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangibles and long-lived assets may not be recoverable based upon the existence of one or more of the above indicators of potential impairment, we assess whether an impairment has occurred based on whether net book value of the assets exceeds the related projected undiscounted cash flows from these assets. We consider a number of factors, including past operating results, budgets, economic projections, market trends and product development cycles in estimating future cash flows. Differing estimates and assumptions as to any of the factors described above could result in a materially different impairment charge, if any, and thus materially different results of operations.

Goodwill

Goodwill is not amortized but rather tested for impairment annually, or more frequently if an event or circumstance indicates that impairment may have been incurred. Events or circumstances that might indicate an interim evaluation is warranted include, among other things, unexpected adverse business conditions, macro and reporting unit specific economic factors, supply costs, unanticipated competitive activities and acts by governments and courts.

Application of the annual goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units and the assessment of the fair value of each reporting unit. We determined that our reporting units were the same as our operating segments and, therefore, our business is comprised of three reporting units. Our annual quantitative impairment test of goodwill was performed in the fourth quarter of 2018.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In our quantitative test, we estimate the fair value of each reporting unit by weighting the results from the income approach (discounted cash flow methodology) and market approach. These valuation approaches require significant judgment and consider a number of factors that include, but are not limited to, expected future cash flows, growth rates and discount rates and comparable multiples from publicly traded companies in our industry. In addition, we are required to make certain assumptions and estimates regarding the current economic environment, industry factors and the future profitability of our businesses.

When performing our discounted cash flow analysis for each reporting unit, we incorporate the use of projected financial information and discount rates that are developed using market participant-based assumptions. The cash-flow projections are based on three-year financial forecasts developed by management that include revenue and expense projections, restructuring and strategic transformation activities, capital spending trends and investment in working capital to support anticipated revenue growth or other changes in the business. The selected discount rates consider the risk and nature of the respective reporting units' cash flows, appropriate capital structure and rates of return that market participants would require to invest their capital in our reporting units.

We believe these assumptions are appropriate and reflect our forecasted long-term business model and give appropriate consideration to our historical results as well as the current economic environment and markets that we serve.

Based on our quantitative assessments, we concluded that the fair value of our reporting units (which are the Financial Services & Healthcare, Consumer & Industrial and Europe operating segments, together comprising Commercial Industries, Government Services operating segment and the Transportation operating segment) exceeded their respective carrying values by approximately $600 million (for all Commercial Industries), $285 million for Government Services and $120 million for Transportation, respectively. The most significant assumption used in the goodwill analysis relates to the long-term organic growth rate for the operating segments comprising Commercial Industries, Government Services and Transportation segments. For example, the EBITDA long term growth rates for the Commercial Industries operating segments, Government Services and Transportation segments were 3%, 2.5% and 4%, respectively. The growth rates are consistent with industry long term growth rates and contemplate that Conduent will grow, on a long term basis, at least consistent with its peers. To the extent that Conduent losses a significant contract or multiple significant contracts, such that its growth rates are negatively impacted, its goodwill could be impaired. Specifically, if Conduent’s EBITDA long term growth rates were zero for the Commercial and Government operating segments and 3% for the Transportation operating segment, the fair values of the operating segments would approximate the book values of the operating segments.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding goodwill by reportable segment.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision is based on nonrecurring events as well as recurring factors, including the taxation of foreign income. In addition, our provision will change based on discrete or other nonrecurring events such as audit settlements, tax law changes, changes in valuation allowances and other factors, that may not be predictable. In the event that there is a significant unusual or one-time item recognized in our operating results, the taxes attributable to that item would be separately calculated and recorded at the same time as an unusual or one-time item.

We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our Consolidated Balance Sheets, as well as operating loss and tax credit carryforwards. We follow very specific and detailed guidelines in each tax jurisdiction regarding the recoverability of any tax assets recorded in our Consolidated Balance Sheets and provide valuation allowances as required. We regularly review our deferred tax assets for recoverability considering historical profitability, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. Gross deferred tax assets of $210 million and $245 million had valuation allowances of $44 million and $35 million at December 31, 2018 and 2017, respectively.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform includes a tax on global intangible low-taxed income ("GILTI"), which imposes a U.S. tax on certain income earned by the Company's foreign subsidiaries. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections. The Company elected to treat the tax on GILTI as a period cost when incurred and therefore, no deferred taxes for GILTI have been recognized for the year ended December 31, 2018.

We are subject to ongoing tax examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon our assessment of the more-likely-than-not outcomes of such matters. In addition, when applicable, we adjust previously recorded tax expense to reflect examination results. Our ongoing assessments of the more-likely-than-not outcomes of examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results. Unrecognized tax benefits were $20 million, $15 million and $14 million at December 31, 2018, 2017 and 2016, respectively.

Refer to Note 13 – Income Taxes in the Consolidated Financial Statements for additional information regarding deferred income taxes and unrecognized tax benefits.

Loss Contingencies

We are currently involved in various claims and legal proceedings. At least quarterly, we review the status of each significant matter and assess its potential financial exposure considering all available information including, but not limited to, the impact of negotiations, settlements, rulings, advice of legal counsel and other updated information and events pertaining to a particular matter. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, we reassess the potential liability related to pending claims and litigation, and may revise estimates. These revisions in the estimates of the potential liabilities could have a material impact on the results of operations and financial position.

Refer to Note 14 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding loss contingencies.

Income (Loss) From Continuing Operations	**$ (416)**	**$ 177**	**$ (983)**	**$ (593)**		**$ 1,160**	

Revenue

Revenue for 2018 decreased, compared to the prior year period, mainly due to the impact from adopting the accounting guidance related to revenue recognition, which is also referred to herein as the "new revenue standard", divestitures completed in 2017 and 2018, strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts and contract losses. Partially offsetting these declines were increases from the ramp of new business. Excluding the impact of the new revenue standard and divestitures, the 2018 revenue decreased by 3.8% mainly due to strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts and contract losses, partially offset by the ramp of new business.

Revenue for 2017 decreased, compared to the prior year period, mainly due to the impact from strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, the run-off of our Student Loan business and contract losses. Partially offsetting these declines were new contracts in the Government Services and the Transportation segments.

Cost of Services (excluding depreciation and amortization)

Cost of services for 2018 decreased, compared to the prior year period, mainly driven by the impact from adopting the new revenue standard, reductions in real estate, information technology and labor costs from our strategic transformation initiatives, lost business, strategic contract actions taken by management as part of portfolio management, lower volumes and divestitures completed in 2017 and 2018.

Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Cost of services for 2017 decreased, compared to the prior year period, primarily due to cost transformation, lost business, wind-down of the NY MMIS contract, run-off of our Student Loan business, strategic contract actions taken by management as part of portfolio management and lower volumes.

Selling, General and Administrative (SG&A) (excluding depreciation and amortization)

Lower SG&A for 2018, compared to the prior year period, was reflective of the impact of our strategic transformation initiatives, primarily due to reductions in labor costs.

Lower SG&A for 2017, compared to the prior year period, was reflective of the impact of our strategic transformation initiatives driving lower wages and benefits, partially offset by the expansion and investment in our sales force.

Depreciation and Amortization

Depreciation and amortization decreased in 2018, compared to the prior year period, primarily due to the divestitures in 2018. The decrease in Depreciation and amortization for 2017, compared to the prior year period, was primarily due to the acceleration of amortization of certain trade-names in 2016. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding our intangible assets.

Restructuring and Related Costs

Restructuring and related costs for the year ended December 31, 2018, include $34 million of severance costs due to headcount reductions of approximately 3,000 employees worldwide, $40 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint as well as $7 million of costs primarily related to data center migration and professional support services associated with the implementation of the strategic transformation program.

Restructuring and related costs for the year ended December 31, 2017 include $41 million of severance costs due to headcount reductions of approximately 3,200 employees worldwide, $51 million of lease cancellation costs as part of our effort to consolidate our real estate footprint and $9 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program.

Restructuring and related costs for the year ended December 31, 2016 include $54 million of severance costs due to headcount reductions of approximately 3,600 employees worldwide, $28 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program and $19 million of lease cancellation costs as part of our effort to consolidate our real estate footprint.

Refer to Note 7 – Restructuring Programs and Related Costs in the Consolidated Financial Statements for additional information regarding our restructuring programs.

Interest Expense

The decrease in Interest expense for 2018, compared to the prior year period, was driven primarily by the repayment of the Senior Notes and repricing of the term loans in 2018, partially offset by the write-off of debt issuance costs for certain loans that were refinanced in June 2018, amortization of debt issuance costs associated with the repricing of the loans and interest rate increases in 2018. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information.

Increase in interest expense for 2017, compared to the prior year period, was primarily due to the issuance of debt with the capitalization of the Company during the spin-off in December 2016 and subsequent borrowing under Term Loan B in January 2017, as well as amounts outstanding at various times throughout the year and interest rate increases.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(Gain) Loss on Divestitures and Transaction Costs

The loss for 2018, compared to the prior year period gain, was driven primarily by an impairment charge related to the anticipated sale of a portfolio of select standalone customer care contracts that was completed in February 2019, partially offset by net gains from divestitures and transaction costs. The gain for 2017, compared to the prior year period loss, was due to gains from the sale of property located in Dallas and from divestitures. See Note 3 – Assets/Liabilities Held for Sale and Divestitures for additional information on 2018 divestitures.

Litigation Costs (Recoveries), Net

Increase in net litigation costs for 2018, compared to the prior year period, was primarily due to increases in reserves related to the litigation settlement pursuant to the Texas Agreement ("Texas Agreement"), Student Loan Service exposures and a reserve for certain terminated contracts that are subject to litigation.

Decrease in net litigation costs for 2017, compared to the prior year period, was primarily due to income received from certain customer dispute settlements and adjustment to contingent consideration on a previous acquisition.

Refer to Note 14 – Contingencies and Litigation to the Consolidated Financial Statements for additional information.

(Gain) Loss on Extinguishment of Debt

The loss on extinguishment of debt for 2018, related to the premium paid for the substantial buyback of the 10.5% Senior Notes due 2024.

Refer to Note 9 – Debt to the Consolidated Financial Statements for additional information regarding the debt redemption.

Goodwill Impairment

Our Commercial Industries reporting unit experienced declining operating results in 2016 versus expectations. As a result, we recorded a goodwill impairment of $935 million in 2016. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding the Goodwill impairment charge.

Separation Costs

Separation costs are primarily for third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies, such as those related to human resources, brand management, real estate and information management to the extent not capitalized. Separation costs also include the costs associated with bonuses and restricted stock grants awarded to employees for retention through the separation.

Other (Income) Expenses, Net

Other (income) expenses, net primarily includes foreign currency transaction losses (gains) and other deferred compensation investment results.

Past financial performance is no guarantee of future results.

Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted. The effects of changes in tax rates and laws were recognized in 2017, the period in which the new legislation was enacted. The income tax effects of the Tax Reform were initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform were provided. A provisional benefit was recorded for $210 million resulting from a reduction in the tax rate from 35% to 21%. This was partially offset by a $12 million charge from one time tax on undistributed and previously untaxed post-1986 foreign earnings and profits (Transition Tax). The Company finalized its accounting for this matter in the fourth quarter of 2018 and recognized a $2 million additional benefit year to date, included as a component of income tax expense from continuing operations. The 2018 effective tax rate was (5.3)% and was lower than the U.S. statutory rate of 21%, primarily due to pre-tax loss and tax from the impacts of business divestitures, partially offset by U.S. foreign tax credits. As a result of higher U.S. Federal taxable income caused by the divestitures, the Company is not subject to Base Erosion Anti-Abuse Tax (BEAT) in 2018.

Excluding the impact of divestitures, the State of Texas litigation reserve, the loss on extinguishment of debt, charges for amortization of intangible assets, restructuring and divestiture related costs, the normalized effective tax rate without a BEAT tax for 2018 was 25.1%.

The 2017 rate was higher than the U.S. statutory rate of 35% primarily due to the impact of the Tax Reform, which included the reduction of the U.S. statutory rate from 35% to 21% and the Transition Tax.

Excluding primarily the tax impact of the Tax Reform, the termination of the COLI, amortization of intangible assets and gains on U.S divestitures, the adjusted effective tax rate for 2017 was 33.8%.

Operations Review of Segments

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

The following are our results of financial performance by segment for the three years ended December 31, 2018:

(in millions)	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
				Divestitures	Other		
Year Ended December 31, 2018							
Total Revenue	$ 2,547	$ 1,351	$ 729	$ 752	$ 14	$ —	$ 5,393
Profit (Loss)	$ 500	$ 424	$ 113	$ 98	$ (18)	$ (695)	$ 422
Adjusted EBITDA	$ 597	$ 451	$ 149	$ 105	$ (15)	$ (647)	$ 640
% of Total Revenue	47.2%	25.1%	13.5%	13.9%	0.3 %	—%	100.0%
Adjusted EBITDA Margin	23.4%	33.4%	20.4%	14.0%	(107.1)%	—%	11.9%
Year Ended December 31, 2017							
Total Revenue	$ 2,685	$ 1,433	$ 767	$ 1,062	$ 75	$ —	$ 6,022
Profit (Loss)	$ 563	$ 398	$ 114	$ 128	$ 16	$ (802)	$ 417
Adjusted EBITDA	$ 661	$ 440	$ 157	$ 141	$ 18	$ (745)	$ 672
% of Total Revenue	44.7%	23.8%	12.7%	17.6%	1.2 %	—%	100.0%
Adjusted EBITDA Margin	24.6%	30.7%	20.5%	13.3%	24.0 %	—%	11.2%
Year Ended December 31, 2016							
Total Revenue	$ 2,827	$ 1,575	$ 766	$ 1,109	$ 131	$ —	$ 6,408
Profit (Loss)	$ 520	$ 421	$ 88	$ 166	$ (149)	$ (850)	$ 196
Adjusted EBITDA	$ 623	$ 464	$ 129	$ 190	$ 9	$ (780)	$ 635
% of Total Revenue	44.1%	24.6%	12.0%	17.3%	2.0 %	—%	100.0%
Adjusted EBITDA Margin	22.0%	29.5%	16.8%	17.1%	6.9 %	—%	9.9%

Commercial Industries Segment

Revenue

Commercial Industries revenue for 2018 decreased, compared to the prior year period, primarily driven by strategic contract actions and contract losses, businesses divested in 2018 and the impact of the new revenue standard, partially offset by revenue from new contracts and price increases from existing accounts.

Commercial Industries revenue 2017 decreased, compared to the prior year period, primarily driven by strategic contract actions and contract losses, lower volumes in our customer care offerings and lost business, partially offset by revenue from new contracts and price increases with existing clients.

Segment Profit and Adjusted EBITDA

Decrease in the Commercial Industries segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was mainly driven by the overall revenue decline from strategic actions and investments in technology platforms, partially offset by reductions in real estate, information technology and labor costs from our strategic transformation initiatives and from increases in new business.

Increase in the Commercial Industries segment profit and adjusted EBITDA margin for 2017, compared to the prior year period, was primarily driven by reduced costs as a result of reductions in real estate, information technology and labor costs from our strategic transformation initiatives, as well as contract remediation and strategic contract actions, partially offset by the overall revenue decline and investments in technology platforms.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠

Government Services Segment

Revenue

Government Services revenue for 2018 decreased, compared to the prior year period, primarily driven by strategic contract actions and the impact of the new revenue standard, contract losses and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Government Services revenue for 2017 decreased, compared to the prior year period, primarily driven by strategic contract actions, contract losses and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Segment Profit and Adjusted EBITDA

Increase in the Government Services segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives and contract remediation, as well as price increases on certain accounts, partially offset by investments in technology platforms.

Decrease in the Government Services segment profit and adjusted EBITDA for 2017, compared to the prior year period, was primarily driven by strategic contract actions, contract losses in healthcare and payment services businesses, partially offset by our strategic transformation initiative.

Transportation Segment

Revenue

Transportation revenue for 2018 decreased, compared to the prior year period, primarily driven by the impact of the new revenue standard, contract losses, service level penalties and lower volumes, partially offset by certain price increases from contract remediation and ramp of new business.

Transportation revenue for 2017 was flat, compared to the prior year period, primarily driven by ramp of new business, offset by strategic decisions and contract losses.

Segment Profit and Adjusted EBITDA

Transportation segment profit and adjusted EBITDA margin for 2018, compared to the prior year period, was flat. This was mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives, offset by investments in technology platforms.

Increase in the Transportation segment profit and adjusted EBITDA for 2017, compared to the prior year period, was mainly due to our strategic transformation initiative, partially offset by strategic decisions and contract losses.

Other

Revenue

Other revenue for 2018 decreased, compared to the prior year period, driven mainly by the divestitures completed in 2017 and 2018 and the run-off of our Student Loan Services business.

Other revenue for 2017 decreased, compared to the prior year period, driven mainly by the divestitures completed in 2017 and the run-off of our Student Loan Services business.

Segment Profit (Loss) and Adjusted EBITDA

Decrease in Other segment profit and adjusted EBITDA for 2018 were primarily due to divestitures completed in 2017 and 2018 and the run-off of our Student Loan Services business.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Increase in Other segment profit for 2017 was primarily due to nonrecurring NY MMIS and HE charges in 2016. Decrease in Other segment adjusted EBITDA for 2017 was primarily due to divestitures completed in 2017 and the run-off of our Student Loan Services business.

Shared IT / Infrastructure & Corporate Costs

Improvements in Shared IT/Infrastructure and Corporate costs for both 2018 and 2017, compared to the prior year periods, were primarily driven by reduced costs as a result of reductions in real estate, information technology and labor costs from our strategic transformation initiatives.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table reflect the impact of our adoption of the new revenue recognition standard on January 1, 2018 and also excludes divestitures. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies for further discussion of the estimated impact of the adoption of this standard.

	Year Ended December 31,		2018 vs. 2017	
(in millions)	2018	2017	$ Change	% Change
New business TCV	$ 1,598	$ 2,031	$ (433)	(21)%
Renewals TCV	3,847	2,297	1,550	67 %
Total Signings	$ 5,445	$ 4,328	$ 1,117	26 %
Annual recurring revenue signings[1]	$ 365	$ 471	$ (106)	(23)%
Non-recurring revenue signings[2]	$ 234	$ 326	$ (92)	(28)%

(1) Recurring revenue signings are for new business contracts longer than one year.

(2) Non-recurring revenue signings are for contracts shorter than one year.

Signings for the 2018 increased, compared to the prior year, mainly due to increased renewal activities, partially offset by new business signings decline due to a continued focus on strategic wins with acceptable margins.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rates for 2018 and 2017 were 95% and 94%, respectively.

Capital Resources and Liquidity

As of December 31, 2018 and 2017, total cash and cash equivalents were $756 million (of which approximately $100 million was cash in foreign locations) and $658 million, respectively. Subsequent to December 31, 2018, the Company purchased the HSP business for approximately $90 million and entered into an agreement to settle the Texas litigation, $20 million of which is payable in the first quarter of 2019. Also, it is anticipated that our working capital in the first quarter of 2019 will be a net use of cash. Regarding the Texas litigation, the Settlement Agreement does not prevent the Company from prepaying the foregoing amounts and the Company is currently considering whether to do so. The Company also has a $750 million revolving line of credit for its various cash needs, of which $12 million has been utilized for letters of credit.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

As of December 31, 2018, there were $1.5 billion outstanding borrowings under our Credit Agreement of which $55 million was due within one year. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional debt information.

Refer to the *Capital Market Activity* section below for additional information regarding our capital activity.

Cash Flow Analysis

The following summarizes our cash flows for the three years ended December 31, 2018, as reported in our Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements:

	Year Ended December 31,			Change	
(in millions)	2018	2017	2016	2018	2017
Net cash provided by operating activities	$ 283	$ 300	$ 95	$ (17)	$ 205
Net cash provided by investing activities	460	74	16	386	58
Net cash provided by (used in) financing activities	(637)	(124)	150	(513)	(274)

Operating Activities

The decrease in cash generated from operating activities for 2018, compared to the prior year period, was primarily attributable to increased tax payments and increased deferred compensation payments, partially offset by other working capital amounts.

The increase in cash generated from operating activities for 2017, compared to the prior year period, was primarily attributable to improvements in working capital and reduced wind-down payments associated with implementations in California, Montana and New York, partially offset by higher interest payments on our outstanding debt.

Investing Activities

The increase in cash generated from investing activities for 2018, compared to the prior year period, was primarily due to the proceeds from the divestitures, partially offset by increased spending for capital expenditures related to modernizing our information technology infrastructure.

The increase in cash provided by investing activities for 2017, compared to the prior year period, was primarily related to proceeds received on the liquidation of investments related to the termination of the deferred compensation plan, proceeds from the sale of business and assets and lower net additions to land, buildings and equipment, partially offset by non-recurring proceeds from related party notes receivable in 2016.

Financing Activities

The increase in cash used from financing activities for 2018, compared to the prior year period, was related to net debt repayments, premium on debt redemption and repayments of capital leases, partially offset by payments to former parent company in 2017.

The decrease in cash used in financing activities for 2017, compared to the prior year period, was primarily related to a decrease in proceeds from long term debt and an increase in debt payments, partially offset by a reduction in payments to former parent.

Capital Market Activity

On June 28, 2018, the Company entered into Amendment No. 3 (Amendment) to the December 7, 2016 Credit Agreement and in July 2018, the Company redeemed $476 million of its $510 million 10.5% Senior Notes due 2024.

Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information on both Amendment No. 3 and the partial redemption of the Senior Notes.

Financial Instruments

Refer to Note 10 – Financial Instruments in the Consolidated Financial Statements for additional information.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

At December 31, 2018, we had the following contractual cash obligations and other commercial commitments and contingencies:

(in millions)	2019	2020	2021	2022	2023	Thereafter
Total debt, including capital lease obligations[1]	$ 55	$ 50	$ 84	$ 576	$ 800	$ 33
Interest on debt[2]	90	89	86	56	4	3
Minimum operating lease commitments[3]	153	113	78	53	33	76
Defined benefit pension plans	2	—	—	—	—	—
Estimated Purchase Commitments[4]	87	58	34	3	—	1
Total	$ 387	$ 310	$ 282	$ 688	$ 837	$ 113

_____

(1) Total debt represents principal debt and capital leases. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information regarding debt.
(2) Represents interest on debt. Refer to Note 9 – Debt in the Consolidated Financial Statements for additional information.
(3) Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information.
(4) Other purchase commitments: We enter into other purchase commitments with vendors in the ordinary course of business. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We currently do not have, nor do we anticipate, material loss contracts.

The table above does not include the amounts payable under the Texas Agreement. Refer to Note 14 – Contingencies and Litigation for additional information.

Other Contingencies and Commitments

As more fully discussed in Note 14 – Contingencies and Litigation in the Consolidated Financial Statements, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. In addition, guarantees, indemnifications and claims may arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates. Nonperformance under a contract including a guarantee, indemnification or claim could trigger an obligation of the Company.

We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. Should developments in any of these areas cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs.

Off-Balance Sheet Arrangements

As of December 31, 2018, we do not believe we have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

In addition, refer to the preceding table for the Company's contractual cash obligations and other commercial commitments and Note 14 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding contingencies, guarantees and indemnifications.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from foreign currency exchange rates, which could affect operating results, financial position and cash flows. We manage our exposure to this market risk through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We utilized derivative financial instruments to hedge economic exposures, as well as reduce earnings and cash flow volatility resulting from shifts in market rates. We also hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify or change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 10 – Financial Instruments in the Consolidated Financial Statements for additional discussion on our financial risk management.

Foreign Exchange Risk Management

Assuming a 10% appreciation or depreciation in foreign currency exchange rates from the quoted foreign currency exchange rates at December 31, 2018, the potential change in the fair value of foreign currency-denominated assets and liabilities in each entity would not be significant because all material currency asset and liability exposures were economically hedged as of December 31, 2018. A 10% appreciation or depreciation of the U.S. Dollar against all currencies from the quoted foreign currency exchange rates at December 31, 2018 would have an impact on our cumulative translation adjustment portion of equity of approximately $50 million. The net amount invested in foreign subsidiaries and affiliates, primarily in the U.K. and Europe, and translated into U.S. Dollars using the year-end exchange rates, was approximately $504 million at December 31, 2018.

Interest Rate Risk Management

The consolidated weighted-average interest rates related to our total debt for 2018 approximated 3.42% for Term A Loan due 2021, 5.44% for Term B Loan due 2023, 7.71% for Senior Notes due 2024 and 2.08% for capital lease obligations. As of December 31, 2018, $1,564 million of our total debt of $1,598 million carried variable interest rates. The fair values of our fixed rate financial instruments are sensitive to changes in interest rates and at December 31, 2018, a 10% increase in market interest rates would decrease the fair values of such financial instruments by approximately $1.5 million. A 10% decrease in market interest rates would increase the fair values of such financial instruments by approximately $4 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Conduent Incorporated

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Conduent Incorporated and its subsidiaries (the "Company") as of December 31, 2018 and 2017, and the related consolidated statements of income (loss), comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2018 appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Change in Accounting Principle

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for revenues from contracts with customers in 2018.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Past financial performance is no guarantee of future results.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORTS OF MANAGEMENT

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have free access to the Audit Committee.

CONDUENT INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation and Summary of Significant Accounting Policies

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

We are a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience. We create value for our commercial and government clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

Our Consolidated Financial Statements included the historical basis of assets, liabilities, revenues and expenses of the individual businesses of the Company, including joint ventures and partnerships over which the Company has a controlling financial interest. We have prepared the Consolidated Financial Statements pursuant to the rules and regulations of the SEC. Certain reclassifications have been made to prior years' amounts to conform to the current year presentation. All intercompany transactions and balances have been eliminated.

We have also considered the impact of subsequent events on these consolidated financial statements.

Separation from Xerox Corporation

On December 31, 2016, Conduent spun-off from Xerox Corporation (Xerox), pursuant to the Separation and Distribution Agreement (Separation). The Separation was completed by way of a pro rata distribution of Conduent shares held by Xerox to Xerox’s shareholders. As a result, we operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

Prior to December 31, 2016, the Financial Statements of the Company were derived from the financial statements and accounting records of Xerox as if Conduent operated on a standalone basis. Historically, the Company consisted of the Business Process Outsourcing Operating segment within Xerox’s reportable Services segment and did not operate as a separate, standalone company. Accordingly, Xerox performed certain corporate overhead functions for the Company. Therefore, certain corporate costs, including compensation costs for corporate employees supporting the Company, were allocated from Xerox. It is not practicable to estimate actual costs that would have been incurred had the Company been a separate standalone company. Allocations for management costs and corporate support services provided to the Company totaled $165 million for year ended December 31, 2016. Management of the Company believes the assumptions regarding the allocated expenses reasonably reflect the utilization of services provided to or the benefit received by the Company during the period prior to the Separation. The Consolidated Financial Statements for the period prior to the Separation does not necessarily include all the expenses that would have been incurred or held by the Company had it been a separate, standalone company.

Use of Estimates

We prepared the Consolidated Financial Statements using financial information available at the time of preparation, which requires us to make estimates and assumptions that affect the amounts reported. Our most significant estimates pertain to the intangible and long-lived assets, valuation of goodwill, contingencies and litigation, income taxes and corporate allocations (for year ended December 31, 2016). Our estimates are based on management's best knowledge of current events, historical experience, and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates.

New Accounting Standards

Past financial performance is no guarantee of future results.

Leases: In February 2016, the FASB updated the accounting guidance related to leases requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with a lease term greater than 12 months. The accounting for lessors is largely unchanged. This updated guidance is effective for the Company beginning January 1, 2019. The Company adopted this updated accounting guidance beginning January 1, 2019 using the optional transition approach, which allows entities to initially apply the new leases standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. Comparative periods will continue to be presented under existing lease guidance. This updated standard will have a significant impact on its Consolidated Balance Sheets by increasing its assets and liabilities. The Company does not expect the adoption to have a material impact on its Consolidated Statements of Income (Loss) and Consolidated Statements of Cash Flows.

Credit Losses: In June 2016, the FASB updated the accounting guidance related to measurement of credit losses on financial instruments, which requires financial assets measured at amortized cost to be presented at the net amount expected to be collected. This updated guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact on the Company's Consolidated Financial Statements.

Recently Adopted Accounting Standards

Cloud Computing Arrangements: In August 2018, the Financial Accounting Standards Board (FASB) issued an accounting update which aligns the requirements for capitalizing implementation costs incurred in a hosting cloud computing arrangement that is a service contract with the existing capitalization requirements for implementation costs incurred to develop or obtain internal-use software (and hosting cloud computing arrangements that include an internal-use software license). The Company elected to early adopt this standard on July 1, 2018 on a prospective basis. The adoption of this guidance did not have a material impact on the Company’s Consolidated Financial Statements.

Reclassifying Certain Tax Effects From Accumulated Other Comprehensive Income: On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted, lowering the U.S. corporate tax rate from 35% to 21%. The U.S. deferred tax assets and liabilities, including the balances originally recorded to Accumulated Other Comprehensive Income (AOCI), were adjusted to the new tax rate through net income from continuing operations in December 2017. In February 2018, the FASB issued guidance permitting companies, on an elective basis, to reclassify the disproportionate income tax effects of Tax Reform on items within AOCI to retained earnings. The only disproportionate income tax effects in the Company’s AOCI balance in December 2017 related to the U.S. pension plan. The plan was transferred to H.I.G. Capital as part of the U.S. human resource consulting and actuarial business divestiture completed in August 2018. In light of this, the Company adopted this accounting policy effective July 1, 2018 and has reclassified $5 million from AOCI to retained earnings as of September 30, 2018. Refer to the Consolidated Statements of Shareholders' Equity for additional information regarding this reclassification.

Cash Flows: In November 2016, the FASB issued updated accounting guidance regarding the presentation of restricted cash in the Consolidated Statements of Cash Flows. Specifically, this update requires that restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the Consolidated Statements of Cash Flows. The Company adopted this updated accounting guidance on January 1, 2018 using the retrospective method. The adoption of this guidance resulted in a reclassification of restricted cash of $9 million and $26 million for the years ended December 31, 2017 and 2016, respectively, in the Consolidated Statements of Cash Flows.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Revenue Recognition: In May 2014, the FASB updated the accounting guidance related to revenue recognition, which is also referred to herein as "the new revenue standard" to clarify the principles for recognizing revenue and replaced all existing revenue recognition guidance in U.S. GAAP with one accounting model. The core principle of the guidance is that an entity should recognize revenue when the promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The updated guidance also requires additional qualitative and quantitative disclosures relating to the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers largely on a disaggregated basis. The Company adopted the new revenue standard as of January 1, 2018, using the modified retrospective method. The Company has applied the new revenue standard only to contracts not completed as of the date of initial application. The adoption has primarily impacted the following: (1) revenue associated with postage recognized on a net basis versus previously being recognized on a gross basis; (2) the timing of revenue recognition associated with fixed fees for certain contracts with more than one performance obligation; and (3) the timing of recognition of certain pricing discounts and credits.

The Company recorded a net increase to opening retained earnings of $17 million, a decrease to current and long-term unearned income of $9 million and $6 million, respectively, and increase to contract assets of $7 million and an increase to deferred taxes of $5 million as of January 1, 2018, due to the cumulative impact of adopting this new guidance. The comparative information has not been restated and continues to be reported under the accounting standards in effect for the periods presented.

The impact of the new revenue standard for the year ended December 31, 2018, was a decrease in Revenue of approximately $150 million, primarily as a result of recognizing postage receipts on a net basis, in the Company's Consolidated Statements of Income (Loss). The impact of the new revenue standard, as of and for the period ended December 31, 2018, on the Company's pre-tax income (loss), Consolidated Balance Sheets and Statements of Cash Flows was not material.

Summary of Accounting Policies

Revenue recognition

The Company recognizes revenue when control of the promised goods or services is transferred to its customers, in an amount that reflects the consideration that the Company expects to receive in exchange for those goods or services.

The Company's contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct performance obligations that should be accounted for separately, versus together, may require judgment. Typically, the Company's contracts include performance obligation(s) to stand-ready on a daily or monthly basis to provide services to the customers. Under a stand-ready obligation, the evaluation of the nature of our performance obligation is focused on each time increment rather than the underlying activities. Accordingly, the promise to stand-ready is accounted for as a single-series performance obligation.

Once the Company determines the performance obligations, the Company estimates the amount of variable consideration, if any, to be included in determining the transaction price. Typical forms of variable consideration include variable pricing based on the number of transactions processed or usage-based pricing arrangements. Variable consideration is also present in the form of volume discounts, tiered and declining pricing, penalties for service level agreements, performance bonuses and credits. In circumstances where we meet certain requirements to allocate variable consideration to a distinct service within a series of related services, we allocate variable consideration to each distinct period of service within the series. If we do not meet those requirements, we include an estimate of variable consideration in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty is resolved. For contracts with multiple performance obligations, the transaction price is allocated to the separate performance obligations on a relative standalone selling price basis. The Company generally determines standalone selling prices based on the prices charged to customers or by using expected cost plus margin.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The Company typically satisfies its performance obligations over time as the services are provided. A time-elapsed output method is used to measure progress because the nature of the Company's promise is a stand-ready service and efforts are expended evenly throughout the period. In limited circumstances, such as contracts for implementation or development projects, the Company also uses a cost-to-cost based input method. The Company has determined that the above methods provide a faithful depiction of the transfer of services to the customer.

Estimates of revenue expected to be recognized in future periods exclude unexercised customer options to purchase additional services that do not represent material rights to the customer. Customer options that do not represent a material right are only accounted for when the customer exercises its option to purchase additional goods or services. The Company recognizes revenue for non-refundable upfront implementation fees on a straight-line basis over the period between the initiation of the services through the end of the contract term.

When more than one party is involved in providing services to a customer, the Company evaluates whether it is the principal, and reports revenue on a gross basis, or an agent, and reports revenue on a net basis. In this assessment, the Company considers the following: if it obtains control of the specified services before they are transferred to the customer; is primarily responsible for fulfillment and inventory risk; and has discretion in establishing price.

The Company reports revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The primary revenue-based taxes are sales tax and value-added tax (VAT).

The Company's payment terms vary by type of services offered. The time between invoicing and when payment is due is not significant. For certain services and customer types, the Company requires payment before services are rendered.

From time to time, the Company's contracts are modified to account for additions or changes to existing performance obligations. The Company's contract modifications related to stand-ready performance obligations are generally accounted for prospectively.

Disaggregation of Revenue

During the second quarter of 2018, the Company changed how it presents the disaggregated revenue by major service line to reflect the core businesses separate from the non-core businesses. This change had no impact on disaggregated revenue by reportable segment or the timing of revenue recognition.

Past financial performance is no guarantee of future results.

The following table provides information about disaggregated revenue by major service line, the timing of revenue recognition and a reconciliation of the disaggregated revenue by reportable segments. Refer to Note 2 – Segment Reporting for additional information on the Company's reportable segments.

(in millions)	Year Ended December 31, 2018
Commercial Industries:	
Omni-channel communications	$ 852
Human resource services	754
Industry services	941
Total Commercial Industries	2,547
Government Services	1,351
Transportation	729
Other:	
Divestitures	752
Education	14
Total Other	766
Total Consolidated Revenue	$ 5,393
Timing of Revenue Recognition:	
Point in time	$ 142
Over time	5,251
Total Revenue	$ 5,393

The Company's contracts with customers are broadly similar in nature throughout the Company's major service lines. The following is a description of the major service lines:

- **Omni-Channel Communications:** The Company offers a range of services that help its clients support their end-users. This includes in-bound and out-bound call support for both simple and complex transactions, technical support and patient assistance. The Company also provides multi-channel communication support (both print and digital) across a range of industries.

- **Human Resource Services:** The Company helps its clients support their employees at all stages of employment from initial on-boarding through retirement as well as health savings account (HSA) administration. The Company offers clients a range of customized advisory, technology and administrative services that improve the ability of employees to manage their benefits, professional development and retirement planning. Also, the Company assists its clients with workers' compensation claims management.

- **Industry Services:** The Company leverages technology to assist its clients with transaction processing as well as providing platform solutions. This includes offerings such as finance and accounting, transaction processing, learning, legal and payment integrity services, among others.

- **Government Services:** The Company's services include public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies. The Company also provides payment services, which include prepaid cards, child support disbursements and other government support programs, disbursement of electronic payments directly to end-users, collections and transfer of payments.

- **Transportation:** The Company provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

- **Divestitures:** This represents divestitures that were previously reported as Commercial Industries Non-core and Public Sector Non-core.

Contract Balances

The Company receives payments from customers based upon contractual billing schedules. Accounts receivable are recorded when the right to consideration becomes unconditional. Contract assets are the Company's rights to consideration for services provided when the right is conditioned on something other than passage of time (for example, meeting a milestone for the right to bill under the cost-to-cost measure of progress). Contract assets are transferred to Accounts receivable when the rights become unconditional. Unearned income includes payments received in advance of performance under the contract, which are realized when the associated revenue is recognized under the contract.

The following table provides information about the balances of the Company's contract assets, unearned income and receivables from contracts with customers:

(in millions)	December 31, 2018	January 1, 2018
Contract Assets (Unearned Income)		
Current contract assets[1]	$ 177	$ 191
Long-term contract assets[2]	7	2
Current unearned income	(112)	(128)
Long-term unearned income[3]	(32)	(46)
Net Contract Assets (Unearned Income)	$ 40	$ 19
Accounts receivable, net	$ 782	$ 908

_____

(1) Prior to the adoption of the new revenue standard, these amounts were recorded in Accounts receivable, net and represented unbilled amounts.

(2) Presented in Other long-term assets in the Consolidated Balance Sheets

(3) Presented in Other long-term liabilities in the Consolidated Balance Sheets

Revenue of $134 million was recognized during the year ended December 31, 2018 related to the Company's unearned income at January 1, 2018. The Company had no asset impairment charges related to contract assets for the year ended December 31, 2018.

Transaction Price Allocated to the Remaining Performance Obligations

Estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied or partially satisfied at December 31, 2018, was approximately $2 billion. The Company expects to recognize approximately 67% of the revenues over the next two years and the remainder thereafter.

Costs to Obtain and Fulfill a Contract

The Company capitalizes commission expenses paid to internal sales personnel that are incremental to obtaining customer contracts. The net book value of these costs, which was $24 million as of December 31, 2018, are included in Other long-term assets. The judgments made in determining the amount of costs incurred include whether the commissions are incremental and directly related to a successful acquisition of a customer contract. These costs are amortized in Depreciation and amortization over the term of the contract or the estimated life of the customer relationship, if renewals are expected and the renewal commission is not commensurate with the initial commission. These costs are periodically reviewed for impairment. The Company expenses sales commissions when incurred if the amortization period of the sales commission is one year or less.

In addition, the Company may provide inducement payments to secure customer contracts. These inducement payments are capitalized and amortized to expense over the term of the customer contract. The net book value of these costs totaled $23 million as of December 31, 2018 and are included in Other long-term assets.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Also, the Company capitalizes costs incurred to fulfill its contracts that (i) relate directly to the contract, (ii) are expected to generate resources that will be used to satisfy the Company's performance obligation under the contract and (iii) are expected to be recovered through revenue generated under the contract. The net book value of these costs, which comprise set-up/transition activities, was $53 million as of December 31, 2018, and are classified in Other long-term assets on the Consolidated Balance Sheets. Contract fulfillment costs are expensed to Cost of services as the Company satisfies its performance obligations by transferring the service to the customer. These costs are amortized on a systematic basis over the expected period of benefit.

The amortization of costs incurred to obtain and fulfill a contract for the year ended December 31, 2018, was approximately $50 million.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, including money market funds and investments with original maturities of three months or less.

Receivable Sales

In 2018, 2017 and 2016, the Company sold certain accounts receivable and derecognized the corresponding receivable balance. Refer to Note 4 – Accounts Receivable, Net for more details on our receivable sales.

Assets/Liabilities Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale.

In both 2018 and 2017, management approved the disposal through sale of certain assets and businesses. This action was taken as a result of our strategic evaluation of these businesses. As of December 31, 2018 and 2017, these businesses qualified as assets held for sale and we reclassified $15 million and $757 million to assets held for sale for 2018 and 2017, respectively, and $40 million and $169 million to liabilities held for sale for 2018 and 2017, respectively.

Refer to Note 3 – Assets/Liabilities Held for Sale and Divestitures for further discussion.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost. Buildings and equipment are depreciated over their estimated useful lives. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life. Significant improvements are capitalized and maintenance and repairs are expensed when incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further discussion.

Software - Internal Use and Product

Internal Use: We capitalize direct costs associated with developing, purchasing or otherwise acquiring software for internal use and amortize these costs on a straight-line basis over the expected useful life of the software, beginning when the software is implemented. Costs for upgrades and enhancements that will not result in additional functionality are expensed as incurred. Amounts incurred for Internal Use Software are included in Cash Flows from Investing.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further information.

Goodwill

For acquired businesses, the Company records the acquired assets and assumed liabilities based on their relative fair values at the date of acquisitions (commonly referred to as the purchase price allocation). Goodwill represents the excess of the purchase price paid in excess of the fair value of net tangible and intangible assets acquired. For the Company's business acquisitions, the purchase price is allocated to identifiable intangible assets separate from goodwill if they are from contractual or other legal rights, or if they could be separated from the acquired business and sold, transferred, licensed, rented or exchanged.

We test goodwill for impairment annually or more frequently if an event or change in circumstances indicate the asset may be impaired. Impairment testing for goodwill is done at the reporting unit level. We determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. If the fair value of a reporting unit is less than its carrying amount, an impairment charge would be recognized for amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Other Intangible Assets

Other intangible assets primarily consist of assets acquired through business combinations, including installed customer base and distribution network relationships, patents and trademarks. Other intangible assets are amortized on a straight-line basis over their estimated economic lives unless impairment is identified.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, including buildings, equipment, internal use software, product software and other intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. If these cash flows are less than the carrying value of such asset, an impairment loss is recognized for the difference between estimated fair value and carrying value. Our primary measure of fair value is based on forecasted cash flows.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Income Taxes

We account for income taxes under the asset and liability method. Deferred tax assets and liabilities are based on differences between U.S. GAAP reporting and tax bases of assets or liabilities and based on current tax laws, regulations and rates.

The recognition of deferred tax assets requires an assessment to determine the realization of such assets. Management establishes valuation allowances on deferred tax assets when it is determined “more-likely-than-not” that some portion or all of the deferred tax assets may not be realized. Management considers positive and negative evidence in evaluating the ability of the Company to realize its deferred tax assets, including its historical results and forecasts of future ability to realize its deferred tax assets, including projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies.

We are subject to ongoing tax examinations and assessments in various jurisdictions. We have unrecognized tax benefits for uncertain tax positions. We follow U.S. GAAP which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results.

On December 22, 2017, the US enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform includes a tax on global intangible low-taxed income (“GILTI”), which imposes a U.S. tax on certain income earned by the Company’s foreign subsidiaries. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections. The Company elected to treat the tax on GILTI as a period cost when incurred and therefore, no deferred taxes for GILTI have been recognized for the year ended December 31, 2018.

Refer to Note 13 – Income Taxes for further discussion.

Foreign Currency Translation and Re-measurement

The functional currency for most foreign operations is the local currency. Net assets are translated at current rates of exchange and income, expense and cash flow items are translated at average exchange rates for the applicable period. The translation adjustments are recorded in Accumulated other comprehensive loss.

The U.S. Dollar is used as the functional currency for certain foreign subsidiaries that conduct their business in U.S. Dollars. A combination of current and historical exchange rates is used in re-measuring the local currency transactions of these subsidiaries and the resulting exchange adjustments are recorded in Currency (gains) and losses within other expenses, net together with other foreign currency re-measurements.

Note 2 – Segment Reporting

Our reportable segments correspond to how we organize and manage the business, as defined by our CEO who is also our Chief Operating Decision Maker, and are aligned to the industries in which our clients operate. Our segments involve the delivery of business process services and include service arrangements where we manage a customer's business activity or process.

During 2018, in an effort to better reflect how we manage our business, we segregated our Public Sector segment into Government Services (including Health Enterprise, which was previously reported in Other segment) and Transportation segments. In addition, the Company also reclassified the operating results of our divestitures from the reportable segments to Other segment and separately reflected Shared IT/Infrastructure & Corporate Costs. All prior periods presented have been revised to reflect these changes.

We report our financial performance based on the three reportable segments: Commercial Industries, Government Services and Transportation.

- **Commercial Industries:** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

- **Government Services:** Our Government Services segment provides government-centric business process services to U.S. federal, state and local and foreign governments for, public assistance, program administration, transaction processing and payment services.

- **Transportation:** Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Geographic area data is based upon the location of the subsidiary reporting the revenue or long-lived assets and is as follows for each of the years ended December 31:

	Revenues			Long-Lived Assets [1]	
(in millions)	2018	2017	2016	2018	2017
United States	$ 4,748	$ 5,303	$ 5,686	$ 375	$ 289
Europe	497	538	547	28	42
Other areas	148	181	175	62	54
Total Revenues and Long-Lived Assets	$ 5,393	$ 6,022	$ 6,408	$ 465	$ 385

(1) Long-lived assets are comprised of (i) Land, buildings and equipment, net, (ii) Internal use software, net and (iii) Product software, net.

In 2016, our methodology to disclose revenue on a geographic basis changed to reflect where the work is contracted.

Note 3 – Assets/Liabilities Held for Sale and Divestitures

In September 2018, the Company entered into an agreement (subject to regulatory approval) to sell a portfolio of select standalone customer care contracts to Skyview Capital LLC. The assets and liabilities related to this portfolio, collectively referred to as the Disposal Group, have been reclassified to held for sale and measured at the lower of carrying value or fair value less cost to sell. The fair value less estimated cost to sell, as measured by the terms of the sale's agreement, was less than the carrying amount by $66 million. Accordingly, the Company recorded a $66 million impairment charge, which included a write-off of goodwill of $11 million and long-lived assets of $11 million. This impairment charge was included in the (Gain) loss on divestitures and transaction costs line in the Consolidated Statements of Income (Loss). This Disposal Group is reported in Other segment. The revenues generated from this business were $439 million and $483 million for the years ended December 31, 2018 and 2017, respectively.

Following is a summary of the major categories of assets and liabilities that have been reclassified to held for sale.

(in millions)	December 31, 2018
Accounts Receivable, net	$ 15
Total Assets held for sale	$ 15
Accounts payable	$ 1
Accrued compensation	16
Unearned revenue	8
Other	15
Total Liabilities held for sale	$ 40

In September 2018, the Company completed the sale of its local and municipal constituent government software solutions business to Avenu Insights & Analytics. The proceeds from this divestiture were $106 million in cash and the transaction generated a pre-tax gain of $0 million. The revenues generated from this business were $81 million and $113 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In August 2018, the Company completed the sale of its U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the United Kingdom (U.K.) to H.I.G. Capital. The proceeds from this divestiture include $168 million in cash paid at closing, $20 million to be collected in installments over four years and a contingent consideration of $6 million. The transaction generated a pre-tax loss of $7 million. The revenues generated from this business were $172 million, which includes $6 million of intercompany revenue and $279 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

In July 2018, the Company completed the sale of its off-street parking business, including the Multipark System in France and the U.K., along with its U.S. Airport Parking business to Andera Partners. The proceeds from this divestiture were $26 million in cash and the transaction generated a pre-tax gain of $8 million. The revenues generated from this business were $18 million and $42 million for the nine months ended September 30, 2018 and for the year ended December 31, 2017, respectively.

In June 2018, the Company completed the sale of its Commercial Vehicle Operations (CVO) business to Alinda Capital Partners. During the third quarter of 2018, the Company recorded a final working capital adjustment for the sale of the CVO business in the amount of $3 million, increasing the total cash proceeds received and pre-tax gain recorded to $403 million and $77 million, respectively. The revenue generated from this business was $33 million and $66 million for the six months ended June 30, 2018 and for the year ended December 31, 2017, respectively.

Note 4 – Accounts Receivable, Net

The Accounts receivable, net balance of $782 million and $1,114 million at December 31, 2018 and 2017, respectively, included allowance for doubtful accounts of $1 million and $2 million at December 31, 2018 and 2017, respectively.

The Company enters into supply chain financing programs from time to time to sell certain accounts receivable without recourse to third-party financial institutions. Sales of accounts receivable are reflected as a reduction of accounts receivable on the Consolidated Balance Sheets and the proceeds are included in cash flow from operating activities in the Consolidated Statements of Cash Flows.

Accounts receivable sales were as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Accounts receivable sales	$ 119	$ 94	$ 259

Note 5 - Land, Buildings, Equipment and Software, Net

Land, buildings and equipment, net were as follows:

(in millions except as noted)	Estimated Useful Lives (Years)	December 31, 2018	December 31, 2017
Land		$ 2	$ 3
Building and building equipment	25 to 50	7	17
Leasehold improvements	Varies	246	247
Office furniture and equipment	3 to 15	901	784
Other	4 to 20	2	1
Construction in progress		64	24
Subtotal		1,222	1,076
Accumulated depreciation		(894)	(819)
Land, Buildings and Equipment, Net		$ 328	$ 257

Depreciation expense and operating lease rent expense were as follows:

(in millions)	Year Ended December 31, 2018	2017	2016
Depreciation expense	$ 121	$ 125	$ 130
Operating lease rent expense	$ 208	$ 267	$ 299

We lease buildings and equipment, substantially all of which are accounted for as operating leases. Certain leases were accounted for as capital leases and the remaining net book value of those assets, included in Land, Buildings and Equipment, net were approximately $24 million and $32 million at December 31, 2018 and 2017, respectively.

Future minimum operating lease commitments that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2018 were as follows (in millions):

2019	2020	2021	2022	2023	Thereafter
$ 153	$ 113	$ 78	$ 53	$ 33	$ 76

Internal Use and Product Software

Internal use and product software are included in Other long-term assets on the Company's Consolidated Balance Sheets. Additions to Internal Use and Product Software as well as year-end balances for these assets were as follows:

(in millions) Additions to:	Year Ended December 31, 2018	2017	2016
Internal use software	$ 47	$ 36	$ 39
Product software	8	10	10

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(in millions)	December 31,	
Capitalized Costs, Net	2018	2017
Internal use software[1]	$ 123	$ 106
Product software[1]	18	22

(1) See Note 8 – Supplementary Financial Information for additional information.

Useful lives of our internal use and product software generally vary from one to seven years.

During 2016 we determined that it was probable that we would not fully complete our NY MMIS project in its current form. As a result of this decision an impairment charge of approximately $28 million was recorded in Cost of services. We also recorded an additional impairment charge in 2016 related to the 2015 HE charge of approximately $9 million in Restructuring and asset impairment.

Note 6 - Goodwill and Intangible Assets, Net

Goodwill

The following table presents the changes in the carrying amount of goodwill, by reportable segments:

(in millions)	Commercial Industries	Government Services	Transportation	Total
Balance at December 31, 2016	$ 1,504	$ 1,738	$ 647	$ 3,889
Foreign currency translation	19	—	28	47
Disposition	(19)	(14)	—	(33)

Balance at December 31, 2017	**$ 1,399**	**$ 1,310**	**$ 657**	**$ 3,366**
Foreign currency translation	(10)	—	(16)	(26)
Assets held-for-sale	(12)	—	—	(12)
Other[1]	14	66	—	80
Balance at December 31, 2018	**$ 1,391**	**$ 1,376**	**$ 641**	**$ 3,408**

(1) Represents 2018 true-up to the 2017 Assets held for sale.

Impairment Charge

There was no impairment identified for the years ended December 31, 2018 and 2017. In 2016, due to the declining trends and projections in the Commercial Industries reporting unit, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value. Accordingly, we recorded a pre-tax goodwill impairment charge of $935 million during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). There was no impairment identified for the Public Sector in 2016.

Intangible Assets, Net

Net intangible assets were $651 million at December 31, 2018 of which $417 million, $160 million and $74 million relate to our Commercial Industries, Government Services and Transportation segments, respectively. Intangible assets were comprised of the following:

		December 31, 2018			December 31, 2017		
(in millions except years)	Weighted Average Amortization	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Customer relationships	11 years	$ 2,914	$ 2,264	$ 650	$ 2,907	$ 2,022	$ 885
Technology, patents and non-compete	4 years	6	5	1	11	5	6
Total Intangible Assets		$ 2,920	$ 2,269	$ 651	$ 2,918	$ 2,027	$ 891

Amortization expense related to intangible assets was $242 million, $243 million and $280 million for the years ended December 31, 2018, 2017 and 2016, respectively. Amortization expense is expected to approximate $241 million in 2019, $238 million in 2020, $134 million in 2021, $12 million in 2022 and $6 million in 2023.

Note 7 – Restructuring Programs and Related Costs

The Company engages in a series of restructuring programs related to downsizing its employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce its cost structure and improve productivity. The implementation of the Company's strategic transformation program and various productivity initiatives have reduced the Company's real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Also included in Restructuring and Related Costs are incremental, non-recurring costs related to the consolidation of our data centers. Management continues to evaluate the Company's business and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made or actions are completed.

Costs associated with restructuring, including employee severance and lease termination costs, are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of our restructuring program activity during the two years ended December 31, 2018 is as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Balance at December 31, 2016	$ 15	$ 6	$ 21
Restructuring provision	49	54	103
Adjustments to prior accruals	(8)	(3)	(11)

Note 9 – Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments or as of the earliest put date available to the debt holders. We defer costs associated with debt issuance over the applicable term. These costs are amortized as interest expense in our Consolidated Statements of Income (Loss).

Long-term debt was as follows:

(in millions)	Weighted Average Interest Rates at December 31, 2018[1]	December 31, 2018	December 31, 2017
Term loan A due 2022	3.42%	$ 705	$ 732
Term loan B due 2023	5.44%	833	842
Senior notes due 2024	7.71%	34	510
Capital lease obligations	2.08%	26	33
Principal Debt Balance		$ 1,598	$ 2,117
Debt issuance costs and unamortized discounts		(31)	(56)
Less: current maturities		(55)	(82)
Total Long-term Debt		$ 1,512	$ 1,979

(1) Represents weighted average effective interest rate which includes the effect of discounts and premiums on issued debt.

Scheduled principal payments due on our long-term debt for the next five years and thereafter are as follows:

2019	2020	2021	2022	2023	Thereafter	Total
$ 55	$ 50	$ 84	$ 576	$ 800	$ 33	$ 1,598

Credit Facility

On December 7, 2016, we entered into a senior secured credit agreement (Credit Agreement) among the Company, its subsidiaries: Conduent Business Services, LLC (CBS), Affiliated Computer Services International B.V. and Conduent Finance, Inc. (CFI), the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains senior secured credit facilities (Senior Credit Facilities) consisting of:

(i) Senior Secured Term Loan A (Term Loan A) with an aggregate principal amount of $700 million;
(ii) Senior Secured Term Loan B (Term Loan B) with an aggregate principal amount of $850 million;
(iii) Senior Revolving Credit Facility (Revolving Credit Facility) with an aggregate available amount of $750 million including a sub-limit for up to $300 million million available for the issuance of letters of credit.

As of December 31, 2018, we have utilized $12 million of our revolving credit facility capacity to issue letters of credit.

The Credit Agreement permits us to incur incremental term loan borrowings and /or increase commitments under the revolving credit facility, subject to certain limitations and satisfaction of certain conditions, in an aggregate amount not to exceed (i) $300 million plus, (ii) if the senior secured net leverage ratio of Conduent Business Services (CBS) and its subsidiaries does not exceed 2.25 to 1.00 on a pro forma basis (without giving effect to any incurrence under clause (i) that is incurred substantially simultaneously with amounts incurred under clause (ii)), an unlimited amount.

All obligations under the Credit Agreement are unconditionally guaranteed by the Company, CBS, Conduent Finance, Inc. (CFI) and the existing and future direct and indirect wholly owned domestic subsidiaries of CBS (subject to certain exceptions). All obligations under the Credit Agreement, and the guarantees of those obligations, are secured, subject to certain exceptions, by substantially all of the assets of CBS and the guarantors under the Credit Agreement (other than the Company and CFI), including a first-priority pledge of all the capital stock of CBS and the subsidiaries of CBS directly held by CBS or the guarantors (other than the Company and CFI) under the

Credit Agreement (which pledges, in the case of any foreign subsidiary, will be limited to 65% of the capital stock of any first-tier foreign subsidiary).

The Credit Agreement contains certain customary affirmative and negative covenants, restrictions and events of default. The Credit Agreement requires total net leverage ratio for December 31, 2018 and thereafter not to exceed 3.75 to 1.00.

Senior Notes

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or CBS that guarantee the obligations under the Senior Credit Facilities.

Interest is payable semi-annually. At the option of the Issuers, the Senior Notes are redeemable in whole or in part, at any time prior to December 15, 2020, at a price equal to 100% of the aggregate principal amount of the Senior Notes plus accrued and unpaid interest, if any, to, but excluding, the redemption date plus a “make-whole” premium. The Issuers may also redeem the Senior Notes, in whole or in part, at any time on or after December 15, 2020, at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to but excluding the redemption date. Additionally, at any time prior to December 15, 2019, the Issuers may redeem up to 35% of the aggregate principal amount of the Senior Notes, subject to certain conditions, with the net cash proceeds from certain equity offerings at a price equal to 110.50% of the principal amount of the Senior Notes, plus accrued and unpaid interest, if any, to, but excluding, the redemption date.

Loans Repricing and Redemption

On June 28, 2018, the Company entered into Amendment No. 3 (Amendment) to the December 7, 2016 Credit Agreement, which (i) extended the revolving credit maturity from December 7, 2021 to December 7, 2022 and reduced the interest rate on the revolving credit by 0.5% from 2.25% over LIBOR to 1.75% over LIBOR; (ii) extended the maturity date of the Term A Loans from December 7, 2021 to December 7, 2022 and reduced the interest rate by 0.5% from 2.25% over LIBOR to 1.75% over LIBOR, and (iii) reduced the interest rate on the Term B Loans by 0.5% from 3.0% over LIBOR to 2.5% over LIBOR. These transactions resulted in a write-off of unamortized discount and issuance costs of $3 million.

In July 2018, the Company redeemed $476 million of its $510 million 10.50% Senior Notes due 2024. As part of the redemption, the Company paid a premium of $95 million and wrote off the associated unamortized discount and issuance costs of $13 million.

Interest

Interest paid on our short-term and long-term debt amounted to $100 million, $129 million, $5 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Interest expense and interest income was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Interest expense	$ 112	$ 137	$ 40
Interest income	7	3	3

Note 10 – Financial Instruments

We are exposed to market risk from changes in foreign currency exchange rates and interest rates, which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We enter into limited types of derivative contracts to manage foreign currency exposures that we hedge. Our primary foreign currency market exposures include the Philippine Peso, Indian Rupee and Mexican Peso. The fair market values of all our derivative contracts change with fluctuations in interest rates or currency exchange rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. Derivative financial instruments are held solely as risk management tools and not for trading or speculative purposes. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

We do not believe there is significant risk of loss in the event of non-performance by the counterparty associated with our derivative instruments because these transactions are executed with a major financial institution. Further, our policy is to deal only with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties.

Summary of Foreign Exchange Hedging Positions

At December 31, 2018 and 2017, we had outstanding forward exchange with gross notional values of $167 million and $160 million, respectively. At December 31, 2018, approximately 65% of these contracts mature within three months, 14% in three to six months, 17% in six to twelve months and 4% in greater than 12 months.

The following is a summary of the primary hedging positions and corresponding fair values:

	December 31, 2018		December 31, 2017	
(in millions)	Gross Notional Value	Fair Value Asset (Liability)[1]	Gross Notional Value	Fair Value Asset (Liability)[1]
Currencies Hedged (Buy/Sell)				
Philippine Peso/U.S. Dollar	$ 53	$ —	$ 62	$ —
Indian Rupee/U.S. Dollar	69	2	68	1
Mexican Peso/U.S. Dollar	8	—	9	—
All Other	37	—	21	—
Total Foreign Exchange Hedging	$ 167	$ 2	$ 160	$ 1

(1) Represents the net receivable (payable) amount included in the Consolidated Balance Sheet.

Note 11 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP established a hierarchy framework to classify the fair value based on the observability of significant inputs to the measurement. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Summary of Financial Assets and Liabilities Accounted for at Fair Value on a Recurring Basis

The following table represents assets and liabilities measured at fair value on a recurring basis. The basis for the measurement at fair value in all cases was Level 2.

(in millions)	December 31, 2018	December 31, 2017
Assets:		
Foreign exchange contract - forward	$ 3	$ 2
Total Assets	$ 3	$ 2
Liabilities:		
Foreign exchange contracts - forwards	$ 1	$ 1
Deferred compensation plan liabilities[1]	—	99
Total Liabilities	$ 1	$ 100

(1) In September 2017, the Company terminated the legacy deferred compensation plans (Plans) and the Company Owned Life Insurance (COLI), which held the Plans' investments. The Company made the payments to Plan participants in 2018.

Summary of Other Financial Assets and Liabilities

The estimated fair values of our other financial assets and liabilities were as follows:

	December 31, 2018		December 31, 2017	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Assets held for sale	$ 15	$ 15	$ 757	$ 757
Liabilities:				
Long-term debt	$ 1,512	$ 1,463	$ 1,979	$ 2,070
Liabilities held for sale	$ 40	$ 40	$ 169	$ 169

The fair value amounts for Cash and cash equivalents, Restricted cash, Accounts receivable, net and Short-term debt approximate carrying amounts due to the short-term maturities of these instruments.

The fair value of the Assets held for sale and the Liabilities held for sale were measured based on the sale's price less estimated transactions costs (Level 3). Refer to Note 3 – Assets/Liabilities Held for Sale and Divestitures to the Consolidated Financial Statements for additional information.

The fair value of Long-term debt was estimated based on the current rates offered to the Company for debt of similar maturities (Level 2).

Note 12 – Employee Benefit Plans

Defined Benefit Plans

In 2018, all of the U.S. and the majority of the international plan assets and obligations were part of the divestiture of the U.S. human resource consulting and actuarial business and the human resource consulting and outsourcing business located in Canada and the U.K. The company's remaining benefit obligations and plan assets in 2018 were $12 million and $3 million, respectively.

As of December 31, 2017 the Company had a pension benefit obligation of $280 million ($102 million in the US and $178 million from non-US plans). The plans also had assets of approximately $222 million ($62 million in the US and $160 million from non-US plans), in which the assets were invested primarily in equity and fixed income securities (level 1 and level 2).

Defined Contribution Plans

We have post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals were transitioned to an enhanced defined contribution plan. In these plans employees are allowed to contribute a portion of their salaries and bonuses to the plans, and we match a portion of the employee contributions. We recorded charges related to our defined contribution plans of $28 million in 2018, $35 million in 2017 and $35 million in 2016.

Note 13 - Income Taxes

Prior to the Separation, Conduent's operating results were included in Xerox Corporation's various consolidated U.S. federal and state income tax returns, as well as non-U.S. tax filings. For the purposes of the Company's Consolidated Financial Statements for periods prior to the Separation, income tax expense and deferred tax balances have been recorded as if the Company filed tax returns on a standalone basis separate from Xerox. The Separate Return Method applies the accounting guidance for income taxes to the standalone financial statements as if the Company was a separate taxpayer and a standalone enterprise for fiscal 2016.

On December 22, 2017, the U.S. enacted the Tax Cuts and Jobs Act (Tax Reform). The Tax Reform significantly changes the U.S. corporate income tax laws by, among other things, reducing the corporate income tax rate to 21% starting in 2018 and creating a territorial tax system with a one-time mandatory tax on previous deferred foreign earnings of U.S. subsidiaries. With respect to this legislation, the Company recorded a provisional tax benefit of $198 million in the fourth quarter of 2017, which included a $210 million tax benefit due to the re-measurement of deferred tax assets and liabilities resulting from the decrease in the corporate U.S. federal income tax rate from 35% to 21% and $12 million as a one-time-charge on the transition tax for Post-1986 undistributed and not previously taxed foreign earnings and profits. The Company finalized its accounting for this legislation in the fourth quarter of 2018 and recognized a $2 million additional benefit year to date, included as a component of income tax expense from continuing operations. The true-up of the provisional benefit includes $5 million additional benefit due to re-measurement of deferred tax assets and liabilities resulting from the decrease in the U.S. corporate federal income tax rate, a $1 million reduction in the one-time charge on the transition tax and a $4 million charge due to change in recognition of deferred tax assets related to deductibility of certain expenses.

Income (loss) before income taxes (pre-tax income (loss)) was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Domestic loss	$ (411)	$ (91)	$ (1,329)
Foreign income	16	75	102
Loss Before Income Taxes	$ (395)	$ (16)	$ (1,227)

Provision (benefit) for income taxes were as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Federal Income Taxes			
Current	$ 35	$ 4	$ (116)
Deferred	(62)	(233)	(132)
Foreign Income Taxes			
Current	41	25	31
Deferred	(6)	(3)	(3)
State Income Taxes			
Current	20	8	1
Deferred	(7)	6	(25)
Total Benefit	$ 21	$ (193)	$ (244)

A reconciliation of the U.S. federal statutory income tax rate to the consolidated effective income tax rate was as follows:

	Year Ended December 31,		
	2018	2017	2016
U.S. federal statutory income tax rate	21.0 %	35.0 %	35.0 %
Nondeductible expenses[1]	(3.7)%	(104.0)%	(19.0)%
Effect of tax law changes	0.5 %	1,282.4 %	— %
Change in valuation allowance for deferred tax assets	(1.7)%	(39.5)%	0.1 %
State taxes, net of federal benefit	(2.3)%	1.2 %	1.8 %
Audit and other tax return adjustments	— %	— %	1.4 %
Tax-exempt income, credits and incentives	2.2 %	38.9 %	0.7 %
Foreign rate differential adjusted for U.S. taxation of foreign profits[2]	1.9 %	47.7 %	0.7 %
Divestitures[3]	(20.3)%	(51.9)%	— %
Unrecognized tax benefits and other	(2.9)%	(3.5)%	(0.8)%
Effective Income Tax Rate	(5.3)%	1,206.3 %	19.9 %

(1) In 2017, nondeductible expenses primarily related to officers life insurance.
(2) The "U.S. taxation of foreign profits" represents the U.S. tax, net of foreign tax credits, associated with actual and deemed repatriations of earnings from our non-U.S. subsidiaries.
(3) 2018 and 2017 divestitures include nondeductible goodwill allocated to divested businesses.

On a consolidated basis, we paid/(received) a total of $108 million, $29 million and $(123) million in income taxes to federal, foreign and state jurisdictions during the three years ended December 31, 2018, 2017 and 2016, respectively.

Total income tax expense (benefit) was allocated as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Pre-tax income	$ 21	$ (193)	$ (244)
Discontinued operations	—	3	—
Common shareholders' equity:			
Changes in defined benefit plans	—	—	8
Stock option and incentive plans, net	—	—	—
Total Income Tax Expense (Benefit)	$ 21	$ (190)	$ (236)

Unrecognized Tax Benefits and Audit Resolutions

We recognize tax liabilities when, despite our belief that our tax return positions are supportable, we believe that certain positions may not be fully sustained upon review by tax authorities. Each period we assess uncertain tax positions for recognition, measurement and effective settlement. Benefits from uncertain tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Where we have determined that our tax return filing position does not satisfy the more-likely-than-not recognition threshold, we have recorded no tax benefits.

We are also subject to ongoing tax examinations in numerous jurisdictions due to the extensive geographical scope of our operations. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can increase or decrease our effective tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain. As of December 31, 2018, we do not believe that there are any positions for which it is reasonably possible that the total amount of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

Source: CONDUENT Inc, 10-K, February 28, 2019

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

A reconciliation of the beginning and ending amount of unrecognized tax benefits was as follows:

(in millions)	2018	2017	2016
Balance at January 1	$ 15	$ 14	$ 24
Additions related to current year	3	—	1
Additions related to prior years positions	5	—	—
Reductions related to prior years positions	—	—	(5)
Settlements with taxing authorities[1]	(1)	—	(5)
Currency	(2)	1	(1)
Balance at December 31	$ 20	$ 15	$ 14

(1) 2018 and 2016 settlement resulted in $1 million and $5 million cash paid, respectively.

We maintain offsetting benefits from other jurisdictions of $15 million, $16 million and $16 million, at December 31, 2018, 2017 and 2016, respectively. We recognized interest and penalties accrued on unrecognized tax benefits, as well as interest received from favorable settlements within income tax expense. We had $10 million, $6 million and $4 million accrued for the payment of interest and penalties associated with unrecognized tax benefits at December 31, 2018, 2017 and 2016, respectively. In the U.S., we are no longer subject to U.S. federal income tax examinations for years before 2012. With respect to our major foreign jurisdictions, the years generally remain open back to 2006.

Deferred Income Taxes

The Company is indefinitely reinvested in the undistributed earnings of its foreign subsidiaries with respect to the U.S. These foreign subsidiaries have aggregate cumulative undistributed earnings of $164 million as of December 31, 2018. For years after 2017, the Tax Reform does allow for certain earnings to be repatriated free from U.S. Federal taxes. However, the repatriation of earnings could give rise to additional tax liabilities. We have also not provided for deferred taxes on outside basis differences in our investments in our foreign subsidiaries that are unrelated to unremitted earnings. These other basis differences will also be indefinitely reinvested. A determination of the unrecognized deferred taxes related to these other components of our outside basis differences is not practicable. We have provided for deferred taxes with respect to certain unremitted earnings of foreign subsidiaries that are not indefinitely reinvested between foreign subsidiaries outside of the U.S.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The tax effects of temporary differences that give rise to significant portions of the deferred taxes were as follows:

(in millions)	December 31, 2018	December 31, 2017
Deferred Tax Assets		
Net operating losses	$ 46	$ 41
Operating reserves, accruals and deferrals	68	85
Deferred compensation	16	59
Pension	2	15
Settlement reserves	67	18
Other	11	27
Subtotal	210	245
Valuation allowance	(44)	(35)
Total	$ 166	$ 210
Deferred Tax Liabilities		
Unearned income	$ 86	$ 134
Intangibles and goodwill	341	413
Depreciation	30	5
Other	24	25
Total	$ 481	$ 577
Total Deferred Taxes, Net	$ (315)	$ (367)

The deferred tax assets for the respective periods were assessed for recoverability and, where applicable, a valuation allowance was recorded to reduce the total deferred tax asset to an amount that will, more-likely-than-not, be realized in the future. The net change in the total valuation allowance for the years ended December 31, 2018 and 2017 was an increase of $9 million and $11 million, respectively. The valuation allowance relates primarily to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Although realization is not assured, we have concluded that it is more-likely-than-not that the deferred tax assets, for which a valuation allowance was determined to be unnecessary, will be realized in the ordinary course of operations based on the available positive and negative evidence, including scheduling of deferred tax liabilities and projected income from operating activities. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if actual future income or income tax rates are lower than estimated, or if there are differences in the timing or amount of future reversals of existing taxable or deductible temporary differences.

At December 31, 2018, we had tax credit carryforwards of $9 million available to offset future income taxes which will expire between 2019 and 2038 if not utilized. We also had net operating loss carryforwards for income tax purposes of $417 million that will expire between 2019 and 2038, if not utilized; and $54 million available to offset future taxable income indefinitely.

Note 14 – Contingencies and Litigation

As more fully discussed below, the Company is involved in a variety of claims, lawsuits, investigations and proceedings concerning: governmental entity contracting, servicing and procurement law; intellectual property law; employment law; commercial and contracts law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company assesses its potential liability by analyzing its litigation and regulatory matters using available information. The Company develops its view on estimated losses in consultation with outside counsel handling its defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in the Company's determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts in excess of any accrual for such matter or matters, this could have a material adverse effect on the Company's results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. The Company believes it has recorded adequate provisions for any such matters as of December 31, 2018. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matters could be in excess of any amounts accrued and could be material to the Company's results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates when the Company undertakes an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the consolidated financial position or liquidity. As of December 31, 2018, the Company had accrued its estimate of liability incurred under its indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Conduent State Healthcare, LLC (f/k/a Xerox State Healthcare, LLC, f/k/a ACS State Healthcare, LLC) and Conduent Incorporated: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Xerox Corporation, Xerox State Healthcare, LLC and ACS State Healthcare (collectively, the "Xerox Defendants") violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”). The State alleges that the Xerox Defendants made false representations of material facts regarding the processes, procedures, implementation and results regarding the prior authorization of orthodontic claims. The State seeks recovery of amounts paid for orthodontic treatment under the Texas Medicaid program for the period from approximately 2004 to 2012, three times the amount of the payments made as a result of the alleged unlawful acts, civil penalties, pre- and post-judgment interest and all costs and attorneys’ fees. The Xerox Defendants filed their Answer in June, 2014 denying all allegations. A trial date was originally scheduled for November, 2018. During the first quarter of 2018, the State notified the Xerox Defendants in the litigation discovery process that its claim is in excess of two billion dollars based primarily on the assertion of treble damages and civil penalties per illegal act for almost two hundred thousand purported illegal acts. During the second quarter of 2018, the trial date was rescheduled for May, 2019. During October of 2018, discussions with the State were undertaken to determine if a mutually acceptable settlement might be reached. Those discussions were not productive. In the wake of those discussions, we recorded an additional $72 million reserve during the third quarter of 2018, increasing our aggregate reserve for this matter as of September 30, 2018, to $110 million. During December 2018, we re-engaged with the State in discussions to settle the matter. In February 2019, those discussions culminated in a settlement agreement and release among the Xerox Defendants, the State and HHSC. Pursuant to the terms of the Texas Agreement ("Texas Agreement"), the Company will pay the State of Texas $236 million in full settlement of the claims asserted against the Xerox Defendants. This amount is payable in installments of: (1) $20 million within 10 days of execution of the settlement agreement; (2) $20 million by April 15, 2019; (3) $38 million by July 31, 2019; (4) $79 million by July 31, 2020; and (5) $79 million by July 31, 2021. The Agreement does not prevent the Company from prepaying the foregoing amounts and the Company is currently considering whether to do so. The Company does not intend to make further disclosure regarding a possible prepayment unless it actually prepays such amounts in whole or in part. As part of the settlement, all proceedings in the lawsuit are suspended and the State and the HHSC will dismiss the lawsuit with prejudice and release the Xerox Defendants from all of the State’s claims after all settlement payments are made. As a result of entering into the Texas Agreement, the Company recorded an additional reserve of $113 million in the quarter ended December 31, 2018 which is net of a $13 million discount to reflect the fair value of the liability. The Defendants’ have not made any admission of liability or wrongdoing in entering into the Texas Agreement.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck"), which was a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court as to Buck only, and only with respect to Plaintiff's claim of aiding and abetting StanCERA in breaching its fiduciary duty. This case has been stayed pending the outcome of parallel litigation the plaintiffs are pursuing against StanCERA. The parallel litigation was tried before the bench in June 2018, and on January 24, 2019, the court found in favor of StanCERA, holding that it had not breached its fiduciary duty to plaintiffs. Plaintiffs in the parallel litigation have the right to file an appeal, which we expect. Nasrawi remains stayed until the parallel litigation is finally concluded. Absent the court finding that StanCERA breached its fiduciary duty, plaintiffs' claim against Buck for aiding and abetting said breach would not appear viable. Buck will continue to aggressively defend these lawsuits. In August 2018, Conduent sold Buck Consultants, LLC; however, the Company retained this liability after the sale. The Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide a Medicaid Management Information Systems (the "NY MMIS Contract"). In the lawsuit, Conduent seeks damages in excess of one hundred fifty million dollars. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and recorded in the same period certain charges associated with the termination. Cognizant asserted two counterclaims for breach of contract seeking recovery of damages in excess of forty-seven million dollars, which includes amounts alleged not paid to Cognizant under the contract and an alleged twenty-five million dollars of termination fee. Conduent has responded to Cognizant's counterclaims by denying the allegations. Conduent will continue to vigorously defend itself against the counterclaims but the Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters:

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB commence an action, it may seek restitution, civil monetary penalties, injunctive relief, or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. XES submitted its response to the NORA. The CFPB's NORA stems from an inquiry that commenced in 2014 when XES received and responded to a CFPB Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the U.S. Department of Education (the "Department") and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB, the U.S. Department of Education, the U.S. Department of Justice, the New York Office of the Attorney General, the New York Department of Financial Services and the Massachusetts Office of the Attorney General began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies. It resolved the Massachusetts Office of the Attorney General investigation in November 2016 and the investigations by both the New York agencies in January 2019. Both as a result of these inquiries, its own reviews of operations and work performed by external auditors, XES has identified certain other operational issues requiring remediation, and this remediation work has commenced. XES disclosed these additional operational projects to the Department at the end of the second quarter of 2018 and is working to complete these projects. In the third quarter of 2018, the Company exited the Student Loan Services business. The Company cannot provide assurance that the CFPB, another regulator, a financial institution on behalf of which the Company serviced third-party student loans, or another party will not ultimately commence a legal action against XES in which fines, penalties or other liabilities are sought from XES. Nor is the Company able to predict the likely outcome of these matters, should any such matter be commenced, or reasonably provide an estimate or range of estimates of any loss in excess of current reserves. The Company could in future periods incur judgments or enter into settlements to resolve these potential matters for amounts in excess of current reserves and there could be a material adverse effect on the Company's results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Guarantees and Indemnifications

Indemnifications Provided as Part of Contracts and Agreements

Acquisitions/Divestitures:

We have indemnified, subject to certain deductibles and limits, the purchasers of businesses or divested assets for the occurrence of specified events under certain of our divestiture agreements. In addition, we customarily agree to hold the other party harmless against losses arising from a breach of representations and covenants, including such matters as adequate title to assets sold, intellectual property rights and certain income taxes arising prior to the date of acquisition. Where appropriate, an obligation for such indemnifications is recorded as a liability at the time of the acquisition or divestiture. Since the obligated amounts of these types of indemnifications are often not explicitly stated or are contingent on the occurrence of future events, the overall maximum amount, or range of amount of the obligation under such indemnifications cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, we have not historically made significant payments for these indemnifications. Additionally, under certain of our acquisition agreements, we have provided for additional consideration to be paid to the sellers if established financial targets are achieved within specific timeframes post-closing. We have recognized liabilities for these contingent obligations based on an estimate of the fair value of these contingencies at the time of acquisition. Contingent obligations related to indemnifications arising from our divestitures and contingent consideration provided for by our acquisitions are not expected to be material to our financial position, results of operations or cash flows.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Other Agreements:

We are also party to the following types of agreements pursuant to which we may be obligated to indemnify the other party with respect to certain matters:

- Guarantees on behalf of our subsidiaries with respect to real estate leases. These lease guarantees may remain in effect subsequent to the sale of the subsidiary.
- Agreements to indemnify various service providers, trustees and bank agents from any third-party claims related to their performance on our behalf, with the exception of claims that result from the third-party's own willful misconduct or gross negligence.
- Guarantees of our performance in certain services contracts to our customers and indirectly the performance of third parties with whom we have subcontracted for their services. This includes indemnifications to customers for losses that may be sustained as a result of our performance of services at a customer's location.

In each of these circumstances, our payment is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract and such procedures also typically allow us to challenge the other party's claims. In the case of lease guarantees, we may contest the liabilities asserted under the lease. Further, our obligations under these agreements and guarantees may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments we made.

Intellectual Property Indemnifications

We do not own most of the software that we use to run our business. Instead, we license this software from a small number of primary vendors. We indemnify certain software providers against claims that may arise as a result of our use or our subsidiaries', customers' or resellers' use of their software in our services and solutions. These indemnities usually do not include limits on the claims, provided the claim is made pursuant to the procedures required in the services contract.

Indemnification of Officers and Directors

Our corporate by-laws require that, except to the extent expressly prohibited by law, we must indemnify our officers and directors against judgments, fines, penalties and amounts paid in settlement and reasonable expenses, including attorneys' fees, incurred in connection with civil or criminal action or proceedings or any appeal, as it relates to their services to our Company and our subsidiaries. Although the by-laws provide no limit on the amount of indemnification, we may have recourse against our insurance carriers for certain payments made by us. However, certain indemnification payments (such as those related to "clawback" provisions in certain compensation arrangements) may not be covered under our directors' and officers' insurance coverage. We also indemnify certain fiduciaries of our employee benefit plans for liabilities incurred in their service as fiduciary whether or not they are officers of the Company. Finally, in connection with our acquisition of businesses, we may become contractually obligated to indemnify certain former and current directors, officers and employees of those businesses in accordance with pre-acquisition by-laws or indemnification agreements or applicable state law.

Other Contingencies

Certain contracts, primarily in the Company's Public Sector segment, require the Company to provide a surety bond or a letter of credit as a guarantee of performance. As of December 31, 2018, the Company had $646 million of outstanding surety bonds used to secure its performance of contractual obligations with its clients and $344 million of outstanding letters of credit issued to secure the Company's performance of contractual obligations to its clients as well as other corporate obligations. In general, the Company would only be liable for the amount of these guarantees in the event of default in the Company's performance of its obligations under each contract. The Company believes it has sufficient capacity in the surety markets and liquidity from its cash flow and its various credit arrangements (including its Credit Facility) to allow it to respond to future requests for proposals that require such credit support.

Note 15 - Preferred Stock

Series A Preferred Stock

In connection with the December 31, 2016 spin-off from Xerox Corporation, we issued 120 thousand shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The Series A convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of the Series A convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393 thousand shares (reflecting an initial conversion price of approximately $22.250 per share of common stock), subject to customary anti-dilution adjustments.

If the closing price of our common stock exceeds 137% of the initial conversion price for 20 out of 30 trading days, we have the right to cause any or all of the Series A convertible preferred stock to be converted into shares of common stock at the then applicable conversion rate. The Series A convertible preferred stock is also convertible, at the option of the holder, upon a change in control, at the applicable conversion rate plus an additional number of shares determined by reference to the price paid for our common stock upon such change in control. In addition, upon the occurrence of certain fundamental change events, including a change in control or the delisting of Conduent's common stock, the holder of Series A convertible preferred stock has the right to require us to redeem any or all of the Series A convertible preferred stock in cash at a redemption price per share equal to the liquidation preference and any accrued and unpaid dividends to, but not including, the redemption date. As a result of the contingent redemption feature, the Series A convertible preferred stock is classified as temporary equity and reflected separately from permanent equity in the Consolidated Balance Sheets.

Note 16 – Shareholders' Equity

Preferred Stock

As of December 31, 2018, we had one class of preferred stock outstanding. See Note 15 – Preferred Stock for further information. We are authorized to issue approximately 100 million shares of cumulative preferred stock at $0.01 par value per share.

Common Stock

We have 1 billion authorized shares of common stock at $0.01 par value per share. At December 31, 2018, 15 million shares were reserved for issuance under our incentive compensation plans and 5.4 million shares were reserved for conversion of the Series A convertible preferred stock.

Stock Compensation Plans

Certain of our employees participate in a long-term incentive plan. Our long-term incentive plan authorizes the issuance of restricted stock units / shares (RSU), performance stock units / share (PSU) and non-qualified stock options to employees. All awards for these plans prior to 2017 were made in Xerox stock and therefore converted into Conduent stock effective upon the Separation. Using a formula designed to preserve the value of the award immediately prior to the Separation, all of these awards will be settled and are reflected in the Company's Consolidated Statements of Shareholders' Equity. Stock-based compensation expense includes expense based on the awards and terms previously granted to the employees.

Stock-based compensation expense was as follows:

	Year Ended December 31,		
(in millions)	2018	2017	2016
Stock-based compensation expense, pre-tax	$ 38	$ 42	$ 23
Income tax benefit recognized in earnings	7	17	9

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Restricted Stock Units / Shares Compensation expense is based upon the grant date market price. The compensation expense is recorded over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest.

Performance Stock Units / Shares: The Company granted PSUs that vest contingent upon its achievement of certain specified financial performance criteria over a three-year period. If the three-year actual results exceed the stated targets, then the plan participants have the potential to earn additional shares of common stock, which cannot exceed 100% of the original grant.

The fair value of PSUs is based upon the market price of Conduent's common stock on the date of the grant. Compensation expense is recognized over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest. If the stated targets are not met, any recognized compensation cost would be reversed.

Employee Stock Options: Stock options were issued by a former parent company and were converted to Conduent's common stock upon the Separation. These options generally expire within the next one year. Other than these options, Conduent has not issued any new stock options.

Summary of Stock-based Compensation Activity

	2018		2017		2016	
(shares in thousands)	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value

(1) Stock-based compensation was converted from former parent stock into Conduent common stock at spin-off.

The Company issued 96 thousand Deferred Stock Units (DSU) to non-employee members of the Board of Directors. These DSUs are fully vested and will be issued when the directors leave the Board.

The Company has 119 thousand stock options outstanding as of December 31, 2018 at a strike price of $10.15. These stock options are fully vested and exercisable.

Note 18 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

	Year Ended December 31,		
(in millions, except per share data. Shares in thousands)	2018	2017	2016
Basic Earnings (Loss) per Share:			
Net income (loss) from continuing operations	$ (416)	$ 177	$ (983)
Accrued dividends on preferred stock	(10)	(10)	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	(426)	167	(983)
Net income (loss) from discontinued operations	—	4	—
Adjusted Net Income (Loss) Available to Common Shareholders	$ (426)	$ 171	$ (983)
Weighted average common shares outstanding	206,056	204,007	202,875
Basic Earnings (Loss) per Share:			
Continuing operations	$ (2.06)	$ 0.82	$ (4.85)
Discontinued operations	—	0.02	—
Basic Earnings (Loss) per Share	$ (2.06)	$ 0.84	$ (4.85)
Diluted Earnings (Loss) per Share:			
Net income (loss) from continuing operations	$ (416)	$ 177	$ (983)
Accrued dividends on preferred stock	(10)	(10)	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	(426)	167	(983)
Net income (loss) from discontinued operations	—	4	—
Adjusted Net Income (Loss) Available to Common Shareholders	$ (426)	$ 171	$ (983)
Weighted average common shares outstanding	206,056	204,007	202,875
Common shares issuable with respect to:			
Stock options	—	195	—
Restricted stock and performance units / shares	—	2,591	—
8% Convertible preferred stock	—	—	—
Adjusted Weighted Average Common Shares Outstanding	206,056	206,793	202,875
Diluted Earnings (Loss) per Share:			
Continuing operations	$ (2.06)	$ 0.81	$ (4.85)
Discontinued operations	—	0.02	—
Diluted Earnings (Loss) per Share	$ (2.06)	$ 0.83	$ (4.85)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):			
Stock Options	119	—	857
Restricted stock and performance shares/units	5,242	2,568	5,719
Convertible preferred stock	5,393	5,393	5,393
Total Anti-Dilutive Securities	10,754	7,961	11,969

Note 19 – Subsequent Events

In January 2019, the Company completed the acquisition of Health Solutions Plus (HSP), a software provider of healthcare payer administration solutions for $90 million and a maximum contingent consideration payment of $7.8 million over two years.

In February 2019, the Company completed the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC for $25 million, subject to delayed transfer of certain assets in some countries pending fulfillment of legal requirements.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

Source: CONDUENT Inc, 10-K, February 28, 2019
Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements

Management is responsible for the integrity and objectivity of all information presented in this Annual Report on Form 10-K. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have access to the Audit Committee.

Disclosure Controls and Procedures

The Company’s management evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of December 31, 2018, the end of the period covered by this Annual Report on Form 10-K. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this Annual Report on Form 10-K, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company’s management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended. Under the supervision and with the participation of our management, including our principal executive officer, principal financial officer and principal accounting officer, we have conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on the above evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2018.

The effectiveness of our internal control over financial reporting as of December 31, 2018 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Part II, Item 8 of this Annual Report on Form 10-K.

Changes in Internal Control over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter ended December 31, 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding directors is incorporated herein by reference to the section entitled “Proposal 1 - Election of Directors” in our definitive Proxy Statement (2019 Proxy Statement) to be filed pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, for our 2019 Annual Meeting of Stockholders. The Proxy Statement is expected to be filed within 120 days after the end of our fiscal year ended December 31, 2018.

The information regarding compliance with Section 16(a) of the Securities and Exchange Act of 1934 is incorporated herein by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” of our 2019 Proxy Statement.

The information required by this Item regarding the Audit Committee, its members and the Audit Committee financial experts is incorporated by reference herein from the subsection entitled “Committee Functions, Membership and Meetings” in the section entitled “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

We have adopted a code of ethics applicable to our principal executive officer, principal financial officer and principal accounting officer. The Finance Code of Conduct can be found on our website at: https://www.conduent.com/corporate-governance/ethics-and-compliance/. Information concerning our Finance Code of Conduct can be found under "Corporate Governance" in our 2019 Proxy Statement and is incorporated here by reference.

Executive Officers of Conduent

The following is a list of the executive officers of Conduent, their current ages, their present positions and the year appointed to their present positions.

Each officer is elected to hold office until the meeting of the Board of Directors held on the day of the next annual meeting of shareholders, subject to the provisions of the by-laws.

Name	Age	Present Position	Year Appointed to Present Position	Conduent Officer Since
Ashok Vemuri*	50	Chief Executive Officer	2017	2017
Allan Cohen	49	Vice President & Chief Accounting Officer	2017	2017
Jeffrey Friedel	54	Executive Vice President & Chief People Officer	2017	2017
James Michael Peffer	57	Executive Vice President, General Counsel & Secretary	2017	2017
Brian J. Webb-Walsh	43	Executive Vice President & Chief Financial Officer	2017	2017

* Member of Conduent Board of Directors

Each of the officers named above has been an officer or an executive of Conduent or its subsidiaries for less than five years.

Mr. Vemuri served as Chief Executive Officer of Xerox Business Services, LLC and an Executive Vice President of Xerox Corporation since July 2016. Mr. Vemuri previously was President, Chief Executive Officer and a member of the Board of Directors of IGATE Corporation. Prior to IGATE, Mr. Vemuri spent 14 years at Infosys Limited, a multinational consulting and IT services company, in a variety of leadership and business development roles.

Prior to joining Conduent, Mr. Cohen served as Senior Vice President and Controller of NBC Universal since 2011. Mr. Cohen also previously served as Vice President, Assistant Controller at Time Warner, Professional Accounting Fellow in the Division of Corporate Finance at the SEC and Senior Manager at PriceWaterhouseCoopers.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Prior to joining Conduent, Mr. Friedel served as Vice President and Head of the Office of Integrity and Compliance at Infosys Limited from January 2016 to September 2016, a global leader in technology services and consulting, where he oversaw SEC compliance, internal investigations, code of conduct, whistleblower, and anti-bribery and export regulations. Mr. Friedel has also previously served as Senior Vice President and General Counsel at IGATE Corporation from June 2014 to December 2015, an IT services and business process outsourcing company which was acquired by CapGemini. Prior to June 2014, Mr. Friedel held a variety of leadership roles at Infosys Limited.

Mr. Peffer served as Vice President, General Counsel and Secretary for Xerox Corporation from August 2016 to December 2016. Prior to this, Mr. Peffer served as Associate General Counsel of Xerox Corporation and Executive Vice President of Xerox Business Services, LLC since 2010. Prior to 2010, Mr. Peffer was Senior Vice President and Deputy General Counsel of ACS from May 2009.

Mr. Webb-Walsh served as the Chief Financial Officer of Xerox Services since January 2016. Prior to this, Mr. Webb-Walsh was Senior Vice President of Finance for the Government Healthcare Group and the Platform Development and Systems Integration Group of Xerox Services. Mr. Webb-Walsh joined Xerox Corporation in 1997 and has held a variety of leadership positions.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item included under the following captions under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement is incorporated herein by reference: “Compensation Discussion and Analysis”, “Summary Compensation Table”, “Grants of Plan-Based Awards in 2018”, “Outstanding Equity Awards at 2018 Fiscal Year-End”, “Option Exercises and Stock Vested in 2018”, “Pension Benefits for the 2018 Fiscal Year”, “Nonqualified Deferred Compensation for the 2018 Fiscal Year”, “Potential Payments upon Termination or Change in Control”, “Summary of Annual Director Annual Compensation, "Compensation Committee Interlocks and Insider Participation” and “Compensation Committee”. The information included under the heading “Compensation Committee Report” in our 2019 Proxy Statement is incorporated herein by reference; however, this information shall not be deemed to be “soliciting material” or to be “filed” with the SEC or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this Item regarding security ownership of certain beneficial owners and management and securities authorized for issuance under equity compensation plans is incorporated herein by reference to the subsections entitled “Ownership of Company Securities,” and “Equity Compensation Plan Information” under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information required by this Item regarding certain relationships and related transactions is incorporated herein by reference to the subsection entitled “Certain Relationships and Related Person Transactions” under “Proposal 1 - Election of Directors” in our 2019 Proxy Statement. The information regarding director independence is incorporated herein by reference to the subsections entitled “Corporate Governance” and “Director Independence” in the section entitled “Proposal 1 - Election of Directors” in our 2019 Proxy Statement.

ITEM 14. PRINCIPAL AUDITOR FEES AND SERVICES

The information required by this Item regarding principal auditor fees and services is incorporated herein by reference to the section entitled “Proposal 2 - Ratification of Election of Independent Registered Public Accounting Firm” in our 2019 Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) (1) Index to Financial Statements and Financial Statement Schedule, incorporated by reference or filed as part of this report:

- Report of Independent Registered Public Accounting Firm including Report on Financial Statement Schedule;
- Consolidated Statements of Income (Loss) for each of the years in the three-year period ended December 31, 2018;
- Consolidated Statements of Comprehensive Income (Loss) for each of the years in the three-year period ended December 31, 2018;
- Consolidated Balance Sheets as of December 31, 2018 and 2017;
- Consolidated Statements of Cash Flows for each of the years in the three-year period ended December 31, 2018;
- Consolidated Statements of Shareholders' Equity for each of the years in the three-year period ended December 31, 2018;
- Notes to the Consolidated Financial Statements;
- Schedule II - Valuation and Qualifying Accounts for the three years ended December 31, 2018; and
- All other schedules are omitted as they are not applicable, or the information required is included in the financial statements or notes thereto.

(2) Supplementary Data:

- Quarterly Results of Operations (unaudited).
- SCHEDULE II

VALUATION AND QUALIFYING ACCOUNTS

For the three years ended December 31, 2018

(in millions)	Balance at beginning of period	Additions charged to expense[1]	Amounts (credited) charged to other income statement accounts [2]	Deductions and other, net of recoveries [3][4]	Balance at end of period
Allowance for Losses:					
2018 Accounts Receivable	$ 2	$ —	$ —	$ (1)	$ 1
2017 Accounts Receivable	7	(1)	—	(4)	2
2016 Accounts Receivable	6	4	—	(3)	7
Tax Valuation Allowance:					
2018 Tax Valuation	35	9	—	—	44
2017 Tax Valuation	24	11	—	—	35
2016 Tax Valuation	38	—	—	(14)	24

(1) Account Receivables: additions charged to expense represent bad debt provisions relate to estimated losses due to credit and similar collectibility issues.
(2) Account Receivables: Other charges (credits) relate to adjustments to reserves necessary to reflect events of non-payment such as customer accommodations and contract terminations.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(3) Account Receivables: Deductions and other, net of recoveries primarily relates to receivable write-offs, but also includes the impact of foreign currency translation adjustments and recoveries of previously written off receivables.

(4) Tax Valuation: Reductions to tax valuation allowance are primarily related to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

(3) The exhibits listed below are filed or incorporated by reference are part of this Form 10-K.

Management contracts or compensatory plans or arrangements listed that are applicable to the executive officers named in the Summary Compensation Table which appears in Registrant's 2019 Proxy Statement or to our directors are preceded by an asterisk (*).

Exhibit No.	
2.1	Separation and Distribution Agreement, dated as of December 30, 2016, by and between Xerox Corporation and Conduent Incorporated.
	Incorporated by reference to Exhibit 2.1 to Registrant's Current Report on Form 8-K dated January 3, 2017. (See SEC File Number 001-37817).
3.1	Restated Certificate of Incorporation of Registrant as of December 23, 2016.
	Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016.
	Incorporated by reference to Exhibit 3.2 to Registrant's Current Report on Form 8-K dated December 23, 2016. (See SEC File Number 001-37817).
4.1(a)	Indenture, dated as of December 7, 2016, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated December 9, 2016. (See SEC File Number 001-37817).
4.1(b)	First Supplemental Indenture, dated as of January 9, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(a) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(c)	Second Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(b) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(d)	Third Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(c) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(e)	Fourth Supplemental Indenture, dated as of June 1, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1(d) to the Registrant's Quarterly Report on Form 10-Q dated August 8, 2018. (See SEC File Number 001-37817).
4.1(f)	Fifth Supplemental Indenture, dated as of July 12, 2018, among Conduent Finance, Inc., Xerox Business Services, LLC, the Guarantors named therein and U.S. Bank National Association, as trustee.
	Incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated July 12, 2018. (See SEC File Number 001-37817).

RESTRICTED STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Restricted Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration the Company agrees as follows:

AWARDS

1. Award of Restricted Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary the number of Restricted Stock Units (individually, a "RSU") as shown on the Award Summary. Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE RESTRICTED STOCK UNITS

2. Entitlement to Shares. As soon as practicable on or after each applicable Vesting Date (as defined below) (or such earlier date provided in Section 9), the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested RSUs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following each applicable Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued as a result of such tax withholding. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of RSUs covered hereby shall be subject to the Employee's continued employment with the Company or a subsidiary or affiliate through the applicable Vesting Date. The Employee shall be eligible to vest in one-third of the shares of Common Stock covered by this Agreement as set forth in the Award Summary on each of December 31, 2019, December 31, 2020 and December 31, 2021 (each, a "Vesting Date").

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Upon the occurrence of an event constituting a Change in Control, notwithstanding anything to the contrary in Section 22(b) of the Plan, the RSUs outstanding on the date of such Change in Control, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such RSUs, and any dividend equivalents with respect thereto, shall be subject to Employee's continued employment with the Company or a subsidiary or an affiliate through each applicable Vesting Date as provided in this Section 3, at which time such RSUs shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee; provided that the RSUs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to a Vesting Date. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on each applicable Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested RSUs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on each applicable Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of RSUs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the RSUs until the date of issuance of a stock certificate to him for such RSUs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the RSUs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, RSUs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a RSU in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on RSUs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than Termination For Good Reason following a Change in Control, the RSUs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(ii) involuntarily ceases to be an employee of the Employer on or after the nine-month anniversary of the grant date of the RSUs and prior to a Change in Control for any reason other than due to death, Disability or a termination for Cause, the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since January 1, 2018, in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. Such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled in accordance with Section 2 within 60 days following the Vesting Date immediately following such termination; provided that such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days following the Vesting Date immediately following such termination] in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the vesting period elapsed prior to such termination;

(v) involuntarily ceases to be an employee of the Employer (A) due to termination for Cause or (B) prior to the nine-month anniversary of the grant date of the RSUs and prior to a Change in Control for any reason other than due to death or Disability, the RSUs shall be cancelled and forfeited on the date of such termination of employment; and

(vi) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination.

(b) Definitions. “Cause” means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company’s Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for “immediate discharge” under the Employer’s Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

"Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

"Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

(c) Divestiture. Notwithstanding the above, the termination of Employee's employment with Employer in connection with the Employer's sale (whether by sale of assets or a subsidiary, or both) of a line of business within which the Employee was employed immediately prior to such sale as determined by the Committee in its sole discretion, that does not constitute a Change in Control, shall be treated as an involuntary termination of employment for purposes of this Agreement and the RSUs shall vest and be paid as provided in Section 9(a)(ii) above, whether or not such termination occurs after the nine-month anniversary of the grant date of the RSUs; provided, however, that, in the event the Employee is offered a comparable position (as determined by the Committee in accordance with the Company's severance policy) with the acquirer of such line of business and does not accept such offer, the RSUs shall be cancelled and forfeited on the date of termination of employment.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the RSUs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of RSUs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the RSUs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting or settlement of RSUs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of RSUs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the RSUs are subject to modification and adjustment under Section 6 of the Plan.

(a) the award of the RSUs is voluntary and occasional and does not create any contractual or other right to receive future grants of RSUs, or benefits in lieu of RSUs, even if RSUs have been granted repeatedly in the past;
(b) all decisions with respect to future RSU awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;
(c) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the RSU award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;
(d) The Employee is voluntarily participating in the Plan;
(e) the RSUs and the shares of Common Stock subject to the RSUs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;
(f) the RSUs and the shares of Common Stock subject to the RSUs are not intended to replace any pension rights or compensation;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(g) the RSUs and the shares of Common Stock subject to the RSUs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(h) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(i) in consideration of the award of the RSUs, no claim or entitlement to compensation or damages shall arise from forfeiture of the RSUs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(j) subject to the provisions in the Plan regarding Change in Control, RSUs and the benefits under the Plan, if any, will not auto-matically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her partici-pation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agree-ment in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corpora-tion" of the Com-pany as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as deter-mined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated busi-ness, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates. In the event that any 60-day period described in Section 9 of this Agreement straddles two calendar years, then any RSUs, and any dividends with respect thereto, that are settled within such 60-day period in accordance with this Agreement shall be settled in the second calendar year.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the RSU award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the RSUs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is nec-essary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

PERFORMANCE STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Performance Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration, the Company agrees as follows:

AWARDS

1. Award of Performance Stock Units. Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary Performance Stock Units (individually, a "PS") as shown on the Award Summary, representing the target number of shares of Common Stock covered by this Agreement (the "Target PSs"). Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE PERFORMANCE STOCK UNITS

2. Entitlement to Shares. As soon as practicable on or after the Vesting Date (as defined below) (or such earlier date provided in Section 9) in connection with the PSs, the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested PSs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following the Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued pursuant to this Agreement. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting. Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of the PSs covered hereby shall be subject to (i) the achievement of the performance goals as set forth in the Award Summary (the "Performance Goals") as determined by the Committee and (ii) the Employee's continued employment with the Company or a subsidiary or affiliate through December 31, 2021 (the "Vesting Date"). In the event the achievement of the Performance Goals is "below threshold" level, then all of the PSs will be forfeited; in the event that achievement of the Performance Goals is between "threshold" and "target" level, then no less than 50% and no more than 100% of the Target PSs will vest; and in the event achievement of the Performance Goals is between "target" and "maximum" level, then no less than 100% and no more than 200% of the Target PSs will vest, in each case as set forth in the Award Summary and subject to the Employee's continued employment through the Vesting Date as described in clause (ii) of the immediately preceding sentence.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Upon the occurrence of an event constituting a Change in Control prior to the Vesting Date, notwithstanding anything to the contrary in Section 22(b) of the Plan, the Performance Goals shall be deemed achieved at target level, but thereafter the PSs, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such PSs, and any dividend equivalents with respect thereto, shall be subject to the Employee's continued employment with the Company or a subsidiary or an affiliate through the Vesting Date, at which time such PSs shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger tax or penalty under Section 409A of the Code, as determined by the Committee; provided that such PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to the Vesting Date or in the event such Change in Control occurs following a termination of the Employee's employment. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on the Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested PSs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on the Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5 . Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6 . Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of PSs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/ Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the PSs until the date of issuance of a stock certificate to him for such PSs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the PSs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, PSs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a PS in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on PSs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than Termination For Good Reason following a Change in Control, the PSs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(ii) involuntarily ceases to be an employee of the Employer on or after the nine-month anniversary of the grant date of PSs and prior to a Change in Control for any reason other than due to death, Disability or a termination for Cause, the number of PSs covered by this Agreement, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. The vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the three-year performance period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the vesting of the PSs shall remain subject to the achievement of the Performance Goals in accordance with Section 3, if such termination of employment occurs prior to a Change in Control and shall be settled on the Vesting Date in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the three-year performance period elapsed prior to such termination;

(v) involuntarily ceases to be an employee of the Employer (A) due to termination for Cause or (B) prior to the nine-month anniversary of the grant date of the PSs and prior to a Change in Control for any reason other than due to death or Disability, the PSs shall be cancelled and forfeited on the date of such termination of employment; and

(vi) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, without proration based on the portion of the three-year performance period elapsed prior to such termination. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within the 60-day period following such termination.

(b) Definitions. "Cause" means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company's Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for "immediate discharge" under the Employer's Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

"Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

"Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

(c) Divestiture. Notwithstanding the above, the termination of Employee's employment with Employer in connection with the Employer's sale (whether by sale of assets or a subsidiary, or both) of a line of business within which the Employee was employed immediately prior to such sale as determined by the Committee in its sole discretion, that does not constitute a Change in Control, shall be treated as an involuntary termination of employment for purposes of this Agreement and the PSs shall vest and be paid as provided in Section 9(a)(ii) above, whether or not such termination occurs after the nine-month anniversary of the grant date of the PSs; provided, however, that, in the event the Employee is offered a comparable position (as determined by the Committee in accordance with the Company's severance policy) with the acquirer of such line of business and does not accept such offer, the PSs shall be cancelled and forfeited on the date of termination of employment.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the PSs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of PSs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the PSs.

11. Responsibility for Taxes. The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting or settlement of the PSs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of PSs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award. In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the PSs are subject to modification and adjustment under Section 6 of the Plan.

(a) the award of the PSs is voluntary and occasional and does not create any contractual or other right to receive future grants of PSs, or benefits in lieu of PSs, even if PSs have been granted repeatedly in the past;
(b) all decisions with respect to future PS awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;
(c) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the PS award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;
(d) The Employee is voluntarily participating in the Plan;
(e) the PSs and the shares of Common Stock subject to the PSs are an extraordinary item that does not constitute compensa-tion of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;
(f) the PSs and the shares of Common Stock subject to the PSs are not intended to replace any pension rights or compensation;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(g) the PSs and the shares of Common Stock subject to the PSs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(h) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(i) in consideration of the award of the PSs, no claim or entitlement to compensation or damages shall arise from forfeiture of the PSs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(j) subject to the provisions in the Plan regarding Change in Control, PSs and the benefits under the Plan, if any, will not auto-matically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award. Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her partici-pation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement. With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agree-ment in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corpora-tion" of the Com-pany as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate. As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as deter-mined by the Committee.

17. Recoupments.

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award. Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated busi-ness, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language. If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

Source: CONDUENT Inc, 10-K, February 28, 2019 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

21. Electronic Delivery and Acceptance. The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement. The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue. The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A. It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates. In the event that any 60-day period described in Section 9 of this Agreement straddles two calendar years, then any PSs, and any dividends with respect thereto, that are settled within such 60-day period in accordance with this Agreement shall be settled in the second calendar year

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability. In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

27. Integration of Terms. Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries. Notwithstanding any provisions in this Agreement, the PS award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements. The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the PSs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is nec-essary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CEO CERTIFICATIONS

I, Ashok Vemuri, certify that:

1. I have reviewed this Annual Report on Form 10-K of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

From time to time, we and our representatives may provide information, whether orally or in writing, including certain statements in this Annual Report on Form 10-K, which are deemed to be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Litigation Reform Act"). These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those expressed or implied herein as anticipated, believed, estimated, expected or intended or using other similar expressions.

In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make.

Such factors include, but are not limited to: termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information, and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our security systems and service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. We do not intend to update these forward-looking statements, except as required by law.

PART I

ITEM 1. BUSINESS

In this Annual Report on Form 10-K, unless the content otherwise dictates, "Conduent", the "Company", "we" or "our" mean Conduent Inc. and its consolidated subsidiaries.

Our Business

Conduent is a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experiences.

On December 31, 2016, Conduent Incorporated (formerly known as the BPO business) spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement between the Company and Xerox Corporation (Separation). As a result of the spin-off, we now operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

We create value for our Commercial and Public Sector clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics.

Our portfolio includes industry-focused service offerings in attractive growth markets such as Healthcare and Transportation, as well as multi-industry service offerings such as Transaction Processing, Human Resources Solutions and Payment Services.

Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation,
complemented by tightly aligned investments. As a result, we aim to deliver profitable growth and margin expansion and to deploy a disciplined capital allocation strategy.

With approximately 90,000 employees globally as of December 31, 2017 , we provide differentiated services to clients spanning small, medium and large businesses and to governments around the world.

Our Transformation

We have a portfolio of businesses that we are optimizing and effectively targeting attractive growth areas in a rapidly evolving business process services industry. We have taken significant actions to improve our profitability and drive growth with a more focused portfolio of services.

Key initiatives include:

- ***Realigned Delivery.*** During 2017 we reorganized the business to better align to our vertical go-to-market strategy and to our global delivery capabilities. We believe this operating structure will allow us to better integrate and tailor business solutions for our customers.
- ***Divested Non-Core Assets.*** We divested five businesses in 2017 for aggregate proceeds of $56 million in cash. These sales enabled us to increase our focus on areas where we have a competitive advantage.
- ***Increased Use of Automation.*** We have developed and deployed a set of advanced software-based automation tools as part of our service delivery operations. These tools reduce the amount of repetitive, manual labor required to deliver many of our services and improve service quality through lower error rates and faster processing times.
- ***Real Estate, Infrastructure and Selling, General and Administrative (SG&A).*** We have significantly reduced the number of leased and owned properties from 462 to 339, reduced our information technology infrastructure costs by streamlining our operations and reduced our SG&A costs from $686 million in 2016 to $615 million in 2017.

We continue to execute on our strategic transformation program to deliver cost savings through infrastructure optimization, labor productivity and automation initiatives, restructuring of unprofitable contracts and other efficiencies. This transformation program has and will enable us to better capitalize on our differentiated service offerings, industry expertise and global delivery excellence and position us for long-term shareholder value creation.

Our Market Opportunity

We estimate our addressable market size in the global business process service industry at approximately $243 billion in 2017 , according to third party industry reports, and we are a leader across several segments of this large, diverse and growing market. Providing business process services is complex and multi-faceted with services that span many industries.

Ongoing competitive pressures and increasing demand for further productivity gains have motivated businesses to outsource elements of their day-to-day operations to accelerate performance and innovation. As a result, our clients have become more focused on their core businesses and the range of outsourced activities has expanded greatly. Increasing globalization has also required many companies to optimize cost structures to retain competitiveness and business process services have become a key component of this strategy.

The ongoing shift to next-generation software and automation technologies is driving greater demand for, and expectation of, efficiency and personalization by the constituents and customers of the businesses and governments we serve. Addressing these business and operational challenges is necessary for business process services companies to capitalize on these trends. In addition, business process services have the potential to meaningfully enhance productivity for businesses and governments and satisfaction for their constituents and customers.

Segments

Our reportable segments correspond to how management organizes and manages the business and are aligned to the industries in which our clients operate, which are Commercial Industries and Public Sector.

- Our *Commercial Industries* segment provides business process services and customized solutions to clients in a variety of industries.
- Our *Public Sector* segment provides government-centric business process services and subject matter experts to U.S. federal, state and local and foreign governments.

Other represents our Government Health Enterprise (HE) Medicaid Platform for all current state clients and our Education business, including our Student Loan business, as well as inter-segment eliminations.

We present segment financial information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference. The discussion below highlights our segment revenues for the year ended December 31, 2017 .

Commercial Industries

Our Commercial Industries segment is our largest segment, with $3.5 billion in revenues in 2017 , representing 59% of total revenues. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include Customer Care, Human Resource Management, Worker's Compensation process management, Finance and Accounting, Workforce Learning Services and Legal Business Services. These services are complemented by innovative industry-specific services such as payment integrity solutions to clients in the Healthcare payer space, care and quality analytics, workflow solutions and software adoption services to Healthcare provider clients, personalized product information for clients in the Automotive industry, digitized source-to-pay solutions for clients in the Manufacturing industry, revenue generation and clinical services for clients in the Pharmaceutical and Life Sciences industries, customer experience and marketing services for clients in the Retail industry, and mortgage and consumer loan processing for clients in the Financial Services industry.

Public Sector

Our Public Sector segment generated revenues of $2.2 billion in 2017 , representing 36% of the total revenues. This segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance program administration, transaction processing and payment services. In order to provide targeted support to our government clients, our Public Sector segment is organized into several primary businesses:

- ***Transportation:*** We provide revenue-generating transportation services to government clients in 27 countries. Our services include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting. These innovative services significantly improve individual travel experiences, optimize how vehicles and goods move efficiently within cities, digitize integrated modes of transportation and help our government clients to better serve their constituents.
- ***Federal, State and Local Government:*** We support our government clients with services targeting key civilian agencies within federal, state and local governments, as well as government administrative offices. Our depth of agency-specific expertise combined with our scale allows us to deliver and manage programs at all levels of government. Our broad set of public sector services includes public assistance program administration such as child support, pension administration, records management, electronic benefits, eligibility and payment cards, unclaimed property, disease management and software offerings in support of federal, state and local government agencies.
- ***Payments:*** With more than $87 billion disbursed annually, we are a leader in government payment disbursements for federally sponsored programs like Supplemental Nutritional Assistance Program (SNAP, a.k.a Food Stamps) and Women, Infant and Children (WIC) as well as government initiated cash disbursements such as child support, unemployment and federal social security. We provide our payment card services which include branded prepaid debit card (Visa and Mastercard), Electronic Benefit Transfer (EBT for SNAP and WIC) and Electronic Child Care to 36 states and the US Treasury with a diversified portfolio consisting of 147 different payment programs nationwide.
- ***Government Healthcare:*** We provide medical management and fiscal agent care management services to Medicaid programs and federally-funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia. Our services include a range of innovative solutions such as Medicaid management fiscal agent, pharmacy benefits management and clinical program management. These services help states optimize their costs by streamlining access to care and improve patient health outcomes through population health management and help families in need by improving beneficiary support.

Other

Other includes our Government HE Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients, our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations. In 2017 , Other accounted for $311 million of revenues, representing 5% of total revenues.

Our Service Offerings

Our portfolio of business process services includes a combination of industry-specific and multi-industry
services. We have subject matter experts who are responsible for implementing each of these services, delivering service excellence to clients, ensuring best practices to improve cost competitiveness, innovating our next generation offerings and supporting worldwide sales.

Industry-Specific Services

Commercial Industry-Specific Services
Examples of the services we offer include personalized product information for automotive clients, digitized source to pay solutions for manufacturing clients, care integration and coordination, member health risk assessments and payment integrity (such as recovering claims from the appropriate payers) for healthcare clients, mortgage and consumer loan processing for financial institution clients and customized workforce learning solutions for aerospace clients.

Public Sector-Specific Services

Transportation Services : The transportation services we offer include support for electronic toll collection, public transit, parking, photo enforcement and commercial vehicle operations. Across these offerings, we manage key processes on behalf of our clients including fee collection, compliance and violation management, notifications, statements and reporting.

Other Public Sector Services : Our broad set of public sector services includes public assistance program administration, pension administration, records management, disease management and software offerings in support of federal, state and local government agencies. It also includes fiscal agent administrative services and providing management information systems in support of Medicaid programs or pharmacy benefits management for Government Healthcare clients.

Multi-Industry Services

Transaction Processing Services
We help our clients to improve communications with their customers and constituents, whether it is on paper, on-line or through other communication channels. By supporting our clients' customer communication processes, we help our clients deliver a better experience to their customers and operate with improved efficiency and greater effectiveness.

We offer a broad array of flexible transaction processing services that include data entry, scanning, image processing, enrollment processing, claims processing, high volume offsite print and mail services and file indexing. Our multi-channel communication capabilities (including secure print, email, text and web) enable the delivery of personalized and targeted communications that are designed to elicit the desired response from customers or other end-users (*e.g.* , on-time bill payment and increased marketing response rates). Our service offerings utilize both proprietary and commercially available third-party technologies, combined with our expertise to ensure continued quality and innovation for our clients.

Payment Services
Prepaid Cards : We are an extensive provider of VISA and MasterCard prepaid debit cards, as well as other electronic payment cards in support of U.S. government benefit programs including Social Security, the Supplemental Nutrition Assistance Program (formerly known as food stamps), the Special Supplemental Nutrition Program for Women, Infants and Children and other specialized Electronic Benefits Transfer programs. Our secure payment services reduce fraud and eliminate paper checks by disbursing electronic payments directly to end users, even those without bank accounts. Our proprietary processing platform, significant operational expertise, advanced fraud analytics and adoption of Europay, MasterCard and Visa chip-enabled technology put us in the forefront of the Prepaid Card industry.

Health Savings Accounts (HSA) : We provide clients with a simplified approach to help their employees manage their health care costs and accumulate wealth with tax-advantaged accounts. We consolidate administration of all health spending accounts onto one common platform, including Health Savings Accounts, Health Reimbursement Arrangements, Flexible Spending Accounts and Health Incentive Accounts. By consolidating and integrating the management of health spending accounts, we help our clients improve benefit enrollment and account opening, consolidate customer service, simplify communications and streamline account funding and management. As of December 31, 2017, we had approximately 1 million active HSA accounts and $2.3 billion of assets under management within our HSA offering.

Child Support Payments : We are an industry leader of U.S. State Government Disbursement Units for child support payments. We collect payments from non-custodial parents via check, credit card and transfers from employee payroll systems and disburse payments to the beneficiaries.

Customer Care Services
We offer customer care services that help our clients provide their own customers with a superior experience. Our service offerings range from answering simple billing questions to providing complex technical and customer support. We also offer both inbound and outbound sales and cross-selling programs through our contact center operations. We provide these services through multiple channels, including phone, SMS, chat, interactive voice response, social networks and email. We augment our customer care agents' efficiency and effectiveness with advanced technologies that help them resolve customer needs quickly and with consistent high quality.

Human Resources Services
We help our clients to support their employees at all stages of employment from initial on-boarding through retirement. We offer clients customized advisory, technology and administrative services that help them more effectively involve employees in their health insurance, retirement plan and compensation programs. We design
and administer employee benefit programs that attract, reward and retain workforce talent through engaging technologies and decision support tools. Our service offerings include; cloud-based HR outsourcing; payroll and benefits administration; health savings and tax efficient account administration; and administration of, and consultation regarding, our proprietary private health care exchange, which allows employees to select from a set of predefined providers and also provides market-leading health and benefit decision support tools and ongoing health and wellness management.

Finance and Accounting Services
We serve clients by managing their critical finance, accounting and procurement processes. Our services include general accounting and reporting, billing and accounts receivable and purchasing, accounts payable and expense management services. We also offer wholesale and retail lockbox services and process auto and mortgage loans in the United States. With a global, dedicated team, we manage the core, end-to-end process areas of finance, accounting and procurement for some of the world's most recognized brands.

Legal Business Services
We have been providing client support to law firms and corporate legal departments for over 20 years. We work across the litigation lifecycle, with particular focus on the legal discovery and review process. Our offerings include litigation support services, compliance and risk review and managed services support.

Workforce Learning Services
We are a provider of end-to-end learning services, designed to accelerate the productivity and development of our clients' employees and extended work forces. Our global presence, superior innovation and expertise allow us to deliver performance-based learning services tailored to our clients' unique strategic business goals. Our offerings include learning strategy and assessment, instructor management and learning administration.

Applied Automation and Analytics Solutions
Many of our service offerings described above incorporate our applied automation and analytics solutions to increase their value and effectiveness to clients across all industries. We deploy these solutions to personalize millions of interactions, optimize service delivery and simplify complex processes. For example, our customer care services harness the power of applied analytics and automation to help our customer service agents work more efficiently across different communication channels. Our applied automation solutions track and learn the most efficient means to address common customer service needs as they occur in real time so that we can solve the same problem faster the next time around. The combination of applied automation and analytics allows us to identify new service demand patterns and opportunities quickly so that we can proactively address them on behalf of our clients.

Our Competitive Strengths

We possess a number of competitive strengths that distinguish us from our competitors, including:

Leadership in attractive growth markets. We are a leader in business process services. Our clients continue to outsource key business processes to accelerate performance and innovation. Additionally, clients are moving beyond services for back-office functions in order to drive customer satisfaction and loyalty, as well as productivity and efficiency. The increase in globalization and cost competition continues to accelerate, forcing companies to seek ways to stay ahead of the competition. These factors, along with clients and their customers demanding more personalized, seamless and secure solutions, are collectively driving the ongoing shift to next-generation software and automation technologies.

- ***Healthcare.*** U.S. healthcare spending is estimated to have represented greater than 17.9% of GDP in 2016 and is continuing to grow. As one of the most regulated industries, healthcare providers must balance increased utilization with heightened complexity and new financial pressures such as government budget challenges to significantly reduce reimbursements, reimbursement penalties for hospital readmissions and a shift from fee-for-service to “value-based” population health management. We are widely recognized by industry analysts as a leader in healthcare payer operations, serving all 20 of the top 20 U.S. managed healthcare plans and providing administrative and care management solutions to Medicaid programs and federally funded U.S. government healthcare programs in 24 states, Puerto Rico and the District of Columbia.

- ***Transportation.*** Traffic congestion continues to increase as urbanization and changing demographics take hold globally. As a result, optimized transportation systems are becoming critical to increase efficiency while maintaining strict safety requirements. Electronic toll collection, public transit and parking all represent key growth drivers as governments at all levels increasingly focus on transportation infrastructure. We maintain approximately 54% market share position in electronic toll collection in the United States based on toll revenues collected through our systems in 2017. We are also one of the largest U.S.-based commercial vehicle operations service providers in the United States with approximately 51% market share based on 2017 revenues, and we are an award-winning innovator in parking management.

- ***Transaction Processing.*** We provide high volume print and mail services, enrollment processing and personalized and targeted marketing and communications, to large corporations and we believe we are a leading provider in this market.

- ***Prepaid Cards*** : We are the leading provider of prepaid payment card services in support of the U.S. government prepaid card services market.

Global delivery expertise. Our scale and global delivery network enables us to deliver our proprietary technology, differentiated service offerings and service capabilities expertly to clients around the world. We have operations in India, Philippines, Jamaica, Guatemala, Mexico, Romania, Dominican Republic and several locations within the United States, giving our customers the option for "onshore" or "offshore" outsourced business process services. This global delivery model enables us to leverage lower-cost production locations, consistent methodologies and processes, time zone advantages and business continuity plans. As of December 31, 2017 , our employee location mix was approximately 48% in North America, 20% in Latin America / Caribbean, 22% in Asia Pacific and 10% in Europe / Middle East / Africa .

Differentiated suite of multi-industry service offerings at scale. We manage transaction-intensive processes and work directly with end-users to meet their needs often in real-time. We are unique in our ability to offer our clients these business process services on a large scale and with high quality. Additionally, we are able to leverage our multi-industry services to bring the same scale and quality to our portfolio of industry-specific service offerings, such as healthcare claims management, employee benefits management and public transit fare collection.

Innovation and development. We innovate by developing and acquiring new technologies and capabilities that improve business processes. We are constantly creating the next generation of simple, automated and touchless business processes to drive lower costs, higher quality and increased end-user satisfaction. Analytics allow us to transform big data into useful information that helps identify operational improvements and constituent insights. Additionally, we leverage robotic process automation and predictive analytics and combine this with our deep subject matter expertise to create intelligent services that improve security, increase speed and improve accuracy, quality and regulatory compliance, and uncover insights that support better decision making and outcomes for our clients.

Stable recurring revenue model supported by a loyal, diverse client base. We have a broad and diverse base of clients in 31 countries across geographies and industries, including Fortune 1000 companies, small and midsize businesses and governmental entities. Our close client relationships and successful client execution support our stable recurring revenue model and high renewal rates. Excluding our strategic decision not to renew certain contracts, the renewal rate for the year ended December 31, 2017 was 94% and above our target range of 85%-90%. Including all contracts, renewal rate would have been approximately 87% .

Our Strategies

Our strategy is to drive leadership in attractive markets by leveraging and building on our competitive strengths. We intend to execute our strategy through increased business portfolio focus and operating discipline, enhanced sales and delivery capabilities and tightly aligned investments. Our strategy is designed to deliver value by delivering profitable growth, expanding operating margins and deploying a disciplined capital allocation strategy.

Specific elements of our strategy include the following:

Expand within attractive industries. The industries in which we operate have attractive revenue growth rates, generally in the mid-single digits. We intend to sharpen our focus and expand our business in industries with strong growth and profitability characteristics. We will employ a disciplined approach to portfolio management to complement our competitive strengths and build depth and breadth in our core businesses. Within the Healthcare industry, we intend to leverage our data analytics, differentiated service offerings and industry know-how to continue to service payer, provider and core government healthcare clients. Within the Transportation industry, we will leverage our global, end-to-end platforms to continue to deliver seamless travel experiences while providing back-end Transaction Processing and Call Center services for government clients globally.

Optimize and strengthen our services capabilities. We plan to optimize our services capabilities and strengthen several core areas, including Transaction Processing, Finance and Accounting and Prepaid Card services by building out our services offerings and continuing to improve our competitive strengths. We have begun to divest non-core assets, refocused our business towards higher margin growing segments and consolidated delivery operations to enable greater productivity. Within Transaction Processing, we intend to continue to build industry-specific service offerings and advance inbound and outbound processing capabilities. Within Customer Experience, we intend to capitalize on our global scale, cost efficiencies and our ability to provide seamless communications between our clients and their end-users through traditional (e.g., voice) and digital (e.g . , web, mobile and Internet of Things) channels. In Prepaid Cards, we plan to continue to leverage our scalable platform to help our clients simplify their payment disbursement processes.

Continue to advance next-generation platforms and capabilities. We intend to maintain our focus on innovation to create next-generation solutions aligned with our clients' future needs and our growth strategies. We plan to advance our current platforms, further automate and personalize business processes and enhance data analytics capabilities to deliver value-added services for our clients.

Engage, develop and support our people. We intend to increasingly develop our employees by investing in training, processes and systems to equip them with modern tools that enable them to perform their jobs more efficiently. Furthermore, we plan to strengthen our sales teams throughout improved and optimized coverage and effective talent management.

Competition

Although we encounter competition in all areas of our portfolio, we lead across many areas of our principal businesses. We compete on the basis of technology, performance, price, quality, reliability and customer service and support. In the current political environment in the U.S. and other territories, we also consider our "onshore" delivery capacity to be a competitive advantage. We participate in a highly competitive and rapidly evolving market, driven by changes in industry standards and demands of customers to become more efficient. Our competitors range from large international companies to relatively small firms. Our competitors include:

- Large multinational service providers such as CGI Group, Accenture, Aon Hewitt, Cognizant, Hewlett-Packard Enterprise, IBM, Teletech and Teleperformance;
- Traditional Business Process Outsourcing companies such as Genpact, ELX Services, Exela Technologies and WNS Global Services;
- Payroll processing and human capital management providers such as ADP and Paychex;
- Healthcare-focused IT and service solutions providers such as Cerner and Maximus;
- U.S. Federal focused government services such as CACI International and DXC Technology;
- Transportation multi-nationals such as Roper/Transcore, Cubic and Kaptsh; and
- Smaller niche business processing service providers and in-house departments that perform functions that could be outsourced to us.

Sales and Marketing

We market our business process services to both potential and existing clients through our worldwide sales force and our business development team. Additionally, we have dedicated “solution architects” who work with clients to better understand their situation and develop a custom-tailored solution to meet their unique needs.

Our sales and marketing strategy is to go to market by industry to deliver key industry-specific and multi-industry service offerings to our clients. We focus on developing new prospects through market research and analysis, renewing expiring contracts and leveraging existing client relationships to offer additional services. We leverage our broad, multi-industry service offerings to package solutions through enterprise selling, while maintaining a disciplined approach to pricing and contracting. Our sales efforts typically involve extended selling cycles and our expertise in specific industries is critical to winning new business.

Our Geographies

We provide services globally and we have a diversified geographic delivery network, including a significant presence within the U.S. In 2017 , approximately 12% of our revenues were generated by clients outside the United States. In 2017 , our revenues by geography were as follows: $5,303 million in the United States (88% of total revenues), $538 million in Europe (9% of total revenues) and $181 million from the rest of the world (3% of total revenues). We present geographical information in Note 2 – Segment Reporting to our Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K, which is incorporated herein by reference.

Innovation and Research and Development

Our innovation and research and development (R&D) capabilities are critical to our client value proposition and competitive positioning. Our investments in innovation align with our growth strategies and are driven by a view of future needs and required competencies developed in close partnership with our clients and R&D partners. We are investing in attractive markets, such as healthcare and transportation, and building on proven platforms to create services that distinguish us from our competitors.

Our innovation and R&D are focused on three key areas: automation, personalization and analytics.

Automation—Create simple, automated and touchless business processes to drive lower cost, higher quality and increased agility. Businesses require agility to quickly respond to market changes and new customer requirements. To enable greater business process agility, our R&D goals are to simplify, automate and enable business processes via flexible platforms that run on robust and scalable infrastructures. Automation of business processes benefits from our strong image, video and robotic processing, as well as our machine learning capabilities. Application of these methods to business processes enables technology to perform tasks that today are performed manually. Examples include providing automation solutions in transportation by aggregating and automatically applying business rules to simplify toll payments, using our state-of-the-art video and image analytics to reduce the need for manual review of license plates in tolling and toll adjustment scenarios, analyzing data on eligibility claims and checking for correctness on applications. The scope of automation is applied across our portfolio of services and is a key element of our ongoing strategy of modern, efficient services.

Personalization—Augment humans by providing secure, real-time and context-aware personalized products and services. Whether business correspondence, personal communication, manufactured items or information service, personalization increases the value to the recipient. Our R&D investments lead to technologies that improve the efficiency, economics and relevance of business services, such as customer care and health and welfare services. In our current customer care service offerings, the human touch is seamlessly added as our software automatically takes telephony data and merges it with customer records pulled from multiple sources to seamlessly create targeted scripts and flows. This allows the agent to have the caller's data at their fingertips and provide a more personal experience to the customer—whether on the phone or online. In toll systems, our systems automatically pull up a customer's name, verify their information and prompt them for unpaid tolls. In transit systems, our mobile app aggregates and calculates the time, cost, carbon footprint and health benefits from walking, biking, driving, parking and taking public transit. For health and welfare, our systems provide state of the art personalized delivery to ensure the best utilization of funds for the neediest populations.

Analytics—Transform big data into useful information to support better decision making. Competitive advantage can be achieved by better utilizing available and real-time information. Today, information resides in an ever increasing universe of servers, repositories and formats. The vast majority of information is unstructured, including text, images, voice and videos. We seek to better manage large data systems in order to extract business insights to provide our clients with actionable recommendations and new services. Tailoring these methods to various industry applications leads to new customer value propositions. In hospitals, we mine usage and clinical indicators to improve patient experiences. We also help our healthcare clients identify waste and fraud by identifying networks of providers and patients with suspicious behavior, such as sudden and dramatic increases in a provider's level of business or unusual or illogical patient treatment sequences. In transportation, we enable transport and parking operators to better understand and predict commuter needs, including adherence to schedules, passenger loading levels, car park utilization rates and the impact of varying factors such as weather and schedule variations. In our card payment services business, we perform geo location analytics to predict potential fraud behaviors to assure monies are being distributed to the intended recipients.

Intellectual Property

Our general policy is to seek patent protection for those inventions likely to be incorporated into our products and services or where obtaining such proprietary rights will improve our competitive position. We own approximately 1,024 patents and pending applications. Our patent portfolio evolves as new patents are awarded to us and as older patents expire. These patents expire at various dates, generally 20 years from their original filing dates. While we believe that our portfolio of patents and applications has value, in general no single patent is essential to our business or any individual segment. In addition, any of our proprietary rights could be challenged, invalidated or circumvented, or may not provide significant competitive advantages.

Our business relies on software provided to an approximately equal extent, by both internal development and external sourcing to deliver our services in our businesses. With respect to internally developed software, we claim copyright on all such software, registering works which may be accessible to third parties. In addition, we rely on maintaining source code confidentiality to assure our market competitiveness. With respect to externally sourced software, we rely on contracts assuring our continued access for our business usage.

In the United States, we own 132 trademarks, which are either registered or applied for, reflecting the many businesses we participate in. These trademarks may have a perpetual life, subject to renewal every 10 years and may be subject to cancellation or invalidation based on certain use requirements and third-party challenges, or on other grounds. We vigorously enforce and protect our trademarks.

People and Culture

We draw on the business and technical expertise of our talented and diverse global workforce to provide our clients with high-quality services. Our business leaders bring a strong diversity of experience in our industry and a track record of successful performance and execution.

Conduent established its own diversity and inclusion program post-separation, which is overseen by Conduent's human resources department. Conduent promotes understanding and inclusion through a comprehensive set of diversity initiatives and strategies, including addressing under-representation by identifying shortfalls and developing action plans to close those gaps and through work-life programs that assist employees in certain aspects of their personal lives. Additionally, Conduent informs and educates all employees on diversity programs, policies and achievements. As an independent company, we intend to continue our commitment to diversity and inclusion and implement similar policies and programs.

In the United States, Conduent complies with Equal Employment Opportunity guidelines and all applicable federal, state and local laws that govern the hiring and treatment of its employees.

As of December 31, 2017 , we had approximately 90,000 employees globally, with 48% located in the United States and the remainder located primarily in India, Philippines, Jamaica, Guatemala and Mexico.

Training and Talent Development
We believe our people are our most important asset, which is why we invest in employee growth and development programs. We are focused on building a workplace where our people can do their best work and have access to the tools and resources they need to perform their jobs more effectively. We are building a culture of learning and have shifted from delivering training to incorporating learning into day-to-day work.

We have a strong performance management system in place that requires all employees to engage with their managers on goal-setting and performance feedback, enabling personal and professional development. There is a strong emphasis on mentorship and coaching, both formal and informal, to help employees get to the next level in their careers. We enable this by developing management capability for our front line leaders to ensure they are able to coach and mentor their teams and engage in constructive and continuous two-way dialogue.

Corporate Ethics
Our commitment to business ethics represents more than a declaration to do the right thing. It has become an integral part of the way we do business. We operate according to our ethics and compliance program, which is designed to meet general governance and specific industry and regulatory requirements with a focus on values, culture and performance with integrity. Conduent has a business ethics program, which is overseen by the business ethics office, and a code of business conduct (Code), which serves as the foundation of our business ethics program. The Code makes clear Conduent’s expectations for ethical leadership, performance with integrity and compliance with company policies and the law. In addition, the Code embodies and reinforces Conduent’s commitment to integrity and helps employees resolve ethics and compliance concerns consistent with operating principles and legal and policy controls. In addition, as Conduent employees, our employees are required to complete business ethics training annually and we periodically solicit their input to gauge the state of Conduent’s ethical culture and help identify areas for improvement.

Our directors must act in accordance with our Code of Business Conduct and Ethics for Members of the Board; our principal executive officer, principal financial officer and principal accounting officer, among others, must act in accordance with our Finance Code of Conduct; and all of our executives and employees must act in accordance with our Code of Business Conduct. Each of these codes of conduct can be accessed through our website at www.conduent.com/corporate-governance. They are also available to any shareholder who requests them in writing addressed to Conduent Incorporated, 100 Campus Drive Suite 200, Florham Park, NJ 07932, Attention: Corporate Secretary. We will disclose any future amendments to, or waivers from, provisions of our Code of Business Conduct and Ethics for members of the Board and, our Code of Business Conduct and our Finance Code of Conduct for our officers on our website as promptly as practicable, and consistent with the requirements of applicable SEC and NYSE rules.

Seasonality

Our revenues can be affected by various factors such as our clients' demand pattern for our services. These factors have historically resulted in higher revenues and profits in the fourth quarter.

Other

Conduent Incorporated is a New York corporation, organized in 2016. Our principal executive offices are located at 100 Campus Drive, Florham Park, New Jersey 07932. Our telephone number is (844) 663-2638.

In the Investor Information section of our Internet website, you will find our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. We make these documents available as soon as we can after we have filed them with, or furnished them to the U.S. Securities and Exchange Commission (SEC).

Our Internet address is www.conduent.com.

ITEM 1A. RISK FACTORS

Our government contracts are subject to termination rights, audits and investigations, which, if exercised, could negatively impact our reputation and reduce our ability to compete for new contracts.

A significant portion of our revenues is derived from contracts with U.S. federal, state and local governments and their agencies, and some of our revenues are derived from contracts with foreign governments and their agencies. Government entities typically finance projects through appropriated funds. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt or funding constraints, such as those recently experienced in the United States and Europe, could result in lower governmental sales and in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Additionally, if the government discovers improper or illegal activities or contractual non-compliance (including improper billing), we may be subject to various civil and criminal penalties and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with the government. Any resulting penalties or sanctions could materially adversely affect our results of operations and financial condition. Moreover, government contracts are generally subject to audits and investigations by government agencies. If the government finds that we inappropriately charged any costs to a contract, the costs are not reimbursable or, if already reimbursed, the cost must be refunded to the government. Further, the negative publicity that could arise from any such penalties, sanctions or findings in such audits or investigations could have an adverse effect on our reputation in the industry and reduce our ability to compete for new contracts and could materially adversely affect our results of operations and financial condition.

We derive significant revenue and profit from commercial and government contracts awarded through competitive bidding processes, including renewals, which can impose substantial costs on us, and we will not achieve revenue and profit objectives if we fail to accurately and effectively bid on such projects.

Many of these contracts are extremely complex and require the investment of significant resources in order to prepare accurate bids and proposals. Competitive bidding imposes substantial costs and presents a number of risks, including: (i) the substantial cost and managerial time and effort that we spend to prepare bids and proposals for contracts that may or may not be awarded to us; (ii) the need to estimate accurately the resources and costs that will be required to implement and service any contracts we are awarded, sometimes in advance of the final determination of their full scope and design; (iii) the expense and delay that may arise if our competitors protest or challenge awards made to us pursuant to competitive bidding and the risk that such protests or challenges could result in the requirement to resubmit bids and in the termination, reduction or modification of the awarded contracts; and (iv) the opportunity cost of not bidding on and winning other contracts we might otherwise pursue. If our competitors protest or challenge an award made to us on a government contract, the costs to defend such an award may be significant and could involve subsequent litigation that could take years to resolve.

Our ability to recover capital and other investments in connection with our contracts is subject to risk.

In order to attract and retain large outsourcing contracts, we sometimes make significant capital and other investments to enable us to perform our services under those contracts, such as purchases of information technology equipment, facility costs, labor resources and costs incurred to develop and implement software. The net book value of certain assets recorded, including a portion of our intangible assets, could be impaired, and our results of operations and financial condition could be materially adversely affected in the event of the early termination of all or a part of such a contract or a reduction in volumes and services thereunder for reasons such as a customer's or client's merger or acquisition, divestiture of assets or businesses, business failure or deterioration or a customer's or client's exercise of contract termination rights.

We rely to a significant extent on third-party providers, such as subcontractors, a relatively small number of primary software vendors, utility providers and network providers; if they cannot deliver or perform as expected or if our relationships with them are terminated or otherwise change, our results of operations and financial condition could be materially adversely affected.

Our ability to service our customers and clients and deliver and implement solutions depends to a large extent on third-party providers such as subcontractors, a relatively small number of primary software vendors, software application developers, utility providers and network providers meeting their obligations to us and our expectations in a timely, quality manner. Our results of operations and financial condition could be materially adversely affected and we might incur significant additional liabilities if any of our third-party providers do not meet these obligations or our or our clients' expectations or if they terminate or refuse to renew their relationships with us or were to offer their products to us with less advantageous prices and other terms than we previously had.

Failure to deliver on our contractual obligations properly and on time could materially adversely affect our results of operations and financial condition.

Our business model depends in large part on our ability to retain existing and attract new work from our base of existing clients, as well as on relationships we develop with our clients so that we can understand our clients' needs and deliver solutions and services that are tailored to meet those needs. In order for our business to grow, we must successfully manage the provision of services under our contracts. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, then we could incur additional costs to address the situation, the profitability of that work might be impaired and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client or obtain new work from other potential clients. In particular, many of our contracts with non-government clients may be terminated by the client, without cause, upon specified advance notice, so clients who are not satisfied might seek to terminate existing contracts prior to their scheduled expiration date, which may result in our inability to fully recover our up-front investments. In addition, clients could direct future business to our competitors. We could also trigger contractual credits to clients or a contractual default. Failure to properly transition new clients to our systems, properly budget transition costs or accurately estimate contract operational costs could result in delays in our contract performance, trigger service level penalties, impair fixed or intangible assets or result in contract profit margins that do not meet our expectations or our historical profit margins.

In addition, we incur significant expenditures for the development and construction of system software platforms needed to support our clients' needs. Our failure to fully understand client requirements or implement the appropriate operating systems or databases or solutions which enable the use of other supporting software may delay the project and result in cost overruns or potential impairment of the related software platforms, which could materially adversely affect our results of operations and financial condition.

We face significant competition and our failure to compete successfully could materially adversely affect our results of operations and financial condition.

To remain competitive, we must develop services and applications; periodically enhance our existing offerings; remain cost efficient; and attract and retain key personnel and management. If we are unable to compete successfully, we could lose market share and important customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Our significant indebtedness could materially adversely affect our results of operations and financial condition.

We have and will continue to have a significant amount of debt and other obligations. Our substantial debt and other obligations could have important consequences. For example, it could (i) increase our vulnerability to general adverse economic and industry conditions; (ii) limit our ability to obtain additional financing for future working capital, capital expenditures, acquisitions and other general corporate requirements; (iii) require us to dedicate a substantial portion of our cash flows from operations to service debt and other obligations thereby reducing the availability of our cash flows from operations for other purposes; (iv) limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate; (v) place us at a competitive disadvantage compared to our competitors that have less debt; and (vi) become due and payable upon a change in control. If new debt is added to our current debt levels, these related risks could increase.

Our ability to make payments on and to refinance our indebtedness, including the debt incurred in connection with our spin-off, as well as any future debt that we may incur, will depend on our ability to generate cash in the future from operations, financings or asset sales. Our ability to generate cash is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

The terms of our indebtedness may restrict our current and future operations, particularly our ability to incur debt that we may need to fund initiatives in response to changes in our business, the industries in which we operate, the economy and governmental regulations.

The terms of our indebtedness include a number of restrictive covenants that impose significant operating and financial restrictions on us and our subsidiaries and limit our ability to engage in actions that may be in our long-term best interests. These may restrict our and our subsidiaries' ability to take some or all of the following actions:

- incur or guarantee additional indebtedness or sell disqualified or preferred stock;
- pay dividends on, make distributions in respect of, repurchase or redeem, capital stock;
- make investments or acquisitions;
- sell, transfer or otherwise dispose of certain assets, including accounts receivable;
- create liens;
- enter into sale/leaseback transactions;
- enter into agreements restricting the ability to pay dividends or make other intercompany transfers;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our or our subsidiaries' assets;
- enter into transactions with affiliates;
- prepay, repurchase or redeem certain kinds of indebtedness;
- issue or sell stock of our subsidiaries; and/or
- significantly change the nature of our business.

As a result of all of these restrictions, we may be:

- limited in how we conduct our business and pursue our strategy; unable to raise additional debt financing to operate during general economic or business downturns; or
- unable to compete effectively or to take advantage of new business opportunities.

A breach of any of these covenants, if applicable, could result in an event of default under the terms of this indebtedness. If an event of default occurs, the lenders would have the right to accelerate the repayment of such debt and the event of default or acceleration may result in the acceleration of the repayment of any other of our debt to which a cross-default or cross-acceleration provision applies. Furthermore, the lenders of this indebtedness may require that we pledge our assets as collateral as security for our repayment obligations. If we were unable to repay any amount of this indebtedness when due and payable, the lenders could proceed against the collateral that secures this indebtedness. In the event our creditors accelerate the repayment of our borrowings, we may not have sufficient assets to repay such indebtedness, which could materially adversely affect our results of operations and financial condition.

Our business is dependent on continued interest in outsourcing.

Our business and growth depend in large part on continued interest in outsourced business process services. Outsourcing means that an entity contracts with a third party, such as us, to provide business process services rather than perform such services in-house. There can be no assurance that this interest will continue, as organizations may elect to perform such services themselves and/or the business process outsourcing industry could move to an as-a-Service model, thereby eliminating traditional business process outsourcing tasks. A significant change in this interest in outsourcing could materially adversely affect our results of operations and financial condition. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

Our profitability is dependent upon our ability to obtain adequate pricing for our services and to improve our cost structure.

Our success depends on our ability to obtain adequate pricing for our services that will provide a reasonable return to our shareholders. Depending on competitive market factors, future prices we obtain for our services may decline from previous levels. If we are unable to obtain adequate pricing for our services, it could materially adversely affect our results of operations and financial condition. In addition, our contracts are increasingly requiring tighter timelines for implementation as well as more stringent service level metrics. This makes the bidding process for new contracts much more difficult and requires us to adequately consider these requirements in the pricing of our services.

In order to meet the service requirements of our customers, which often includes 24/7 service, and to optimize our employee cost base, including our back-office support, we often locate our delivery service and back-office support centers in lower-cost locations, including several developing countries. Concentrating our centers in these locations presents a number of operational risks, many of which are beyond our control, including the risks of political instability, natural disasters, safety and security risks, labor disruptions, excessive employee turnover and rising labor rates. Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of such centers outside of the United States could materially adversely affect our results of operations and financial condition. These risks could impair our ability to effectively provide services to our customers and keep our costs aligned to our associated revenues and market requirements.

Our ability to sustain and improve profit margins is dependent on a number of factors, including our ability to continue to improve the cost efficiency of our operations through such programs as robotic process automation, to absorb the level of pricing pressures on our services through cost improvements and to successfully complete information technology initiatives. If any of these factors adversely materialize or if we are unable to achieve and maintain productivity improvements through restructuring actions or information technology initiatives, our ability to offset labor cost inflation and competitive price pressures would be impaired, each of which could materially adversely affect our results of operations and financial condition.

We may be subject to claims of infringement of third-party intellectual property rights which could adversely affect our results of operation and financial condition.

We rely heavily on the use of intellectual property. We do not own a significant portion of the software that we use to run our business; instead we license this software from a small number of primary vendors. If these vendors assert claims that we or our clients are infringing on their software or related intellectual property, we could incur substantial costs to defend these claims, which could materially adversely affect our results of operations and financial condition. In addition, if any of our vendors' infringement claims are ultimately successful, our vendors could require us to (i) cease selling or using products or services that incorporate the challenged software or technology, (ii) obtain a license or additional licenses from our vendors or (iii) redesign our services which rely on the challenged software or technology. In addition, we may be exposed to claims for monetary damages. If we are unsuccessful in defending an infringement claim and our vendors require us to initiate any of the above actions, or we are required to pay monetary damages, then such actions could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to individually identifiable information and personal health information, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and negatively impact our operations.

We receive, process, transmit and store information relating to identifiable individuals, both in our role as a service provider and as an employer. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations designed to protect both individually identifiable information as well as personal health information, including the Health Insurance Portability and Accountability Act of 1996, as amended ("HIPAA") and the HIPAA regulations governing, among other things, the privacy, security and electronic transmission of individually identifiable health information, and the European Union Directive on Data Protection (Directive 95/46/EC). The EU General Data Protection Regulation (GDPR) replaces the Data Protection Directive 95/46/EC (with an enforcement date of May 25, 2018) and is designed to harmonize data privacy laws across Europe, to protect and empower all EU citizens data privacy, to reshape the way organizations across the region approach data privacy and will have a significant impact on how we process and handle certain data. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of individually identifiable information and these laws have been subject to frequent changes, and new legislation in this area may be enacted at any time. For example, the invalidation of the U.S.-EU Safe Harbor regime and the emerging GDPR will require us to implement alternative mechanisms in order for some of our data flows from Europe to the United States to comply with applicable law. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to obtain and process information and allegations by our customers and clients that we have not performed our contractual obligations, any of which could materially adversely affect our results of operations and financial condition.

We are subject to laws of the United States and foreign jurisdictions relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions, and failure to comply with those laws, whether or not inadvertent, could subject us to legal actions and materially adversely affect our results of operations and financial condition.

We process, support and execute financial transactions, and disburse funds, on behalf of both government and commercial customers, often in partnership with financial institutions. This activity includes receiving debit and credit card information, processing payments for and due to our customers and disbursing funds on payment or debit cards to payees of our customers. As a result, we are subject to numerous United States (both federal and state) and foreign jurisdiction laws and regulations, including the Electronic Fund Transfer Act, as amended, the Currency and Foreign Transactions Reporting Act of 1970 (commonly known as the Bank Secrecy Act), as amended, the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (including the so-called Durbin Amendment), as amended, the Gramm-Leach-Bliley Act (also known as the Financial Modernization Act of 1999), as amended, and the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT ACT) Act of 2001, as amended. Other United States (both federal and state) and foreign jurisdiction laws apply to our processing of certain financial transactions and related support services. These laws are subject to frequent changes, and new statutes and regulations in this area may be enacted at any time. Changes to existing laws, introduction of new laws in this area or failure to comply with existing laws that are applicable to us may subject us to, among other things, additional costs or changes to our business practices, liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process and support financial transactions and allegations by our customers, partners and clients that we have not performed our contractual obligations. Any of these could materially adversely affect our results of operations and financial condition.

Our data systems, information systems and network infrastructure may be subject to hacking or other cyber security threats and other service interruptions, which could expose us to liability, impair our reputation or temporarily render us unable to fulfill our service obligations under our contracts.

We are a leading provider of business processing services concentrated in transaction-intensive processing, analytics and automation. We act as a trusted business partner in both front office and back office platforms, providing interactions on a substantial scale with our customers and other third parties. Our customers include global commercial clients and government clients who depend upon our operational efficiency, non-interruption of service, and accuracy and security of information. We also use third party providers such as subcontractors, software vendors, utility providers and network providers, upon whom we rely for our business processing services, to deliver uninterrupted, secure service. As part of our business processing services we also develop system software platforms necessary to support our customers' needs, with significant ongoing investment in developing and operating customer-appropriate operating systems, data bases and system software solutions. We also receive, process, transmit and store substantial volumes of information relating to identifiable individuals, both in our role as a service provider and as an employer, and we are subject to numerous laws, rules and regulations in the United States (both federal and state) and foreign jurisdictions designed to protect both individually identifiable information as well as personal health information. We also receive, process and implement financial transactions, and disburse funds, on behalf of both commercial and government customers, which activity includes receiving debit and credit card information to process payments due to our customers as well as disbursing funds to payees of our customers. As a result of these and other business processing services, the integrity, security, accuracy and non-interruption of our systems and information technology and that of our third-party providers and our interfaces with our customers are extremely important to our business, operating results, growth, prospects and reputation.

We have implemented security systems and controls, both directly and with third-party subcontractors and service providers, with the intent of maintaining both the physical security of our facilities and the data security of our customers', clients' and suppliers' confidential information and information related to identifiable individuals (including payment card and debit and credit card information and health information) against unauthorized access through our information systems or by other electronic transmission or through the misdirection, theft or loss of physical media. These include, for example, the appropriate encryption of information. Despite such efforts, we are subject to breach of security systems which may result in unauthorized access to our facilities and those of our customers and/or the information we and our customers are trying to protect. Cyber security failure might be caused by computer hacking, malware, computer viruses, worms and other destructive software, "cyber-attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Operational or business delays may also result from the disruption of network or information systems and subsequent remediation activities.

Because the techniques used to obtain unauthorized access are constantly changing and becoming increasingly more sophisticated and often are not recognized until launched against a target, we or our third-party service providers may be unable to anticipate these techniques or implement sufficient preventative measures. Hacking, malware, phishing, viruses and other "cyber-attacks" have become more prevalent, have occurred in our systems in the past, and may occur in our systems in the future. Although we have implemented and intend to continue to implement what we believe to be appropriate cyber practices and cyber security systems, these systems may prove to be inadequate and result in the disruption, failure, misappropriation or corruption of our network and information systems.

Additionally, with advances in computer capabilities and data protection requirements to address ongoing threats, we may be required to expend significant capital and other resources to protect against potential security breaches or to alleviate problems caused by security breaches. Moreover, employee error or malfeasance, faulty password management or other irregularities may result in a defeat of our or our third-party service providers' security measures and a breach of our or our third-party service providers' information systems (whether digital, cloud-based or otherwise).

If unauthorized parties gain physical access to one of our or one of our third-party service providers' facilities or electronic access to our or one of our third-party service providers' information systems or such sensitive or confidential information is misdirected, lost or stolen during transmission or transport, any theft or misuse of such information could result in, among other things, unfavorable publicity and significant damage to our brand, governmental inquiry, oversight and possible regulatory action, difficulty in marketing our services, loss of existing and potential customers, allegations by our customers that we have not performed our contractual obligations, litigation by affected parties and possible financial obligations for substantial damages related to the theft or misuse of such information, any of which could materially adversely affect our results of operations and financial condition. Moreover, a security breach could require us to devote significant management resources to address the problems created by the security breach and to expend significant additional resources to upgrade further the security measures that we employ to guard such personal information against "cyber attacks" and to maintain various systems and data centers for our customers. Often these systems and data centers must be maintained worldwide and on a 24/7 basis. Although we endeavor to ensure that there is adequate backup and maintenance of these systems and centers, we could experience service interruptions that could result in curtailed operations and loss of existing and potential customers, which could significantly reduce our revenues and profits in addition to significantly impairing our reputation. If our information systems and our back-up systems are damaged, breached or cease to function properly, we may have to make a significant investment to repair or replace them, and we may suffer interruptions in our operations in the interim, each of which could materially adversely affect our results of operations and financial condition and diminish the value of our shares.

In addition, our and our customers' systems and networks are subject to continued threats of terrorism, which could disrupt our operations as well as disrupt the utilities and telecommunications infrastructure on which our business depends. To the extent any such disruptions were to occur, our business, operating results and financial condition could be materially adversely affected.

If we underestimate the scope of work or the costs of performance in our contracts, or we mis-perform our contracts, our results of operations and financial condition could be materially adversely affected.

In order to stay competitive in our industry, we must also keep pace with changing technologies and customer preferences. Many of our contracts require us to design, develop and implement new technological and operating systems for our customers. Many of these systems involve detailed and complex computer source code which must be created and integrated into a working system that meets contract specifications. The accounting for these contracts requires judgment relative to assessing risks, estimating contract revenues and costs and making assumptions for schedule and technical issues. To varying degrees, each contract type involves some risk that we could underestimate the costs and resources necessary to fulfill the contract. In each case, our failure to accurately estimate costs or the resources and technology needed to perform our contracts or to effectively manage and control our costs during the performance of our work could result, and in some instances has resulted, in reduced profits or in losses. In addition, in many of our contracts, we have complicated performance obligations, including, without limitation, designing and building new integrated computer systems or doing actuarial work for pension, medical and other plans with beneficiaries that can rely on future projection of obligations to determine appropriate levels of funding. These contracts carry potential financial penalties or could result in financial damages or exposures if we fail to properly perform those obligations and could result in our results of operations and financial condition being materially adversely affected.

If we are unable to collect our receivables for unbilled services, our results of operations and financial condition could be materially adversely affected.

The profitability of certain of our large contracts depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. Actual losses on client balances could differ from current estimates and, as a result, may require adjustment of our receivables for unbilled services. Our receivables include long-term contracts and over the course of a long-term contract, our customers' financial condition may change such that their ability to pay their obligations, and our ability to collect our fees for services rendered, is adversely affected. Additionally, we may perform work for the federal, state and local governments, with respect to which we must file requests for equitable adjustment or claims with the proper agency to seek recovery in whole or in part, for out-of-scope work directed or caused by the government customer in support of its project, and the amounts of such recoveries may not meet our expectations or cover our costs. Timely collection of client balances also depends on our ability to complete our contractual commitments (for example, achieve specified milestones in percentage-of-completion contracts) and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our results of operations and financial condition could be materially adversely affected.

A decline in revenues from or a loss or failure of significant clients could materially adversely affect our results of operations and financial condition.

Our results of operations and financial condition could be materially adversely affected by the loss or failure of significant clients. Some of our clients are in business sectors which have experienced significant financial difficulties or consolidation, and/or the reduction of volumes or their inability to make payments to us, as a result of, among other things, their merger or acquisition, divestiture of assets or businesses, contract expiration, nonrenewal or early termination (including termination for convenience) or business or financial failure or deterioration. Economic and political conditions could affect our clients' businesses and the markets they serve.

We have non-recurring revenue, which subjects us to a risk that our revenues and cash flows from operations may fluctuate from period to period.

Revenue generated from our non-recurring services may fluctuate due to factors both within and outside of our control. Our mix of non-recurring and recurring revenues is impacted by acquisitions as well as growth in our non-recurring lines of business. There is less predictability and certainty in the timing and amount of revenues generated by our non-recurring services and, accordingly, our results of operations and financial condition could be materially adversely affected by the timing and amount of revenues generated from our non-recurring services.

The failure to obtain or maintain a satisfactory credit rating could adversely affect our liquidity, capital position, borrowing costs, access to capital markets and ability to post surety or performance bonds to support clients' contracts.

Any future downgrades to our credit rating could negatively impact our ability to renew contracts with our existing clients, limit our ability to compete for new clients, result in increased premiums for surety or performance bonds to support our clients' contracts and/or result in a requirement that we provide collateral to secure our surety or performance bonds. Further, certain of our commercial outsourcing contracts provide that, in the event our credit ratings are downgraded to specified levels, the client may elect to terminate its contract with us and either pay a reduced termination fee or, in some limited instances, no termination fee. Such a credit rating downgrade could adversely affect these client relationships.

There can be no assurance that we will be able to maintain our credit ratings. Any additional actual or anticipated downgrades of our credit ratings, including any announcement that our ratings are under review for a downgrade, may have a negative impact on our liquidity, capital position and access to capital markets.

A failure to attract and retain necessary technical personnel and qualified subcontractors could materially adversely affect our results of operations and financial condition.

Because we operate in intensely competitive markets, our success depends to a significant extent upon our ability to attract, retain and motivate highly skilled and qualified technical personnel and to subcontract with qualified, competent subcontractors. If we fail to attract, train and retain sufficient numbers of qualified engineers, technical staff and sales and marketing representatives or are unable to contract with qualified, competent subcontractors, our results of operations and financial condition could be materially adversely affected. Experienced and capable personnel in the services industry remain in high demand, and there is continual competition for their talents. Additionally, we may be required to increase our hiring in geographic areas outside of the United States, which could subject us to increased geopolitical and exchange rate risk. The loss of any key technical employee or the loss of a key subcontractor relationship could materially adversely affect our results of operations and financial condition.

Increases in the cost of telephone and data services or significant interruptions in such services could materially adversely affect our results of operations and financial condition.

Our business is significantly dependent on telephone and data service provided by various local and long distance telephone and data service providers around the world. Accordingly, any disruption of these services could materially adversely affect our results of operations and financial condition. We have taken steps to mitigate our exposure to service disruptions by investing in redundant circuits, although there is no assurance that the redundant circuits would not also suffer disruption. Any inability to obtain telephone or data services at favorable rates could materially adversely affect our results of operations and financial condition. Where possible, we have entered into long-term contracts with various providers to mitigate short-term rate increases and fluctuations. There is no obligation, however, for the vendors to renew their contracts with us, or to offer the same or lower rates in the future, and such contracts are subject to termination or modification for various reasons outside of our control. A significant increase in the cost of telephone or data services that is not recoverable through an increase in the price of our services could materially adversely affect our results of operations and financial condition. In addition, a number of our facilities are located in jurisdictions outside of the United States where the provision of utility services, including electricity and water, may not be consistently reliable, and while there are backup systems in many of our operating facilities, an extended outage of utility or network services could materially adversely affect our results of operations and financial condition.

We are a holding company and, therefore, may not be able to receive dividends or other payments in needed amounts from our subsidiaries.

Our principal assets are the shares of capital stock and indebtedness of our subsidiaries. We rely on dividends, interest and other payments from these subsidiaries to meet our obligations for paying principal and interest on outstanding debt obligations, paying corporate expenses and, if determined by our Board, paying dividends to shareholders and repurchasing common shares. Certain of our subsidiaries are subject to regulatory requirements of the jurisdictions in which they operate or other restrictions that may limit the amounts that these subsidiaries can pay in dividends or other payments to us. No assurance can be given that there will not be further changes in law, regulatory actions or other circumstances that could restrict the ability of our subsidiaries to pay dividends to us. In addition, due to differences in tax rates, repatriation of funds from certain countries into the United States could have unfavorable tax ramifications for us.

Our results of operations and financial condition could be materially adversely affected by legal and regulatory matters.

We are potentially subject to various contingent liabilities that are not reflected on our balance sheet, including those arising as a result of being involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental and non-governmental entity contracting, servicing and governmental entity procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act of 1974 (ERISA); and other laws, regulations and contractual undertakings, as discussed under Note 13 – Contingencies and Litigation in our Consolidated Financial Statements. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual or materially increase an existing accrual, or should any of these matters result in an adverse judgment or be settled for significant amounts above any existing accruals, it could materially adversely affect our results of operations and financial condition in the period or periods in which such change in determination, judgment or settlement occurs. There can be no assurances as to the favorable outcome of any claim, lawsuit, investigation or proceeding. It is possible that a resolution of one or more such proceedings could require us to make substantial payments to satisfy judgments, fines or penalties or to settle claims or proceedings, any of which could materially adversely affect our results of operations and financial condition. These proceedings could also result in reputational harm, criminal sanctions, consent decrees or orders preventing us from offering certain services, requiring a change in our business practices in costly ways or requiring development of non-infringing or otherwise altered products or technologies. In addition, it can be very costly to defend litigation and these costs could materially adversely affect our results of operations and financial condition. See Note 13 – Contingencies and Litigation to our Consolidated Financial Statements.

Our results of operations and financial condition may be materially adversely affected by conditions abroad, including local economics, political environments, fluctuating foreign currencies and shifting regulatory schemes.

A portion of our revenues is generated from operations outside the United States. In addition, we maintain significant operations outside the United States. Our results of operations and financial condition could be materially adversely affected by changes in foreign currency exchange rates, as well as by a number of other factors, including, without limitation, changes in economic conditions from country to country, changes in a country's political conditions, trade controls and protection measures, financial sanctions, licensing requirements, local tax issues, capitalization and other related legal matters. We generally hedge foreign currency denominated assets, liabilities and anticipated transactions primarily through the use of currency derivative contracts. The use of derivative contracts is intended to mitigate or reduce transactional level volatility in the results of foreign operations, but does not completely eliminate volatility. We do not hedge the translation effect of international revenues and expenses, which are denominated in currencies other than our U.S. parent functional currency, within our Consolidated Financial Statements. If we are unable to effectively hedge these risks, our results of operations and financial condition could be materially adversely affected.

If we fail to successfully develop new service offerings, including new technology components, and protect our intellectual property rights, we may be unable to retain current customers and gain new customers and our revenues would decline.

The process of developing new service offerings, including new technology components, is inherently complex and uncertain. It requires accurate anticipation of customers' changing needs and emerging technological trends. We must make long-term investments and commit significant resources before knowing whether these investments will eventually result in service offerings that achieve customer acceptance and generate the revenues required to provide desired returns. For example, establishing internal automation processes to help us develop new service offerings will require significant up-front costs and resources, which, if not monetized effectively, could materially adversely affect our revenues. In addition, some of our service offerings rely on technologies developed by and licensed from third parties. We may not be able to obtain or continue to obtain licenses and technologies from these third parties at all or on reasonable terms, or such third parties may demand cross-licenses to our intellectual property. It is also possible that our intellectual property rights could be challenged, invalidated or circumvented, allowing others to use our intellectual property to our competitive detriment. We also must ensure that all of our service offerings comply with both existing and newly enacted regulatory requirements in the countries in which they are sold. If we fail to accurately anticipate and meet our customers' needs through the development of new service offerings (including technology components) or if we fail to adequately protect our intellectual property rights or if our new service offerings are not widely accepted or if our current or future service offerings fail to meet applicable worldwide regulatory requirements, we could lose market share and customers to our competitors and that could materially adversely affect our results of operations and financial condition.

Risks related to the spin-off:

We may be unable to achieve some or all of the benefits that we expect to achieve from the spin-off.

We believe that, as an independent, publicly traded company, we will be able to, among other things, design and implement corporate strategies and policies that are targeted to our business, better focus our financial and operational resources on our specific business, create effective incentives for our management and employees that are more closely tied to our business performance, provide investors more flexibility and enable us to achieve alignment with a more natural shareholder base and implement and maintain a capital structure designed to meet our specific needs. However, as a result of separating from Xerox, we may be more susceptible to market fluctuations and other adverse events. As an independent entity, we have an arm's-length relationship with Xerox and we may not be able to obtain supplies from Xerox on terms as favorable to us as those we had as a wholly owned subsidiary of Xerox prior to the spin-off. As a smaller, independent company, Conduent has a narrower business focus and may be more vulnerable to changing market conditions as well as the risk of takeover by third parties. In addition, we may be unable to achieve some or all of the benefits that we expected to achieve as an independent company in the time we expect, if at all. Furthermore, Xerox used to guarantee our and our subsidiaries' performance under certain services contracts and real estate leases. Following the spin-off, we expect that Conduent will provide such performance guarantees, and we may be unable to retain or renew contracts or real estate leases or a failure to renew such contracts or leases on favorable terms and conditions could materially adversely affect our results of operations and financial condition. If we fail to achieve some or all of the benefits that we expected to achieve as an independent company, or do not achieve them in the time we expect, our results of operations and financial condition could be materially adversely affected.

We may be unable to make, on a timely or cost-effective basis, the changes necessary to operate as an independent, publicly traded company, and we may experience increased costs after the spin-off.

We had historically operated as part of Xerox's corporate organization, and Xerox had provided us with various corporate functions. Following the spin-off, Xerox has no obligation to provide us with assistance other than the transition services described under "Certain Relationships and Related Party Transactions —Transition Services Agreement." These services do not include every service that we have received from Xerox in the past, and Xerox is only obligated to provide these services for limited periods following completion of the spin-off. Accordingly, following the spin-off, we have needed to provide internally or obtain from unaffiliated third parties the services we had received from Xerox. These services include senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services, the effective and appropriate performance of which are critical to our operations. We may be unable to replace these services on terms and conditions as favorable as those we received from Xerox. Because our business had operated as part of the wider Xerox organization, we may incur additional costs that could adversely affect our business. If we fail to obtain the quality of services necessary to operate effectively or incur greater costs in obtaining these services, our results of operations and financial condition could be materially adversely affected.

We have no recent operating history as an independent, publicly traded company, and our historical and pro forma financial data are not necessarily representative of the results we would have achieved as an independent, publicly traded company and may not be a reliable indicator of our future results.

We derived certain of the historical financial data included in this Annual Report from Xerox's consolidated financial statements, and this data does not necessarily reflect the results of operations and financial condition we would have achieved as an independent, publicly traded company during the periods presented, or those that we will achieve in the future. This is primarily because of the following factors:

- Prior to the spin-off, we operated as part of Xerox's broader corporate organization and Xerox performed various corporate functions for us, including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology, marketing and communications, internal audit and other shared services. Our historical financial data reflect allocations of corporate expenses from Xerox for these and similar functions. These allocations may not reflect the costs we have incurred and in the future will incur for similar services as an independent, publicly traded company.
- We entered into transactions with Xerox that did not exist prior to the spin-off, such as Xerox's provision of transition services, which will cause us to incur new costs.
- Such historical financial data does not and in the future may not reflect changes that we have experienced and expect to experience in the future as a result of our separation from Xerox. As part of Xerox, we enjoyed certain benefits from Xerox's operating diversity, size, purchasing power, credit rating, borrowing leverage and available capital for investments. Many of our services contracts, particularly those for our transportation service offerings in our Public Sector business, require significant capital investments, and after the spin-off, we may not have access to the capital (from both internal and external sources) necessary to fund these services contracts. As an independent entity, we may be unable to purchase goods, services and technologies, such as insurance and health care benefits and computer software licenses, or access capital markets on terms as favorable to us as those we obtained as part of Xerox prior to the spin-off.

Following the spin-off, we are now responsible for the additional costs associated with being an independent, publicly traded company, including costs related to corporate governance, investor and public relations and public reporting. For additional information about our past financial performance and the basis of presentation of our financial statements, see "Selected Historical Financial Data," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and our historical financial statements and the notes thereto included in this annual report on Form 10-K.

We may have been able to receive better terms from unaffiliated third parties than the terms we receive in our agreements with Xerox.

We entered into agreements with Xerox related to our separation from Xerox, including the Separation and Distribution Agreement, Transition Services Agreement, Tax Matters Agreement, Employee Matters Agreement and any other agreements, while we were still part of Xerox. Accordingly, these agreements may not reflect terms that would have resulted from arm's-length negotiations among unaffiliated third parties. The terms of these agreements relate to, among other things, allocations of assets, liabilities, rights, indemnifications and other obligations between Xerox and us. We may have received better terms from third parties. See "Certain Relationships and Related Party Transactions—Agreements with Xerox."

The spin-off could result in significant tax liability to Xerox and its shareholders.

Completion of the spin-off required Xerox's receipt of a written opinion of Cravath, Swaine & Moore LLP to the effect that the Distribution should qualify for non-recognition of gain and loss under Section 355 of the Internal Revenue Code (the "Code") and the receipt and continuing effectiveness and validity of the IRS Ruling.

The opinion of counsel did not address any U.S. state or local or foreign tax consequences of the spin-off. The opinion assumed that the spin-off was completed according to the terms of the Separation and Distribution Agreement and relied on the facts as stated in the Separation and Distribution Agreement, the Tax Matters Agreement, the other ancillary agreements, the Information Statement included in our registration statement on Form 10 and a number of other documents. In addition, the opinion was based on certain representations as to factual matters from, and certain covenants by, Xerox and us. The opinion cannot be relied on if any of the assumptions, representations or covenants are incorrect, incomplete or inaccurate or are violated in any material respect.

Xerox received an IRS ruling in connection with the spin-off (the "IRS Ruling"). The IRS Ruling relies on certain facts, assumptions, representations and undertakings from Xerox and us regarding the past and future conduct of Xerox's and our businesses and other matters. If any of these facts, assumptions, representations or undertakings is incorrect or not otherwise satisfied, Xerox may not be able to rely on the IRS Ruling. In addition, the IRS Ruling is not a comprehensive ruling from the IRS regarding all aspects of the U.S. federal income tax consequences of the transactions.

Accordingly, notwithstanding the opinion of counsel and the IRS Ruling, there can be no assurance that the IRS will not assert, or that a court would not sustain, a contrary position.

If the distribution in connection with the spin-off were determined not to qualify for non-recognition of gain and loss for U.S. federal income tax purposes, U.S. holders who received our common stock could be subject to tax. In this case, each U.S. holder who received our common stock in the distribution would generally, for U.S. federal income tax purposes, be treated as having received a distribution in an amount equal to the fair market value of our common stock received, which would generally result in (i) a taxable dividend to the U.S. holder to the extent of that U.S. holder's pro rata share of Xerox's current and accumulated earnings and profits; (ii) a reduction in the U.S. holder's basis (but not below zero) in Xerox common stock to the extent the amount received exceeds the shareholder's share of Xerox's earnings and profits; and (iii) a taxable gain from the exchange of Xerox common stock to the extent the amount received exceeds the sum of the U.S. holder's share of Xerox's earnings and profits and the U.S. holder's basis in its Xerox common stock.

We could have an indemnification obligation to Xerox if the Distribution were determined not to qualify for non-recognition treatment, which could materially adversely affect our results of operations and financial condition.

If it were determined that the distribution in connection with the spin-off did not qualify for non-recognition of gain and loss under Section 355 of the Code, we could, under certain circumstances, be required to indemnify Xerox for the resulting taxes and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

In addition, Section 355(e) of the Code generally creates a presumption that the distribution would be taxable to Xerox, but not to shareholders, if we or our shareholders were to engage in transactions that result in a 50% or greater change by vote or value in the ownership of our stock during the four-year period beginning on the date that begins two years before the date of the distribution, unless it were established that such transactions and the distribution were not part of a plan or series of related transactions giving effect to such a change in ownership. If the distribution were taxable to Xerox due to such a 50% or greater change in ownership of our stock, Xerox would recognize gain equal to the excess of the fair market value of our common stock distributed to Xerox shareholders over Xerox's tax basis in our common stock and we generally would be required to indemnify Xerox for the tax on such gain and related expenses. Any such indemnification obligation could materially adversely affect our results of operations and financial condition.

We agreed to numerous restrictions to preserve the non-recognition treatment of the Distribution, which may reduce our strategic and operating flexibility.

We agreed in the Tax Matters Agreement to covenants and indemnification obligations that address compliance with Section 355 of the Code. These covenants and indemnification obligations may limit our ability to pursue strategic transactions or engage in new businesses or other transactions that may otherwise maximize the value of our business, and might discourage or delay a strategic transaction that our shareholders may consider favorable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We lease and own numerous facilities worldwide with larger concentrations of space in Kentucky, New Jersey, California, Mexico, Guatemala, the Philippines, Jamaica, Romania and India. Our owned and leased facilities house general offices, sales offices, service locations, call centers and distribution centers. The size of our property portfolio as of December 31, 2017 was approximately 9.7 million square feet at an annual operating cost (lease costs and expenses) of approximately $247 million and comprised 330 leased properties and 9 owned properties. We believe that our current facilities are suitable and adequate for our current businesses. Because of the interrelation of our business segments, each of the segments uses substantially all of these properties at least in part.

In addition to the 9.7 million square feet of our real estate property portfolio, we also had 2.7 million square feet of our leased and owned properties that became surplus in 2017 due to the implementation of our strategic transformation program as well as various productivity initiatives to consolidate our real estate footprint. We aggressively managed our surplus properties through early terminations and subleasing of leased properties and the sale of owned properties. As a result, approximately 1.7 million square feet of the surplus property portfolio were resolved as of December 31, 2017. Additional leased and owned properties may become surplus over the next three years as we continue the strategic transformation program. We are obligated to maintain our leased surplus properties through required contractual lease periods and plan to dispose of or sublease these properties.

ITEM 3. LEGAL PROCEEDINGS

The information set forth under Note 13 – Contingencies and Litigation in the Consolidated Financial Statements in Part II, Item 8, which is incorporated here by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

(1) On December 31, 2016, Conduent spun-off from Xerox Corporation. See Note 1 – Basis of Presentation and Summary of Significant Accounting Policies to the Consolidated Financial Statements included in Item 8 of this 2017 Form 10-K for a discussion concerning the historical financial statements.

(2) Includes capital lease obligations.

(3) Common stock of Conduent Incorporated did not begin trading on the NYSE until January 3, 2017; therefore, selected data and ratios are not available for years prior to 2017.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated. This MD&A is provided as a supplement to, and should be read in conjunction with, our Consolidated Financial Statements and the accompanying notes. This MD&A provides additional information about our operations, current developments, financial condition, cash flows and results of operations.

Throughout the MD&A, we refer to various notes to our Consolidated Financial Statements which appear in Item 8 of this 2017 Form 10-K, and the information contained in such notes is incorporated by reference into the MD&A in the places where such references are made.

Overview

With revenues of $6.0 billion , we are a leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience.

Headquartered in Florham Park, New Jersey, we, have a team of approximately 90,000 people as of December 31, 2017 , who serves customers in 31 countries. In 2017 , 12% of our revenue was generated outside the U.S.

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate.

Beginning in 2017, in an effort to better reflect how we manage our business, we changed our reporting segments to align the Healthcare business based upon customer focus between Commercial Industries and Public Sector.

- **Commercial Industries -** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include transaction processing, customer experience, human resource management, omni-channel communications and finance and accounting services.
- **Public Sector -** Our Public Sector segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.

Other includes our Government HE Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients; our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations.

Significant 2017 Actions

Dispositions

In 2017, we completed divestitures of: (1) our Firehouse business and suite of emergency records management products used by fire departments across the country for their incident reporting and Emergency Management System information and records management; (2) our healthcare provider consulting services business, which advises healthcare organizations on IT application optimization; (3) the Breakaway Group business, which provides advisory project services to assist healthcare organizations optimize their health IT applications; (4) the mobile device management business of Wireless Data Services Limited; and (5) the Global Mobility business. The aggregate proceeds for these divestitures was $56 million in cash. The businesses sold represent $60 million and $82 million of 2017 and 2016 revenue, respectively. We recorded a pre-tax gain of $16 million on these divestitures for the year ended December 31, 2017.

In addition, in 2017, we sold a property located in Dallas, Texas, which was formerly the Affiliated Computer Services (ACS) headquarters, for a pre-tax gain of $24 million. This was part of our effort to consolidate our real estate footprint.

Health Enterprise Settlement

On November 28, 2017, we entered into a definitive settlement agreement with the State of New York regarding resolution of the HE platform project. Under the terms of the settlement: (1) our contract with the State of New York terminated effective December 15, 2017 and we were released from all liabilities and obligations in connection with the contract at such time; and (2) we will pay, or incur costs on behalf of, the State of New York in the amount of approximately $20 million. As we have previously reserved this amount, we will incur no additional charges as a result of the settlement.

Significant 2016 Actions

Separation

On December 31, 2016, Conduent Incorporated spun-off from Xerox Corporation, pursuant to the Separation and Distribution Agreement. The separation was completed by way of a pro rata distribution of Conduent Incorporated shares held by Xerox to Xerox's shareholders. As a result of the spin-off we operate as an independent, publicly traded company on the New York Stock Exchange under the ticker "CNDT".

Goodwill Impairment Charge

Our Commercial Industries reporting units operating results declined in 2016 versus our expectations, including a weak fourth quarter 2016. In performing our annual impairment test during the fourth quarter of 2016, we determined that the carrying value of the Commercial Industries reporting unit exceeded its fair value by 53%, which resulted in a goodwill impairment of $935 million. This has been presented as Goodwill impairment, a separate line item in the Consolidated Statements of Income (Loss). Refer to Note 6 – Goodwill and Intangible Assets, Net , in the Consolidated Financial Statements for additional information.

Health Enterprise Charge

In February 2017, we determined that it was not probable that the New York Medicaid Management Information System (NY MMIS) project would be completed. As a result of this determination, we recorded a pre-tax charge (NY MMIS charge) of $161 million ($98 million after-tax) in the fourth quarter of 2016. The charge included $83 million for the write-off of contract receivables which were recorded as a reduction of revenue and $78 million recorded in Cost of services including $36 million for wind-down costs, $28 million related to the non-cash charge for the impairment of software and $14 million for the write-off of deferred contract set-up and transition costs and other related assets and liabilities.

Significant 2015 Actions

Health Enterprise Charge

In 2015, we determined that we would not fully complete the HE platform implementation projects in California and Montana. However, we would continue to process Medicaid claims using existing legacy systems in those states, thus providing uninterrupted service for the states' healthcare providers and constituents.

As a result of this determination, we recorded a pre-tax HE charge of $389 million ($237 million after-tax). The charge included $116 million for the write-off of contract receivables (primarily non-current), $34 million related to the non-cash impairment of the HE software and deferred contract set-up transition costs and $23 million for other related assets and liabilities. The remainder of the charge was primarily related to settlement costs including payments to subcontractors resulting in cash outflows in future periods. Of the $389 million charge, $116 million was recorded as a reduction to revenue and the remaining $273 million recorded to Cost of services.

This development resulted from the Government Healthcare strategy change announced in July 2015, regarding our decision to focus our future HE implementations on current Medicaid customers and to discontinue investment in and sales of our Integrated Eligibility System. This resulted in a pre-tax non-cash software platform impairment charge of $146 million ($89 million after-tax).

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying Consolidated Financial Statements and notes thereto. In preparing our Consolidated Financial Statements, we have made our best estimates and judgments of certain amounts included in the Consolidated Financial Statements giving due consideration to materiality. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Senior management has discussed the development and selection of the critical accounting policies, estimates and related disclosures included herein with the Audit Committee of the Board of Directors. We consider these as critical to understanding our Consolidated Financial Statements, as their application places the most significant demands on management's judgment, since financial reporting results rely on estimates of the effects of matters that are inherently uncertain. In instances where different estimates could have reasonably been used, we disclose the impact of these different estimates on our operations. In certain instances, the accounting rules are prescriptive; therefore, it would not have been possible to reasonably use different estimates. Changes in assumptions and estimates are reflected in the period in which they occur. The impact of such changes could be material to our results of operations and financial condition in any quarterly or annual period.

Specific risks associated with these critical accounting policies are discussed throughout the MD&A, where such policies affect our reported and expected financial results. For a detailed discussion of the application of these and other accounting policies, refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies in the Consolidated Financial Statements.

Revenue Recognition

Application of the various accounting principles in U.S. GAAP related to the measurement and recognition of revenue requires us to make judgments and estimates. Complex arrangements with nonstandard terms and conditions may require significant contract interpretation to determine the appropriate accounting. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies — Revenue Recognition in the Consolidated Financial Statements for additional information regarding our revenue recognition policies .

A significant portion of our revenue is recognized based on objective criteria that do not require significant estimates or uncertainties. For example, transaction volumes, time and material and cost reimbursable arrangements are based on specific, objective criteria under the contracts. Accordingly, revenues recognized under these contracts do not require the use of significant estimates that are susceptible to change. Revenue recognized using the percentage-of completion (POC) accounting method does require the use of estimates and judgment as discussed below.

We recognize revenues when we have persuasive evidence of an arrangement, the services have been provided, the transaction price is fixed or determinable and collectability is reasonably assured. During 2017 , approximately 80% of our revenue was recognized based on transaction volumes, approximately 13% was recognized on a fixed fee basis (wherein our revenue is earned as we fulfill our performance obligations under the arrangement), approximately 1% was related to cost reimbursable contracts, approximately 2% recognized using POC accounting and the remaining 4% was related to time and material contracts. Our revenue mix is subject to change due to the impact of changing customer requirements, acquisitions, divestitures, new business and lost business.

Percentage-of-Completion : The POC method requires the use of estimates and judgment. Although not significant to total revenue, the POC methodology is normally applied to certain of our larger and longer term outsourcing contracts involving system development and implementation, primarily in government healthcare and certain government transportation contracts. In addition, we had unbilled receivables totaling $187 million and $279 million at December 31, 2017 and 2016 , respectively, representing revenues recognized but not yet billable under the terms of our POC contracts.

The POC accounting methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed based on a current cumulative cost incurred to estimated total cost basis and a reasonably consistent profit margin over the period. Due to the long-term nature of these arrangements, developing the estimates of cost often requires significant judgment. Factors that must be considered in estimating the progress of work completed and ultimate cost of the projects include, but are not limited to, the availability of labor and labor productivity, the nature and complexity of the work to be performed and the impact of delayed performance. If changes occur in delivery, productivity or other factors used in developing the estimates of costs or revenues, we revise our cost and revenue estimates, which may result in increases or decreases in revenues. Such revisions are reflected in income in the period in which the facts that give rise to that revision become known. We perform ongoing profitability analysis of our POC services contracts in order to determine whether the latest estimates require updating. Key factors reviewed by the Company to estimate the future costs to complete each contract are future labor costs, future product costs, expected productivity efficiencies, achievement of contracted milestones and performance goals, as well as potential penalties for milestone and system implementation delays.

If at any time our estimates indicate the POC contract will be unprofitable, the entire estimated loss for the remainder of the contract is recorded immediately in cost of services. This results in the contract being recorded at a zero profit margin going forward with recognition of an equal amount of revenues and costs over the remaining contract term. A zero profit margin may also be applied when it is impractical to estimate specific amounts or ranges of contract revenues and costs; however, we can at least determine that we will not incur a loss on a particular contract.

Capitalization of Outsourcing Contract Costs

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract. We regularly review costs to determine appropriateness for deferral in accordance with the relevant accounting guidance. Key estimates and assumptions that we must make include projecting future cash flows in order to assess the recoverability of deferred costs. To assess recoverability, undiscounted estimated cash flows of the contract are projected over its remaining life and compared to the carrying amount of contract related assets, including the unamortized deferred cost balance. Key factors that are considered in estimating the undiscounted cash flows include projected labor costs and productivity efficiencies. A significant change in an estimate or assumption on one or more contracts could have a material effect on our results of operations.

Capitalization of Software Development Costs

We capitalize certain costs incurred to develop commercial software products to be sold, leased or otherwise marketed after establishing technological feasibility, and we capitalize costs to develop or purchase internal-use software. Significant estimates and assumptions include: determining the appropriate period over which to amortize the capitalized costs based on estimated useful lives, estimating the marketability of the commercial software products and related future revenues and assessing the unamortized cost balances for impairment. For commercial software products, determining the appropriate amortization period is based on estimates of future revenues from sales of the products. We consider various factors to project marketability and future revenues, including an assessment of alternative solutions or products, current and historical demand for the product, and anticipated changes in technology that may make the product obsolete. For internal-use software, the appropriate amortization period is based on estimates of our ability to utilize the software on an ongoing basis. To assess the recoverability of capitalized software costs, we consider estimates of future revenue, costs and cash flows. Such estimates require assumptions about future cash inflows and outflows, and are primarily based on the historical experience and expectations regarding future revenues. A significant change in an estimate related to one or more software products could result in a material change to our results of operations.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information regarding capitalized software costs.

Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale. Upon determining that a long-lived asset (disposal group) meets the criteria to be classified as held for sale, the Company reports the assets and liabilities of the disposal group in the line items Assets held for sale and Liabilities held for sale, respectively, in the Consolidated Balance Sheets.

In the fourth quarter of 2017, management approved the disposal through sale of certain assets and businesses, which is a mix of both Commercial Industries and Public Sectors. This action was taken as a result of our evaluation of these businesses as they represent businesses in markets or with services that we did not see as strategic or core. As of December 31, 2017, these businesses qualified as assets held for sale. During the year ended December 31, 2017, we reclassified $757 million to assets held for sale and $169 million to liabilities held for sale, as we have an active program to locate buyers for these businesses and we expect these businesses to be sold within one year.

Intangible Assets

The fair values of identifiable intangible assets are primarily estimated using an income approach. These estimates include market participant assumptions and require projected financial information, including assumptions about future revenue growth and costs necessary to facilitate the projected growth. Other key inputs include assumptions about technological obsolescence, customer attrition rates, brand recognition, the allocation of projected cash flows to identifiable intangible assets and discount rates. We regularly review intangible assets with finite lives for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

- significant underperformance relative to historical or projected future operating results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangibles and long-lived assets may not be recoverable based upon the existence of one or more of the above indicators of potential impairment, we assess whether an impairment has occurred based on whether net book value of the assets exceeds the related projected undiscounted cash flows from these assets. We consider a number of factors, including past operating results, budgets, economic projections, market trends and product development cycles in estimating future cash flows. Differing estimates and assumptions as to any of the factors described above could result in a materially different impairment charge, if any, and thus materially different results of operations.

Goodwill

Goodwill is not amortized but rather tested for impairment annually, or more frequently, if an event or circumstance indicates that impairment may have been incurred. Events or circumstances that might indicate an interim evaluation is warranted include, among other things, unexpected adverse business conditions, macro and reporting unit specific economic factors, supply costs, unanticipated competitive activities and acts by governments and courts.

Application of the annual goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units and the assessment of the fair value of each reporting unit. We determined that our reporting units were the same as our operating segments and, therefore, our business is comprised of two reporting units. Our annual quantitative impairment test of goodwill was performed in the fourth quarter of 2017 .

In our quantitative test, we estimate the fair value of each reporting unit by weighting the results from the income approach (discounted cash flow methodology) and market approach. These valuation approaches require significant judgment and consider a number of factors that include, but are not limited to, expected future cash flows, growth rates and discount rates and comparable multiples from publicly traded companies in our industry. In addition, we are required to make certain assumptions and estimates regarding the current economic environment, industry factors and the future profitability of our businesses.

When performing our discounted cash flow analysis for each reporting unit, we incorporate the use of projected financial information and discount rates that are developed using market participant-based assumptions. The cash-flow projections are based on three-year financial forecasts developed by management that include revenue and expense projections, restructuring and strategic transformation activities, capital spending trends and investment in working capital to support anticipated revenue growth or other changes in the business. The selected discount rates consider the risk and nature of the respective reporting units' cash flows, appropriate capital structure and rates of return that market participants would require to invest their capital in our reporting units.

We believe these assumptions are appropriate and reflect our forecasted long-term business model and give appropriate consideration to our historical results as well as the current economic environment and markets that we serve.

Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries and Public Sector reporting units exceeded their respective carrying values by 72% and 13% , respectively, at December 31, 2017. The most significant assumptions used in the goodwill analysis relate to a 3% long-term organic growth rate for both the Commercial Industries and Public Sector segments as well as a 9.25% and a 8.75% discount rate for the Commercial Industries and Public Sector segments, respectively. The fair values of the Commercial Industries and Public Sector segments are sensitive to changes in the long-term growth rates and the discount rates. A decrease of 50 basis points to the long-term growth rate or an increase to the discount rate of 50 basis points would result in an approximate reduction of fair value of $200 million and $250 million, respectively, in the Public Sector segment.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding goodwill by reportable segment.

Restructuring and Asset Impairments

We have engaged in restructuring actions, which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction, the fair value of assets made redundant or obsolete and the lease cancellation and other exit costs. We accrue for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The rates used in determining severance accruals are based on existing plans, historical experiences and negotiated settlements.

For additional information regarding our restructuring actions, refer to the "Restructuring and Related Costs" section in the MD&A and Note 7 – Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements.

Income Taxes

We are subject to income taxes in the United States and numerous foreign jurisdictions. The determination of our provision for income taxes requires significant judgment, the use of estimates and the interpretation and application of complex tax laws. Our provision is based on nonrecurring events as well as recurring factors, including the taxation of foreign income. In addition, our provision will change based on discrete or other nonrecurring events such as audit settlements, tax law changes, changes in valuation allowances and other factors, that may not be predictable. In the event that there is a significant unusual or one-time item recognized in our operating results, the taxes attributable to that item would be separately calculated and recorded at the same time as an unusual or one-time item.

We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and amounts reported in our Consolidated Balance Sheets, as well as operating loss and tax credit carryforwards. We follow very specific and detailed guidelines in each tax jurisdiction regarding the recoverability of any tax assets recorded in our Consolidated Balance Sheets and provide valuation allowances as required. We regularly review our deferred tax assets for recoverability considering historical profitability, projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies. Gross deferred tax assets of $250 million and $360 million had valuation allowances of $35 million and $24 million at December 31, 2017 and 2016 , respectively. As a result of the 2017 tax law changes in the United States, we recorded provisional amounts for a one-time non-cash $210 million income tax benefit related to adjusting our deferred tax liabilities from a 35% Federal tax rate to a 21% Federal tax rate and the transition tax expense of $12 million .

We are subject to ongoing tax examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon our assessment of the more-likely-than-not outcomes of such matters. In addition, when applicable, we adjust previously recorded tax expense to reflect examination results. Our ongoing assessments of the more-likely-than-not outcomes of examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results. Unrecognized tax benefits were $15 million, $14 million and $24 million at December 31, 2017 , 2016 and 2015 , respectively.

Refer to Note 12 – Income Taxes in the Consolidated Financial Statements for additional information regarding deferred income taxes and unrecognized tax benefits.

Loss Contingencies

We are currently involved in various claims and legal proceedings. At least quarterly, we review the status of each significant matter and assess its potential financial exposure considering all available information including, but not limited to, the impact of negotiations, settlements, rulings, advice of legal counsel and other updated information and events pertaining to a particular matter. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information available at the time. As additional information becomes available, we reassess the potential liability related to pending claims and litigation, and may revise estimates. These revisions in the estimates of the potential liabilities could have a material impact on the results of operations and financial position.

Refer to Note 13 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding loss contingencies.

Financial Information

Financial information for the three years ended December 31, 2017 was as follows:

	Year Ended December 31,			2017 vs. 2016		2016 vs. 2015	
(in millions)	2017	2016	2015	$ Change	% Change	$ Change	% Change
Total Revenues	$ 6,022	$ 6,408	$ 6,662	$ (386)	(6)%	$ (254)	(4)%

Revenue

Total revenues for 2017 decreased mainly due to the impact from strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, the run-off of our Student Loan business and contract losses. Partially offsetting these declines was an increase from the ramping of new business.

Total revenues for 2016 decreased compared to the prior year as a result of the NY MMIS charge of $83 million, lower volumes, delayed ramping of new business and contract exits, primarily in customer care contracts within our Commercial Industries segment, the run off of our Student Loan business and overall price declines that were consistent with prior-period trends. Partially offsetting these declines were new contracts in the Public Sector.

Cost of Services

Cost of services for 2017 decreased compared to the prior year period primarily due to cost transformation, lost business, wind-down of the NY MMIS contract, run-off of our Student Loan business, strategic contract actions taken by management as part of portfolio management and lower volumes.

Cost of services for 2016 decreased compared to the prior year period primarily due to lost business, the NY MMIS contract, run-off of our Student Loan business and lower volumes.

Gross Margin

Increase in gross margin in 2017 compared to the prior year period was driven primarily by the impact of cost and productivity improvements, including benefits from our strategic transformation program, exiting or remediating certain underperforming contracts and lower costs associated with our Student Loan business. This was partially offset by the run-off of our Student Loan business, contract losses and lower volumes with existing clients.

Increase in gross margin in 2016 compared to the prior year period reflected cost benefits from our strategic transformation initiatives offset by lost business and margin pressures in our customer service offerings and price declines.

Selling, General and Administrative (SG&A)

Lower SG&A compared to the prior years reflected the impact of our strategic transformation initiatives driving lower wages and benefits, partially offset by the expansion and investment in our sales force.

Restructuring and Related Costs

Restructuring and related costs for the year ended December 31, 2017 include $46 million of lease cancellation costs as part of our effort to consolidate our real estate footprint, $41 million of severance costs due to headcount reductions of approximately 3,200 employees worldwide, $9 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program and $5 million of asset impairments charges.

Restructuring and related costs for the year ended December 31, 2016 include $54 million of severance costs due to headcount reductions of approximately 3,600 employees worldwide, $28 million of costs primarily related to professional support services associated with the implementation of the strategic transformation program, $12 million of asset impairment charges and $7 million of lease cancellation costs.

Refer to Note 7 – Restructuring Programs and Asset Impairment Charges in the Consolidated Financial Statements for additional information regarding our restructuring programs.

Amortization of Intangible Assets

Amortization of intangible asset decreased in 2017 from the prior year primarily due to the acceleration of amortization of certain trade-names in 2016.

Amortization of intangible assets was higher in 2016 as compared to 2015, primarily due to the acceleration of amortization of certain trade-names associated with prior acquisitions.

Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding our intangible assets.

Goodwill Impairment

Our Commercial Industries reporting unit experienced declining operating results in 2016 versus expectations. As a result, we recorded a goodwill impairment of $935 million. Refer to Note 6 – Goodwill and Intangible Assets, Net in the Consolidated Financial Statements for additional information regarding the Goodwill impairment charge.

Separation Costs

Separation costs are primarily for third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies, such as those related to human resources, brand management, real estate and information management to the extent not capitalized. Separation costs also include the costs associated with bonuses and restricted stock grants awarded to employees for retention through the separation.

Interest Expense

Interest expense represents interest on long-term debt and the amortization of debt issuance costs. Interest expense for the year ended December 31, 2017 increased compared to the prior year, primarily due to the issuance of debt with the capitalization of the Company during the spin-off in December 2016 and subsequent borrowing under Term Loan B in January 2017, as well as amounts outstanding at various times throughout the year under the Company's credit facility.

In 2017, the Company successfully repriced its Term Loan B in April and October (Amendments No.1 and No. 2, respectively), which overall resulted in lowering the total interest rate on this loan by 250 basis points to LIBOR plus 3.0%.

Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.

Related Party Interest

In January 2017, in connection with the spin-off from Xerox Corporation, we paid Xerox $161 million for the final settlement per the Separation and Distribution Agreement.

Related-party interest expense for the year ended December 31, 2016 was lower than the prior year primarily due to the payment of certain related party notes payable in 2015, as a result of the proceeds received from the sale of the ITO business.

Refer to Note 18 – Related Party Transactions and Former Parent Company Investment in the Consolidated Financial Statements for additional information.

(Gain) Loss on Sale of Asset

As disclosed under Item 7. MD&A— Divestiture, we completed five divestitures in 2017 with aggregate proceeds of $56 million . We recorded a pre-tax gain of $16 million on these divestitures. In addition, in 2017 we sold a property located in Dallas, TX, which was formerly the ACS headquarters, for a pre-tax gain of $24 million.

Other (Income) Expense, Net

Other (income) expense, net primarily includes foreign currency transaction losses (gains), litigation and other contingent matters and deferred compensation investment results.

Income Taxes

On December 22, 2017, the Tax Cuts and Jobs Act (Tax Reform) was enacted. The effects of changes in tax rates and laws are recognized in the period in which the new legislation is enacted. In the case of US federal income taxes, the enactment date is the date the bill becomes law. The income tax effects of the Tax Reform have been initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform have been provided and adjustments to provisional amounts will be made in subsequent reporting periods as information becomes available to complete provisional computations.

The 2017 effective tax rate was 1,206.3% as compared with 19.9% for the prior year. The 2017 rate was higher than the U.S. statutory tax rate of 35% primarily due to the impact of the Tax Reform, which included the reduction of the U.S. statutory rate from 35% to 21% and a one-time tax on undistributed and previously untaxed post-1986 foreign earnings and profits. Excluding primarily the tax impact of the Tax Reform, the termination of the COLI, amortization of intangible assets and gains on U.S divestitures, the adjusted effective tax rate for 2017 was 33.8% . The Tax Reform is the most significant change to U.S. federal income tax legislation in over 30 years and, as a result, has a disproportionate effect on our 2017 effective tax rate. See Note 12 – Income Taxes for further information regarding the impact of the Tax Reform on our Consolidated Financial Statements.

Deferred tax assets and liabilities are measured and recorded using the enacted tax rates for the periods during which the related temporary differences are expected to reverse or deferred tax attributes are expected to be realized. As a result of the change in future federal statutory tax rate due to the passing of the Tax Reform, the deferred tax assets and liabilities should no longer be valued at a federal statutory rate of 35%, but rather at the rate in which the benefit of the deferred tax liabilities will be realized by the Company. As such, the U.S. federal statutory rate used to value the Company's deferred tax assets and liabilities was 21%, which resulted in a $210 million tax benefit.

The 2016 effective tax rate was lower than the U.S. statutory tax rate due primarily to the impact of the non-deductible Goodwill impairment charge. Excluding primarily the goodwill impairment, NY MMIS, amortization of intangible assets, and restructuring costs, the 2016 normalized effective rate was 29.0% .

Operations Review of Segments

Our reportable segments correspond to how we organize and manage the business and are aligned to the industries in which our clients operate. Beginning in 2017, in an effort to better reflect how we organize and manage our business, we changed our reporting segments to align the Healthcare business based on customer focus between Commercial Industries and Public Sector. All prior years have been adjusted to reflect the new reporting segments.

The following are our results of financial performance by segment for the three years ended December 31, 2017 :

(in millions)	Commercial Industries	Public Sector	Other	Total
Year Ended December 31, 2017				
Total Revenue	$ 3,548	$ 2,163	$ 311	$ 6,022
Profit (Loss)	$ 182	$ 245	$ (10)	$ 417
EBITDA [1]	$ 344	$ 330	$ (3)	$ 671
Adjusted EBITDA(1)	$ 344	$ 330	$ (2)	$ 672
% of Total Revenue	58.9%	35.9%	5.2 %	100.0%
EBITDA Margin [1]	9.7%	15.3%	(1.0)%	11.1%
Adjusted EBITDA Margin [1]	9.7%	15.3%	(0.6)%	11.2%
Year Ended December 31, 2016				
Total Revenue	$ 3,805	$ 2,308	$ 295	$ 6,408
Adjusted Revenue [1]	$ 3,805	$ 2,308	$ 378	$ 6,491
Profit (Loss)	$ 151	$ 293	$ (248)	$ 196
EBITDA [1]	$ 313	$ 395	$ (182)	$ 526
Adjusted EBITDA [1]	$ 313	$ 395	$ (73)	$ 635
% of Total Revenue	59.4%	36.0%	4.6 %	100.0%
EBITDA Margin [1]	8.2%	17.1%	(61.7)%	8.2%
Adjusted EBITDA Margin [1]	8.2%	17.1%	(19.3)%	9.8%
Year Ended December 31, 2015				
Total Revenue	$ 4,059	$ 2,331	$ 272	$ 6,662
Adjusted Revenue [1]	$ 4,059	$ 2,331	$ 388	$ 6,778
Profit (Loss)	$ 148	$ 298	$ (509)	$ (63)
EBITDA [1]	$ 308	$ 416	$ (440)	$ 284
Adjusted EBITDA [1]	$ 308	$ 416	$ (85)	$ 639
% of Total Revenue	60.9%	35.0%	4.1 %	100.0%
EBITDA Margin [1]	7.6%	17.8%	(161.8)%	4.3%
Adjusted EBITDA Margin [1]	7.6%	17.8%	(21.9)%	9.4%

(1) Refer to the reconciliations table in the "Non-GAAP Financial Measures" section.

Commercial Industries Segment

Revenue

Commercial Industries revenue 2017 as compared to prior year decreased, primarily driven by strategic contract actions, lower volumes in our customer care offerings and lost business, partially offset by revenue from new contracts and price increases with existing clients. Commercial Industries revenue for 2016 decreased from the prior year, mainly driven by lost business, lower volumes in our customer care offerings and reduced level of project work as a result of fewer large cases in our litigation services offering, negative impacts from currency and strategic contract exits. Partially offsetting the decline were new contract signings, primarily in our high-tech business area.

Segment Profit

Increase in the Commercial Industries segment profit for 2017 as compared to the prior year, was primarily driven by reduced costs as a result of our strategic transformation initiatives, including contract remediation and strategic contract actions, partially offset by the overall revenue decline. The Commercial Industries segment profit for 2016 as compared to the prior year was largely flat, primarily due to overall benefits from costs and productivity initiatives, partially offset by margin pressure in our customer care services offering and reduced project work in our litigation services offering.

Public Sector Segment

Revenue

Public Sector revenue for 2017 as compared to prior year decreased, primarily driven by strategic decisions and contract losses in State & Local, Government Healthcare and Payment Services. Public Sector revenue for 2016 decreased as compared to the prior year, primarily due to lower volumes and lost business in State Government Services, partially offset by new business.

Segment Profit

Decrease in the Public Sector segment profit for 2017 as compared to the prior year was mainly due to strategic decisions, contract losses in Government Healthcare, as well as losses in our Payment Services business, partially mitigated by our strategic transformation initiative. Decrease in the Public Sector segment profit for 2016 as compared to prior year was primarily due to the impact of lost business in State Government Services, partially offset by costs and productivity initiatives and improved performance in our transportation offering.

Other

Revenue

Other revenue for 2017 improved compared to 2016, primarily due to improved pricing and performance from two large Health Enterprise clients, partially offset by the exit from the NY MMIS contract and the strategic run-off of the Student Loan business. Other revenue for 2016 increased compared to 2015 as a result of the non-recurring $116 million HE charge in 2015, partially offset by the $83 million write-off of NY MMIS in 2016, the continued run-off of the Student Loan business, partially offset by our prior-year decision to not complete the HE implementations in California and Montana.

Segment Loss

Other loss for 2017 improved, primarily due to improved profitability in the student loan business, improved pricing from a contract extension with a large Health Enterprise client and general operational efficiencies in the HE business. Other loss for 2016 improved as a result of the non-recurring $389 million HE charge in 2015, partially offset by the $161 million write-off of the NY MMIS, partially offset by improvements in HE platform implementation expenses resulting from the decision to not fully complete the HE platform implementation in California and Montana.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table do not reflect the impact of our adoption of the new revenue recognition standard on January 1, 2018. Refer to Note 1 – Basis of Presentation and Summary of Significant Accounting Policies for further discussion of the estimated impact of the adoption of this standard.

(in millions)	Year Ended December 31, 2017	2016	2015	2017 vs. 2016 $ Change	2017 vs. 2016 % Change	2016 vs. 2015 $ Change	2016 vs. 2015 % Change
New business TCV	$ 2,260	$ 2,527	$ 4,345	$ (267)	(11)%	$ (1,818)	(42)%
Renewals TCV	2,692	4,325	3,637	(1,633)	(38)%	688	19 %
Total Signings	$ 4,952	$ 6,852	$ 7,982	$ (1,900)	(28)%	$ (1,130)	(14)%
Annual recurring revenue signings	$ 533	$ 589	$ 883	$ (56)	(10)%	$ (294)	(33)%
Non-recurring revenue signings	$ 383	$ 438	$ 451	$ (55)	(13)%	$ (13)	(3)%

Signings for 2017 decreased compared to the prior year mainly due to strategic decisions by management to streamline our portfolio which impacted both new business and renewal volume. Partially offsetting these declines were new business wins in targeted offerings and expansion with certain existing clients.

Signings for 2016 decreased compared to the prior year, primarily reflecting lower contribution from new business, due in part to our decision not to pursue opportunities with lower margins and the prior year large NY MMIS new business signing.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rate for 2017 was 94% and above our target range of 85%-90%. Including all contracts, renewals would have been 87% .

Capital Resources and Liquidity

As of December 31, 2017 and 2016 , total cash and cash equivalents were $658 million and $390 million , respectively. As of December 31, 2017, there were $1,574 million outstanding borrowings under our credit facility and we utilized $12 million of our revolving credit facility capacity to issue letters of credit. In addition, we will make payments in 2018 of $99 million to participants of the terminated deferred compensation plans.

Refer to the *Capital Market Activity* section below for additional information regarding our capital activity.

Cash Flow Analysis

The following summarizes our cash flows for the three years ended December 31, 2017 , as reported in our Consolidated Statements of Cash Flows in the accompanying Consolidated Financial Statements:

(in millions)	Year Ended December 31, 2017	2016	2015	Change 2017	Change 2016
Net cash provided by operating activities	$ 302	$ 108	$ 493	$ 194	$ (385)
Net cash provided by investing activities	74	16	522	58	(506)
Net cash provided by (used in) financing activities	(109)	132	(1,023)	(241)	1,155

Operating Activities

The increase in cash generated from operating activities for the year ended December 31, 2017 was primarily attributable to improvements in working capital and reduced wind-down payments associated with implementations in California, Montana and New York, partially offset by a higher interest payments on our outstanding debt.

The decrease in cash generated from operating activities for the year ended December 31, 2016 was primarily attributable to reduced factoring, HE settlement payments and working capital partially offset by lower net income tax payments due to income tax refunds.

Investing Activities

The increase in cash provided by investing activities for the year ended December 31, 2017 compared to the year ended December 31, 2016 was primarily related to $117 million in proceeds received on the liquidation of investments related to the termination of the deferred compensation plan, $56 million of proceeds from the sale of business and assets as compared to payments of $54 million in 2016, $86 million of lower net additions to land, buildings and equipment, partially offset by non-recurring proceeds of $248 million on related party notes receivable in 2016.

The decrease in cash provided by investing activities for the year ended December 31, 2016 compared to the year ended December 31, 2015 was primarily related to $54 million of payments for the sale of business and assets as compared to proceeds of $742 million in 2015, partially offset by proceeds of $248 million from related party notes receivable in 2016.

Financing Activities

The change to cash used in financing activities for the year ended December 31, 2017 compared to cash provided by for the year ended December 31, 2016 was primarily related to a decrease of $1.7 billion in proceeds from long term debt and an increase in debt payments of $209 million, partially offset by a reduction in payments to former parent of $1.6 billion.

The change to cash provided by financing activities for the year ended December 31, 2016 compared to cash used for the year ended December 31, 2015 was primarily related to an increase of $1.9 billion in proceeds from long term debt and a reduction in payments on debt of $261 million, partially offset by an increase in payments to former parent of $957 million.

Capital Market Activity

In April 2017, we entered into Amendment No. 1 to the Credit Agreement, which reduced the interest rate on our Term Loan B by 1.5% from 5.5% over LIBOR to 4.0% over LIBOR. Subsequently in October 2017, we entered into Amendment No. 2, which reduced the interest rate on our Term Loan B by 1.0% from 4.0% over LIBOR to 3.0% over LIBOR.

In January 2017, we borrowed an additional $100 million on Term Loan B with proceeds used for general corporate purposes.

Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.

Financial Instruments

Refer to Note 9 – Financial Instruments in the Consolidated Financial Statements for additional information.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

At December 31, 2017 , we had the following contractual cash obligations and other commercial commitments and contingencies:

(in millions)	2018	2019	2020	2021	2022	Thereafter
Total debt, including capital lease obligations [1]	$ 82	$ 72	$ 85	$ 560	$ 9	$ 1,309
Interest on debt [2]	115	113	110	107	91	156
Minimum operating lease commitments [3]	163	119	80	53	31	52
Defined benefit pension plans	8	—	—	—	—	—
Estimated Purchase Commitments [4]	116	100	68	38	21	—
Total	$ 484	$ 404	$ 343	$ 758	$ 152	$ 1,517

(1) Total debt represents principal debt and capital leases. Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information regarding debt.
(2) Represents interest on debt. Refer to Note 8 – Debt in the Consolidated Financial Statements for additional information.
(3) Refer to Note 5 – Land, Buildings, Equipment and Software, Net in the Consolidated Financial Statements for additional information.

(4) Other purchase commitments: We enter into other purchase commitments with vendors in the ordinary course of business. Our policy with respect to all purchase commitments is to record losses, if any, when they are probable and reasonably estimable. We currently do not have, nor do we anticipate, material loss contracts.

Pension Benefit Plans

We sponsor defined benefit pension plans that require periodic cash contributions. Our 2017 cash contributions for these plans were $8 million . In 2018 , based on current actuarial calculations, we expect to make contributions of approximately $8 million to our worldwide defined benefit pension plans.

Contributions to our defined benefit pension plans in subsequent years will depend on a number of factors, including the investment performance of plan assets and discount rates as well as potential legislative and plan changes. At December 31, 2017 , the unfunded and underfunded balances of our U.S. and non-U.S. defined benefit pension plans were $40 million and $19 million , respectively.

Refer to Note 11 – Employee Benefit Plans in the Consolidated Financial Statements for additional information regarding contributions to our defined benefit pension and post-retirement plans.

Other Contingencies and Commitments

As more fully discussed in Note 13 – Contingencies and Litigation in the Consolidated Financial Statements, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. In addition, guarantees, indemnifications and claims may arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates. Nonperformance under a contract including a guarantee, indemnification or claim could trigger an obligation of the Company.

We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. Should developments in any of these areas cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, they could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs.

Off-Balance Sheet Arrangements

As of December 31, 2017 , we do not believe we have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

In addition, refer to the preceding table for the Company's contractual cash obligations and other commercial commitments and Note 13 – Contingencies and Litigation in the Consolidated Financial Statements for additional information regarding contingencies, guarantees, indemnifications and warranty liabilities.

Non-GAAP Financial Measures

We have reported our financial results in accordance with U.S. generally accepted accounting principles (GAAP). In addition, we have discussed our results using the non-GAAP measures described below.

We believe these non-GAAP measures allow investors to better understand the trends in our business and to better understand and compare our results. Accordingly, we believe it is necessary to adjust several reported amounts, determined in accordance with GAAP, to exclude the effects of certain items as well as their related tax effects. Management believes that these non-GAAP financial measures provide an additional means of analyzing the current periods' results against the corresponding prior periods' results. However, these non-GAAP financial measures should be viewed in addition to, and not as a substitute for, the Company's reported results prepared in accordance with U.S. GAAP. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable U.S. GAAP measures and should be read only in conjunction with our Consolidated Financial Statements prepared in accordance with U.S. GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions and providing such non-GAAP financial measures to investors allows for a further level of transparency as the factors management uses in planning for and forecasting future periods. Compensation of our executives is based in part on the performance of our business based on these non-GAAP measures.

A reconciliation of the non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with U.S. GAAP are provided in the tables below.

These reconciliations also include the income tax effects of our non-GAAP performance measures in total, to the extent applicable. The income tax effects are calculated under the same accounting principles as applied to our reported pre-tax performance measures under ASC 740, which employs an annual effective tax rate method. The income tax effect for our non-GAAP performance measures is effectively the difference in income taxes for reported and adjusted pre-tax income calculated under the annual effective tax rate method. The tax effect of the non-GAAP adjustments was calculated based upon evaluation of the statutory tax treatment and the applicable statutory tax rate in the jurisdictions in which such charges were incurred.

Adjusted Revenue, Adjusted Operating Income and Adjusted Operating Margin*

We make adjustments to Revenue and Pre-tax income (Loss) for the following items for the purpose of calculating Adjusted Revenue, Adjusted Operating Income and Adjusted Operating Margin.

- Goodwill Impairment. Represents Goodwill Impairment charge of $935 million .
- Amortization of intangible assets. The amortization of intangible assets is driven by acquisition activity, which can vary in size, nature and timing as compared to other companies within our industry and from period to period.
- NY MMIS. Revenue and costs associated with the Company not fully completing the State of New York Health Enterprise Platform project.
- Restructuring and related costs. Restructuring and related costs include restructuring and asset impairment charges as well as costs associated with our strategic transformation program.
- HE charge. Revenue and costs associated with not fully completing the Health Enterprise Medical Platform projects in California and Montana.
- Separation costs. Separation costs are expenses incurred in connection with separation from Xerox Corporation into a separate, independent, publicly traded company. These costs primarily relate to third-party investment banking, accounting, legal, consulting and other similar types of services related to the separation transaction as well as costs associated with the operational separation of the two companies.
- Interest expense. Interest expense includes interest on long-term debt and amortization of debt issuance costs.
- Related party interest. Related party interest relates interest on related party Notes payable from Xerox prior to the Separation.
- Other (income) expenses, net. Other (income) expenses, net includes currency (gains) losses, net, litigation matters and all other (income) expenses, net.
- (Gain) loss on sale of asset and businesses.

** Applies to both consolidated and segment disclosures.*

We provide our investors with adjusted operating income and adjusted operating margin information, as supplemental information, because we believe it offers added insight, by itself and for comparability between periods, by adjusting for certain non-cash items as well as certain other identified items which we do not believe are indicative of our ongoing business and may also provide added insight on trends in our ongoing business.

Adjusted Net Income (Loss), Adjusted Earnings per Share and Adjusted Effective Tax Rate

We made adjustments to Income (Loss) before Income Taxes for the following items for the purpose of calculating Adjusted Net Income (Loss), Adjusted Earnings per Share and Adjusted Effective Tax Rate:

- Goodwill Impairment.
- Amortization of intangible assets.
- NY MMIS.
- Restructuring and related costs.
- HE charge.
- Separation costs.
- (Gain) loss on sale of asset and businesses.
- Other (income) expenses, net.

The Company provides adjusted net income and adjusted EPS financial measures to assist our investors in evaluating our ongoing operating performance for the current reporting period and, where provided, over different reporting periods, by adjusting for certain items which may be recurring or non-recurring and which in our view do not necessarily reflect ongoing performance. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions.

Management believes that adjusted effective tax rate, provided as supplemental information, facilitates a comparison by investors of our actual effective tax rate with an adjusted effective tax rate which reflects the impact of the items which are excluded in providing adjusted net income, and may provide added insight into our underlying business results and how effective tax rates impact our ongoing business.

Segment and Consolidated Adjusted EBITDA and EBITDA Margin

We use Adjusted EBITDA and Adjusted EBITDA Margin as additional way of assessing certain aspects of our operations that, when viewed with the GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, provide a more complete understanding of our on-going business. Adjusted EBITDA represents income (loss) before interest, income taxes, depreciation and amortization adjusted for the following items:

- Goodwill Impairment.
- Restructuring and related costs.
- Separation costs.
- Other (income) expenses, net.
- NY MMIS.
- NY MMIS depreciation
- HE charge.
- HE charge depreciation.
- (Gain) loss on sale of asset and businesses.
- Business transformation costs (Segment only).

Adjusted EBITDA and Adjusted EBITDA Margin are not intended to represent cash flows from operations, operating income (loss) or net income (loss) as defined by U.S. GAAP as indicators of operating performances. Management cautions that amounts presented in accordance with Conduent's definition of Adjusted EBITDA may not be comparable to similar measures disclosed by other companies because not all companies calculate Adjusted EBITDA in the same manner.

Key Financial Ratios

We make adjustments to Gross margin and SG&A as a percentage on Revenue:

- NY MMIS.
- HE charge.

The Company provides adjusted gross margin and adjusted SG&A as a percentage of revenue to assist our investors in evaluating our ongoing operating performance for the current reporting period and, where provided, over different reporting periods, by adjusting for certain items which may be recurring or non-recurring and which in our view do not necessarily reflect ongoing performance. We also internally use these measures to assess our operating performance, both absolutely and in comparison to other companies, and in evaluating or making selected compensation decisions.

Non-GAAP Reconciliations

Net Income (Loss) and EPS Reconciliation:

	Year Ended December 31, 2017		Year Ended December 31, 2016		Year Ended December 31, 2015

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

We are exposed to market risk from foreign currency exchange rates, which could affect operating results, financial position and cash flows. We manage our exposure to this market risk through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We utilized derivative financial instruments to hedge economic exposures, as well as reduce earnings and cash flow volatility resulting from shifts in market rates. We also hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify or change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 9 – Financial Instruments in the Consolidated Financial Statements for additional discussion on our financial risk management.

Foreign Exchange Risk Management

Assuming a 10% appreciation or depreciation in foreign currency exchange rates from the quoted foreign currency exchange rates at December 31, 2017 , the potential change in the fair value of foreign currency-denominated assets and liabilities in each entity would not be significant because all material currency asset and liability exposures were economically hedged as of December 31, 2017 . A 10% appreciation or depreciation of the U.S. Dollar against all currencies from the quoted foreign currency exchange rates at December 31, 2017 would have an impact on our cumulative translation adjustment portion of equity of approximately $54 million. The net amount invested in foreign subsidiaries and affiliates, primarily in the U.K. and Europe, and translated into U.S. Dollars using the year-end exchange rates, was approximately $542 million at December 31, 2017 .

Interest Rate Risk Management

The consolidated weighted-average interest rates related to our total debt for 2017 approximated 3.11% for Term A Loan due 2021, 6.79% for Term B Loan due 2023, 10.91% for Senior Notes due 2024 and 4.39% for capital lease obligations. As of December 31, 2017 , $1,607 million of our total debt of $2,117 million carried variable interest rates. The fair values of our fixed rate financial instruments are sensitive to changes in interest rates and at December 31, 2017 , a 10% increase in market interest rates would decrease the fair values of such financial instruments by approximately $19 million. A 10% decrease in market interest rates would increase the fair values of such financial instruments by approximately $52 million.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Conduent Incorporated

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Conduent Incorporated and its subsidiaries as of December 31, 2017 and 2016, and the related consolidated statements of income (loss), comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2017, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2017 appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016 **,** and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ PricewaterhouseCoopers LLP

Florham Park, New Jersey

March 1, 2018

We have served as the Company's auditor since 2016.

REPORTS OF MANAGEMENT

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have free access to the Audit Committee.

CONDUENT INCORPORATED
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation and Summary of Significant Accounting Policies

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

We are a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. We serve as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end user experience. We create value for our commercial and government clients by applying our expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

Our Consolidated Financial Statements included the historical basis of assets, liabilities, revenues and expenses of the individual businesses of the Company, including joint ventures and partnerships over which the Company has a controlling financial interest. We have prepared the Consolidated Financial Statements pursuant to the rules and regulations of the SEC. Certain reclassifications have been made to prior years to conform to the current year presentation. All intercompany transactions and balances have been eliminated.

We have also considered the impact of subsequent events on these consolidated financial statements.

Separation from Xerox Corporation

On December 31, 2016, Conduent spun-off from Xerox Corporation (Xerox), pursuant to the Separation and Distribution Agreement (Separation). The Separation was completed by way of a pro rata distribution of Conduent shares held by Xerox to Xerox’s shareholders. As a result, we operate as an independent, publicly traded company on the New York Stock Exchange, under the ticker "CNDT".

Prior to December 31, 2016, the Financial Statements of the Company were derived from the financial statements and accounting records of Xerox as if the Conduent operated on a standalone basis. Historically, the Company consisted of the Business Process Outsourcing Operating segment within Xerox’s reportable Services segment and did not operate as a separate, standalone company. Accordingly, Xerox performed certain corporate overhead functions for the Company. Therefore, certain corporate costs, including compensation costs for corporate employees supporting the Company, were allocated from Xerox. It is not practicable to estimate actual costs that would have been incurred had the Company been a separate standalone company during the periods presented. Allocations for management costs and corporate support services provided to the Company totaled $165 million and $170 million for years ended December 31, 2016 and December 31, 2015, respectively. Management of the Company believes the assumptions regarding the allocated expenses reasonably reflect the utilization of services provided to or the benefit received by the Company during the periods prior to the Separation. The Consolidated Financial Statements for the periods prior to the Separation do not necessarily include all the expenses that would have been incurred or held by the Company had it been a separate, standalone company.

Use of Estimates

We prepared the Consolidated Financial Statements using financial information available at the time of preparation, which requires us to make estimates and assumptions that affect the amounts reported. Our most significant estimates pertain to the recognition of revenue for contracts based on the percentage of completion method of accounting, intangible and long-lived assets, valuation of goodwill, contingencies and litigation, income taxes and corporate allocations (for years ended December 31, 2016 and 2015). Our estimates are based on management's best knowledge of current events, historical experience, and on various other assumptions that are believed to be reasonable under the circumstances. As a result, actual results may be different from these estimates.

New Accounting Standards

Revenue Recognition: In May 2014, the Financial Accounting Standards Board (FASB) updated the accounting guidance related to revenue recognition to clarify the principles for recognizing revenue and replaced all existing revenue recognition guidance in U.S. GAAP with one accounting model. The core principle of the guidance is that an entity should recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The updated guidance also requires additional qualitative and quantitative disclosures relating to the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers largely on a disaggregated basis. We have evaluated the adoption impact of the updated accounting guidance on our consolidated financial statements and continue to evaluate the impact on disclosures and internal controls. The new guidance will impact: (1) revenue associated with postage, which will be recognized on a net basis versus the current gross treatment; (2) the timing of revenue recognition associated with fixed fees for certain contracts with more than one performance obligation; and (3) the timing of recognition of certain pricing discounts. We adopted this updated accounting guidance beginning January 1, 2018 using the modified retrospective method under which we will recognize a cumulative-effect adjustment of approximately $20 million at the date of adoption (the expected impact to 2018 revenues is approximately $15 million), which excludes changes to our revenue associated with the reimbursement of postage. In addition, we recognized approximately $150 million of postage revenue in 2017 that will be recognized on a net basis (for all future periods) in Cost of services.

Leases: In February 2016, the FASB updated the accounting guidance related to leases requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases except short term leases (lease term of 12 months or less). The accounting for lessors is largely unchanged. This updated guidance is effective for us beginning January 1, 2019. This guidance must be adopted using a modified retrospective approach through a cumulative-effect adjustment for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. While we are currently evaluating the impact of the updated accounting guidance on our consolidated financial statements; we do expect a material impact to the Company's Consolidated Balance Sheets.

Cash Flows: In November 2016 the FASB issued updated accounting guidance regarding the presentation of restricted cash in the statement of cash flows. Specifically, this update requires that restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. At December 31, 2017 and 2016 , we had $9 million and $22 million of restricted cash, respectively, reported in other current assets. This update is effective for us beginning January 1, 2018.

Business Combinations: In January 2017, the FASB issued clarifying accounting guidance related to the definition of a business to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This update is effective for us beginning January 1, 2018, with early adoption permitted. The amendment in this update will be applied prospectively. There will be no material impact from the adoption of this clarifying accounting guidance on our consolidated financial statements.

Recently Adopted Accounting Standards

Goodwill: In January 2017, the FASB issued updated accounting guidance for simplifying the goodwill impairment test. Under the new guidance, an entity does not have to calculate the implied fair value of goodwill at the impairment testing date of its assets and liabilities as if those assets and liabilities had been acquired in a business combination. Instead the goodwill impairment test will compare the fair value of a reporting unit with its carrying amount and recognize as an impairment charge any amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit. We have elected to early adopt this new guidance for our goodwill impairment tests performed after January 1, 2017. Adoption did not have any effect on our financial condition, results of operations or cash flows.

Summary of Accounting Policies

Revenue Recognition

We primarily generate revenue through services. Revenue is recognized when it is realized or realizable and earned. We consider revenue realized or realizable and earned when we have persuasive evidence of an arrangement, delivery has occurred, the transaction price is fixed or determinable and collectibility is reasonably assured. Delivery does not occur until services have been provided to the customer, risk of loss has transferred to the customer, and either customer acceptance has been obtained, customer acceptance provisions have lapsed or the company has objective evidence that the criteria specified in the customer acceptance provisions have been satisfied. The transaction price is not considered to be fixed or determinable until all contingencies related to the sale have been resolved.

Outsourcing Services: Revenues associated with outsourcing services are generally recognized as services are rendered, which is generally on the basis of the number of accounts or transactions processed. In service arrangements where final acceptance of a system or solution by the customer is required, revenue is deferred until all acceptance criteria have been met. Revenues on cost reimbursable contracts are recognized by applying an estimated factor to costs as incurred, determined by the contract provisions and prior experience. Revenues on unit-price contracts are recognized at the contractual selling prices as work is completed and accepted by the customer. Revenues on time and material contracts are recognized at the contractual rates as the labor hours and direct expenses are incurred.

Revenues on certain fixed price contracts where we provide system development and implementation services are recognized over the contract term based on the percentage of development and implementation services that are provided during the period compared with the total estimated development and implementation services to be provided over the entire contract using the percentage-of-completion accounting methodology. These services require that we perform significant, extensive and complex design, development, modification or implementation of our customers' systems. Performance will often extend over long periods, and our right to receive future payment depends on our future performance in accordance with the agreement.

The percentage-of-completion methodology involves recognizing probable and reasonably estimable revenue using the percentage of services completed, on a current cumulative cost to an estimated total cost basis, using a reasonably consistent profit margin over the period.

Revenues earned in excess of related billings are accrued, whereas billings in excess of revenues earned are deferred until the related services are provided. We recognize revenues for non-refundable, upfront implementation fees on a straight-line basis over the period between the initiation of the services through the end of the contract term.

In connection with our services arrangements, we incur and capitalize costs to originate these long-term contracts and to perform the migration, transition and setup activities necessary to enable us to perform under the terms of the arrangement. Certain initial direct costs of an arrangement are capitalized and amortized over the contractual service period of the arrangement to cost of services. From time to time, we also provide inducements to customers in various forms, including contractual credits, which are capitalized and amortized as a reduction of revenue over the term of the contract.

Spending associated with customer-related deferred set-up/transition and inducement costs were as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Set-up/transition and inducement expenditures	$ 55	$ 63	$ 65

The capitalized amount of customer contract costs were as follows:

(in millions)	Year Ended December 31, 2017	2016
Capitalized customer contract costs [1]	126	137

(1) The balance at December 31, 2017 and 2016 are expected to be amortized over a weighted average period of approximately nine and eight years, respectively.

Amortization expense for the next five years and thereafter is expected to be as follows (in millions):

2018	2019	2020	2021	2022	Thereafter
$ 54	$ 22	$ 13	$ 9	$ 6	$ 22

Long-lived assets used in the fulfillment of the arrangements are capitalized and depreciated over the shorter of their useful life or the term of the contract if an asset is contract specific.

Multiple Element Arrangements: As described above, we enter into the following revenue arrangements that may consist of multiple deliverables including contracts for multiple types of outsourcing services, as well as professional and value-added services. For instance, we may contract for an implementation or development project and also provide services to operate the system which we implement or develop over a period of time; or we may contract to scan, manage and store customer documents.

In substantially all of our multiple element arrangements, we are able to separate the deliverables since we normally will meet both of the following criteria:

- The delivered item(s) has value to the customer on a stand-alone basis; and
- If the arrangement includes a general right of return relative to the delivered item(s), delivery or performance of the undelivered item(s) is considered probable and substantially in our control.

Consideration in a multiple-element arrangement is allocated at the inception of the arrangement to all deliverables on the basis of the relative selling price. When applying the relative selling price method, the selling price for each deliverable is primarily determined based on vendor-specific objective evidence (VSOE), third-party evidence (TPE), or our best estimate of the selling price. The above noted revenue policies are then applied to each separated deliverable, as applicable.

Revenue Reporting: Revenue from sales of third-party vendor products or services is recorded net of costs when the Company is acting as an agent between the customer and the vendor or supplier, or gross when the Company is a principal to the transaction. Postage is generally recognized on a gross basis. Several factors are considered to determine whether the company is an agent or principal, most notably whether the Company is the primary obligor to the customer, or has inventory risk. Consideration is also given to whether the Company adds meaningful value to the vendor's product or service, was involved in the selection of the vendor's product or service, has latitude in establishing the sales price or has credit risk.

Revenue-based Taxes: We report revenue net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions. The primary revenue-based taxes are sales tax and value-added tax (VAT).

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, including money market funds and investments with original maturities of three months or less.

Receivable Sales

We had transferred certain portions of our receivable portfolios in 2016 and 2015 and accounted for those transfers as sales based on meeting the criteria for derecognition. Losses on the sale of receivables depend, in part, on both (a) the cash proceeds and (b) the net non-cash proceeds received or paid. When we have sold receivables, we normally received beneficial interests in the transferred receivables from the purchasers as part of the proceeds. Refer to Note 4 – Accounts Receivable, Net for more details on our receivable sales .

Assets/Liabilities Held for Sale

We classify assets as held for sale in the period when the following conditions are met: (i) management, having the authority to approve the action, commits to a plan to sell the asset (disposal group); (ii) the asset (disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (disposal group); (iii) an active program to locate a buyer and other actions required to complete the plan to sell the asset (disposal group) have been initiated; (iv) the sale of the asset (disposal group) is probable, and transfer of the asset (disposal group) is expected to qualify for recognition as a completed sale within one year, except if events or circumstances beyond our control extend the period of time required to sell the asset (disposal group) beyond one year; (v) the asset (disposal group) is being actively marketed for sale at a price that is reasonable in relation to its current fair value; and (vi) actions required to complete the plan indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.

A long-lived asset (disposal group) that is classified as held for sale is initially measured at the lower of its carrying value or fair value less any costs to sell. Any loss resulting from this measurement is recognized in the period in which the held for sale criteria are met. Conversely, gains are not recognized on the sale of a long-lived asset (disposal group) until the date of sale.

The fair value of a long-lived asset (disposal group) less any costs to sell is assessed each reporting period it remains classified as held for sale and any subsequent changes are reported as an adjustment to the carrying value of the asset (disposal group), as long as the new carrying value does not exceed the carrying value of the asset at the time it was initially classified as held for sale.

In the fourth quarter of 2017, Management approved for disposal through sale of certain assets and businesses. This action was taken as a result of our strategic evaluation of these businesses. As of December 31, 2017, these businesses qualified as assets held for sale. During the year ended December 31, 2017, we reclassified $757 million to assets held for sale and $169 million to liabilities held for sale, as we have an active program to locate buyers for these businesses and we expect these businesses to be sold within one year.

Refer to Note 3 – Assets/Liabilities Held for Sale for further discussion.

Land, Buildings and Equipment

Land, buildings and equipment are recorded at cost. Buildings and equipment are depreciated over their estimated useful lives. Leasehold improvements are depreciated over the shorter of the lease term or the estimated useful life. Significant improvements are capitalized and maintenance and repairs are expensed when incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further discussion.

Software - Internal Use and Product

Internal Use: We capitalize direct costs associated with developing, purchasing or otherwise acquiring software for internal use and amortize these costs on a straight-line basis over the expected useful life of the software, beginning when the software is implemented (Internal Use Software). Costs incurred for upgrades and enhancements that will not result in additional functionality are expensed as incurred. Amounts expended for Internal Use Software are included in Cash Flows from Investing.

Product: We also capitalize certain costs related to the development of software solutions to be sold to our customers upon reaching technological feasibility (Product Software). These costs are amortized on a straight-line basis over the estimated economic life of the software. Amounts expended for Product Software are included in Cash Flows from Operations. We perform periodic reviews to ensure that unamortized Product Software costs remain recoverable from estimated future operating profits (net realizable value or NRV). Costs to support or service licensed software are charged to Costs of outsourcing as incurred.

Refer to Note 5 – Land, Buildings, Equipment and Software, Net for further information.

Goodwill

For acquired businesses, the Company records the acquired assets and assumed liabilities based on their relative fair values at the date of acquisitions (commonly referred to as the purchase price allocation). Goodwill represents the excess of the purchase price paid in excess of the fair value of net tangible and intangible assets acquired. For the Company's business acquisitions, the purchase price is allocated to identifiable intangible assets separate from goodwill if they are from contractual or other legal rights, or if they could be separated from the acquired business and sold, transferred, licensed, rented or exchanged.

We test goodwill for impairment annually or more frequent if an event or change in circumstances indicate the asset may be impaired. Impairment testing for goodwill is done at the reporting unit level. We determined the fair value of our reporting units utilizing a combination of both an Income Approach and a Market Approach. The Income Approach utilizes a discounted cash flow analysis based upon the forecasted future business results of our reporting units. The Market Approach utilizes the guideline public company method. If the fair value of a reporting unit is less than its carrying amount, an impairment charge would be recognized for amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Other Intangible Assets

Other intangible assets primarily consist of assets acquired through business combinations, including installed customer base and distribution network relationships, patents and trademarks. Other intangible assets are amortized on a straight-line basis over their estimated economic lives unless impairment is identified.

Refer to Note 6 – Goodwill and Intangible Assets, Net for further information.

Impairment of Long-Lived Assets

We review the recoverability of our long-lived assets, including buildings, equipment, internal use software, product software and other intangible assets, when events or changes in circumstances occur that indicate that the carrying value of the asset may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of the asset from the expected future pre-tax cash flows (undiscounted and without interest charges) of the related operations. If these cash flows are less than the carrying value of such asset, an impairment loss is recognized for the difference between estimated fair value and carrying value. Our primary measure of fair value is based on forecasted cash flows.

Pension Obligations

We sponsor various forms of defined benefit pension plans in several countries covering employees who meet eligibility requirements.

Several statistical and other factors that attempt to anticipate future events are used in calculating the expense, liability and asset values related to our pension plans. These factors include assumptions we make about the discount rate, expected return on plan assets, the rate of future compensation increases and mortality rates.

The discount rate is used to present value our future anticipated benefit obligations. The discount rate reflects the current rate at which benefit liabilities could be effectively settled considering the timing of expected payments for plan participants. In estimating our discount rate, we consider rates of return on high-quality fixed-income investments adjusted to eliminate the effects of call provisions, as well as the expected timing of pension and other benefit payments.

The expected rate of return on plan assets is the long-term rate of return we expect to earn on plan assets. When estimating the expected rate of return, in addition to assessing recent performance, we consider the historical returns earned on plan assets, the rates of return expected in the future, and our investment strategy and asset mix with respect to the plans' funds. The expected rate of return on plan assets is reviewed annually and revised, as necessary, to reflect changes in financial markets and our investment strategy.

Each year, the difference between the actual return on plan assets and the expected return on plan assets, as well as increases or decreases in the benefit obligation as a result of changes in the discount rate and other actuarial assumptions, are added to or subtracted from any cumulative actuarial gain or loss from prior years. This amount is the net actuarial gain or loss recognized in Accumulated other comprehensive loss. We amortize net actuarial gains and losses as a component of net pension cost for a year if, as of the beginning of the year, that net gain or loss (excluding asset gains or losses that have not been recognized in market-related value) exceeds 10% of the greater of the projected benefit obligation or the market-related value of plan assets (the "corridor" method). This determination is made on a plan-by-plan basis. If amortization is required for a particular plan, we amortize the applicable net gain or loss in excess of the 10% threshold on a straight-line basis in net periodic pension cost over the remaining service period of the employees participating in that pension plan. In plans where substantially all participants are inactive, the amortization period for the excess is the average remaining life expectancy of the plan participants.

All changes are ultimately recognized as components of net periodic benefit cost, except to the extent they may be offset by subsequent changes. At any point, changes that have been identified and quantified but not recognized as components of net periodic benefit cost, are recognized in Accumulated other comprehensive loss, net of tax.

Refer to Note 11 – Employee Benefit Plans for further information regarding our Pension Benefit Obligations .

Income Taxes

We account for income taxes under the asset and liability method. Deferred tax assets and liabilities are based on differences between U.S. GAAP reporting and tax bases of assets or liabilities and based on current tax laws, regulations and rates.

The recognition of deferred tax assets requires an assessment to determine the realization of such assets. Management establishes valuation allowances on deferred tax assets when it is determined “more-likely-than-not” that some portion or all of the deferred tax assets may not be realized. Management considers positive and negative evidence in evaluating the ability of the Company to realize its deferred tax assets, including its historical results and forecasts of future ability to realize its deferred tax assets, including projected future taxable income, the expected timing of the reversals of existing temporary differences and tax planning strategies.

We are subject to ongoing tax examinations and assessments in various jurisdictions. We have unrecognized tax benefits for uncertain tax positions. We follow U.S. GAAP which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can materially increase or decrease our effective tax rate, as well as impact our operating results.

Refer to Note 12 – Income Taxes for further discussion.

Foreign Currency Translation and Re-measurement

The functional currency for most foreign operations is the local currency. Net assets are translated at current rates of exchange and income, expense and cash flow items are translated at average exchange rates for the applicable period. The translation adjustments are recorded in Accumulated other comprehensive loss.

The U.S. Dollar is used as the functional currency for certain foreign subsidiaries that conduct their business in U.S. Dollars. A combination of current and historical exchange rates is used in re-measuring the local currency transactions of these subsidiaries and the resulting exchange adjustments are recorded in Currency (gains) and losses within other expenses, net together with other foreign currency re-measurements.

Note 2 – Segment Reporting

Our reportable segments correspond to how we organize and manage the business, as defined by our CEO who is also our Chief Operating Decision Maker, and are aligned to the industries in which our clients operate. Our segments involve the delivery of business process services and include service arrangements where we manage a customer's business activity or process. We report our financial performance based on the two reportable segments: Commercial Industries and Public Sector.

- **Commercial Industries:** Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries (other than healthcare). Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include customer care, human resource management and finance and accounting services. These services are complemented by innovative industry-specific services such as personalized product information for the automotive industry; digitized source-to-pay solutions for clients in the manufacturing industry; customer experience and marketing services for clients in the retail industry; mortgage and consumer loan processing for clients in the financial services industry; and customized workforce learning solutions for clients in the aerospace industry.
- **Public Sector:** Our Public Sector segment provides government-centric business process services to U.S. federal, state and local and foreign governments for transportation, public assistance, program administration, transaction processing and payment services.

Other includes our Government Health Enterprise Medicaid Platform business, where we are limiting our focus to maintaining systems for our current clients; our Education Business inclusive of our Student Loan business, which is in runoff; and inter-segment eliminations.

Selected financial information for our reportable segments was as follows:

(in millions)	Year Ended December 31, Commercial Industries	Public Sector	Other	Total
2017				
Revenue	$ 3,486	$ 2,160	$ 334	$ 5,980
Former parent company revenue	42	—	—	42
Inter-segment revenue	20	3	(23)	—
Total Segment Revenue	$ 3,548	$ 2,163	$ 311	$ 6,022
Depreciation and amortization	$ 162	$ 85	$ 7	$ 254
Segment profit (loss)	182	245	(10)	417
2016				
Revenue	$ 3,729	$ 2,300	$ 329	$ 6,358
Former parent company revenue	50	1	(1)	50
Inter-segment revenue	26	7	(33)	—
Total Segment Revenue	$ 3,805	$ 2,308	$ 295	$ 6,408
Depreciation and amortization	$ 162	$ 102	$ 69	$ 333
Segment profit (loss)	151	293	(248)	196
2015				
Revenue	$ 3,970	$ 2,324	$ 315	$ 6,609
Former parent company revenue	54	—	(1)	53
Inter-segment revenue	35	7	(42)	—
Total Segment Revenue	$ 4,059	$ 2,331	$ 272	$ 6,662
Depreciation and amortization	$ 160	$ 118	$ 72	$ 350
Segment profit (loss)	148	298	(509)	(63)

The following is a reconciliation of segment profit (loss) profit to pre-tax (loss) income:

(in millions)	Year Ended December 31,		
Segment Profit (Loss) Reconciliation to Pre-tax Loss	2017	2016	2015
Pre-tax Loss	$ (16)	$ (1,227)	$ (574)
Reconciling items:			
Goodwill impairment	—	935	—
Amortization of intangible assets	243	280	250
Restructuring and related costs	101	101	159
Interest expense	137	14	8
Related party interest	—	26	61
Separation costs	12	44	—
(Gain) Loss on sale of asset and businesses	(42)	2	—
Business transformation costs	—	3	3
Other (income) expenses, net	(18)	18	30
Total Segment Profit (Loss)	$ 417	$ 196	$ (63)

Geographic area data is based upon the location of the subsidiary reporting the revenue or long-lived assets and is as follows for each of the years ended December 31:

	Revenues			Long-Lived Assets [1]	
(in millions)	2017	2016	2015	2017	2016
United States	$ 5,303	$ 5,686	$ 5,849	$ 289	$ 325
Europe	538	547	616	42	47
Other areas	181	175	197	54	64
Total Revenues and Long-Lived Assets	$ 6,022	$ 6,408	$ 6,662	$ 385	$ 436

(1) Long-lived assets are comprised of (i) Land, buildings and equipment, net, (ii) Internal use software, net and (iii) Product software, net.

In 2016, our methodology to disclose revenue on a geographic basis changed to reflect where the work is contracted. All prior years have been adjusted to reflect this change in methodology.

Note 3 – Assets/Liabilities Held for Sale

As of December 31, 2017, there were certain businesses that qualified as assets/liabilities held for sale due to plans for disposal through sale. These assets/liabilities held for sale include a mix of both Commercial Industries and Public Sector that represent businesses in markets or with services that we did not see as strategic or core. The following is a summary of the major categories of assets and liabilities that have been reclassified to held for sale.

(in millions)	Year Ended December 31, 2017
Accounts Receivable, net	$ 160
Other current assets	41
Land, building and equipment, net	6
Product Software, net	3
Intangible assets, net	7
Goodwill	537
Other long-term assets	3
Total Assets held for sale	$ 757
Accounts payable	$ 9
Accrued compensation	20
Unearned revenue	30
Other current liabilities	53
Pension and other benefit obligations	50
Other long-term liabilities	7
Total Liabilities held for sale	$ 169

Information Technology Outsourcing (ITO)

In 2015 we completed the sale of our ITO business to Atos, which represented a discontinued operation.

In February 2016, we reached an agreement with Atos on the final adjustments to the closing balance of net assets sold as well as the settlement of certain indemnifications and recorded an additional pre-tax loss on the disposal in 2015 of $ 24 million ($ 14 million after-tax). The additional loss was recorded in 2015 as the financial statements had not yet been issued when the agreement was reached with Atos. We made a payment in 2016 to Atos of approximately $ 52 million , representing a $ 28 million adjustment to the final sales price as a result of this agreement and a payment of $ 24 million due from closing. The payment is reflected in Investing cash flows as an adjustment of the sales proceeds.

Summarized financial information for our Discontinued Operations is as follows:

(in millions)	Year Ended December 31, 2015
Revenues	$ 619
Income (loss) from operations	$ 104
Loss on disposal	(101)
Net income (loss) before income taxes	$ 3
Income tax expense	(81)
Loss from discontinued operations, net of tax	$ (78)

The following is a summary of selected financial information of the ITO business:

(in millions)	Year Ended December 31, 2015
Expenses:	
Operating lease rent expense	$ 130
Defined contribution plans	4
Interest expense	2
Expenditures:	
Cost of additions to land, buildings and equipment	$ 41
Cost of additions to internal use software	1
Customer-related deferred set-up/transition and inducement costs	10

Note 4 – Accounts Receivable, Net

Accounts receivable, net was as follows:

	December 31,	
(in millions)	2017	2016
Amounts billed or billable	$ 919	$ 1,014
Unbilled amounts	187	279
Allowance for doubtful accounts	(2)	(7)
Accounts Receivable, Net	$ 1,104	$ 1,286

Unbilled amounts include amounts associated with percentage-of-completion accounting and other earned revenues not currently billable due to contractual provisions. Amounts to be invoiced in subsequent months for current services provided are included in amounts billable, and at December 31, 2017 and 2016 were approximately $364 million and $429 million , respectively.

Accounts Receivable Sales Arrangements

Prior to 2017, we sold accounts receivables with payment due dates of less than 60 days.

Under most of the agreements, we continue to service the sold accounts receivable. When applicable, a servicing liability is recorded for the estimated fair value of the servicing. The amounts associated with the servicing liability were not material.

Accounts receivable sales were as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Accounts receivable sales	$ —	$ 250	$ 325
Estimated increase (decrease) to operating cash flows [1]	—	(136)	58

(1) Represents the difference between current and prior year fourth quarter receivable sales adjusted for the effects of: (i) deferred proceeds, (ii) collections prior to the end of the year and (iii) currency.

Note 5 - Land, Buildings, Equipment and Software, Net

Land, buildings and equipment, net were as follows:

(in millions except as noted)	Estimated Useful Lives (Years)	December 31, 2017	December 31, 2016
Land		$ 3	$ 10
Building and building equipment	25 to 50	17	20
Leasehold improvements	Varies	247	236
Office furniture and equipment	3 to 15	784	719
Other	4 to 20	1	1
Construction in progress		24	54
Subtotal		1,076	1,040
Accumulated depreciation		(819)	(757)
Land, Buildings and Equipment, Net		$ 257	$ 283

Depreciation expense and operating lease rent expense were as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Depreciation expense	$ 125	$ 130	$ 126
Operating lease rent expense	$ 375	$ 378	$ 389

We lease buildings and equipment, substantially all of which are accounted for as operating leases. Certain leases were accounted for as capital leases and the remaining net book value of those assets, included in Land, Buildings and Equipment, net were approximately $32 million and $42 million at December 31, 2017 and 2016 , respectively.

Future minimum operating lease commitments that have initial or remaining non-cancelable lease terms in excess of one year at December 31, 2017 were as follows (in millions):

2018	2019	2020	2021	2022	Thereafter
$ 163	$ 119	$ 80	$ 53	$ 31	$ 52

Internal Use and Product Software

Additions to Internal Use and Product Software as well as year-end balances for these assets were as follows:

(in millions) Additions to:	Year Ended December 31, 2017	2016	2015
Internal use software	$ 36	$ 39	$ 27
Product software	10	10	19

(in millions) Capitalized Costs, Net	December 31, 2017	2016
Internal use software	$ 106	$ 115
Product software	22	38

Useful lives of our internal use and product software generally vary from one to seven years.

Included within product software at December 31, 2017 and 2016 were $2 million and $3 million , respectively, of capitalized costs associated with software system platforms developed for use in certain of our government services businesses.

During 2016 we determined that it was probable that we would not fully complete our NY MMIS project in its current form. As a result of this decision an impairment charge of approximately $28 million was recorded in Cost of services. We also recorded an additional impairment charge in 2016 related to the 2015 HE charge of approximately $9 million in Restructuring and asset impairment. In 2015 we decided to discontinue certain future implementations of these software system platforms, and recorded an impairment charge of $160 million ($14 million in Cost of services and $146 million in Restructuring and asset impairments).

Note 6 - Goodwill and Intangible Assets, Net

Goodwill

The following table presents the changes in the carrying amount of goodwill, by reportable segment:

(in millions)	Commercial Industries	Public Sector	Total
Balance at December 31, 2015	$ 2,467	$ 2,405	$ 4,872
Foreign currency translation	(24)	(20)	(44)
Acquisitions	(2)	—	(2)
Disposition	(2)	—	(2)
Impairment	(935)	—	(935)
Balance at December 31, 2016	$ 1,504	$ 2,385	$ 3,889
Foreign currency translation	19	28	47
Dispositions	(19)	(14)	(33)
Assets held for sale	(105)	(432)	(537)
Balance at December 31, 2017	**$ 1,399**	**$ 1,967**	**$ 3,366**

Impairment Charge

There was no impairment identified for the years ended December 31, 2017 and 2015. In 2016, due to the declining trends and projections in the Commercial Industries reporting unit, we concluded that the fair value of our Commercial Industries reporting unit was less than its carrying value. Accordingly, we recorded a pre-tax goodwill impairment charge of $935 million during the fourth quarter of 2016, which is separately presented in the Consolidated Statements of Income (Loss). There was no impairment identified for the Public Sector in 2016.

Based on our quantitative assessments, we concluded that the fair value of our Commercial Industries and Public Sector reporting units exceeded their respective carrying values by 72% and 13% , respectively, at December 31, 2017. The most significant assumptions used in the goodwill analysis relate to a 3% long-term organic growth rate for both the Commercial Industries and Public Sector segments as well as a 9.25% and a 8.75% discount rate for the Commercial Industries and Public Sector segments, respectively.

Intangible Assets, Net

Net intangible assets were $891 million at December 31, 2017 of which $492 million and $399 million relate to our Commercial Industries and Public Sector segments, respectively. Intangible assets were comprised of the following:

		December 31, 2017			December 31, 2016		
(in millions except years)	Weighted Average Amortization	Gross Carrying Amount	Accumulated Amortization	Net Amount	Gross Carrying Amount	Accumulated Amortization	Net Amount
Customer relationships	12 years	$ 2,907	$ 2,022	$ 885	$ 2,924	$ 1,788	$ 1,136
Technology, patents and non-compete	4 years	11	5	6	11	3	8
Total Intangible Assets		$ 2,918	$ 2,027	$ 891	$ 2,935	$ 1,791	$ 1,144

Amortization expense related to intangible assets was $243 million , $280 million and $250 million for the years ended December 31, 2017 , 2016 and 2015 , respectively. Amortization expense is expected to approximate $241 million in 2018 , $241 million in 2019, $238 million in 2020, $134 million in 2021 and $12 million in 2022 .

Note 7 – Restructuring Programs and Asset Impairment Charges

We engage in a series of restructuring programs related to downsizing our employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce our cost structure and improve productivity. Prior to 2017, these initiatives primarily consist of severance actions that impacted all major geographies and segments. In 2017, the implementation of our strategic transformation program as well as various productivity initiatives reduced our real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Management continues to evaluate our business, therefore, in future years, there may be additional provisions for new plan initiatives as well as changes in previously recorded estimates as payments are made or actions are completed. Asset impairment charges were also incurred in connection with these restructuring actions for those assets sold, abandoned or made obsolete as a result of these programs.

Costs associated with restructuring, including employee severance and lease termination costs are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of our restructuring program activity during the two years ended December 31, 2017 is as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Asset Impairments	Total
Balance at December 31, 2015	4	—	—	4
Restructuring provision	67	7	12	86
Reversals of prior accruals	(13)	—	—	(13)
Total Net Current Period Charges	54	7	12	73
Charges against reserve and currency	(43)	(2)	(11)	(56)
Balance at December 31, 2016	15	5	1	21
Restructuring provision	49	49	5	103
Reversals of prior accruals	(8)	(3)	—	(11)
Total Net Current Period Charges	41	46	5	92
Charges against reserve and currency	(42)	(17)	(6)	(65)
Liabilities held for sale	—	(4)	—	(4)
Balance at December 31, 2017	$ 14	$ 30	$ —	$ 44

We also recorded costs related to professional support services associated with the implementation of the strategic transformation program of $9 million and $28 million during the years ended December 31, 2017 and 2016 , respectively.

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Commercial Industries	$ 60	$ 57	$ 11
Public Sector	28	12	2
Other [1]	4	4	146
Total Net Restructuring Charges	$ 92	$ 73	$ 159

(1) Refer to Note 5 – Land, Buildings, Equipment and Software, Net for additional information regarding the asset impairment in 2016 and 2015.

Note 8 – Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments or as of the earliest put date available to the debt holders. We defer costs associated with debt issuance over the applicable term. These costs are amortized as interest expense in our Consolidated Statements of Income (Loss).

Long-term debt was as follows:

(in millions)	Weighted Average Interest Rates at December 31, 2017 [1]	December 31, 2017	December 31, 2016
Term loan A due 2021	3.11%	$ 732	$ 694
Term loan B due 2023	6.79%	842	750
Senior notes due 2024	10.91%	510	510
Capital lease obligations	4.39%	33	43
Principal Debt Balance		$ 2,117	$ 1,997
Debt issuance costs and unamortized discounts		(56)	(56)
Less: current maturities		(82)	(28)
Total Long-term Debt		$ 1,979	$ 1,913

(1) Represents weighted average effective interest rate which includes the effect of discounts and premiums on issued debt.

Scheduled principal payments due on our long-term debt for the next five years and thereafter are as follows:

2018(1)	2019	2020	2021	2022	Thereafter	Total
$ 82	$ 72	$ 85	$ 560	$ 9	$ 1,309	$ 2,117

(1) Quarterly long-term debt maturities for 2018 are $21 million , $21 million , $21 million and $19 million for the first, second, third and fourth quarters, respectively.

Credit Facility

On December 7, 2016 , we entered into a senior secured credit agreement (Credit Agreement) among the Company, its subsidiaries: Conduent Business Services, LLC (CBS), Affiliated Computer Services International B.V. and Conduent Finance, Inc. (CFI), the lenders party and JP Morgan Chase Bank, N.A., as the administrative agent. The Credit Agreement contains senior secured credit facilities (Senior Credit Facilities) consisting of:

(i) Senior Secured Term Loan A (Term Loan A) due 2021 with an aggregate principal amount of $700 million ;
(ii) Senior Secured Term Loan B (Term Loan B) due 2023 with an aggregate principal amount of $850 million ;
(iii) Senior Revolving Credit Facility (Revolving Credit Facility) due 2021 with an aggregate available amount of $750 million including a sub-limit for up to $300 million available for the issuance of letters of credit.

Borrowings under the Term Loan A Facility and the Revolving Credit Facility bears interest at a rate equal to either the sum of a base rate plus a margin ranging from 1.00% and 1.50% or the sum of a Eurocurrency rate plus an applicable rate ranging from 2.00% to 2.50% , with either such margin varying according to the total net leverage ratio of CBS. Borrowing under Term Loan B Facility bears interest at a rate equal to the sum of a base rate plus 2.0% , or the sum of a Eurocurrency rate plus 3.0% . CBS is required to pay a quarterly commitment fee under the Revolving Credit Facility at a rate ranging from 0.35% to 0.40% per annum, with such rate varying according to the total net leverage ratio of CBS and the actual daily unused portion of the commitments during the applicable quarter. CBS is also required to pay a fee equal to the adjusted LIBOR on the aggregate face amount of outstanding letters of credit under the Revolving Credit Facility.

The Credit Agreement permits us to incur incremental term loan borrowings and /or increase commitments under the Revolving Credit Facility, subject to certain limitations and satisfaction of certain conditions, in an aggregate amount not to exceed (i) $200 million plus, (ii) if the senior secured net leverage ratio of CBS and its subsidiaries does not exceed 2.25 to 1.00 on a pro forma basis (without giving effect to any incurrence under clause (i) that is incurred substantially simultaneously with amounts incurred under clause (ii)), an unlimited amount.

All obligations under the Senior Credit Facilities are unconditionally guaranteed by the Company, CBS, CFI and the existing and future direct and indirect wholly owned domestic subsidiaries of CBS (subject to certain exceptions). All obligations under the Senior Credit Facilities, and the guarantees of those obligations, are secured, subject to certain exceptions, by substantially all of the assets of CBS and the guarantors under the Senior Credit Facilities (other than the Company and CFI), including a first-priority pledge of all the capital stock of CBS and the subsidiaries of CBS directly held by CBS or the guarantors (other than the Company and CFI) under the Senior Credit Facilities (which pledge, in the case of any foreign subsidiary, will be limited to 65% of the capital stock of any first-tier foreign subsidiary).

The Credit Facility contains certain customary affirmative and negative covenants, restrictions and events of default. CBS is required to maintain a total net leverage ratio not to exceed 4.25 to 1.00 (a quarterly test) for each quarter through September 30, 2018 and 3.75 to 1.00 for each quarter thereafter.

The net proceeds of the borrowings under the Term Loan A of $700 million (approximately $278 million borrowed in Euros) and Term Loan B of $850 million , were used to purchase our international subsidiaries from Xerox Corporation, to pay a distribution to Xerox Corporation and for working capital and other general corporate purposes. At December 31, 2017 we had $1,574 million in outstanding borrowings under our Credit Agreement and had utilized $12 million of our Revolving Credit Facility capacity to issue letters of credit. Discounts and debt issuance costs of $47 million were deferred.

Senior Notes

On December 7, 2016 , CBS and CFI, each a wholly owned subsidiary of the Company, issued $510 million Senior Unsecured Notes due 2024 bearing interest at 10.5% (the "Senior Notes"). Interest is payable semi-annually, beginning on June 15, 2017. Discounts and debt issuance costs of $17 million were deferred.

At the option of the Issuers, the Senior Notes are redeemable in whole or in part, at any time prior to December 15, 2020, at a price equal to 100% of the aggregate principal amount of the Senior Notes plus accrued and unpaid interest, if any, to, but excluding, the redemption date plus a “make-whole” premium. The Issuers may also redeem the Senior Notes, in whole or in part, at any time on or after December 15, 2020, at the redemption prices specified in the Indenture, plus accrued and unpaid interest, if any, to but excluding the redemption date. Additionally, at any time prior to December 15, 2019, the Issuers may redeem up to 35% of the aggregate principal amount of the Senior Notes with the net cash proceeds from certain equity offerings at a price equal to 110.50% of the principal amount of the Senior Notes, plus accrued and unpaid interest, if any, to, but excluding, the redemption date.

The Senior Notes are jointly and severally guaranteed on a senior unsecured basis by the Company and each of the existing and future domestic subsidiaries of CFI or CBS that guarantee the obligations under the Senior Credit Facilities.

Proceeds from the issuance were used to fund a portion of the transfer of cash to Xerox Corporation in connection with the spin-off.

Interest

Interest paid on our short-term and long-term debt amounted to $129 million , $5 million and $9 million for the years ended December 31, 2017 , 2016 and 2015 , respectively.

Interest expense and interest income was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Interest expense	$ 137	$ 14	$ 8
Interest income	3	3	3

Note 9 – Financial Instruments

We are exposed to market risk from changes in foreign currency exchange rates and interest rates, which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We enter into limited types of derivative contracts to manage foreign currency exposures that we hedge. Our primary foreign currency market exposures include the Philippine Peso, Indian Rupee and Mexican Peso. The fair market values of all our derivative contracts change with fluctuations in interest rates or currency exchange rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. Derivative financial instruments are held solely as risk management tools and not for trading or speculative purposes. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

We do not believe there is significant risk of loss in the event of non-performance by the counterparty associated with our derivative instruments because these transactions are executed with a major financial institution. Further, our policy is to deal only with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties.

Summary of Foreign Exchange Hedging Positions

At December 31, 2017 , we had outstanding forward exchange with gross notional values of $160 million , which is typical of the amounts that are normally outstanding at any point during the year. The impact of our hedging program is not material to our balance sheet or income statement.

Approximately 68% of these contracts mature within three months, 12% in three to six months, 15% in six to twelve months and 5% in greater than 12 months.

The following is a summary of the primary hedging positions and corresponding fair values as of December 31, 2017 :

(in millions)	Gross Notional Value	Fair Value Asset (Liability) [1]
Currencies Hedged (Buy/Sell)		
Philippine Peso/U.S. Dollar	$ 62	$ —
Indian Rupee/U.S. Dollar	68	1
Mexican Peso/U.S. Dollar	9	—
All Other	21	—
Total Foreign Exchange Hedging	$ 160	$ 1

(1) Represents the net receivable (payable) amount included in the Consolidated Balance Sheet at December 31, 2017 .

Note 10 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. US. GAAP establishes a framework for measuring that includes a hierarchy used to classify the inputs used in measuring fair value. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities. As at December 31, 2017 and 2016, the Company did not have any asset or liability that was measured using Level 1 inputs.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly. All the Company's assets and liabilities that were measured at fair value on a recurring basis as at December 31, 2017 and 2016, were valued using Level 2 inputs.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets. As at December 31, 2017 and 2016, the Company did not have any asset or liability that was measured using Level 3 inputs.

The following table represents assets and liabilities fair value measured on a recurring basis. The basis for the measurement at fair value in all cases is Level 2 – Significant Other Observable Inputs.

	As of December 31,	
(in millions)	2017	2016
Assets:		
Foreign exchange contracts - forwards	$ 2	$ 1
Deferred compensation investments in cash surrender life insurance [1]	—	99
Deferred compensation investments in mutual funds [1]	—	10
Total	$ 2	$ 110
Liabilities:		
Foreign exchange contracts - forwards	$ 1	$ 3
Deferred compensation plan liabilities [1]	99	113
Total	$ 100	$ 116

(1) In September 2017, the Company terminated the legacy deferred compensation plans (Plans) and the Company Owned Life Insurance (COLI), which held the Plans' investments. The Company will make payments to Plan participants of approximately $100 million in the fourth quarter 2018.

Fair value for our deferred compensation plan investments in company-owned life insurance is reflected at cash surrender value. Fair value for our deferred compensation plan investments in mutual funds is based on quoted market prices for actively traded investments similar to those held by the plan. Fair value for deferred compensation plan liabilities is based on the fair value of investments corresponding to employees' investment selections, based on quoted prices for similar assets in actively traded markets.

Summary of Other Financial Assets and Liabilities Fair Value Measured on a Nonrecurring Basis

The estimated fair values of our other financial assets and liabilities fair value measured on a nonrecurring basis were as follows:

	December 31, 2017		December 31, 2016	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash and cash equivalents	$ 658	$ 658	$ 390	$ 390
Restricted cash	9	9	22	22
Accounts receivable, net	1,104	1,104	1,286	1,286
Short-term debt	82	82	28	28
Long-term debt	1,979	2,070	1,913	1,933

The fair value amounts for Cash and cash equivalents, Restricted cash and Accounts receivable, net, approximate carrying amounts due to the short maturities of these instruments. The fair value of Short and Long-term debt was estimated based on the current rates offered to us for debt of similar maturities (Level 2). The difference between the fair value and the carrying value represents the theoretical net premium or discount we would pay or receive to retire all debt at such date.

The fair value of the Goodwill impairment charge of $935 million recorded in 2016, was estimated based on a determination of the implied fair value of goodwill, leveraging discounted cash flows (level 3). Refer to Note 6 – Goodwill and Intangible Assets, Net for additional information regarding this impairment.

Note 11 – Employee Benefit Plans

Our defined benefit pension plans are primarily associated with certain employees in our Human Resources and Consulting business located in the U.S., Canada and the United Kingdom (U.K.). Prior to an amendment to freeze future service benefits, these defined benefit pension plans had provided benefits for participating employees based on years of service and average compensation for a specified period before retirement (see Plan Amendment below for further information).

Certain of our employees participate in post-employment medical plans. These plans are not material to our results of operations or financial position and are not included in the disclosures below.

December 31 is the measurement date for all of our defined benefit pension plans.

	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
(in millions)	2017	2016	2017	2016
Change in Benefit Obligation:				
Benefit obligation, January 1	$ 89	$ 74	$ 164	$ 157
Service cost	—	—	2	2
Interest cost	4	3	5	5
Actuarial loss	10	13	5	27
Currency exchange rate changes	—	—	14	(19)
Benefits paid/settlements	(1)	(1)	(12)	(8)
Benefit Obligation, December 31	$ 102	$ 89	$ 178	$ 164
Change in Plan Assets:				
Fair value of plan assets, January 1	$ 52	$ 47	$ 140	$ 150
Actual return on plan assets	8	2	13	15
Employer contribution	3	4	5	2
Currency exchange rate changes	—	—	14	(19)
Benefits paid/settlements	(1)	(1)	(12)	(8)
Fair Value of Plan Assets, December 31	$ 62	$ 52	$ 160	$ 140
Net Funded Status at December 31 [1]	$ (40)	$ (37)	$ (18)	$ (24)
Amounts Recognized in the Consolidated Balance Sheets:				
Asset held for sale	$ —	$ —	$ 1	$ —
Accrued compensation and benefit costs	—	—	—	(2)
Liabilities held for sale	(40)	—	(11)	—
Pension and other benefit liabilities	—	(37)	(8)	(22)
Net Amounts Recognized	$ (40)	$ (37)	$ (18)	$ (24)

(1) Includes under-funded and un-funded plans.

Benefit plans pre-tax amounts recognized in Accumulated other comprehensive loss (AOCL) at December 31:

	Pension Benefits			
	U.S. Plans		Non-U.S. Plans	
(in millions)	2017	2016	2017	2016
Net actuarial loss	$ 38	$ 31	$ 42	$ 42

Aggregate information for pension plans with an Accumulated benefit obligation in excess of plan assets is presented below:

	December 31, 2017			December 31, 2016		
(in millions)	Projected benefit obligation	Accumulated benefit obligation	Fair value of plan assets	Projected benefit obligation	Accumulated benefit obligation	Fair value of plan assets
Underfunded Plans:						
U.S.	$ 102	$ 102	$ 62	$ 89	$ 89	$ 52
Non U.S.	60	55	46	162	156	140
Unfunded Plans:						
Non U.S.	5	3	—	2	1	—
Total Underfunded and Unfunded Plans:						
U.S.	$ 102	$ 102	$ 62	$ 89	$ 89	$ 52
Non U.S.	65	58	46	164	157	140
Total	$ 167	$ 160	$ 108	$ 253	$ 246	$ 192

Our pension plan assets and benefit obligations at December 31, 2017 were as follows:

(in millions)	Fair Value of Pension Plan Assets	Pension Benefit Obligations	Net Funded Status	Accumulated Benefit Obligation
U.S.	$ 62	$ 102	$ (40)	$ 102
U.K.	114	113	1	114
Canada	44	55	(11)	53
Other	2	10	(8)	5
Total	$ 222	$ 280	$ (58)	$ 274

The components of Net periodic benefit cost and other changes in plan assets and benefit obligations were as follows:

	Year Ended December 31,					
	U.S. Plans			Non-U.S. Plans		
(in millions)	2017	2016	2015	2017	2016	2015
Components of Net Periodic Benefit Costs:						
Service cost	$ —	$ —	$ —	$ 2	$ 2	$ 3
Interest cost	4	3	3	5	5	6
Expected return on plan assets	(5)	(4)	(4)	(8)	(8)	(9)
Recognized net actuarial loss	1	—	—	1	1	2
Net Periodic Benefit Cost	—	(1)	(1)	—	—	2
Other changes in plan assets and benefit obligations recognized in Other Comprehensive Income:						
Net actuarial loss (gain)	7	13	4	(2)	18	(9)
Amortization of net actuarial loss	(1)	—	—	(1)	(1)	(2)
Total Recognized in Other Comprehensive Income	6	13	4	(3)	17	(11)
Total Recognized in Net Periodic Benefit Cost and Other Comprehensive Income	$ 6	$ 12	$ 3	$ (3)	$ 17	$ (9)

The net actuarial loss for the defined benefit pension plans that will be amortized from AOCL into net periodic benefit cost over the next fiscal year is $2 million .

Plan Amendments

Pension Plan Freezes

In 2015, we amended several of our major defined benefit pension plans to freeze current benefits and eliminate benefits accruals for future service, including our plans in the U.S., Canada and the U.K. The freeze of current benefits is the primary driver of the reduction in pension service costs since 2015. In certain non-U.S. plans, we are required to continue to consider salary increases and inflation in determining the benefit obligation related to prior service.

Plan Assets

Current Allocation

As of the 2017 and 2016 measurement dates, the global pension plan assets were $222 million and $192 million , respectively. These assets were invested among several asset classes.

The following tables presents the defined benefit plans assets measured at fair value and the basis for that measurement:

	December 31, 2017									
(in millions)	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 1	$ —	$ —	$ 1	2%	$ 3	$ —	$ —	$ 3	2%
Equity Securities	12	31	—	43	69%	—	47	—	47	29%
Fixed Income Securities	18	—	—	18	29%	—	46	—	46	29%
Other	—	—	—	—	—%	—	55	9	64	40%
Total Fair Value of Plan Assets	$ 31	$ 31	$ —	$ 62	100%	$ 3	$ 148	$ 9	$ 160	100%

	December 31, 2016									
(in millions)	U.S. Plans					Non-U.S. Plans				
Asset Class	Level 1	Level 2	Level 3	Total	%	Level 1	Level 2	Level 3	Total	%
Cash and cash equivalents	$ 3	$ —	$ —	$ 3	6%	$ —	$ —	$ —	$ —	—%
Equity Securities	9	24	—	33	63%	—	61	—	61	44%
Fixed Income Securities	10	6	—	16	31%	—	60	—	60	43%
Other	—	—	—	—	—%	—	11	8	19	13%
Total Fair Value of Plan Assets	$ 22	$ 30	$ —	$ 52	100%	$ —	$ 132	$ 8	$ 140	100%

Valuation Method

Our primary Level 3 assets are Real Estate and Guaranteed Investment Contract investments which are individually immaterial. The fair value of our real estate investment funds are based on the Net Asset Value (NAV) of our ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for our Guaranteed Investment Contract investments have been determined based on the higher of the surrender value of the contract or the present value of the cash flow of the related pension obligations. The valuation techniques and inputs for our Level 3 assets have been consistently applied for all periods presented.

Investment Strategy

The target asset allocations for our worldwide defined benefit pension plans were:

	2017		2016	
	U.S.	Non-U.S.	U.S.	Non-U.S.
Equity investments	55%	28%	55%	41%
Fixed income investments	23%	43%	25%	45%
Real estate	—%	4%	—%	4%
Other	22%	25%	20%	10%
Total Investment Strategy	100%	100%	100%	100%

We employ a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by exceeding the interest growth in long-term plan liabilities. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. This consideration involves the use of long-term measures that address both return and risk. The investment portfolio contains a diversified blend of equity and fixed income investments. Furthermore, equity investments are diversified across U.S. and non-U.S. stocks, as well as growth, value and small and large capitalizations. Other assets such as real estate, are used to improve portfolio diversification. Derivatives may be used to hedge market exposure in an efficient and timely manner; however, derivatives may not be used to leverage the portfolio beyond the market value of the underlying investments. Investment risks and returns are measured and monitored on an ongoing basis through annual liability measurements and quarterly investment portfolio reviews.

Contributions

In 2017 , we made cash contributions of $8 million ($3 million U.S. and $5 million non-U.S.) to our defined benefit pension plans.

In 2018 , based on current actuarial calculations, we expect to make contributions of approximately $8 million ($8 million non-U.S. and none for U.S.) to our defined benefit pension plans.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid during the following years:

	Pension Benefits		
(in millions)	U.S.	Non-U.S.	Total
2018	$ 2	$ 4	$ 6
2019	2	5	7
2020	2	5	7
2021	3	5	8
2022	3	5	8
Years 2023-2026	19	30	49

Assumptions

Weighted-average assumptions used to determine benefit obligations at the plan measurement dates:

	Pension Benefits					
	2017		2016		2015	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	3.8%	2.9%	4.2%	3.2%	4.3%	3.9%
Rate of compensation increase	n/a	0.8%	n/a	1.0%	n/a	1.0%

Weighted-average assumptions used to determine net periodic benefit cost for years ended December 31:

	Pension Benefits							
	2018		2017		2016		2015	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Discount rate	3.8%	3.1%	4.2%	3.1%	4.3%	3.9%	4.0%	3.4%
Expected return on plan assets	7.8%	4.8%	7.8%	4.8%	7.8%	5.7%	7.8%	5.8%
Rate of compensation increase	n/a	0.8%	n/a	0.8%	n/a	1.0%	n/a	1.1%

Defined Contribution Plans

We have post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals (see "Plan Amendments" for additional information) were transitioned to an enhanced defined contribution plan. In these plans employees are allowed to contribute a portion of their salaries and bonuses to the plans, and we match a portion of the employee contributions. We recorded charges related to our defined contribution plans of $35 million in 2017 , $35 million in 2016 and $34 million in 2015 .

Note 12 - Income Taxes

Prior to the spin-off from Xerox Corporation, Conduent's operating results were included in various Xerox consolidated U.S. federal and state income tax returns, as well as non-U.S. tax filings. For the purposes of the Company's Consolidated and Combined Financial Statements for periods prior to the spin-off, income tax expense and deferred tax balances have been recorded as if the Company filed tax returns on a standalone basis, separate from Xerox. The Separate Return Method applies the accounting guidance for income taxes to the standalone financial statements as if the Company was a separate taxpayer and a standalone enterprise for fiscal 2016 and prior.

On December 22, 2017, the Tax Reform was enacted. The effects of changes in tax rates and laws are recognized in the period in which the new legislation is enacted. In the case of US federal income taxes, the enactment date is the date the bill becomes law. The income tax effects of the Tax Reform have been initially accounted for on a provisional basis pursuant to the SEC staff guidance on income taxes. Reasonable estimates for all material tax effects of the Tax Reform (other than amounts related to accounting policy elections) have been provided and adjustments to provisional amounts will be made in subsequent reporting periods as information becomes available to complete provisional computations. With respect to this legislation, we recorded a provisional tax benefit of $198 million , which included a $210 million tax benefit due to the re-measurement of deferred tax assets and liabilities resulting from the decrease in the corporate U.S. federal income tax rate from 35% to 21% , and $12 million as a one-time-charge on the transition tax for Post-1986 undistributed and not previously taxed foreign earnings and profits. The impacts of Tax Reform on our 2017 Consolidated Financial Statements are provisional, and could change during 2018 as we further evaluate the impacts of the Tax Reform. The Company has provisionally adopted the policy of treating the Global Intangible Low Taxed Income (GILTI) regime as a period cost. The GILTI regime enacted as part of Tax Reform subjects certain post 2017 foreign earnings (i.e. amounts in excess of deemed return on net tangible assets of non-US subsidiaries) to US tax. In January 2018, the FASB released guidance on the accounting for tax on GILTI. The guidance indicates that either accounting for deferred taxes on GILTI or treating GILTI as a period cost are both acceptable accounting elections.

(Loss) income before income taxes (pre-tax (loss) income) was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Domestic loss	$ (91)	$ (1,329)	$ (654)
Foreign income	75	102	80
Loss Before Income Taxes	$ (16)	$ (1,227)	$ (574)

(Benefit) provision for income taxes were as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Federal Income Taxes			
Current	$ 4	$ (116)	$ (130)
Deferred	(233)	(132)	(99)
Foreign Income Taxes			
Current	25	31	24
Deferred	(3)	(3)	6
State Income Taxes			
Current	8	1	(17)
Deferred	6	(25)	(22)
Total Benefit	$ (193)	$ (244)	$ (238)

A reconciliation of the U.S. federal statutory income tax rate to the consolidated effective income tax rate is as follows:

	Year Ended December 31, 2017	2016	2015
U.S. federal statutory income tax rate	35.0 %	35.0 %	35.0 %
Nondeductible expenses [1]	(155.9)%	(19.0)%	(1.3)%
Effect of tax law changes	1,282.4 %	— %	0.9 %
Change in valuation allowance for deferred tax assets	(39.5)%	0.1 %	(1.0)%
State taxes, net of federal benefit	1.2 %	1.8 %	4.2 %
Audit and other tax return adjustments	— %	1.4 %	0.1 %
Tax-exempt income, credits and incentives	38.9 %	0.7 %	0.7 %
Foreign rate differential adjusted for U.S. taxation of foreign profits [2]	47.7 %	0.7 %	2.4 %
Other	(3.5)%	(0.8)%	0.5 %
Effective Income Tax Rate	1,206.3 %	19.9 %	41.5 %

(1) In 2017, nondeductible expenses primarily related to the nondeductible portion of the goodwill and officers life insurance.
(2) The "U.S. taxation of foreign profits" represents the U.S. tax, net of foreign tax credits, associated with actual and deemed repatriations of earnings from our non-U.S. subsidiaries, except for transition tax, which is reported on the line Effect of tax law changes.

On a consolidated basis, we paid/(received) a total of $29 million , $(123) million and $194 million in income taxes to federal, foreign and state jurisdictions during the three years ended December 31, 2017 , 2016 and 2015 , respectively.

Total income tax expense (benefit) was allocated as follows:

(in millions)	Year Ended December 31, 2017	2016	2015
Pre-tax income	$ (193)	$ (244)	$ (238)
Discontinued operations [1]	3	—	81
Common shareholders' equity:			
Changes in defined benefit plans	—	8	2
Stock option and incentive plans, net	—	—	(6)
Total Income Tax Benefit	$ (190)	$ (236)	$ (161)

(1) Refer to Note 3 – Assets/Liabilities Held for Sale for additional information regarding discontinued operations.

Unrecognized Tax Benefits and Audit Resolutions

We recognize tax liabilities when, despite our belief that our tax return positions are supportable, we believe that certain positions may not be fully sustained upon review by tax authorities. Each period we assess uncertain tax positions for recognition, measurement and effective settlement. Benefits from uncertain tax positions are measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. Where we have determined that our tax return filing position does not satisfy the more-likely-than-not recognition threshold, we have recorded no tax benefits.

We are also subject to ongoing tax examinations in numerous jurisdictions due to the extensive geographical scope of our operations. Our ongoing assessments of the more-likely-than-not outcomes of the examinations and related tax positions require judgment and can increase or decrease our effective tax rate, as well as impact our operating results. The specific timing of when the resolution of each tax position will be reached is uncertain. As of December 31, 2017 , we do not believe that there are any positions for which it is reasonably possible that the total amount of unrecognized tax benefits will significantly increase or decrease within the next 12 months.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(in millions)	2017	2016	2015
Balance at January 1	$ 14	$ 24	$ 32
Additions related to current year	—	1	3
Additions related to prior years positions	—	—	—
Reductions related to prior years positions	—	(5)	(10)
Settlements with taxing authorities [1]	—	(5)	—
Currency	1	(1)	(1)
Balance at December 31	$ 15	$ 14	$ 24

(1) 2016 settlement results in $5 million cash paid.

Included in the balances at December 31, 2017 , 2016 and 2015 are $0 , $0 and $8 million , respectively, of tax positions that are highly certain of realization but for which there is uncertainty about the timing. Because of the impact of deferred tax accounting, other than for the possible incurrence of interest and penalties, the disallowance of these positions would not affect the annual effective tax rate. In addition, for other uncertain tax positions, we maintain offsetting benefits from other jurisdictions of $16 million , $16 million and $14 million , at December 31, 2017 , 2016 and 2015 , respectively.

We recognized interest and penalties accrued on unrecognized tax benefits, as well as interest received from favorable settlements within income tax expense. We had $6 million , $4 million and $14 million accrued for the payment of interest and penalties associated with unrecognized tax benefits at December 31, 2017 , 2016 and 2015 , respectively.

In the U.S., we are no longer subject to U.S. federal income tax examinations for years before 2005. With respect to our major foreign jurisdictions, the years generally remain open back to 2006.

Deferred Income Taxes

The Company is in the position of having tax basis in excess of book basis in its U.S. investment in foreign subsidiaries. Nonetheless, the Company is indefinitely reinvesting its foreign subsidiaries' undistributed earnings of $253 million . For years after 2017, the Tax Reform does allow for certain earnings to be repatriated free from US Federal taxes. However, the repatriation of earnings could give rise to additional tax liabilities.

The tax effects of temporary differences that give rise to significant portions of the deferred taxes were as follows:

(in millions)	December 31, 2017	2016
Deferred Tax Assets		
Net operating losses	$ 41	$ 42
Operating reserves, accruals and deferrals	90	155
Deferred compensation	59	101
Pension	15	18
Other	45	44
Subtotal	250	360
Valuation allowance	(35)	(24)
Total	$ 215	$ 336
Deferred Tax Liabilities		
Unearned income	$ 134	$ 217
Intangibles and goodwill	413	680
Depreciation	10	15
Other	25	29
Total	$ 582	$ 941
Total Deferred Taxes, Net	$ (367)	$ (605)

The deferred tax assets for the respective periods were assessed for recoverability and, where applicable, a valuation allowance was recorded to reduce the total deferred tax asset to an amount that will, more-likely-than-not, be realized in the future. The net change in the total valuation allowance for the years ended December 31, 2017 and 2016 was an increase of $11 million and a decrease of $14 million , respectively. The valuation allowance relates primarily to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

Although realization is not assured, we have concluded that it is more-likely-than-not that the deferred tax assets, for which a valuation allowance was determined to be unnecessary, will be realized in the ordinary course of operations based on the available positive and negative evidence, including scheduling of deferred tax liabilities and projected income from operating activities. The amount of the net deferred tax assets considered realizable, however, could be reduced in the near term if actual future income or income tax rates are lower than estimated, or if there are differences in the timing or amount of future reversals of existing taxable or deductible temporary differences.

At December 31, 2017 , we had tax credit carryforwards of $27 million available to offset future income taxes which will expire between 2018 and 2037 if not utilized. We also had net operating loss carryforwards for income tax purposes of $422 million that will expire between 2018 and 2037, if not utilized; and $43 million available to offset future taxable income indefinitely.

Note 13 – Contingencies and Litigation

As more fully discussed below, we are involved in a variety of claims, lawsuits, investigations and proceedings concerning: securities law; governmental entity contracting, servicing and procurement law; intellectual property law; environmental law; employment law; the Employee Retirement Income Security Act (ERISA); and other laws and regulations. We determine whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. We assess our potential liability by analyzing our litigation and regulatory matters using available information. We develop our views on estimated losses in consultation with outside counsel handling our defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in our determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts, this could have a material adverse effect on our results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. We believe that we have recorded adequate provisions for any such matters as of December 31, 2017 . Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matter could be in excess of any amounts accrued and could be material to our results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and nonconsolidated affiliates when we undertake an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the consolidated financial position or liquidity. As of December 31, 2017 , we have accrued our estimate of liability incurred under our indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Xerox State Healthcare, LLC, and ACS State Healthcare, LLC: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Xerox Corporation, Xerox State Healthcare, LLC and ACS State Healthcare (collectively, the "Xerox Defendants") violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”). The State alleges that the Xerox Defendants made false representations of material facts regarding the processes, procedures, implementation and results regarding the prior authorization of orthodontic claims. The State seeks recovery of amounts paid for orthodontic treatment under the Texas Medicaid program for the period from approximately 2004 to 2012, three times the amount of the payments made as a result of the alleged unlawful acts, civil penalties, pre- and post-judgment interest and all costs and attorneys’ fees. The Xerox Defendants filed their Answer in June, 2014 denying all allegations. A trial date is scheduled for November, 2018. During the first quarter of 2018, the State notified the Xerox Defendants in the litigation discovery process that its claim is in excess of two billion dollars based primarily on the assertion of treble damages and civil penalties per illegal act for almost two hundred thousand purported illegal acts. The Xerox Defendants will forcefully contest this assertion and continue to vigorously defend themselves in this matter. We are not able to determine or predict the ultimate outcome of this proceeding or to estimate any reasonably possible loss or range of losses, if any, in excess of the thirty-eight million dollars we have already accrued. In the course of litigation, we periodically engage in discussions with the State's counsel for possible resolution of the matter. Should developments cause a change in our determination as to an unfavorable outcome, or result in a final adverse judgment or settlement for a significant amount, there could be a material adverse effect on our results of operations, cash flows and financial position in the period in which such change in determination, judgment or settlement occurs.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck"), a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court. Buck will continue to aggressively defend these lawsuits. We are not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide a Medicaid Management Information Systems (the "NY MMIS Contract"). In the lawsuit, Conduent seeks damages in excess of one hundred fifty million dollars . During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and will be recording in that period certain charges associated with the termination. Cognizant has asserted counterclaims against Conduent in the lawsuit seeking damages in excess of twenty-two million dollars . Conduent has responded to Cognizant's counterclaims by denying the allegations. Conduent will continue to vigorously defend itself against the counterclaims but we are not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters:

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB commence an action, it may seek restitution, civil monetary penalties, injunctive relief or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. This notice stems from an inquiry that commenced in 2014 when XES received and responded to a Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the Department of Education and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB and the Department of Education, as well as certain states' attorney general offices and other regulatory agencies, began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies, and XES has submitted its NORA response. We cannot provide assurance that the CFPB or another party will not ultimately commence a legal action against XES in this matter nor are we able to predict the likely outcome of the investigations into this matter or reasonably provide an estimate or range of estimate of possible outcome or loss, if any. We could in future periods incur judgments or enter into settlements in connection with this matter and there could be a material adverse effect on our results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Guarantees, Indemnifications and Warranty Liabilities

Indemnifications Provided as Part of Contracts and Agreements

Acquisitions/Divestitures:

We have indemnified, subject to certain deductibles and limits, the purchasers of businesses or divested assets for the occurrence of specified events under certain of our divestiture agreements. In addition, we customarily agree to hold the other party harmless against losses arising from a breach of representations and covenants, including such matters as adequate title to assets sold, intellectual property rights, specified environmental matters and certain income taxes arising prior to the date of acquisition. Where appropriate, an obligation for such indemnifications is recorded as a liability at the time of the acquisition or divestiture. Since the obligated amounts of these types of indemnifications are often not explicitly stated or are contingent on the occurrence of future events, the overall maximum amount of the obligation under such indemnifications cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, we have not historically made significant payments for these indemnifications. Additionally, under certain of our acquisition agreements, we have provided for additional consideration to be paid to the sellers if established financial targets are achieved post-closing. We have recognized liabilities for these contingent obligations based on an estimate of the fair value of these contingencies at the time of acquisition. Contingent obligations related to indemnifications arising from our divestitures and contingent consideration provided for by our acquisitions are not expected to be material to our financial position, results of operations or cash flows.

Other Agreements:

We are also party to the following types of agreements pursuant to which we may be obligated to indemnify the other party with respect to certain matters:

- Guarantees on behalf of our subsidiaries with respect to real estate leases. These lease guarantees may remain in effect subsequent to the sale of the subsidiary.
- Agreements to indemnify various service providers, trustees and bank agents from any third-party claims related to their performance on our behalf, with the exception of claims that result from the third-party's own willful misconduct or gross negligence.
- Guarantees of our performance in certain services contracts to our customers and indirectly the performance of third parties with whom we have subcontracted for their services. This includes indemnifications to customers for losses that may be sustained as a result of our performance of services at a customer's location.

In each of these circumstances, our payment is conditioned on the other party making a claim pursuant to the procedures specified in the particular contract and such procedures also typically allow us to challenge the other party's claims. In the case of lease guarantees, we may contest the liabilities asserted under the lease. Further, our obligations under these agreements and guarantees may be limited in terms of time and/or amount, and in some instances, we may have recourse against third parties for certain payments we made.

Also in December 2017, a customer released our former parent company from a performance guarantee for a service contract resulting in a release of escrow funds of $15 million to the Company.

Intellectual Property Indemnifications

We do not own most of the software that we use to run our business. Instead, we license this software from a small number of primary vendors. We indemnify certain software providers against claims that may arise as a result of our use or our subsidiaries', customers' or resellers' use of their software in our services and solutions. These indemnities usually do not include limits on the claims, provided the claim is made pursuant to the procedures required in the services contract.

Indemnification of Officers and Directors

Our corporate by-laws require that, except to the extent expressly prohibited by law, we must indemnify our officers and directors against judgments, fines, penalties and amounts paid in settlement and reasonable expenses, including attorneys' fees, incurred in connection with civil or criminal action or proceedings or any appeal, as it relates to their services to our Company and our subsidiaries. Although the by-laws provide no limit on the amount of indemnification, we may have recourse against our insurance carriers for certain payments made by us. However, certain indemnification payments (such as those related to "clawback" provisions in certain compensation arrangements) may not be covered under our directors' and officers' insurance coverage. We also indemnify certain fiduciaries of our employee benefit plans for liabilities incurred in their service as fiduciary whether or not they are officers of the Company. Finally, in connection with our acquisition of businesses, we may become contractually obligated to indemnify certain former and current directors, officers and employees of those businesses in accordance with pre-acquisition by-laws or indemnification agreements or applicable state law.

Other Contingencies

Certain contracts, primarily in our Public Sector segment, require us to provide a surety bond or a letter of credit as a guarantee of performance. As of December 31, 2017 , we had $576 million for outstanding surety and bid bonds used to secure our performance of contractual obligations with our clients, and we had $256 million of outstanding letters of credit issued to secure our performance of contractual obligations to our clients as well as other corporate obligations.

In general, we would only be liable for the amount of these guarantees in the event of default in our performance of our obligations under each contract. We believe we have sufficient capacity in the surety markets and liquidity from our cash flow and our various credit arrangements (including our Credit Facility) to allow us to respond to future requests for proposals that require such credit support.

We have service arrangements where we service third-party student loans in the Federal Family Education Loan program (FFEL) on behalf of various financial institutions. We service these loans for investors under outsourcing arrangements and do not acquire any servicing rights that are transferable by us to a third-party. At December 31, 2017 , we serviced a FFEL portfolio of loans with an outstanding principal balance of approximately $ 5.2 billion . Some servicing agreements contain provisions that, under certain circumstances, require us to purchase the loans from the investor if the loan guaranty has been permanently terminated as a result of a loan default caused by our servicing error. If defaults caused by us are cured during an initial period, any obligation we may have to purchase these loans expires. Loans that we purchase may be subsequently cured, the guaranty reinstated and the loans repackaged for sale to third parties. We evaluate our exposure under our purchase obligations on defaulted loans and establish a reserve for potential losses. The reserve is evaluated periodically and adjusted based upon management’s analysis of the historical performance of the defaulted loans. As of December 31, 2017 , other current liabilities include reserves of approximately $1 million , which we believe to be adequate. In addition to potential purchase obligations arising from servicing errors, various laws and regulations applicable to student loan borrowers could give rise to fines, penalties and other liabilities associated with loan servicing errors.

Note 14 - Preferred Stock

Series A Preferred Stock

In connection with the December 31, 2016 spin-off from Xerox Corporation, we issued 120 thousand shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million . The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393 thousand shares (reflecting an initial conversion price of approximately $22.250 per share of common stock), subject to customary anti-dilution adjustments.

If the closing price of our common stock exceeds 137% of the initial conversion price for 20 out of 30 trading days, we have the right to cause any or all of the convertible preferred stock to be converted into shares of common stock at the then applicable conversion rate. The convertible preferred stock is also convertible, at the option of the holder, upon a change in control, at the applicable conversion rate plus an additional number of shares determined by reference to the price paid for our common stock upon such change in control. In addition, upon the occurrence of certain fundamental change events, including a change in control or the delisting of Conduent's common stock, the holder of convertible preferred stock has the right to require us to redeem any or all of the convertible preferred stock in cash at a redemption price per share equal to the liquidation preference and any accrued and unpaid dividends to, but not including, the redemption date. As a result of the contingent redemption feature, the convertible preferred stock is classified as temporary equity and reflected separately from permanent equity in the Consolidated Balance Sheets.

Note 15 – Shareholders' Equity

Preferred Stock

As of December 31, 2017 , we had one class of preferred stock outstanding. See Note 14 – Preferred Stock for further information. We are authorized to issue approximately 100 million shares of cumulative preferred stock at $0.01 par value per share.

Common Stock

We have 1 billion authorized shares of common stock at $0.01 par value per share. At December 31, 2017 , 15 million shares were reserved for issuance under our incentive compensation plans and 5.4 million shares were reserved for conversion of the Series A convertible preferred stock.

Stock Compensation Plans

Certain of our employees participate in a long-term incentive plan. Our long-term incentive plan authorizes the issuance of restricted stock units / shares (RSU), performance stock units / share (PSU) and non-qualified stock options to employees. All awards for these plans prior to 2017, were made in Xerox stock and therefore converted into Conduent stock effective upon the Separation. Using a formula designed to preserve the value of the award immediately prior to the Separation, all of these awards will be settled and are reflected in Conduent's Consolidated Statements of Stockholders' Equity. Stock-based compensation expense includes expense based on the awards and terms previously granted to the employees.

Stock-based compensation expense was as follows:

	Year Ended December 31,		
(in millions)	2017	2016	2015
Stock-based compensation expense, pre-tax	$ 42	$ 23	$ 19
Income tax benefit recognized in earnings	17	9	7

Restricted Stock Units / Shares Compensation expense is based upon the grant date market price. The compensation expense is recorded over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest.

Performance Stock Units / Shares: The Company granted PSUs that vest contingent upon its achievement of certain specified financial performance criteria over a three -year period. If the three -year actual results exceed the stated targets, then the plan participants have the potential to earn additional shares of common stock, which cannot exceed 100% of the original grant.

The fair value of PSUs is based upon the market price of Conduent's common stock on the date of the grant and then converted to Conduent's common stock upon the Separation. Compensation expense is recognized over the vesting period, which is normally three years from the date of grant, based on management's estimate of the number of shares expected to vest. If the stated targets are not met, any recognized compensation cost would be reversed.

Employee Stock Options: Stock options were issued by a former parent company and were converted to Conduent's common stock upon the Separation. These options generally expire within the next two years. Other than these options, Conduent has not issued any new stock options.

Summary of Stock-based Compensation Activity

(shares in thousands)	2017 Shares	2017 Weighted Average Grant Date Fair Value	2016 Shares	2016 Weighted Average Grant Date Fair Value	2015 Shares	2015 Weighted Average Grant Date Fair Value

(1) Stock-based compensation was converted from former parent stock into Conduent common stock at spin-off.

The Company issued 77 thousand Deferred Stock Units (DSU) to non-employee members of the Board of Directors. These DSUs are fully vested and will be issued when the directors leave the Board.

The Company has 348 thousand stock options outstanding as of December 31, 2017 at strike prices ranging from $10.15 to $11.38 . These stock options are fully vested and exercisable.

The total unrecognized compensation cost related to non-vested stock-based awards at December 31, 2017 was as follows (in millions) :

Awards	Unrecognized Compensation	Remaining Weighted-Average Vesting Period (Years)
Restricted Stock Units / Shares	$ 27	1.9
Performance Stock Units / Shares	30	1.6
Total	$ 57	

The aggregate intrinsic value of outstanding RSUs and PSs awards was as follows (in millions) :

Awards	December 31, 2017
Restricted Stock Units / Shares	$ 50
Performance Stock Units / Shares	88

Information related to stock options outstanding and exercisable at December 31, 2017 was as follows:

(in millions)	Options

Other Comprehensive Income (Loss)	$ 31	$ 32	$ (162)	$ (155)	$ (50)	$ (52)

(1) Reclassified to Cost of sales - refer to Note 9 – Financial Instruments for additional information regarding our cash flow hedges.
(2) Reclassified to Total Net Periodic Benefit Cost - refer to Note 11 – Employee Benefit Plans for additional information.
(3) Primarily represents currency impact on cumulative amount of benefit plan net actuarial losses and prior service credits in AOCL.

Accumulated Other Comprehensive Loss (AOCL)

AOCL is comprised of the following:

	December 31,		
(in millions)	2017	2016	2015
Cumulative translation adjustments [1]	$ (437)	$ (472)	$ (147)
Other unrealized losses, net	1	(1)	(1)
Benefit plans net actuarial losses and prior service credits	(58)	(53)	(33)
Total Accumulated Other Comprehensive Loss	$ (494)	$ (526)	$ (181)

(1) 2016 includes $190 million of AOCL transferred from former parent as part of the spin-off.

Note 17 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

	Year Ended December 31,		
(in millions, shares in thousands)	2017	2016	2015
Basic Earnings (Loss) per Share:			
Net income (loss) from continuing operations attributable to Conduent	$ 177	$ (983)	$ (336)
Accrued dividends on preferred stock	(10)	—	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	167	(983)	(336)
Net income (loss) from discontinued operations attributable to Conduent	4	—	(78)
Adjusted Net Income (Loss) Available to Common Shareholders	$ 171	$ (983)	$ (414)
Weighted-average common shares outstanding	204,007	202,875	202,875
Basic Earnings (Loss) per Share:			
Continuing operations	$ 0.82	$ (4.85)	$ (1.65)
Discontinued operations	0.02	—	(0.39)
Basic Earnings (Loss) per Share	$ 0.84	$ (4.85)	$ (2.04)
Diluted Earnings (Loss) per Share:			
Net income (loss) from continuing operations attributable to Conduent	$ 177	$ (983)	$ (336)
Accrued dividends on preferred stock	(10)	—	—
Adjusted Net Income (Loss) From Continuing Operations Available to Common Shareholders	167	(983)	(336)
Net income (loss) from discontinued operations attributable to Conduent	4	—	(78)
Adjusted Net Income (Loss) Available to Common Shareholders	$ 171	$ (983)	$ (414)
Weighted-average common shares outstanding	204,007	202,875	202,875
Common shares issuable with respect to:			
Stock options	195	—	—
Restricted stock and performance units / shares	2,491	—	—
Convertible preferred stock	—	—	—
Adjusted Weighted Average Common Shares Outstanding	206,693	202,875	202,875
Diluted Earnings (Loss) per Share:			
Continuing operations	$ 0.81	$ (4.85)	$ (1.65)
Discontinued operations	0.02	—	(0.39)
Diluted Earnings (Loss) per Share	$ 0.83	$ (4.85)	$ (2.04)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):			
Stock Options	—	857	—
Restricted stock and performance shares	2,568	5,719	—
Convertible preferred stock	5,393	5,393	—
Total Securities	7,961	11,969	—

Note 18 – Related Party Transactions and Former Parent Company Investment

Allocation of Corporate Expenses

The Consolidated Statements of Income (Loss), Consolidated Statements of Comprehensive Income (Loss) and Consolidated Statements of Cash Flows for the years ended December 31, 2016 and 2015 include an allocation of general corporate expenses from Xerox, the Company's former parent. The financial information in these Consolidated Financial Statements does not necessarily include all the expenses that would have been incurred or held had we been a separate, standalone company and it is not practicable to estimate actual costs that would have been incurred had we been a separate, standalone company during the periods presented. Management considers these allocations to be a reasonable reflection of the utilization of services by, or the benefits provided. Allocations for management costs and corporate support services provided totaled $165 million and $170 million for the years ended December 31, 2016 and 2015, respectively. These amounts include costs for corporate functions including, but not limited to, senior management, legal, human resources, finance and accounting, treasury, information technology and other shared services. Where possible, these costs were allocated based on direct usage, with the remainder allocated on a basis of costs, headcount and/or other measures we have determined as reasonable.

	Year Ended December 31,	
(in millions)	2016	2015
Research and development	$ 25	$ 43
Selling, general and administrative	140	127
Total Allocated Corporate Expenses	$ 165	$ 170

Final Cash Allocation To Former Parent

In January 2017, in connection with the Separation, we paid Xerox $161 million for settlement of the management and support services received.

The components of Net transfers to former parent and the reconciliation to the corresponding amount presented on the Consolidated Statements of Cash Flows are as follows:

	Year Ended December 31,	
(in millions)	2016	2015

Related Party Notes Receivable/Payable

Certain operating units of the Company had various interest bearing notes under contractual agreements to and from Xerox Corporation and other related parties. The purpose of these notes was to provide funds for certain working capital or other capital and operating requirements of the business. Net interest expense on these notes with related party companies was recorded net in Related Party Interest in the Consolidated Statements of Income (Loss) and was $26 million and $61 million for the years ended December 31, 2016 and 2015, respectively. These notes had fixed interest rates that ranged from 1% to 8% . The balances were settled as part of the Separation transaction.

Related Party Revenue and Purchases

We provide various services to Xerox Corporation, including those related to human resources, accounting and finance and customer care, which are reported as Related party revenue in the Consolidated Statements of Income (Loss). The costs related to these services are reported as Related party cost of services in the Consolidated Statements of Income (Loss).

We also leased equipment and received related services, supplies and parts, from Xerox and Xerox subsidiaries in the amount of $21 million and $24 million , for the years ended December 31, 2016 and 2015, respectively. The costs related to these services, supplies and parts are reported in Cost of services and Selling, administrative and general expenses in the Consolidated Statements of Income (Loss).

Note 19 – Subsequent Events

In the first quarter of 2018, the Company will be moving the Health Enterprise business from the Other segment into the Public Sector segment. In addition, the Company plans to move the divested businesses' historical results to Other segment from both the Commercial Industries and the Public Sector segments.

See Note 13 – Contingencies and Litigation as it relates to the termination of the Cognizant agreement.

Total Basic (Loss) Earnings per Share:	$ (0.12)	$ (0.05)	$ 0.01	$ (4.69)	$ (4.85)
Diluted Earnings (Loss) per Share [1]:					
Continuing operations	$ (0.12)	$ (0.05)	$ 0.01	$ (4.69)	$ (4.85)
Total Diluted (Loss) Earnings per Share	$ (0.12)	$ (0.05)	$ 0.01	$ (4.69)	$ (4.85)

(1) The sum of quarterly earnings per share may differ from the full-year amounts due to rounding, or in the case of diluted earnings per share, because securities that are anti-dilutive in certain quarters may not be anti-dilutive on a full-year basis.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Management's Responsibility for Financial Statements

Our management is responsible for the integrity and objectivity of all information presented in this annual report. The consolidated financial statements were prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's best estimates and judgments. Management believes the consolidated financial statements fairly reflect the form and substance of transactions and that the financial statements fairly represent the Company's financial position and results of operations.

The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with the independent registered public accountants, PricewaterhouseCoopers LLP, the internal auditors and representatives of management to review accounting, financial reporting, internal control and audit matters, as well as the nature and extent of the audit effort. The Audit Committee is responsible for the engagement of the independent registered public accountants. The independent registered public accountants and internal auditors have access to the Audit Committee.

Disclosure Controls and Procedures

The Company’s management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, as of December 31, 2017 , the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company’s management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934, as amended. Under the supervision and with the participation of our management, including our principal executive officer, principal financial and accounting officers, we have conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on the above evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2017 .

The effectiveness of our internal control over financial reporting as of December 31, 2017 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Part II, Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter ended December 31, 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information regarding directors is incorporated herein by reference to the section entitled “Proposal 1 - Election of Directors” in our definitive Proxy Statement (2018 Proxy Statement) to be filed pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended, for our 2018 Annual Meeting of Stockholders. The Proxy Statement will be filed within 120 days after the end of our fiscal year ended December 31, 2017 .

The information regarding compliance with Section 16(a) of the Securities and Exchange Act of 1934 is incorporated herein by reference to the section entitled “Section 16(a) Beneficial Ownership Reporting Compliance” of our 2018 Proxy Statement.

The information regarding the Audit Committee, its members and the Audit Committee financial experts is incorporated by reference herein from the subsection entitled “Committee Functions, Membership and Meetings” in the section entitled “Proposal 1 - Election of Directors” in our 2018 Proxy Statement.

We have adopted a code of ethics applicable to our principal executive officer, principal financial officer and principal accounting officer. The Finance Code of Conduct can be found on our website at: http://www.conduent.com/investor and then clicking on Corporate Governance. Information concerning our Finance Code of Conduct can be found under "Corporate Governance" in our 2018 Proxy Statement and is incorporated here by reference.

Executive Officers of Conduent

The following is a list of the executive officers of Conduent, their current ages, their present positions and the year appointed to their present positions.

Each officer is elected to hold office until the meeting of the Board of Directors held on the day of the next annual meeting of shareholders, subject to the provisions of the By-Laws.

Name	Age	Present Position	Year Appointed to Present Position	Conduent Officer Since
Ashok Vemuri*	49	Chief Executive Officer	2017	2017
David Amoriell	61	Executive Vice President & President, Public Sector	2017	2017
Allan Cohen	48	Vice President & Chief Accounting Officer	2017	2017
Jeffrey Friedel	56	Executive Vice President & Chief People Officer	2017	2017
James Michael Peffer	56	Executive Vice President, General Counsel & Secretary	2017	2017
Brian J. Webb-Walsh	42	Executive Vice President & Chief Financial Officer	2017	2017

* Member of Conduent Board of Directors

Each of the officers named above has been an officer or an executive of Conduent or its subsidiaries for less than five years.

Mr. Vemuri served as Chief Executive Officer of Xerox Business Services, LLC and an Executive Vice President of Xerox Corporation since July 2016. Mr. Vemuri previously was President, Chief Executive Officer and a member of the Board of Directors of IGATE Corporation. Prior to IGATE, Mr. Vemuri spent 14 years at Infosys Limited, a multinational consulting and IT services company, in a variety of leadership and business development roles.

Mr. Amoriell served as the chief operating officer of the Public Sector Business Group for Xerox Services. He was named to that position in June 2014 and appointed a corporate vice president of Xerox in February 2012. Prior to that, Mr. Amoriell was the chief operating officer for the Government & Transportation Sector of Xerox Services.

Prior to joining Conduent, Mr. Cohen served as Senior Vice President and Controller of NBC Universal since 2011. Mr Cohen also previously served as Vice President, Assistant Controller at Time Warner, Professional Accounting Fellow in the Division of Corporate Finance at the Securities and Exchange Commission and Senior Manager at PriceWaterhouseCoopers.

Prior to joining Conduent, Mr. Friedel served as Vice President and Head of the Office of Integrity and Compliance at Infosys Limited from January 2016 to September 2016, a global leader in technology services and consulting, where he oversaw SEC compliance, internal investigations, code of conduct, whistleblower, and anti-bribery and export regulations. Mr. Friedel has also previously served as Senior Vice President and General Counsel at IGATE Corporation from June 2014 to December 2015, an IT services and business process outsourcing company which was acquired by CapGemini. Prior to June 2014, Mr. Friedel held a variety of leadership roles at Infosys Limited.

Mr. Peffer served as Vice President, General Counsel and Secretary for Xerox Corporation from August 2016 to December 2016. Prior to this, Mr. Peffer served as Associate General Counsel of Xerox Corporation and Executive Vice President of Xerox Business Services, LLC. since 2010. Prior to 2010, Mr. Peffer was Senior Vice President and Deputy General Counsel of ACS from May 2009.

Mr. Webb-Walsh served as the Chief Financial Officer of Xerox Services since January 2016. Prior to this, Mr. Webb-Walsh was Senior Vice President of Finance for the Government Healthcare Group and the Platform Development and Systems Integration Group of Xerox Services. Mr. Webb-Walsh joined Xerox Corporation in 1997 and has held a variety of leadership positions.

ITEM 11. EXECUTIVE COMPENSATION

The information included under the following captions under “Proposal 1 - Election of Directors” in our 2018 Proxy Statement is incorporated herein by reference: “Compensation Discussion and Analysis”, “Summary Compensation Table”, “Grants of Plan-Based Awards in 2017”, “Outstanding Equity Awards at 2017 Fiscal Year-End”, “Option Exercises and Stock Vested in 2017”, “Pension Benefits for the 2017 Fiscal Year”, “Nonqualified Deferred Compensation for the 2017 Fiscal Year”, “Potential Payments upon Termination or Change in Control”, “Summary of Director Annual Compensation, "Compensation Committee Interlocks and Insider Participation” and “Compensation Committee”. The information included under the heading “Compensation Committee Report” in our 2018 Proxy Statement is incorporated herein by reference; however, this information shall not be deemed to be “soliciting material” or to be “filed” with the Commission or subject to Regulation 14A or 14C, or to the liabilities of Section 18 of the Exchange Act of 1934, as amended.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information regarding security ownership of certain beneficial owners and management and securities authorized for issuance under equity compensation plans is incorporated herein by reference to the subsections entitled “Ownership of Company Securities,” and “Equity Compensation Plan Information” under “Proposal 1 - Election of Directors” in our 2018 Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS, RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information regarding certain relationships and related transactions is incorporated herein by reference to the subsection entitled “Certain Relationships and Related Person Transactions” under “Proposal 1 - Election of Directors” in our 2018 Proxy Statement. The information regarding director independence is incorporated herein by reference to the subsections entitled “Corporate Governance” and “Director Independence” in the section entitled “Proposal 1 - Election of Directors” in our 2018 Proxy Statement.

ITEM 14. PRINCIPAL AUDITOR FEES AND SERVICES

The information regarding principal auditor fees and services is incorporated herein by reference to the section entitled “Proposal 2 - Ratification of Election of Independent Registered Public Accounting Firm” in our 2018 Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) (1) Index to Financial Statements and Financial Statement Schedule, incorporated by reference or filed as part of this report:

- Report of Independent Registered Public Accounting Firm including Report on Financial Statement Schedule;
- Consolidated Statements of Income (Loss) for each of the years in the three-year period ended December 31, 2017 ;
- Consolidated Statements of Comprehensive Income (Loss) for each of the years in the three-year period ended December 31, 2017 ;
- Consolidated Balance Sheets as of December 31, 2017 and 2016 ;
- Consolidated Statements of Cash Flows for each of the years in the three-year period ended December 31, 2017 ;
- Consolidated Statements of Shareholders' Equity for each of the years in the three-year period ended December 31, 2017 ;
- Notes to the Consolidated Financial Statements;
- Schedule II - Valuation and Qualifying Accounts for the three years ended December 31, 2017 ; and
- All other schedules are omitted as they are not applicable, or the information required is included in the financial statements or notes thereto.

(2) Supplementary Data:

- Quarterly Results of Operations (unaudited).
- SCHEDULE II

VALUATION AND QUALIFYING ACCOUNTS

For the three years ended December 31, 2017

(in millions)		Balance at beginning of period	Additions charged to expense [1]	Amounts (credited) charged to other income statement accounts [2]	Deductions and other, net of recoveries [3][4]	Balance at end of period
Allowance for Losses:						
2017	Accounts Receivable	$ 7	$ (1)	$ —	$ (4)	$ 2
2016	Accounts Receivable	6	4	—	(3)	7
2015	Accounts Receivable	6	4	—	(4)	6
Tax Valuation Allowance:						
2017	Tax Valuation	24	11	—	—	35
2016	Tax Valuation	38	—	—	(14)	24
2015	Tax Valuation	35	—	5	(2)	38

(1) Account Receivables: additions charged to expense represent bad debt provisions relate to estimated losses due to credit and similar collectibility issues.
(2) Account Receivables: Other charges (credits) relate to adjustments to reserves necessary to reflect events of non-payment such as customer accommodations and contract terminations.
(3) Account Receivables: Deductions and other, net of recoveries primarily relates to receivable write-offs, but also includes the impact of foreign currency translation adjustments and recoveries of previously written off receivables.
(4) Tax Valuation: Reductions to tax valuation allowance are primarily related to certain net operating loss carryforwards, tax credit carryforwards and deductible temporary differences for which we have concluded it is more-likely-than-not that these items will not be realized in the ordinary course of operations.

(3) The exhibits listed below are filed or incorporated by reference are part of this Form 10-K.

Management contracts or compensatory plans or arrangements listed that are applicable to the executive officers named in the Summary Compensation Table which appears in Registrant's 2018 Proxy Statement or to our directors are preceded by an asterisk (*).

PERFORMANCE STOCK UNIT AWARD AGREEMENT PURSUANT TO CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Performance Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration, the Company agrees as follows:

AWARDS

1. Award of Performance Stock Units . Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary Performance Stock Units (individually, a "PS") as shown on the Award Summary, representing the target number of shares of Common Stock covered by this Agreement (the "Target PSs"). Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE PERFORMANCE STOCK UNITS

2. Entitlement to Shares . As soon as practicable on or after the Vesting Date (as defined below) (or such earlier date provided in Section 9) in connection with the PSs, the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested PSs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following the Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued pursuant to this Agreement. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting . Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of the PSs covered hereby shall be subject to (i) the achievement of the performance goals as set forth in the Award Summary (the "Performance Goals") as determined by the Committee and (ii) the Employee's continued employment with the Company or a subsidiary or affiliate through the vesting date indicated on the Award Summary (the "Vesting Date"). In the event the achievement of the Performance Goals is "below threshold" level, then all of the PSs will be forfeited; in the event that achievement of the Performance Goals is between "threshold" and "target" level, then no less than 50% and no more than 100% of the Target PSs will vest; and in the event achievement of the Performance Goals is between "target" and "maximum" level, then no less than 100% and no more than 200% of the Target PSs will vest, in each case as set forth in the Award Summary and subject to the Employee's continued employment through the Vesting Date as described in clause (ii) of the immediately preceding sentence.

Upon the occurrence of an event constituting a Change in Control prior to the Vesting Date, notwithstanding anything to the contrary in Section 22(b) of the Plan, the Performance Goals shall be deemed achieved at target level, but thereafter the PSs, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such PSs, and any dividend equivalents with respect thereto, shall be subject to the Employee's continued employment with the Company or a subsidiary or an affiliate through the Vesting Date, at which time such PSs shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger tax or penalty under Section 409A of the Code, as determined by the Committee; provided that such PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to the Vesting Date or in the event such Change in Control occurs following a termination of the Employee's employment. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on the Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested PSs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on the Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines . Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements . In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of PSs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/ Dividends . Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the PSs until the date of issuance of a stock certificate to him for such PSs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the PSs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, PSs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a PS in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death .

(a) Effect on PSs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than (A) retirement or (B) following a Change in Control, Termination For Good Reason, the PSs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer prior to a Change in Control for any reason other than due to death, Disability or termination for Cause, the number of PSs covered by this Agreement, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. The vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided

that, to the extent such 60-day period straddles two calendar years, then such prorated number of PSs, and any dividend equivalents with respect thereto, shall settled in the second calendar year;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the three-year performance period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then such PSs, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the vesting of the PSs shall remain subject to the achievement of the Performance Goals in accordance with Section 3, if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days following the Vesting Date in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the three-year performance period elapsed prior to such termination;

(v) voluntarily ceases to be an employee of the Employer by reason of retirement (for purposes of this Agreement only, “retirement” for U.S. employees shall mean termination of employment at or above age 55 with 10 years of service or age 60 with 5 years of service), the PSs, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed during the three-year performance period prior to such termination of employment and the denominator of which is 36, and any remaining PSs shall be forfeited. If such termination occurs prior to a Change in Control, the vesting of such prorated number of PSs, and any dividend equivalents with respect thereto, shall remain subject to the achievement of the Performance Goals in accordance with Section 3 and shall be settled within 60 days following the Vesting Date in accordance with Section 2. If such termination occurs following a Change in Control, the proration described in this Section 9(a)(v) shall be applied to the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), immediately following which such prorated number of PSs, and any dividend equivalents with respect thereto, shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. In each case, whether such termination of employment occurs prior to or following a Change of Control, such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then such prorated number of PSs, and any dividend equivalents with respect thereto, shall be settled or paid in cash, as applicable, in the second calendar year;

(vi) involuntarily ceases to be an employee of the Employer due to termination for Cause, the PSs shall, subject to any Plan provisions to the contrary, be cancelled and forfeited on the date of such termination of employment; and

(vii) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the PSs (the Performance Goals for which shall have been deemed achieved at target level, pursuant to Section 3), and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, without proration based on the portion of the three-year performance period elapsed prior to such termination. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-

day period straddles two calendar years, then such PSs, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(b) Cause. "Cause" means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company's Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for "immediate discharge" under the Employer's Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(c) "Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

(d) "Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the PSs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of PSs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the PSs.

11. Responsibility for Taxes . The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting of the PSs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of PSs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award . In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the PSs are subject to modification and adjustment under Section 6 of the Plan.

(b) the award of the PSs is voluntary and occasional and does not create any contractual or other right to receive future grants of PSs, or benefits in lieu of PSs, even if PSs have been granted repeatedly in the past;

(c) all decisions with respect to future PS awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;

(d) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the PS award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;

(e) The Employee is voluntarily participating in the Plan;

(f) the PSs and the shares of Common Stock subject to the PSs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;

(g) the PSs and the shares of Common Stock subject to the PSs are not intended to replace any pension rights or compensation;

(h) the PSs and the shares of Common Stock subject to the PSs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(i) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(j) in consideration of the award of the PSs, no claim or entitlement to compensation or damages shall arise from forfeiture of the PSs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(k) subject to the provisions in the Plan regarding Change in Control, PSs and the benefits under the Plan, if any, will not automatically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award . Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her participation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement . With the consent of the Employee, the Committee or its authorized delegate, as applicable, may amend this Agreement in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corporation" of the Company as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate . As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as determined by the Committee.

17. Recoupments .

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award . Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated business, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language . If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

21. Electronic Delivery and Acceptance . The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement . The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue . The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A . It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability . In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

27. Integration of Terms . Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries . Notwithstanding any provisions in this Agreement, the PS award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements . The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the PSs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is necessary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

RESTRICTED STOCK UNIT AWARD AGREEMENT PURSUANT TO
CONDUENT INCORPORATED PERFORMANCE INCENTIVE PLAN

AGREEMENT, by Conduent Incorporated, a New York corporation (the "Company"), dated as of the date that appears in the award summary that provides the number of Restricted Stock Units and vesting provisions of the award (the "Award Summary"), in favor of the individual whose name appears on the Award Summary (the "Employee"), who is an employee of the Company, one of the Company's subsidiaries or one of its affiliates (the Company, or such subsidiary or affiliate, the "Employer").

In accordance with the provisions of the Conduent Performance Incentive Plan (the "Plan"), the Compensation Committee of the Board of Directors of the Company (the "Committee") or the Chief Executive Officer of the Company (the "CEO") has authorized the execution and delivery of this Agreement.

Terms used herein that are defined in the Plan or in this Agreement shall have the meanings assigned to them in the Plan or this Agreement, respectively.

The Award Summary contains the details of the awards covered by this Agreement and is incorporated herein in its entirety.

NOW, THEREFORE, in consideration of the premises and for other good and valuable consideration the Company agrees as follows:

AWARDS

1. Award of Restricted Stock Units . Subject to all terms and conditions of the Plan and this Agreement, the Company has awarded to the Employee on the date indicated on the Award Summary the number of Restricted Stock Units (individually, a "RSU") as shown on the Award Summary. Notwithstanding anything herein to the contrary, only active employees and those employees on Short Term Disability Leave, Social Service Leave, Family Medical Leave or Paid Uniform Services Leave (pursuant to the Company's Human Resources Policies or similar policies of the Company's subsidiaries or affiliates) on the effective date of the award as shown on the Award Summary shall be eligible to receive the award.

TERMS OF THE RESTRICTED STOCK UNITS

2. Entitlement to Shares . As soon as practicable on or after the vesting dates indicated on the Award Summary (each, a "Vesting Date") (or such earlier date provided in Section 9), the Company shall deliver to the Employee, in such manner as the Company shall determine, a number of shares of Common Stock equal to the number of vested RSUs (subject to reduction for withholding of the Employee's taxes in relation to the award as described in Section 11) within 60 days following each applicable Vesting Date (or, if earlier, a distribution event set forth in Section 9 that satisfies the requirements of Section 409A(a)(2) of the Code).

No fractional shares shall be issued as a result of such tax withholding. Instead, the Company shall apply the equivalent of any fractional share amount to amounts withheld for taxes. Notwithstanding the foregoing, the Company shall be entitled to delay delivery of such shares of Common Stock (or cash payment in lieu thereof, as applicable) until it shall have received from the Employee a duly executed Form W-8 or W-9, as applicable, and any other information or completed forms the Company may reasonably require.

3. Vesting . Except as otherwise determined by the Committee in its sole discretion (subject to Section 23 of the Plan) or as otherwise provided in this Section 3 or Section 9, the vesting of RSUs covered hereby shall be subject to the Employee's continued employment with the Company or a subsidiary or affiliate through the applicable Vesting Date. The Employee shall be eligible to vest on each Vesting Date in the applicable percentage of the shares of Common Stock covered by this Agreement set forth in the Award Summary.

Upon the occurrence of an event constituting a Change in Control, notwithstanding anything to the contrary in Section 22(b) of the Plan, the RSUs outstanding on the date of such Change in Control, and any dividend equivalents with respect thereto, shall remain outstanding and thereafter the vesting of such RSUs, and any dividend equivalents with respect thereto, shall be subject to Employee's continued employment with the Company or a subsidiary or an affiliate through each applicable Vesting Date as provided in this Section 3, at which time such RSUs shall vest and shall be paid in cash in accordance with Section 22(f) of the Plan at the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee; provided that the RSUs, and any dividend equivalents with respect thereto, shall vest and shall be paid to the extent provided

in Section 9 in the event of the Employee's termination of employment following such Change in Control and prior to a Vesting Date. Upon payment pursuant to the terms of the Plan, such awards shall be cancelled.

4. Dividend Equivalents. The Employee shall become entitled to receive from the Company on each applicable Vesting Date (or such earlier date provided in Section 9) a cash payment equaling the same amount(s) that the holder of record of a number of shares of Common Stock equal to the number of vested RSUs (if any) would have been entitled to receive as dividends on such Common Stock during the period commencing on the effective date hereof and ending on each applicable Vesting Date (or such earlier date provided in Section 9) as provided under Section 3. Payments under this Section shall be net of any required withholding taxes.

OTHER TERMS

5. Ownership Guidelines. Guidelines pertaining to the Employee's required ownership of Common Stock (the "Stock Ownership Guidelines") shall be determined by the Committee or its authorized delegate, as applicable, in its sole discretion from time to time as communicated to the Employee in writing.

6. Holding Requirements. In the event of non-compliance with the Stock Ownership Guidelines under Section 5 hereof, following a five-year noncompliance period as described in the Stock Ownership Guidelines, the Employee must retain fifty percent (50%) of the net shares of Common Stock acquired in connection with the vesting of RSUs (net of withholding tax and any applicable fees) until the threshold set forth in the Stock Ownership Guidelines is satisfied. Such shares shall be held in the Employee's Morgan Stanley account or in another account acceptable to the Company. In addition, shares used to maintain the Employee's ownership level pursuant to this award should be held with Morgan Stanley or in another account acceptable to the Company.

7. Voting Rights/Dividends. Except as otherwise provided herein, the Employee shall have no rights as a shareholder with respect to the RSUs until the date of issuance of a stock certificate to him for such RSUs and no adjustment shall be made for dividends or other rights for which the record date is prior to the date the RSUs become vested.

8. Non-Assignability. Unless otherwise provided by the Committee in its discretion, RSUs may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered except as provided in Section 11 of the Plan. Any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of a RSU in violation of the provisions of this Section 8 and Section 11 of the Plan shall be void.

9. Effect of Termination of Employment or Death.

(a) Effect on RSUs. In the event the Employee

(i) voluntarily ceases to be an employee of the Employer for any reason other than (A) retirement or (B) following a Change in Control, Termination For Good Reason, the RSUs that have not vested in accordance with Section 3 shall be canceled and forfeited on the date of such voluntary termination of employment;

(ii) involuntarily ceases to be an employee of the Employer prior to a Change in Control for any reason other than due to death, Disability or termination for Cause, the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since the date the award was granted, in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. Such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled within 60 days following such termination in accordance with Section 2; provided that such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided further that, to the extent such 60-day period straddles two calendar years, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall be settled in the second calendar year;

(iii) involuntarily ceases to be an employee of the Employer following a Change in Control for any reason other than due to death, Disability or termination for Cause, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under

Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall be paid in cash in the second calendar year;

(iv) involuntarily ceases to be an employee of the Employer by reason of death or Disability, (1) the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest if such termination of employment occurs prior to a Change in Control and shall be settled within 60 days of such termination in accordance with Section 2, and (2) if such termination of employment occurs following a Change in Control, then the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee, in either case without proration based on the portion of the vesting period elapsed prior to such termination;

(v) voluntarily ceases to be an employee of the Employer by reason of retirement (for purposes of this Agreement only, “retirement” for U.S. employees shall mean termination of employment at or above age 55 with 10 years of service or age 60 with 5 years of service with the Employer), the number of RSUs scheduled to vest on the Vesting Date immediately following such termination, and any dividend equivalents with respect thereto, shall be prorated based on a fraction, the numerator of which is the number of full months elapsed since the most recent Vesting Date immediately preceding such date of termination (or since the date the award was granted in the case of a termination of employment prior to the first Vesting Date) and the denominator of which is 12, and any remaining RSUs shall be forfeited. If such termination of employment occurs prior to a Change in Control, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be settled within 60 days following such termination in accordance with Section 2. If such termination of employment occurs following a Change in Control, such prorated number of RSUs, and any dividend equivalents with respect thereto, shall immediately vest and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days of the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. In each case, whether such termination of employment occurs prior to or following a Change of Control, such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent the 60-day period straddles two calendar years, then such prorated number of RSUs, and any dividend equivalents with respect thereto, shall be settled or paid in cash, as applicable, in the second calendar year;

(vi) involuntarily ceases to be an employee of the Employer due to termination for Cause, the RSUs shall, subject to any Plan provisions to the contrary, be cancelled and forfeited on the date of such termination of employment; and

(vii) voluntarily ceases to be an employee due to a Termination for Good Reason following a Change in Control, the number of RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall immediately vest (without proration based on the portion of the vesting period elapsed since the most recent Vesting Date (or since the date the award was granted, in the case of a termination of employment prior to the first Vesting Date) prior to such termination) and shall be paid in cash in accordance with Section 22(f) of the Plan within 60 days following the earliest time set forth in Section 22(c) of the Plan that will not trigger a tax or penalty under Section 409A of the Code, as determined by the Committee. Such vesting shall be contingent, at the discretion of the Company, upon the Employee executing a general release (which may include an agreement with respect to engagement in detrimental activity, in a form acceptable to the Company) and such release becoming effective and irrevocable within such 60-day period; provided that, to the extent such 60-day period straddles two calendar years, then the RSUs covered by this Agreement, and any dividend equivalents with respect thereto, shall settled or paid in cash, as applicable, in the second calendar year;

(b) Cause. “Cause” means (i) a violation of any of the rules, policies, procedures or guidelines of the Employer, including but not limited to the Company’s Business Ethics Policy and the Proprietary Information and Conflict of Interest Agreement (ii) any conduct which qualifies for “immediate discharge” under the Employer’s Human Resource Policies as in effect from time to time (iii) rendering services to a firm which engages, or engaging directly or indirectly, in any business that is competitive with the Employer, or represents a conflict of interest with the interests

of the Employer; (iv) conviction of, or entering a guilty plea with respect to, a crime whether or not connected with the Employer; or (v) any other conduct determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(c) "Termination For Good Reason" has the meaning set forth in Section 22(a)(vi) of the Plan.

(d) "Disability" shall include cessation of active employment due to commencement of long-term disability under the Employer's long-term disability plan or under a disability policy of any subsidiary or Affiliate, as applicable; provided that a Disability shall not be deemed to have occurred for such purposes unless the circumstances would also result in a "disability" within the meaning of Section 409A of the Code.

10. General Restrictions. If at any time the Committee or its authorized delegate, as applicable, shall determine, in its discretion, that the listing, registration or qualification of any shares of Common Stock subject to this Agreement upon any securities exchange or under any state or Federal law, or the consent or approval of any government regulatory body, is necessary or desirable as a condition of, or in connection with, the awarding of the RSUs or the issue or purchase of shares of Common Stock hereunder, the certificates for shares of Common Stock may not be issued in respect of RSUs in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee or its authorized delegate, as applicable, and any delay caused thereby shall in no way affect the date of termination of the RSUs.

11. Responsibility for Taxes . The Employee acknowledges that the ultimate responsibility for the Employee's Federal, state and municipal individual income taxes, the Employee's portion of social security and other payroll taxes, and any other taxes related to the Employee's participation in the Plan and legally applicable to the Employee, is and remains his or her responsibility and may exceed the amount actually withheld by the Company or the Employer. In the event that there is withholding tax liability in connection with the vesting of RSUs, the Employee may satisfy, in whole or in part, any withholding tax liability: (a) by cash payment of an amount equal to such withholding liability; or (b) by having the Company withhold from the number of RSUs in which the Employee would be entitled to vest a number of shares of Common Stock having a fair value equal to such withholding tax liability in accordance with the Company's share withholding procedures.

12. Nature of Award . In accepting the award, the Employee acknowledges that:

(a) the Plan is established voluntarily by the Company, it is discretionary in nature and it may be modified, amended, suspended or terminated by the Company at any time in a manner consistent with Section 13 of the Plan regarding Plan amendment and termination and, in addition, the RSUs are subject to modification and adjustment under Section 6 of the Plan.

(b) the award of the RSUs is voluntary and occasional and does not create any contractual or other right to receive future grants of RSUs, or benefits in lieu of RSUs, even if RSUs have been granted repeatedly in the past;

(c) all decisions with respect to future RSU awards, if any, will be at the sole discretion of the Committee or its authorized delegate, as applicable;

(d) The Employee's participation in the Plan shall not create a right to further employment with the Employer and shall not interfere with the ability of the Employer to terminate Employee's employment relationship at any time; further, the RSU award and Employee's participation in the Plan will not be interpreted to form an employment contract or relationship with the Employer;

(e) The Employee is voluntarily participating in the Plan;

(f) the RSUs and the shares of Common Stock subject to the RSUs are an extraordinary item that does not constitute compensation of any kind for services of any kind rendered to the Employer, and which is outside the scope of the Employee's employment contract, if any;

(g) the RSUs and the shares of Common Stock subject to the RSUs are not intended to replace any pension rights or compensation;

(h) the RSUs and the shares of Common Stock subject to the RSUs are not part of normal or expected compensation or salary for any purposes, including, but not limited to, calculating any severance, resignation, termination, redundancy, dismissal, end of service payments, bonuses, long-service awards, pension or retirement

or welfare benefits or similar payments and in no event should be considered as compensation for, or relating in any way to, past services for the Employer;

(i) the future value of the underlying shares of Common Stock is unknown and cannot be predicted with certainty;

(j) in consideration of the award of the RSUs, no claim or entitlement to compensation or damages shall arise from forfeiture of the RSUs, including, but not limited to, forfeiture resulting from termination of the Employee's employment with the Employer (for any reason whatsoever and whether or not in breach of local labor laws) and the Employee irrevocably releases the Company and the Employer from any such claim that may arise; if, notwithstanding the foregoing, any such claim is found by a court of competent jurisdiction to have arisen, the Employee shall be deemed irrevocably to have waived the Employee's entitlement to pursue such claim; and

(k) subject to the provisions in the Plan regarding Change in Control, RSUs and the benefits under the Plan, if any, will not automatically transfer to another company in the case of a merger, take-over or transfer of liability.

13. No Advice Regarding Award . Neither the Company nor the Employer is providing any tax, legal or financial advice, nor is the Company or Employer making any recommendations regarding the Employee's participation in the Plan, or his or her acquisition or sale of the underlying shares of Common Stock. The Employee is hereby advised to consult with his or her own personal tax, legal and financial advisors regarding his or her participation in the Plan before taking any action related to the Plan.

14. Amendment of This Agreement . With the consent of the Em-ployee, the Committee or its authorized delegate, as applicable, may amend this Agreement in a manner not inconsistent with the Plan.

15. Subsidiary. As used herein the term "subsidiary" shall mean any present or future corporation which would be a "subsidiary corporation" of the Company as the term is defined in Section 425 of the Internal Revenue Code (the "Code") of 1986 on the date of award.

16. Affiliate . As used herein the term "affiliate" shall mean any entity in which the Company has a significant equity interest, as determined by the Committee.

17. Recoupments .

(a) If an employee or former employee of the Employer is reasonably deemed by the Committee or its authorized delegate, as applicable, to have engaged in detrimental activity against the Employer, any awards granted to such employee or former employee shall be cancelled and be of no further force or effect and any payment or delivery of an award from six months prior to such detrimental activity may be rescinded. In the event of any such rescission, the Employee shall pay to the Company the amount of any gain realized or payment received as a result of the rescinded exercise, payment or delivery, in such manner and on such terms and conditions as may be required by the Committee or its authorized delegate, as applicable. Detrimental activity may include:

(i) violating terms of a non-compete agreement with the Employer, if any;

(ii) disclosing confidential or proprietary business information of the Employer to any person or entity including but not limited to a competitor, vendor or customer without appropriate authorization from the Employer;

(iii) violating any rules, policies, procedures or guidelines of the Employer;

(iv) directly or indirectly soliciting any employee of the Employer to terminate employment with the Employer;

(v) directly or indirectly soliciting or accepting business from any customer or potential customer or encouraging any customer, potential customer or supplier of the Employer, to reduce the level of business it does with the Employer; or

(vi) engaging in any other conduct or act that is determined to be injurious, detrimental or prejudicial to any interest of the Employer.

(b) If an accounting restatement by the Company is required in order to correct any material noncompliance with financial reporting requirements under relevant securities laws, the Company will have the

authority to recover from executive officers or former executive officers, whether or not still employed by the Employer, any excess incentive-based compensation (in excess of what would have been paid under the accounting restatement), including entitlement to shares, provided under this Agreement to executive officers of the Employer, that was based on such erroneous data and paid during the three-year period preceding the date on which the Company is required to prepare the accounting restatement. Notwithstanding anything herein to the contrary, the Company may implement any policy or take any action with respect to the recovery of excess incentive-based compensation, including entitlement to shares of Common Stock that the Company determines to be necessary or advisable in order to comply with the requirements of the Dodd-Frank Wall Street Financial Reform and Consumer Protection Act.

18. Cancellation and Rescission of Award . Without limiting the foregoing Section regarding non-engagement in detrimental activity against the Employer, the Company may cancel any award provided hereunder if the Employee is not in compliance with all of the following conditions:

(a) The Employee shall not render services for any organization or engage directly or indirectly in any business which would cause the Employee to breach any of the post-employment prohibitions contained in any agreement between the Employer and the Employee.

(b) The Employee shall not, without prior written authorization from the Employer, disclose to anyone outside the Employer, or use in other than the Employer's business, any confidential information or material, as specified in any agreement between the Employer and the Employee which contains post-employment prohibitions, relating to the business of the Employer acquired by the Employee either during or after employment with the Employer.

Notwithstanding the above, this Agreement does not in any manner restrict the Employee from reporting possible violations of federal, state or local laws or regulations to any governmental agency or entity, and shall not, and not be interpreted to, impair the participant from exercising any legally protected whistleblower rights (including under Rule 21F under the Exchange Act). Similarly, the Employer does not in any manner restrict the Employee from participating in any proceeding or investigation by a federal, state or local government agency or entity responsible for enforcing such laws. The Employee is not required to notify the Employer that he or she has made such report or disclosure, or of his or her participation in an agency investigation or proceeding.

(c) The Employee, pursuant to any agreement between the Employer and the Employee which contains post-employment prohibitions, shall disclose promptly and assign to the Employer all right, title and interest in any invention or idea, patentable or not, made or conceived by the Employee during employment with the Employer, relating in any manner to the actual or anticipated business, research or development work of the Employer, and shall do anything reasonably necessary to enable the Employer to secure a patent where appropriate in the United States and in foreign countries.

(d) Failure to comply with the provision of subparagraphs (a), (b) or (c) of this Section 18 prior to, or during the six months after, any payment or delivery shall cause such payment or delivery to be rescinded. The Company shall notify the Employee in writing of any such rescission within two years after such payment or delivery. Within ten days after receiving such a notice from the Company, the Employee shall pay to the Company the amount of any payment received as a result of the rescinded payment or delivery pursuant to an award. Such payment to the Company by the Employee shall be made either in cash or by returning to the Company the number of shares of Common Stock that the Employee received in connection with the rescinded payment or delivery.

19. Notices. Notices hereunder shall be in writing and if to the Company shall be mailed to the Company at 100 Campus Dr. Suite 200 Florham Park, NJ 07932 USA, addressed to the attention of Stock Plan Administrator, and if to the Employee shall be delivered personally or mailed to the Employee at his address as the same appears on the records of the Company.

20. Language . If the Employee has received this Agreement or any other document related to the Plan translated into a language other than English and if the meaning of the translated version is different than the English version, the English version will control.

21. Electronic Delivery and Acceptance . The Company will deliver any documents related to current or future participation in the Plan by electronic means. The Employee hereby consents to receive such documents by electronic delivery, and agrees to participate in the Plan and be bound by the terms and conditions of this Agreement, through an on-line or electronic system established and maintained by the Company or a third party designated by the

Company. Electronic acceptance by the Employee is required and the award will be cancelled for any employee who fails to comply with the Company's acceptance requirement within six months of the effective date of the award.

22. Interpretation of This Agreement . The Committee or its authorized delegate, as applicable, shall have the authority to interpret the Plan and this Agreement and to take whatever administrative actions, including correction of administrative errors in the awards subject to this Agreement and in this Agreement, as the Committee or its authorized delegate, as applicable, in its sole good faith judgment shall determine to be advisable. All decisions, interpretations and administrative actions made by the Committee or its authorized delegate, as applicable, hereunder or under the Plan shall be binding and conclusive on the Company and the Employee. In the event there is inconsistency between the provisions of this Agreement and of the Plan, the provisions of the Plan shall govern.

23. Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the parties hereto and the successors and assigns of the Company and to the extent provided in Section 11 of the Plan to the personal representatives, legatees and heirs of the Employee.

24. Governing Law and Venue . The validity, construction and effect of the Agreement and any actions taken under or relating to this Agreement shall be determined in accordance with the laws of the state of New York and applicable Federal law.

This grant is made and/or administered in the United States. For purposes of litigating any dispute that arises under this grant or the Agreement the parties hereby submit to and consent to the jurisdiction of the state of New York, agree that such litigation shall be conducted in the state or federal courts located in New York.

25. Section 409A . It is intended that the provisions of this Agreement comply with, or are exempt from, Section 409A, and all provisions of this Agreement shall be construed and interpreted in a manner consistent with the requirements for avoiding taxes or penalties under Section 409A.

Neither the Employee nor any of the Employee's creditors or beneficiaries shall have the right to subject any deferred compensation (within the meaning of Section 409A) payable under this Agreement to any anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, attachment or garnishment. Except as permitted under Section 409A, any deferred compensation (within the meaning of Section 409A) payable to the Employee or for the Employee's benefit under this Agreement may not be reduced by, or offset against, any amount owing by the Employee to the Company or any of its Affiliates.

If, at the time of the Employee's separation from service (within the meaning of Section 409A), (a) the Employee shall be a specified employee (within the meaning of Section 409A and using the identification methodology selected by the Company from time to time) and (b) the Company shall make a good faith determination that an amount payable hereunder constitutes deferred compensation (within the meaning of Section 409A) the payment of which is required to be delayed pursuant to the six-month delay rule set forth in Section 409A in order to avoid taxes or penalties under Section 409A, then the Company shall not pay such amount on the otherwise scheduled payment date but shall instead pay it, without interest, on the first business day after such six-month period.

Notwithstanding any provision of this Agreement to the contrary, in light of the uncertainty with respect to the proper application of Section 409A, the Company reserves the right to make amendments to this Agreement as the Company deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A. In any case, the Employee shall be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on the Employee or for the Employee's account in connection with this Agreement (including any taxes and penalties under Section 409A), and neither the Company nor any of its Affiliates shall have any obligation to indemnify or otherwise hold the Employee harmless from any or all of such taxes or penalties.

26. Separability . In case any provision in the Agreement, or in any other instrument referred to herein, shall become invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions in the Agreement, or in any other instrument referred to herein, shall not in any way be affected or impaired thereby.

27. Integration of Terms . Except as otherwise provided in this Agreement, this Agreement contains the entire agreement between the parties relating to the subject matter hereof and supersedes any and all oral statements and prior writings with respect thereto.

28. Appendix for Non-U.S. Countries . Notwithstanding any provisions in this Agreement, the RSU award shall be subject to any special terms and conditions set forth in any appendix to this Agreement for the Employee's country (the "Appendix"). Moreover, if the Employee relocates to one of the countries included in the Appendix, the special

terms and conditions for such country will apply to the Employee, to the extent the Company determines that the application of such terms and conditions is necessary or advisable in order to comply with local law or facilitate the administration of the Plan. The Appendix constitutes part of this Agreement.

29. Imposition of Other Requirements . The Committee or its authorized delegate, as applicable, reserves the right to impose other requirements on the Employee's participation in the Plan, on the RSUs and on any shares of Common Stock acquired under the Plan, to the extent the Committee or its authorized delegate, as applicable, determines it is necessary or advisable in order to comply with local law or facilitate the administration of the Plan, and to require the Employee to sign any additional agreements or undertakings that may be necessary to accomplish the foregoing.

IN WITNESS WHEREOF, the Company has executed this Agreement as of the day and year set forth on the Award Summary.

CONDUENT INCORPORATED

By:

Signature

September 27, 2017

Allan Cohen

190 Vandelinda Avenue

Teaneck, New Jersey 07666

Dear Allan:

I am pleased to offer you the position of Vice President, Chief Accounting Officer, Conduent, Inc., reporting to me. The expected start date is October 17, 2017. Your work location will be at 100 Campus Drive in Florham Park, New Jersey. This offer is contingent upon approval of the Board of Directors.

Annual Base Salary

Your starting base salary for this position will be paid bi-weekly, one week in arrears, at the annualized rate of $400,000.

Annual Performance Incentive Plan

You will be eligible to participate in the 2018 Annual Performance Incentive Plan (APIP) at an annual target level of 60% of base salary prorated for time eligible to participate in the plan. The payout can be up to 2 times target and this varies based on company and individual performance.

Executive Long-Term Incentive Plan

You will be eligible to participate in the Executive Long-Term Incentive Plan (ELTIP) for 2018 with a target award of $250,000. Grants are typically made in April of each year. Additional details of the ELTIP will be provided to you separately.

You will also be eligible to receive a sign-on ELTIP grant of $250,000 at grant date, expected to be on or about December 29, 2017. Additional details of the ELTIP will be provided to you separately.

Benefits

We are pleased to offer you a comprehensive benefits package, including medical, dental, vision care, disability income protection, accident insurance, and life insurance. You are eligible for coverage on your first day of employment assuming an October 17, 2017 start date.

In addition, Conduent offers a 401(k) savings plan which includes a dollar-for-dollar company match of 3.0%. You will also be eligible for paid vacation totaling four weeks per year.

Severance

You will be eligible for the severance if your employment is terminated by Conduent for any reason (other than for cause) as defined herein. Severance benefits under this arrangement will be the equivalent of 6 months of your annual base salary and benefits coverage and will be paid in accordance with our regularly scheduled payroll. The payment of any severance benefits will be contingent upon your execution of both a general release of all claims and an agreement not to engage in detrimental activity as determined by the Company upon your termination.

For Cause Definition

The term for cause as used in this letter shall mean any one or more of the following reasons for termination: (i) your failure to follow the directions of your manager provided such directions are not inconsistent with your job duties and/or with applicable law; (ii) your performance of any act of fraud, dishonesty, misappropriation or embezzlement, or other similar willful misconduct while conducting business on behalf of Conduent or executing upon your job duties and responsibilities; (iii) your conviction of any felony or a crime involving moral turpitude (including pleading guilty or no contest to such crime or a lesser crime which results from plea bargaining); (iv) your performance becomes impaired due to alcohol or substance abuse and you refuse to seek treatment; (v) your performance of any act which injures or reasonably could be expected to injure the reputation, brand, business or business relationships of Conduent; and (vi) your violation of any material Conduent policy, including, but not limited to, policies prohibiting sexual harassment, retaliation, discrimination, and violence.

Other Conditions

It is our sincere hope and belief that our relationship will be a beneficial one, however, Conduent does not offer employment on a fixed term basis. Unless otherwise prohibited by law, this letter should not be considered in any manner as a proposed contract for employment for any fixed term, as your employment will be "at will." That is, either you or Conduent can terminate this relationship at any time, with or without cause or notice. In addition, Conduent may change any term or condition of your employment at will; with or without cause or notice.

This offer of employment is contingent on the receipt of a waiver of non-competition agreements with current or prior employers, if any. This offer is also contingent upon the successful completion of a pre-employment background check (criminal, credit etc.) which will require your execution of a background screening consent. Additionally, your employment is contingent on your execution of Conduent Employee Confidentiality, Non-Solicitation and Intellectual Property Non-Compete Agreement. Lastly, you will be required to present documents necessary to complete an I−9 Form. Human Resources will contact you to make an appointment with an I−9 verifier prior to your scheduled start date.

This offer will remain in effect until October 2, 2017. Please notify me of your acceptance and ensure that all requirements are met before we finalize your start date (expected to be on or before Tuesday, October 17, 2017). All originals should be returned to me and if you have any questions, please feel free to contact me at (973) 526-7146.

Allan, I am delighted you are joining the Conduent leadership team. This is one of most exciting periods in our company's history; I look forward to your significant contributions and success.

Sincerely,

/s/ BRIAN WEBB-WALSH

Chief Financial Officer

CEO CERTIFICATIONS

I, Ashok Vemuri, certify that:

1. I have reviewed this Annual Report on Form 10-K of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and any exhibits to this Report may contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect management's current beliefs, assumptions and expectations and are subject to a number of factors that could cause actual results to differ materially.

Such factors include, but are not limited to: government appropriations and termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our information systems or security systems or any service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our continuing emphasis on and shift toward technology-led digital transactions; customer decision-making cycles and lead time for customer commitments; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to modernize our information technology infrastructure and consolidate data centers; our ability to comply with data security standards; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Quarterly Report on Form 10-Q, as well as in our 2018 Annual Report on Form 10-K filed with the Securities and Exchange Commission and any current Report on Form 8-K. Any forward-looking statements made by us in this Quarterly Report on Form 10-Q speak only as of the date on which they are made. We are under no obligation to, and expressly disclaim any obligation to, update or alter our forward-looking statements, whether as a result of new information, subsequent events or otherwise.

Increase (decrease) in cash, cash equivalents and restricted cash	(237)	(104)
Cash, Cash Equivalents and Restricted Cash at Beginning of Period	765	667
Cash, Cash Equivalents and Restricted Cash at End of period[1]	$ 528	$ 563

(1) Includes $8 million and $10 million of restricted cash as of March 31, 2019 and 2018, respectively, that were included in Other current assets on the Condensed Consolidated Balance Sheets.

The accompanying notes are an integral part of these Condensed Consolidated Financial Statements.

CONDUENT INCORPORATED
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Basis of Presentation

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

The Company is a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. The Company serves as a trusted business partner in both the front office and back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience. The Company creates value for its commercial and government clients by applying its expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. The Company's portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

The unaudited interim Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). The year-end Condensed Consolidated Balance Sheet was derived from the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. Certain reclassifications have been made to prior year information to conform to current year presentation. Intercompany balances and transactions have been eliminated. In the opinion of management, all adjustments necessary for a fair statement of the financial position, results of operations and cash flows have been made. These adjustments consist of normal recurring items. The interim results of operations are not necessarily indicative of the results of the full year. These financial statements should be read in conjunction with the Company’s Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2018.

Note 2 – Recent Accounting Pronouncements

The Company's significant accounting policies are described in Note 1–Basis of Presentation and Summary of Significant Accounting Policies in the Company’s 2018 Annual Report on Form 10-K. Summarized below are the accounting pronouncements adopted subsequent to December 31, 2018 that were applicable and material to the Company.

New Accounting Standards Adopted

Leases: The Company adopted the updated lease guidance as of January 1, 2019, using the cumulative-effect adjustment transition method, which applies the provisions of the standard at the effective date without adjusting the comparative periods presented. The Company has elected the package of practical expedients, which allows the Company not to reassess (1) whether any expired or existing contracts as of the adoption date are, or contain, leases, (2) lease classification for any expired or existing leases as of the adoption date and (3) initial direct costs for any existing leases as of the adoption date. The Company did not elect to apply the hindsight practical expedient. Additionally, the Company has elected not to include short-term leases, with a term of 12 months or less, on its Condensed Consolidated Balance Sheets.

The impact of adopting this new guidance resulted in an increase to Operating lease right-of-use (ROU) assets of $387 million, an increase to Other current liabilities of $103 million, a decrease to Other long-term liabilities of $21 million, an increase to Operating lease liabilities of $316 million and a net decrease to opening retained earnings (deficit) of $8 million as of January 1, 2019. The adoption did not have an impact on the Company's Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows.

Summary of Accounting Policies

Leases

The Company determines if an arrangement is a lease at the inception of the contract and whether that lease meets the classification criteria of a finance or operating lease. The Company has operating and finance leases for real estate and equipment. Operating leases are included in Operating lease ROU assets, Other current liabilities, and Operating lease liabilities in our Condensed Consolidated Balance Sheets. Finance leases are included in Land, buildings and equipment, net, Current portion of long-term debt, and Long-term debt in our Condensed Consolidated Balance Sheets.

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the commencement date based on the net present value of lease payments over the lease term using the Company's incremental borrowing rates or implicit rates. The Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option based on economic factors. The Company recognizes operating fixed lease expense and finance lease depreciation on a straight-line basis over the lease term. Variable lease expense is recognized in the period in which the obligation for those payments is incurred. The Company accounts for lease and non-lease components separately for its equipment leases, based on the estimated standalone price of each component, and combines lease and non-lease components for its real estate leases.

The components of lease costs were as follows:

(in millions)	Three Months Ended March 31, 2019
Finance Lease Costs:	
Amortization of right of use assets	$ 3
Total Finance Lease Costs	$ 3
Operating lease costs:	
Base rent	$ 31
Short-term lease costs	3
Variable lease costs[(1)]	7
Sublease income	(1)
Total Operating Lease Costs	$ 40

_____

(1) Primarily related to taxes, insurance and common area and other maintenance costs for real estate leases.

Interest expense related to the finance leases for the three months ended March 31, 2019 was immaterial.

Supplemental cash flow information related to leases was as follows:

(in millions)	Three Months Ended March 31, 2019
Cash paid for the amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	$ (30)
Financing cash flow from finance leases	$ (3)
Supplemental non-cash information on right of use assets obtained in exchange for new lease obligations:	
Operating leases	$ 6

Supplemental balance sheet information related to leases was as follows:

(in millions)	March 31, 2019
Operating Leases:	
Operating lease right of use assets	$ 338
Other current liabilities	$ 112
Operating lease liabilities	282
Total Operating Lease Liabilities	$ 394
Finance Leases:	
Land, buildings and Equipment, net	$ 21
Current portion of long-term debt	$ 9
Long-term debt	14
Total Finance Lease Liabilities	$ 23

The Company's leases generally do not provide an implicit rate, and therefore the Company uses its incremental borrowing rate as the discount rate when measuring operating lease liabilities. The incremental borrowing rate represents an estimate of the interest rate the Company would incur at lease commencement to borrow an amount equal to the lease payments on a collateralized basis over the term of a lease within a particular currency environment. The weighted average discount rates for operating and finance leases were 5.2% and 4.8%, respectively.

The weighted average remaining lease terms for operating and finance leases at March 31, 2019, were 5 years and 3 years, respectively.

The aggregate future lease payments for operating leases were as follows:

(in millions)	March 31, 2019 Operating Lease Payments
Maturity Of Lease Liabilities:	
2019 (remaining)	$ 100
2020	105
2021	75
2022	52
2023	35
Thereafter	84
Total undiscounted operating lease payments	451
Less imputed interest	57
Present value of operating lease liabilities	$ 394

Maturities of finance lease liabilities were as follows:

(in millions)	March 31, 2019 Finance Lease Payments
2019 (remaining)	$ 8
2020	6
2021	5
2022	4
2023	1
Thereafter	—
Total undiscounted finance lease payments	24
Less imputed interest	1
Present value of finance lease liabilities	$ 23

As of March 31, 2019, the Company had an additional operating lease for real estate of $14 million, which has not commenced and has not been recognized on the Company's Consolidated Balance Sheet. This operating lease is expected to commence in 2019 with a lease term of 10 years.

As previously disclosed in Note 5 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018, under the previous lease accounting, future minimum lease payments for operating leases having initial or remaining non-cancelable lease term in excess of one year were as follows:

(in millions)	December 31, 2018 Operating Lease Payments
Maturity Of Lease Liabilities:	
2019	$ 153
2020	113
2021	78
2022	53
2023	33
Thereafter	76
Total minimum operating lease payments	$ 506

New Accounting Standards To Be Adopted

Credit Losses: In June 2016, the FASB updated the accounting guidance related to measurement of credit losses on financial instruments, which requires financial assets measured at amortized cost to be presented at the net amount expected to be collected. This updated guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact on the Company's Consolidated Financial Statements.

Note 3 – Revenue, Contract Assets and Liabilities

Disaggregation of Revenue

The following table provides information about disaggregated revenue by major service line, the timing of revenue recognition and a reconciliation of the disaggregated revenue by reportable segments. Refer to Note 4 – Segment Reporting for additional information on the Company's reportable segments.

	Three Months Ended March 31,	
(in millions)	2019	2018
Commercial Industries:		
Omni-channel communications	$ 211	$ 219
Human resource services	182	187
Industry services	219	248
Total Commercial Industries	612	654
Government Services:		
Government Services and Healthcare	119	114
Payment Services	74	82
State and Local	119	126
Federal	13	13
Total Government Services	325	335
Transportation:		
Tolling	79	72
Transit	54	54
Photo and Parking	48	46
Commercial Vehicle	3	4
Total Transportation	184	176
Other:		
Divestitures	36	248
Education	1	7
Total Other	37	255
Total Consolidated Revenue	$ 1,158	$ 1,420
Timing of Revenue Recognition:		
Point in time	$ 39	$ 36
Over time	1,119	1,384
Total Revenue	$ 1,158	$ 1,420

Contract Balances

The Company receives payments from customers based upon contractual billing schedules. Accounts receivable are recorded when the right to consideration becomes unconditional. Contract assets are the Company's rights to consideration for services provided when the right is conditioned on something other than passage of time (for example, meeting a milestone for the right to bill under the cost-to-cost measure of progress). Contract assets are transferred to Accounts receivable when the rights to consideration become unconditional. Unearned income includes payments received in advance of performance under the contract, which are realized when the associated revenue is recognized under the contract.

The following table provides information about the balances of the Company's contract assets, unearned income and receivables from contracts with customers:

(in millions)	March 31, 2019	December 31, 2018
Contract Assets (Unearned Income)		
Current contract assets	$ 197	$ 177
Long-term contract assets[1]	14	7
Current unearned income	(103)	(112)
Long-term unearned income[2]	(29)	(32)
Net Contract Assets (Unearned Income)	$ 79	$ 40
Accounts receivable, net	$ 820	$ 782

(1) Presented in Other long-term assets in the Condensed Consolidated Balance Sheets

(2) Presented in Other long-term liabilities in the Condensed Consolidated Balance Sheets

Revenues of $53 million and $83 million were recognized during the three months ended March 31, 2019 and 2018, respectively, related to the Company's unearned income at December 31, 2018 and January 1, 2018, respectively.

Transaction Price Allocated to the Remaining Performance Obligations

Estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied or partially satisfied at March 31, 2019, was approximately $2 billion. The Company expects to recognize approximately 65% of the revenues over the next two years and the remainder thereafter.

Note 4 – Segment Reporting

The Company's reportable segments correspond to how the Company organizes and manages the business and are aligned to the industries in which the Company's clients operate.

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three reportable segments: Commercial Industries, Government Services and Transportation.

Commercial Industries: Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

Government Services: Our Government Services segment provides government-centric business process services to U.S. federal, state and local and foreign governments for, public assistance, program administration, transaction processing and payment services.

Transportation: Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Selected financial information for our reportable segments is as follows:

(in millions)	Three Months Ended March 31,						
	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
March 31, 2019				Divestitures	Other		
Revenue	$ 612	$ 325	$ 184	$ 36	$ 1	$ —	$ 1,158
Segment profit (loss)	$ 113	$ 86	$ 20	$ 1	$ —	$ (151)	$ 69
Segment depreciation and amortization	$ 22	$ 9	$ 9	$ —	$ —	$ 14	$ 54
Adjusted EBITDA	$ 135	$ 95	$ 29	$ 1	$ —	$ (137)	$ 123
March 31, 2018							
Revenue	$ 654	$ 335	$ 176	$ 248	$ 7	$ —	$ 1,420
Segment profit (loss)	$ 110	$ 108	$ 27	$ 39	$ (3)	$ (176)	$ 105
Segment depreciation and amortization	$ 28	$ 7	$ 8	$ 2	$ 1	$ 10	$ 56
Adjusted EBITDA	$ 138	$ 115	$ 35	$ 41	$ (2)	$ (166)	$ 161

(in millions)	Three Months Ended March 31,	
Segment Profit (Loss) Reconciliation to Pre-tax Income (Loss)	2019	2018
Income (Loss) Before Income Taxes	$ (338)	$ (54)
Reconciling items:		
Amortization of acquired intangible assets	62	61
Restructuring and related costs	16	20
Interest expense	20	33
Goodwill impairment	284	—
(Gain) loss on divestitures and transaction costs	14	15
Litigation costs (recoveries), net	12	31
Other (income) expenses, net	(1)	(1)
Segment Pre-tax Income (Loss)	$ 69	$ 105
Segment depreciation and amortization (including contract inducements)	$ 54	$ 56
Adjusted EBITDA	$ 123	$ 161

Note 5 – Assets/Liabilities Held for Sale

In February 2019, the Company completed the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC. During the first quarter of 2019, the Company recorded an additional loss, inclusive of transaction costs, of $12 million on the sale of this portfolio, reflecting certain changes in estimates that were made when recording the initial charge. The revenue generated from this business was $36 million for the three months ended March 31, 2019 and $439 million for the year ended December 31, 2018.

Note 6 – Business Acquisition

In January 2019, the Company completed the acquisition of Health Solutions Plus (HSP), a software provider of healthcare payer administration solutions, for a total base consideration of $90 million and a maximum contingent consideration payment of $8 million based on a cumulative achievement over two years. Revenue and pre-tax income recorded since the acquisition date through March 31, 2019 were $4 million and $3 million, respectively.

The Company's purchase price allocation for the HSP acquisition is preliminary and subject to revision as additional information related to the fair value of assets and liabilities becomes available. The preliminary purchase price based upon the current determination of fair values as at March 31, 2019 was as follows:

(in millions)	March 31, 2019
Fair Value of Consideration Transferred:	
Cash paid	$ 90
Recorded earn-out payable	7
Total Consideration	$ 97
Allocation of Purchase Price:	
Net tangible assets	$ 10
Costs Assigned to Intangible Assets	
Developed technology	20
Customer relationships	18
Trademarks and trade names	1
Goodwill	48
Total Intangible Assets	87
Total Assets	$ 97

The useful lives are 7 years, 15 years and 1.5 years for Developed technology, Customer relationships and Trademarks and trade names, respectively. The acquired goodwill is associated with the Company's Commercial Industries segment. This acquired goodwill, while tax deductible, includes $7 million related to contingent consideration payable that is not tax deductible until it is earned and paid. The goodwill recognized is attributable primarily to expected synergies and the assembled workforce of HSP.

The Company has not presented separate results of operations or combined pro forma financial information of the Company and the acquired interests because the results of operations of the acquired business are considered immaterial.

Note 7 – Restructuring Programs and Related Costs

The Company engages in a series of restructuring programs related to downsizing its employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce its cost structure and improve productivity. The implementation of the Company's strategic transformation program and various productivity initiatives have reduced the Company's real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Also included in Restructuring and Related Costs are incremental, non-recurring costs related to the consolidation of the Company's data centers, which totaled $9 million for the three months ended March 31, 2019. Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Costs associated with restructuring, including employee severance and lease termination costs, are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of the Company's restructuring program activity during the three months ended March 31, 2019 and 2018 was as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2018	$ 13	$ 36	$ 49
Restructuring provision	3	14	17
Adjustments to prior accruals	—	(1)	(1)
Total Net Current Period Charges	3	13	16
Payments against reserve and currency	(5)	(6)	(11)
Adoption of new lease standard	—	(22)	(22)
Other	—	(3)	(3)
Accrued Balance at March 31, 2019	$ 11	$ 18	$ 29

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2017	$ 14	$ 30	$ 44
Restructuring provision	17	7	24
Adjustments to prior accruals	(3)	(2)	(5)
Total Net Current Period Charges	14	5	19
Payments against reserve and currency	(5)	(8)	(13)
Other	—	1	1
Accrued Balance at March 31, 2018	$ 23	$ 28	$ 51

In addition, the Company recorded professional support costs associated with the strategic transformation program in Restructuring and related costs of $0 million and $1 million for the three months ended March 31, 2019 and 2018, respectively.

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Three Months Ended March 31,	
(in millions)	2019	2018
Commercial Industries	$ 2	$ 12
Shared IT / Infrastructure & Corporate Costs	14	7
Total Net Restructuring Charges	$ 16	$ 19

Note 8 – Debt

Long-term debt was as follows:

(in millions)	March 31, 2019	December 31, 2018
Term loan A due 2022	$ 691	$ 705
Term loan B due 2023	831	833
Senior notes due 2024	34	34
Finance lease obligations	23	26
Principal debt balance	1,579	1,598
Debt issuance costs and unamortized discounts	(30)	(31)
Less: current maturities	(53)	(55)
Total Long-term Debt	$ 1,496	$ 1,512

Note 9 – Financial Instruments

The Company is a global company that is exposed to foreign currency exchange rate fluctuations in the normal course of its business. As a part of the Company's foreign exchange risk management strategy, the Company uses derivative instruments, primarily forward contracts, to hedge the funding of foreign entities which have a non-dollar functional currency, thereby reducing volatility of earnings or protecting fair values of assets and liabilities.

At March 31, 2019 and December 31, 2018, the Company had outstanding forward exchange contracts with gross notional values of approximately $164 million and $167 million, respectively. Approximately 65% of these contracts mature within three months, 14% in three to six months, 16% in six to twelve months and 5% in greater than twelve months. Most of these foreign currency derivative contracts are designated as cash flow hedges and did not have a material impact on the Company's balance sheet, income statement or cash flows for the periods presented.

Refer to Note 10 – Fair Value of Financial Assets and Liabilities for additional information regarding the fair value of the Company's foreign exchange forward contracts.

Note 10 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP established a hierarchy framework to classify the fair value base on the observability of significant inputs to the measurement. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities.

Unless noted herein, the Company's valuation methodologies for assets and liabilities measured at fair value are described in Note 10 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018.

Summary of Financial Assets and Liabilities Accounted for at Fair Value on a Recurring Basis

The following table represents assets and liabilities measured at fair value on a recurring basis. The basis for the measurement at fair value in all cases is Level 2.

(in millions)	March 31, 2019	December 31, 2018
Assets:		
Foreign exchange contract - forward	$ 3	$ 3
Total Assets	$ 3	$ 3
Liabilities:		
Foreign exchange contracts - forwards	$ 1	$ 1
Total Liabilities	$ 1	$ 1

Summary of Other Financial Assets and Liabilities

The estimated fair values of our other financial assets and liabilities were as follows:

(in millions)	March 31, 2019 Carrying Amount	March 31, 2019 Fair Value	December 31, 2018 Carrying Amount	December 31, 2018 Fair Value
Assets:				
Assets held for sale	—	—	15	15
Liabilities:				
Long-term debt	1,496	1,478	1,512	1,463
Liabilities held for sale	—	—	40	40

The fair value amounts for Cash and cash equivalents, Restricted cash, Accounts receivable, net and Short-term debt approximate carrying amounts due to the short-term maturities of these instruments.

The fair value of the Goodwill impairment of $284 million recorded for the three months ended March 31, 2019, was estimated based on a discounted cash flow and market multiple analysis (level 3). Refer to Note 18 – Goodwill to the Condensed Consolidated Financial Statements for additional information regarding this impairment charge.

The fair value of the Assets held for sale and the Liabilities held for sale were measured based on the sales price less estimated transactions costs (Level 3). Refer to Note 5 – Assets/Liabilities Held for Sale to the Condensed Consolidated Financial Statements for additional information

The fair value of Long-term debt was estimated based on the current rates offered to the Company for debt of similar maturities (Level 2).

Note 11 – Employee Benefit Plans

The Company has post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals were transitioned to an enhanced defined contribution plan. In these plans, employees are allowed to contribute a portion of their salaries and bonuses to the plans. Historically, the Company matched a portion of employee contributions. However, beginning in 2019, the Company has suspended its match to the 401(k) plan for all U.S. employees, except hourly employees.

The Company recognized an expense related to its defined contribution plans of $3 million and $8 million for the three months ended March 31, 2019 and 2018, respectively. As a result of suspending 401(K) match for U.S. employees as indicated above, there was a $3 million reduction in expense for the three months ended March 31, 2019.

Note 12 – Accumulated Other Comprehensive Loss (AOCL)

Below are the balances and changes in AOCL[(1)]:

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2018	$ (426)	$ 2	$ (1)	$ (425)
Other comprehensive income (loss) before reclassifications	7	1	—	8
Amounts reclassified from accumulated other comprehensive loss	15	—	(1)	14
Net current period other comprehensive income (loss)	22	1	(1)	22
Balance at March 31, 2019	$ (404)	$ 3	$ (2)	$ (403)

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2017	$ (437)	$ 1	$ (58)	$ (494)
Other comprehensive income (loss) before reclassifications	9	(1)	—	8
Amounts reclassified from accumulated other comprehensive loss	5	—	—	5
Net current period other comprehensive income (loss)	14	(1)	—	13
Balance at March 31, 2018	$ (423)	$ —	$ (58)	$ (481)

(1) All amounts are net of tax. Tax effects were immaterial.

Note 13 – Contingencies and Litigation

As more fully discussed below, the Company is involved in a variety of claims, lawsuits, investigations and proceedings concerning: governmental entity contracting, servicing and procurement law; intellectual property law; employment law; commercial and contracts law; the Employee Retirement Income Security Act (ERISA); and other laws, regulations and matters. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company assesses its potential liability by analyzing its litigation and regulatory matters using available information. The Company develops its view on estimated losses in consultation with outside counsel handling its defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in the Company's determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts in excess of any accrual for such matter or matters, this could have a material adverse effect on the Company's results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. The Company believes it has recorded adequate provisions for any such matters as of March 31, 2019. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matters could be in excess of any amounts accrued and could be material to the Company's results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates when the Company undertakes an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the condensed consolidated financial position or liquidity. As of March 31, 2019, the Company had accrued its estimate of liability incurred under its indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Conduent State Healthcare, LLC (f/k/a Xerox State Healthcare, LLC, f/k/a ACS State Healthcare, LLC) and Conduent Incorporated: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Conduent State Healthcare LLC (f/k/a Xerox State Healthcare, LLC and ACS State Healthcare) (“CSH”), Conduent Business Services LLC (“CBS”) and Conduent Incorporated (“CI”) (collectively, CSH, CBS and CI are referred to herein as the "Conduent Defendants") and Xerox Corporation (together with the Conduent Defendants called “Defendants”) violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”) (the “State Action”). In February 2019 a settlement agreement and release was reached among the Defendants, the State and HHSC. Pursuant to the terms of the Texas Agreement ("Texas Agreement"), the Conduent Defendants will pay the State of Texas $236 million in full settlement of the claims asserted against the Defendants. This amount was payable in installments and all proceedings in the lawsuit were suspended and the State and the HHSC agreed to dismiss the lawsuit with prejudice and release the Defendants from all of the State’s claims after all settlement payments are made. In May 2019, the Defendants entered into the First Amendment to Settlement Agreement and Release with the State (the “Amended Agreement”). Pursuant to the terms of the Amended Agreement, the amount paid to the State by the Conduent Defendants in full settlement of the State Action will be paid as follows: (1) $40 million on or before April 15, 2019 (which the Company has already paid); (2) $78 million on or before May 15, 2019 (the “First Payment”); and (3) $118 million on or before January 15, 2020 (the “Second Payment”). In order to secure the Second Payment, the Company will provide bank issued letters of credit to the State in the full amount of the Second Payment (the “LCs”) which the State may present for payment to the issuing banks if the Conduent Defendants do not make the Second Payment. On the 91st day following receipt of the First Payment and the LCs, the State will file a dismissal with prejudice dismissing the State Action and fully release and discharge the Defendants. As a result of the change in payment terms pursuant to the Amended Agreement, the Company recognized an additional $13 million of expense in the quarter ended March 31, 2019.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC (“Buck”), which was a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association (“StanCERA”). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck’s valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court’s ruling and remanded the case back to the trial court as to Buck only, and only with respect to Plaintiff’s claim of aiding and abetting StanCERA in breaching its fiduciary duty. This case has been stayed pending the outcome of parallel litigation the plaintiffs are pursuing against StanCERA. The parallel litigation was tried before the bench in June 2018, and on January 24, 2019, the court found in favor of StanCERA, holding that it had not breached its fiduciary duty to plaintiffs. Plaintiffs in the parallel litigation have the right to file an appeal, which we expect. Nasrawi remains stayed until the parallel litigation is finally concluded. Absent the court finding that StanCERA breached its fiduciary duty, plaintiffs’ claim against Buck for aiding and abetting said breach would not appear viable. Buck will continue to aggressively defend these lawsuits. In August 2018, Conduent sold Buck Consultants, LLC; however, the Company retained this liability after the sale. The Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide a Medicaid Management Information Systems. In the lawsuit, Conduent seeks damages in excess of $150 million. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and recorded in the same period certain charges associated with the termination. Cognizant asserted two counterclaims for breach of contract seeking recovery of damages in excess of $47 million, which includes amounts alleged not paid to Cognizant under the contract and an alleged $25 million for termination fees. Conduent has responded to Cognizant's counterclaims by denying the allegations. Conduent will continue to vigorously defend itself against the counterclaims but the Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters

On January 5, 2016, the Consumer Financial Protection Bureau (the "CFPB") notified Xerox Education Services, Inc. (XES) that, in accordance with the CFPB's discretionary Notice and Opportunity to Respond and Advise (NORA) process, the CFPB's Office of Enforcement is considering recommending that the CFPB take legal action against XES, alleging that XES violated the Consumer Financial Protection Act's prohibition of unfair practices. Should the CFPB have commenced an action, it may have sought restitution, civil monetary penalties, injunctive relief, or other corrective action. The purpose of a NORA letter is to provide a party being investigated an opportunity to present its position to the CFPB before an enforcement action is recommended or commenced. XES submitted its response to the NORA. The CFPB's NORA stems from an inquiry that commenced in 2014 when XES received and responded to a CFPB Civil Investigative Demand containing a broad request for information. During this process, XES self-disclosed to the U.S. Department of Education (the "Department") and the CFPB certain adjustments of which it had become aware that had not been timely made relating to its servicing of a small percentage of third-party student loans under outsourcing arrangements for various financial institutions. The CFPB, the U.S. Department of Education, the U.S. Department of Justice and several state agencies began similar reviews. XES has cooperated and continues to fully cooperate with all regulatory agencies and has resolved the state agency investigations. As a result of these regulatory inquiries, its own reviews of operations and work performed by external auditors, XES identified and remediated certain other operational issues. XES disclosed these additional operational projects to the Department at the end of the second quarter of 2018 and to the CFPB in late 2018. In the third quarter of 2018, the Company exited the Student Loan Services business. In the first quarter of 2019, the Company resolved the CFPB's investigation. The Company cannot provide assurance that the CFPB, another regulator, a financial institution on behalf of which the Company serviced third-party student loans, or another party will not ultimately commence a legal action against XES in which fines, penalties or other liabilities are sought from XES. Nor is the Company able to predict the likely outcome of these matters, should any such matter be commenced, or reasonably provide an estimate or range of estimates of any loss in excess of current reserves. The Company could, in future periods, incur judgments or enter into settlements to resolve these potential matters for amounts in excess of current reserves and there could be a material adverse effect on the Company's results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Other Contingencies

Certain contracts, primarily in the Company's Government Services and Transportation segments, require the Company to provide a surety bond or a letter of credit as a guarantee of performance. As of March 31, 2019, the Company had $636 million of outstanding surety bonds used to secure its performance of contractual obligations with its clients and $266 million of outstanding letters of credit issued to secure the Company's performance of contractual obligations to its clients as well as other corporate obligations. In general, the Company would only be liable for the amount of these guarantees in the event of default in the Company's performance of its obligations under each contract. The Company believes it has sufficient capacity in the surety markets and liquidity from its cash flow and its various credit arrangements (including its Credit Facility) to allow it to respond to future requests for proposals that require such credit support.

Note 14 – Preferred Stock

Series A Preferred Stock

In December 2016, the Company issued 120,000 shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393,000 shares (reflecting an initial conversion price of approximately $22.25 per share of common stock), subject to customary anti-dilution adjustments.

Note 15 – Shareholders' Equity

Note 16 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

(in millions, except per share data in whole dollars and shares in thousands)	Three Months Ended March 31, 2019	Three Months Ended March 31, 2018
Net income (loss)	$ (308)	$ (50)
Accrued dividends on preferred stock	(2)	(2)
Adjusted Net Income (Loss) Available to Common Shareholders	$ (310)	$ (52)
Weighted average common shares outstanding	207,944	205,093
Common shares issuable with respect to:		
Stock options	—	—
Restricted stock and performance units / shares	—	—
Adjusted Weighted Average Common Shares Outstanding	207,944	205,093
Net Income (Loss) per Share:		
Basic	$ (1.49)	$ (0.26)
Diluted	$ (1.49)	$ (0.26)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):		
Stock Options	110	317
Restricted stock and performance shares/units	5,124	5,527
Convertible preferred stock	5,393	5,393
Total Anti-Dilutive Securities	10,627	11,237

Note 17 – Supplementary Financial Information

The components of Other current liabilities were as follows:

(in millions)	March 31, 2019	December 31, 2018
Accrued liabilities	$ 308	$ 307
Legal settlements	280	147
Current operating lease liabilities	112	—
All other liabilities	117	113
Total Other Current Liabilities	$ 817	$ 567

Note 18 – Goodwill

As a result of the Transportation reporting unit experiencing unanticipated losses of certain customer contracts, lower than expected new customer contracts and higher costs of delivery (all subsequent to February 2019), the growth of this reporting unit decreased resulting in its fair value being below its carrying value by approximately $284 million. As a result, the Company recorded a pre-tax impairment charge of approximately $284 million for the three months ended March 31, 2019.

ITEM 2 — MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated and its consolidated subsidiaries. MD&A is provided as a supplement to, and should be read in conjunction with, our Condensed Consolidated Financial Statements and the accompanying Notes.

Overview

We are a leading provider of digital business services with expertise in transaction-intensive processing, analytics and automation. Our portfolio covers both front office and back office operations; however, the majority of our revenue and differentiation derives from engagements where we serve on behalf of our clients to manage end-user interactions across a wide-range of domains. Examples include payments, collections, benefit administration and end-user engagement services. We create value for our clients through more efficient service delivery combined with a personalized and seamless experience for the end-user. We apply our expertise, technology and innovation to continually modernize our offerings for improved customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation, complemented by tightly aligned investments. Headquartered in Florham Park, New Jersey, we have a team of approximately 67,000 people as of March 31, 2019, servicing customers in 23 countries.

Financial Review of Operations

	Three Months Ended March 31,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
Revenue	$ 1,158	$ 1,420	$ (262)	(18)%

Income tax expense (benefit)	(30)	(4)	(26)	
Income (Loss) From Continuing Operations	**$ (308)**	**$ (50)**	**$ (258)**	

Revenue

Revenue for the three months ended March 31, 2019 decreased, compared to the prior period, primarily due to the impact from divestitures completed in 2018 and 2019, strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, contract losses and currency fluctuations. Partially offsetting these declines were increases from the ramp of new business.

Cost of Services (excluding depreciation and amortization)

Cost of services for the three months ended March 31, 2019 decreased, compared to the prior period, mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives, lost business, strategic contract actions taken by management as part of portfolio management, lower volumes and divestitures completed in 2018 and 2019.

Selling, General and Administrative (SG&A) (excluding depreciation and amortization)

Lower SG&A for the three months ended March 31, 2019, compared to the prior period, was reflective of the impact of our strategic transformation initiatives, primarily due to reductions in labor costs as well as the reduction in 401(K) costs and negotiated IT contract costs. As a result of the Company suspending its 401(K) match for U.S. employees, except hourly employees, there was a $3 million reduction in expense for the three months ended March 31, 2019.

Depreciation and Amortization

Depreciation and amortization for the three months ended March 31, 2019 decreased, compared to the prior period, primarily due to the divestitures in 2018.

Restructuring and Related Costs

Restructuring and related costs for the three months ended March 31, 2019 include $3 million of severance costs due to headcount reductions of approximately 200 employees worldwide, $9 million of costs related to data center migration and $4 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint.

Restructuring and related costs for the three months ended March 31, 2018 include $14 million of severance costs due to headcount reductions of approximately 700 employees worldwide and $5 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint, and $1 million of strategic transformation costs.

Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Refer to Note 7 – Restructuring Programs and Related Costs to the Condensed Consolidated Financial Statements for additional information regarding our restructuring programs.

Interest Expense

Interest expense represents interest on long-term debts and the amortization of debt issuance costs. Decrease in Interest expense for the three months ended March 31, 2019, compared to the prior period, was driven primarily by lower average debt balances and repricing as a result of the tender offer in 2018. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional information.

Goodwill Impairment

The goodwill impairment for the three months ended March 31, 2019 related to the write-down of the Transportation segment's carrying value. Refer to Note 18 – Goodwill to the Condensed Consolidated Financial Statements for additional information regarding this impairment charge.

(Gain) Loss on Divestitures and Transaction Costs

The current year period consists of $5 million of changes in estimates related to losses on divestitures and $9 million of transaction and related costs, $4 million of which relates to costs to remediate Payment Card Industry Data Security Standards compliance issues related to the sale of select standalone customer care contracts to Skyview Capital LLC.

Litigation Costs (Recoveries), Net

Net litigation costs for the three months ended March 31, 2019, consists primarily of the $13 million expense related to the Texas litigation whereas the prior year period expense was primarily due to the establishment of a reserve for certain terminated contracts that were subject to litigation in 2018.

Refer to Note 13 – Contingencies and Litigation to the Condensed Consolidated Financial Statements for additional information.

Income Taxes

The effective tax rate for the three months ended March 31, 2019 was 8.9%, compared with 7.4% for the three months ended March 31, 2018. The March 31, 2019 rate was lower than the U.S. statutory rate of 21%, primarily due to the goodwill impairment charge being partially non-deductible for tax and the geographic mix of income, partially offset by the tax benefit recognized on the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC.

The effective tax rate for the three months ended March 31, 2018 was lower than the statutory tax rate of 21%, primarily due to the geographic mix of income and the impact of Global Intangible Low Tax Income and Base Erosion Anti-Abuse Tax (BEAT), which reduced the tax benefits on the worldwide loss.

Excluding the impact of the goodwill impairment, divestitures, the Texas litigation reserve, charges for amortization of intangible assets, restructuring and divestiture related costs, the normalized effective tax rate for the three months ended March 31, 2019 was 34.7%. The normalized effective tax rate of 34.7% for the three months ended March 31, 2018, was predominantly impacted by the exclusion of charges for amortization of intangible assets, restructuring and divestiture related costs and the impact of BEAT.

The Company believes it is reasonably possible that unrecognized tax benefits of approximately $20 million will reverse within 12 months due to an anticipated audit settlement.

Operations Review of Segment Revenue and Profit

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three segments:

- Commercial Industries,
- Government Services, and
- Transportation.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

We are modernizing a significant portion of our information technology infrastructure with new systems and processes and consolidating our data centers as part of our transformation initiatives. We expect that these changes will provide greater strategic and operational flexibility and efficiency and better control of our systems and processes. Based on our continuing review of our cybersecurity, we are making additional investments to enhance our cybersecurity protection. There is a risk, however, that our modernization efforts and data center consolidations could materially and adversely disrupt our operations. See Part I, Item 1A – Risk Factors of our 2018 Annual Report on Form 10-K for additional information.

Revenues by segment were:

(in millions)	Three Months Ended March 31,						
	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total

Commercial Industries Segment

Revenue

Commercial Industries revenue for the three months ended March 31, 2019 decreased, compared to prior period, primarily driven by strategic contract actions and contract losses, partially offset by revenue from new contracts.

Segment Profit and Adjusted EBITDA

Increase in the Commercial Industries segment profit and adjusted EBITDA margin for the three months ended March 31, 2019, compared to prior period, was mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives and from increases in new business, partially offset by overall revenue decline from lost business, volumes and price declines.

Government Services Segment

Revenue

Government Services revenue for the three months ended March 31, 2019, decreased compared to prior period, primarily driven by contract losses, partially offset by ramp of new business.

Segment Profit and Adjusted EBITDA

Decrease in the Government Services segment profit and adjusted EBITDA margin for the three months ended March 31, 2019, compared to prior period, was mainly driven by lost business, increased IT spend and price declines as well as higher investments in technology platforms, partially offset by reductions in real estate and labor costs from our strategic transformation initiatives and contract remediation.

Transportation Segment

Revenue

Transportation revenue for the three months ended March 31, 2019 increased, compared to the prior period, primarily driven by ramp of new business, partially offset by contract losses and service level penalties.

Segment Profit and Adjusted EBITDA

Transportation segment profit and adjusted EBITDA margin for the three months ended March 31, 2019 decreased, compared to the prior period, mainly driven by volume declines, service level penalties and increased IT spend, partially offset by reductions in real estate and labor costs from our strategic transformation initiatives.

Other

Revenue

Other revenue for the three months ended March 31, 2019 decreased, compared to prior period, driven mainly by the divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.

Segment Profit (Loss) and Adjusted EBITDA

Decrease in Other segment profit and adjusted EBITDA for the three months ended March 31, 2019, compared to the prior period, were primarily due to divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.

Shared IT / Infrastructure & Corporate Costs

Improvements in Shared IT/Infrastructure and Corporate costs for the three months ended March 31, 2019, compared to the prior year period, were primarily driven by reduced costs as a result of reductions in real estate, information technology and labor costs from our strategic transformation initiatives as well as a reduction in negotiated IT contract costs.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table exclude divestitures.

	Three Months Ended March 31,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
New business TCV	$ 225	$ 367	$ (142)	(39)%
Renewals TCV	727	926	(199)	(21)%
Total Signings	$ 952	$ 1,293	$ (341)	(26)%
Recurring revenue signings[1]	$ 52	$ 81	$ (29)	(36)%
Non-recurring revenue signings[2]	$ 32	$ 53	$ (21)	(40)%

(1) Recurring revenue signings are for new business contracts longer than one year.

(2) Non-recurring revenue signings are for contracts shorter than one year.

Signings for the three months ended March 31, 2019 decreased, compared to the prior year, mainly due to a continued focus on strategic wins with acceptable margins, longer lead times and delays in signings.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rates for the three months ended March 31, 2019 and 2018 were 92% and 94%, respectively.

Critical Accounting Policies - Goodwill

As a result of the Transportation reporting unit experiencing unanticipated losses of certain customer contracts, lower than expected new customer contracts and higher costs of delivery (all subsequent to February 2019), the growth of this reporting unit decreased resulting in its fair value being below its carrying value by approximately $284 million. As a result, the Company recorded a pre-tax impairment charge of approximately $284 million.

In addition, based on our discounted cash flow and market multiple analysis, we evaluated if the goodwill of the other reporting units were also impaired. The weighted average cost of capital used for the discounted cash flow analysis was between 10% and 13%, depending on the reporting unit. Although, we did not have a goodwill impairment in the Financial Services & Healthcare (FS&H) reporting unit, the Consumer & Industrial (C&I) reporting unit or in the Government Services reporting unit, the fair values of each of these reporting units have declined. These reporting units may become impaired if they experience significant customer losses, do not achieve new customer signing projections, or incur higher costs than projected. The goodwill, carrying values and the headroom for FS&H, C&I, Europe and the Government reporting units are as follows:

	March 31, 2019		
(amounts in millions)	Goodwill	Carrying Value	Headroom
Reporting Unit:			
FS&H	$ 982	$ 1,023	26%
C&I	389	439	30%
Europe	67	90	70%
Government services	1,376	962	17%
Transportation	357	570	—%

In addition, because the fair value of the Transportation unit is equal to the book value of the reporting unit, the Transportation reporting unit goodwill could be further impaired if there are further customer contracts losses and lower expected new customer contracts.

The most significant assumption used in the goodwill analysis relates to the long-term organic growth rates. For example, the EBITDA long-term growth rate for FS&H and C&I reporting units was 3%, and for Government Services was 2.5%. The growth rates are consistent with industry long-term growth rates and contemplate that Conduent will grow, on a long-term basis, at least consistent with its peers. To the extent that Conduent loses a significant contract or multiple significant contracts, such that its growth rates are negatively impacted, its goodwill could be impaired. For example, if Conduent's EBITDA long-term growth rates were reduced to 1% for all reporting units (except for Europe and Transportation), the fair values of the reporting units would approximate their book values.

Capital Resources and Liquidity

As of March 31, 2019, and December 31, 2018, total cash and cash equivalents were $520 million and $756 million, respectively. The Company also has a $750 million revolving line of credit for its various cash needs, of which $12 million has been utilized for letters of credit.

In May 2019, the Company entered into the First Amendment to Settlement Agreement and Release with the State of Texas. Pursuant to the terms of the Amended Agreement, the amount paid to the State by the Conduent Defendants in full settlement of the State Action will be paid as follows: (1) $40 million on or before April 15, 2019 (which the Company has already paid); (2) $78 million on or before May 15, 2019 (the "First Payment"); and (3) $118 million on or before January 15, 2020 (the "Second Payment"). In order to secure the Second Payment, the Company will provide bank issued letters of credit to the State in the full amount of the Second Payment (the "LCs") which the State may present for payment to the issuing banks if the Conduent Defendants do not make the Second Payment.

As of March 31, 2019, there were $1.5 billion outstanding borrowings under our Credit Agreement of which $53 million was due within one year. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional debt information.

We expect our operating cash flows combined with cash on hand and financing activities to be sufficient to fund expected operating and anticipated capital and other funding requirements for at least the next twelve months.

Cash Flow Analysis

The following table summarizes our cash flows, as reported in our Condensed Consolidated Statement of Cash Flows in the accompanying Condensed Consolidated Financial Statements:

	Three Months Ended March 31,		
(in millions)	2019	2018	Better (Worse)
Net cash provided by (used in) operating activities	$ (49)	$ (38)	$ (11)
Net cash provided by (used in) investing activities	(168)	(39)	(129)
Net cash provided by (used in) financing activities	(22)	(27)	5

Historically the Company generates the majority of its cash from operating activities in the last two quarters of the year, as such the Company expects the second quarter cash flow from operations to also be negative.

Operating activities

Net cash used in operating activities of $(49) million was the result of $20 million in payments for the Texas litigation as well as negative working capital (which was partially offset by unpaid accounts payables for an IT supplier).

Investing activities

The increase in cash used in investing activities for the three months ended March 31, 2019, compared to the prior period, was primarily due to the acquisition of HSP and increased spending for capital expenditures related to modernizing our information technology infrastructure.

Financing activities

The decrease in cash used in financing activities for the three months ended March 31, 2019, compared to the prior period, was related to lower debt payments.

Market Risk Management

We are exposed to market risk from changes in foreign currency exchange rates which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We may utilize derivative financial instruments to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We also may hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify nor change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 9 – Financial Instruments in the Condensed Consolidated Financial Statements for additional discussion on our financial risk management.

ITEM 3 — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information set forth under the “Market Risk Management” section in Item 2 of this Quarterly Report on Form 10-Q is hereby incorporated by reference in answer to this Item.

ITEM 4 — CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company’s management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act"), as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company’s management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting

Beginning January1, 2019, we implemented the new lease accounting standard. Although the adoption of this standard did not have a material impact on our Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows for the three months ended March 31, 2019, we did implement changes to our internal controls related to the implementation of the new lease accounting standard. These changes included performing a comprehensive lease scoping analysis to identify, disaggregate and evaluate each of our lease categories and implementing a new information technology application to calculate ROU assets and lease liabilities values for our leases. There were no other changes in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1 — LEGAL PROCEEDINGS

The information set forth under Note 13 – Contingencies and Litigation in the Condensed Consolidated Financial Statements of this Quarterly Report on Form 10-Q is incorporated herein by reference in answer to this Item.

ITEM 1A — RISK FACTORS

Reference is made to the Risk Factors set forth in Part I, Item 1A of our 2018 Annual Report on Form 10-K. There have been no material changes to our risk factors as previously reported in our 2018 Annual Report on Form 10-K.

ITEM 2 — UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Sales of Unregistered Securities during the Quarter ended March 31, 2019

During the quarter ended March 31, 2019, the Company did not issue any securities in transactions that were not registered under the Securities Act of 1933, as amended.

(b) Issuer Purchases of Equity Securities during the Quarter ended March 31, 2019

None.

ITEM 6 — EXHIBITS

3.1	Restated Certificate of Incorporation of Registrant filed with the Department of the State of New York on December 31, 2016. Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016.
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016. Incorporated by reference to Exhibit 3.2 to Registrants Current Report on Form 8-K dated December 23, 2016.
10.7(b)	First Amendment to Settlement Agreement and Release between the State of Texas, the Texas Health and Human Services Commission, Xerox Corporation, Conduent Incorporated, Conduent Business Services, LLC and Conduent State Healthcare, LLC dated May 6, 2019. Incorporated by reference to the Registrant's Current Report on Form 8-K dated May 6, 2019. (See SEC file Number 001-37817).
31(a)	Certification of CEO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
31(b)	Certification of CFO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
32	Certification of CEO and CFO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101.INS	XBRL Instance Document - the instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
101.CAL	XBRL Taxonomy Extension Calculation Linkbase.
101.DEF	XBRL Taxonomy Extension Definition Linkbase.
101.LAB	XBRL Taxonomy Extension Label Linkbase.
101.PRE	XBRL Taxonomy Extension Presentation Linkbase.
101.SCH	XBRL Taxonomy Extension Schema Linkbase.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CEO CERTIFICATIONS

I, Ashok Vemuri, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and any exhibits to this Report may contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect management's current beliefs, assumptions and expectations and are subject to a number of factors that could cause actual results to differ materially. As with any projection or forecast, forward-looking statements are inherently susceptible to uncertainty and changes in circumstances. Our actual results may vary materially from those expressed or implied in our forward-looking statements.

Important factors and uncertainties that could cause our actual results to differ materially from those in our forward-looking statements include, but are not limited to: our ability to successfully manage the leadership transition and the potential for disruptions to our business from the transition; government appropriations and termination rights contained in our government contracts; our ability to renew commercial and government contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our information systems or security systems or any service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our continuing emphasis on and shift toward technology-led digital transactions; customer decision-making cycles and lead time for customer commitments; our ability to collect our receivables for unbilled services; a decline in revenues from or a loss or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to modernize our information technology infrastructure and consolidate data centers; our ability to comply with data security standards; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Quarterly Report on Form 10-Q, our quarterly report on Form 10-Q for the quarter ended March 31, 2019, as well as in our 2018 Annual Report on Form 10-K filed with the Securities and Exchange Commission and any current Report on Form 8-K. Any forward-looking statements made by us in this Quarterly Report on Form 10-Q speak only as of the date on which they are made. We are under no obligation to, and expressly disclaim any obligation to, update or alter our forward-looking statements, whether as a result of new information, subsequent events or otherwise.

CONDUENT INCORPORATED
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Basis of Presentation

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

The Company is a global enterprise and leading provider of business process services with expertise in transaction-intensive processing, analytics and automation. The Company serves as a trusted business partner in both the front office and the back office, enabling personalized, seamless interactions on a massive scale that improve end-user experience. The Company creates value for its commercial and government clients by applying its expertise, technology and innovation to help them drive customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. The Company's portfolio includes industry-focused service offerings in attractive growth markets such as healthcare and transportation, as well as multi-industry service offerings such as transaction processing, customer care and payment services.

Basis of Presentation

The unaudited interim Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). The year-end Condensed Consolidated Balance Sheet was derived from the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. Certain reclassifications have been made to prior year information to conform to current year presentation. Intercompany balances and transactions have been eliminated. In the opinion of management, all adjustments necessary for a fair statement of the financial position, results of operations and cash flows have been made. These adjustments consist of normal recurring items. The interim results of operations are not necessarily indicative of the results of the full year. These financial statements should be read in conjunction with the Company’s Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2018.

Note 2 – Recent Accounting Pronouncements

The Company's significant accounting policies are described in Note 1–Basis of Presentation and Summary of Significant Accounting Policies in the Company’s 2018 Annual Report on Form 10-K. Summarized below are the accounting pronouncements adopted subsequent to December 31, 2018 that were applicable and material to the Company.

New Accounting Standards Adopted

Leases: The Company adopted the new lease guidance as of January 1, 2019, using the cumulative-effect adjustment transition method, which applies the provisions of the standard at the effective date without adjusting the comparative periods presented. The Company has elected the package of practical expedients, which allows the Company not to reassess (1) whether any expired or existing contracts as of the adoption date are, or contain, leases, (2) lease classification for any expired or existing leases as of the adoption date and (3) initial direct costs for any existing leases as of the adoption date. The Company did not elect to apply the hindsight practical expedient. Additionally, the Company has elected not to include short-term leases, with a term of 12 months or less, on its Condensed Consolidated Balance Sheets.

The impact of adopting this new guidance resulted in establishing Operating lease right-of-use (ROU) assets of $387 million, an increase to Other current liabilities of $103 million, a decrease to Other long-term liabilities of $21 million, establishing Operating lease liabilities of $316 million and a net decrease to opening retained earnings (deficit) of $8 million as of January 1, 2019. The adoption did not have an impact on the Company's Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows.

Summary of Accounting Policies

Leases

The Company determines if an arrangement is a lease at the inception of the contract and whether that lease meets the classification criteria of a finance or operating lease. The Company has operating and finance leases for real estate and equipment. Operating leases are included in Operating lease ROU assets, Other current liabilities, and Operating lease liabilities in our Condensed Consolidated Balance Sheets. Finance leases are included in Land, buildings and equipment, net, Current portion of long-term debt, and Long-term debt in our Condensed Consolidated Balance Sheets.

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the commencement date based on the net present value of lease payments over the lease term using the Company's incremental borrowing rates or implicit rates. The Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option based on economic factors. The Company recognizes operating fixed lease expense and finance lease depreciation on a straight-line basis over the lease term. Variable lease expense is recognized in the period in which the obligation for those payments is incurred. The Company accounts for lease and non-lease components separately for its equipment leases, based on the estimated standalone price of each component, and combines lease and non-lease components for its real estate leases.

The components of lease costs were as follows:

(in millions)	Three Months Ended June 30, 2019	Six Months Ended June 30, 2019
Finance Lease Costs:		
Amortization of right of use assets	$ 3	$ 6
Interest on lease liabilities	1	1
Total Finance Lease Costs	$ 4	$ 7
Operating lease costs:		
Base rent	$ 29	$ 60
Short-term lease costs	4	7
Variable lease costs[(1)]	8	15
Sublease income	(1)	(2)
Total Operating Lease Costs	$ 40	$ 80

_____

(1) Primarily related to taxes, insurance and common area and other maintenance costs for real estate leases.

Supplemental cash flow information related to leases was as follows:

(in millions)	Six Months Ended June 30, 2019
Cash paid for the amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	$ (65)
Operating cash flows from finance leases	(1)
Total Cash Flow from Operating Activities	$ (66)
Financing cash flow from finance leases	$ (6)
Supplemental non-cash information on right of use assets obtained in exchange for new lease obligations:	
Operating leases	$ 16

Supplemental balance sheet information related to leases was as follows:

(in millions)	June 30, 2019
Operating Leases:	
Operating lease right-of-use assets	$ 317
Other current liabilities	$ 106
Operating lease liabilities	264
Total Operating Lease Liabilities	$ 370
Finance Leases:	
Land, buildings and equipment, net	$ 18
Current portion of long-term debt	$ 8
Long-term debt	11
Total Finance Lease Liabilities	$ 19

The Company's leases generally do not provide an implicit rate, and therefore the Company uses its incremental borrowing rate as the discount rate when measuring operating lease liabilities. The incremental borrowing rate represents an estimate of the interest rate the Company would incur at lease commencement to borrow an amount equal to the lease payments on a collateralized basis over the term of a lease within a particular currency environment. The weighted average discount rates for operating and finance leases were 5.3% and 4.8%, respectively.

The weighted average remaining lease terms for operating and finance leases at June 30, 2019, were 5 years and 3 years, respectively.

The aggregate future lease payments for operating leases were as follows:

(in millions)	June 30, 2019 Operating Lease Payments
Maturity Of Lease Liabilities:	
2019 (remaining)	$ 66
2020	107
2021	77
2022	53
2023	35
Thereafter	86
Total undiscounted operating lease payments	424
Less imputed interest	54
Present value of operating lease liabilities	$ 370

Maturities of finance lease liabilities were as follows:

(in millions)	June 30, 2019 Finance Lease Payments
2019 (remaining)	$ 5
2020	6
2021	5
2022	3
2023	1
Thereafter	—
Total undiscounted finance lease payments	20
Less imputed interest	1
Present value of finance lease liabilities	$ 19

As of June 30, 2019, the Company had entered into an additional operating lease agreement for real estate of $14 million, which has not commenced and has not been recognized on the Company's Consolidated Balance Sheet. This operating lease is expected to commence in 2019 with a lease term of 10 years.

As previously disclosed in Note 5 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018, under the previous lease accounting standard, future minimum lease payments for operating leases having initial or remaining non-cancelable lease term in excess of one year were as follows:

(in millions)	December 31, 2018 Operating Lease Payments
Maturity Of Lease Liabilities:	
2019	$ 153
2020	113
2021	78
2022	53
2023	33
Thereafter	76
Total minimum operating lease payments	$ 506

New Accounting Standards To Be Adopted

Credit Losses: In June 2016, the FASB updated the accounting guidance related to measurement of credit losses on financial instruments, which requires financial assets measured at amortized cost to be presented at the net amount expected to be collected. This updated guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Company is currently evaluating the impact on its Consolidated Financial Statements.

Note 3 – Revenue, Contract Assets and Liabilities

Disaggregation of Revenue

During the second quarter, the Company changed how it presents the disaggregated revenue by major service line for Government Services and Healthcare and Payment Services to reflect how the businesses are managed. This change had no impact on disaggregated revenue by reportable segment or the timing of revenue recognition. All prior periods presented have been revised to reflect this change.

The following table provides information about disaggregated revenue by major service line, the timing of revenue recognition and a reconciliation of the disaggregated revenue by reportable segments. Refer to Note 4 – Segment Reporting for additional information on the Company's reportable segments.

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2019	2018	2019	2018

Education	—	2	1	9
Total Other	—	240	37	495
Total Consolidated Revenue	$ 1,112	$ 1,387	$ 2,270	$ 2,807
Timing of Revenue Recognition:				
Point in time	$ 34	$ 34	$ 73	$ 70
Over time	1,078	1,353	2,197	2,737
Total Revenue	$ 1,112	$ 1,387	$ 2,270	$ 2,807

Contract Balances

The Company receives payments from customers based upon contractual billing schedules. Accounts receivable are recorded when the right to consideration becomes unconditional. Contract assets are the Company's rights to consideration for services provided when the right is conditioned on something other than passage of time (for example, meeting a milestone for the right to bill under the cost-to-cost measure of progress). Contract assets are transferred to Accounts receivable, net when the rights to consideration become unconditional. Unearned income includes payments received in advance of performance under the contract, which are realized when the associated revenue is recognized under the contract.

The following table provides information about the balances of the Company's contract assets, unearned income and receivables from contracts with customers:

(in millions)	June 30, 2019	December 31, 2018
Contract Assets (Unearned Income)		
Current contract assets	$ 192	$ 177
Long-term contract assets[1]	15	7
Current unearned income	(92)	(112)
Long-term unearned income[2]	(26)	(32)
Net Contract Assets (Unearned Income)	$ 89	$ 40
Accounts receivable, net	$ 824	$ 782

(1) *Presented in Other long-term assets in the Condensed Consolidated Balance Sheets*

(2) *Presented in Other long-term liabilities in the Condensed Consolidated Balance Sheets*

Revenues of $28 million and $81 million were recognized during the three and six months ended June 30, 2019, respectively, related to the Company's unearned income at December 31, 2018. Revenues of $98 million and $181 million were recognized during the three and six months ended June 30, 2018, respectively, related to the Company's unearned income at January 1, 2018.

Transaction Price Allocated to the Remaining Performance Obligations

Estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied or partially satisfied at June 30, 2019, was approximately $2 billion. The Company expects to recognize approximately 65% of this revenue over the next 2 years and the remainder thereafter.

Note 4 – Segment Reporting

The Company's reportable segments correspond to how the Company organizes and manages the business and are aligned to the industries in which the Company's clients operate.

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three reportable segments: Commercial Industries, Government Services and Transportation.

Commercial Industries: Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end, business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

Government Services: Our Government Services segment provides government-centric business process services to U.S. federal, state and local and foreign governments for public assistance, program administration, transaction processing and payment services.

Transportation: Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Selected financial information for our reportable segments is as follows:

	Three Months Ended June 30,						
(in millions)	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total

Adjusted EBITDA	$ 114	$ 166	$ 237	$ 327

Note 5 – Assets/Liabilities Held for Sale

In February 2019, the Company completed the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC. During the first quarter of 2019, the Company recorded an additional loss, inclusive of transaction costs, of $12 million on the sale of this portfolio, reflecting certain changes in estimates that were made when recording the initial charge. The revenue generated from this business was $36 million for the three months ended March 31, 2019 and $439 million for the year ended December 31, 2018.

Note 6 – Business Acquisition

In January 2019, the Company completed the acquisition of Health Solutions Plus (HSP), a software provider of healthcare payer administration solutions, for a total base consideration of $90 million and a maximum contingent consideration payment of $8 million based on a cumulative achievement over two years. Revenues recorded for the three and six months ended June 30, 2019, were $5 million and $9 million, respectively. Pre-tax income for the three and six months ended June 30, 2019, were $3 million and $6 million, respectively.

The Company's purchase price allocation for the HSP acquisition is preliminary and subject to revision as additional information related to the fair value of assets and liabilities becomes available. The preliminary purchase price based upon the current determination of fair value at June 30, 2019 was as follows:

(in millions)	June 30, 2019
Fair Value of Consideration Transferred:	
Cash paid	$ 90
Recorded earn-out payable	7
Total Consideration	$ 97
Allocation of Purchase Price:	
Net tangible assets	$ 10
Costs Assigned to Intangible Assets	
Developed technology	20
Customer relationships	18
Trademarks and trade names	1
Goodwill	48
Total Intangible Assets	87
Total Assets	$ 97

The weighted average amortization periods are 7 years, 15 years and 1.5 years for Developed technology, Customer relationships and Trademarks and trade names, respectively. The acquired goodwill is associated with the Company's Commercial Industries segment. This acquired goodwill, while tax deductible, includes $7 million related to contingent consideration payable that is not tax deductible until it is earned and paid. The goodwill recognized is attributable primarily to expected synergies and the assembled workforce of HSP.

The Company has not presented separate results of operations or combined pro forma financial information of the Company and the acquired interests because the results of operations of the acquired business are considered immaterial.

Note 7 – Restructuring Programs and Related Costs

The Company engages in a series of restructuring programs related to downsizing its employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce its cost structure and improve productivity. The implementation of the Company's strategic transformation program and various productivity initiatives have reduced the Company's real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Also included in Restructuring and related costs are incremental, non-recurring costs related to the consolidation of the Company's data centers, which totaled $9 million and $18 million for the three and six months ended June 30, 2019, respectively. Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Costs associated with restructuring, including employee severance and lease termination costs, are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of the Company's restructuring program activity during the six months ended June 30, 2019 and 2018 was as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2018	$ 13	$ 36	$ 49
Restructuring provision	18	27	45
Adjustments to prior accruals	(2)	(3)	(5)
Total Net Current Period Charges	16	24	40
Payments and other charges against reserve and currency	(10)	(23)	(33)
Adoption of new lease standard	—	(22)	(22)
Asset impairment	—	(5)	(5)
Other	—	(1)	(1)
Accrued Balance at June 30, 2019	$ 19	$ 9	$ 28

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2017	$ 14	$ 30	$ 44
Restructuring provision	21	17	38
Adjustments to prior accruals	(2)	—	(2)
Total Net Current Period Charges	19	17	36
Payments and other charges against reserve and currency	(19)	(16)	(35)
Other	—	3	3
Accrued Balance at June 30, 2018	$ 14	$ 34	$ 48

In addition, the Company recorded professional support costs associated with the strategic transformation program in Restructuring and related costs of $2 million and $0 million for the three months ended June 30, 2019 and 2018, respectively, and $2 million and $1 million for the six months ended June 30, 2019 and 2018, respectively.

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions)	2019	2018	2019	2018
Commercial Industries	$ 9	$ 3	$ 11	$ 14
Government Services	1	—	1	—
Transportation	—	—	1	—
Other	—	2	1	3
Shared IT / Infrastructure & Corporate Costs	14	12	26	19
Total Net Restructuring Charges	$ 24	$ 17	$ 40	$ 36

Note 8 – Debt

Long-term debt was as follows:

(in millions)	June 30, 2019	December 31, 2018
Term loan A due 2022	$ 686	$ 705
Term loan B due 2023	829	833
Senior notes due 2024	34	34
Finance lease obligations	19	26
Principal debt balance	1,568	1,598
Debt issuance costs and unamortized discounts	(28)	(31)
Less: current maturities	(52)	(55)
Total Long-term Debt	$ 1,488	$ 1,512

Note 9 – Financial Instruments

The Company is a global company that is exposed to foreign currency exchange rate fluctuations in the normal course of its business. As a part of the Company's foreign exchange risk management strategy, the Company uses derivative instruments, primarily forward contracts, to hedge the funding of foreign entities which have a non-dollar functional currency, thereby reducing volatility of earnings or protecting fair values of assets and liabilities.

At June 30, 2019 and December 31, 2018, the Company had outstanding forward exchange contracts with gross notional values of approximately $175 million and $167 million, respectively. Approximately 70% of these contracts mature within three months, 12% in three to six months, 14% in six to twelve months and 4% in greater than twelve months. Most of these foreign currency derivative contracts are designated as cash flow hedges and did not have a material impact on the Company's balance sheet, income statement or cash flows for the periods presented.

Refer to Note 10 – Fair Value of Financial Assets and Liabilities for additional information regarding the fair value of the Company's foreign exchange forward contracts.

Note 10 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP established a hierarchy framework to classify the fair value base on the observability of significant inputs to the measurement. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities.

Unless noted herein, the Company's valuation methodologies for assets and liabilities measured at fair value are described in Note 10 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018.

Summary of Financial Assets and Liabilities Accounted for at Fair Value on a Recurring Basis

The following table represents assets and liabilities measured at fair value on a recurring basis. The basis for the measurement at fair value in all cases is Level 2.

(in millions)	June 30, 2019	December 31, 2018
Assets:		
Foreign exchange contract - forward	$ 4	$ 3
Total Assets	$ 4	$ 3
Liabilities:		
Foreign exchange contracts - forwards	$ —	$ 1
Total Liabilities	$ —	$ 1

Summary of Other Financial Assets and Liabilities

The estimated fair values of our other financial assets and liabilities were as follows:

	June 30, 2019		December 31, 2018	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Assets held for sale	$ —	$ —	15	$ 15
Liabilities:				
Long-term debt	$ 1,488	$ 1,467	$ 1,512	$ 1,463
Liabilities held for sale	$ —	$ —	$ 40	$ 40

The fair value amounts for Cash and cash equivalents, Restricted cash, Accounts receivable, net and Short-term debt approximate carrying amounts due to the short-term maturities of these instruments.

The fair value of the Assets held for sale and the Liabilities held for sale were measured based on the sales price less estimated transactions costs (Level 3). Refer to Note 5 – Assets/Liabilities Held for Sale to the Condensed Consolidated Financial Statements for additional information

The fair value of Long-term debt was estimated based on the current rates offered to the Company for debt of similar maturities (Level 2).

Note 11 – Employee Benefit Plans

The Company has post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals were transitioned to an enhanced defined contribution plan. In these plans, employees are allowed to contribute a portion of their salaries and bonuses to the plans. Historically, the Company matched a portion of employee contributions. However, beginning in 2019, the Company has suspended its match to the 401(k) plan for all U.S. salaried employees.

The Company recognized an expense related to its defined contribution plans of $2 million and $7 million for the three months ended June 30, 2019 and 2018, respectively, and $5 million and $16 million for the six months ended June 30, 2019 and 2018, respectively. As a result of suspending 401(k) match for U.S. employees as indicated above, there was a $3 million and $6 million reduction in expense for the three and six months ended June 30, 2019, respectively.

Note 12 – Accumulated Other Comprehensive Loss (AOCL)

Below are the balances and changes in AOCL[(1)]:

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2018	$ (426)	$ 2	$ (1)	$ (425)
Other comprehensive income (loss) before reclassifications	6	1	—	7
Amounts reclassified from accumulated other comprehensive loss	15	—	(1)	14
Net current period other comprehensive income (loss)	21	1	(1)	21
Balance at June 30, 2019	$ (405)	$ 3	$ (2)	$ (404)

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2017	$ (437)	$ 1	$ (58)	$ (494)
Other comprehensive income (loss) before reclassifications	(23)	(3)	3	(23)
Amounts reclassified from accumulated other comprehensive loss	5	—	—	5
Net current period other comprehensive income (loss)	(18)	(3)	3	(18)
Balance at June 30, 2018	$ (455)	$ (2)	$ (55)	$ (512)

(1) All amounts are net of tax. Tax effects were immaterial.

Note 13 – Contingencies and Litigation

As more fully discussed below, the Company is involved in a variety of claims, lawsuits, investigations and proceedings concerning: governmental entity contracting, servicing and procurement law; intellectual property law; employment law; commercial and contracts law; the Employee Retirement Income Security Act (ERISA); and other laws, regulations and matters. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company assesses its potential liability by analyzing its litigation and regulatory matters using available information. The Company develops its view on estimated losses in consultation with outside counsel handling its defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in the Company's determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts in excess of any accrual for such matter or matters, this could have a material adverse effect on the Company's results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. The Company believes it has recorded adequate provisions for any such matters as of June 30, 2019. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matters could be in excess of any amounts accrued and could be material to the Company's results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates when the Company undertakes an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the condensed consolidated financial position or liquidity. As of June 30, 2019, the Company had accrued its estimate of liability incurred under its indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Conduent State Healthcare, LLC (f/k/a Xerox State Healthcare, LLC, f/k/a ACS State Healthcare, LLC) and Conduent Incorporated: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleges that Conduent State Healthcare LLC (f/k/a Xerox State Healthcare, LLC and ACS State Healthcare) (“CSH”), Conduent Business Services LLC (“CBS”) and Conduent Incorporated (“CI”) (collectively, CSH, CBS and CI are referred to herein as the "Conduent Defendants") and Xerox Corporation (together with the Conduent Defendants, the “Defendants”) violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”) (the “State Action”). In February 2019 a settlement agreement and release was reached among the Defendants, the State and HHSC ("Texas Agreement"). Pursuant to the terms of the Texas Agreement, the Conduent Defendants will pay the State of Texas $236 million in full settlement of the claims asserted against the Defendants. This amount was payable in installments and all proceedings in the lawsuit were suspended and the State and the HHSC agreed to dismiss the lawsuit with prejudice and release the Defendants from all of the State’s claims after all settlement payments are made. In May 2019, the Defendants entered into the First Amendment to Settlement Agreement and Release with the State (the “Amended Agreement”). Pursuant to the terms of the Amended Agreement, the amount payable to the State by the Conduent Defendants in full settlement of the State Action is as follows: (1) $40 million on or before April 15, 2019; (2) $78 million on or before May 15, 2019 (together constitute the “First Payment”); (both of which the Company has already paid); and (3) $118 million on or before January 15, 2020 (the “Second Payment”). In order to secure the Second Payment, the Company provided bank issued letters of credit to the State in the full amount of the Second Payment (the “LCs”) which the State may present for payment to the issuing banks if the Company does not make the Second Payment. Pursuant to the Amended Agreement, on the 91st day following receipt of the First Payment and the LCs, the State will file a dismissal with prejudice dismissing the State Action and fully release and discharge the Defendants.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC ("Buck"), which was a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association ("StanCERA"). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck's valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court's ruling and remanded the case back to the trial court as to Buck only, and only with respect to Plaintiffs' claim of aiding and abetting StanCERA in breaching its fiduciary duty. This case has been stayed pending the outcome of parallel litigation the plaintiffs are pursuing against StanCERA. The parallel litigation was tried before the bench in June 2018, and on January 24, 2019, the court found in favor of StanCERA, holding that it had not breached its fiduciary duty to plaintiffs. On April 26, 2019, Plaintiffs in the parallel litigation filed an appeal. Nasrawi remains stayed until the parallel litigation is finally concluded. Absent the court finding that StanCERA breached its fiduciary duty, plaintiffs' claim against Buck for aiding and abetting said breach would not appear viable. Buck will continue to aggressively defend these lawsuits. In August 2018, Conduent sold Buck Consultants, LLC; however, the Company retained this liability after the sale. The Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC ("Conduent") filed a lawsuit against Cognizant Business Services Corporation ("Cognizant") in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the "Contract"). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant's failure to properly perform its obligations as subcontractor to Conduent under Conduent's contract with the New York Department of Health to provide Medicaid Management Information Systems. In the lawsuit, Conduent seeks damages in excess of $150 million. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and recorded in the same period certain charges associated with the termination. Cognizant asserted two counterclaims for breach of contract seeking recovery of damages in excess of $47 million, which includes amounts alleged not paid to Cognizant under the contract and an alleged $25 million for termination fees. Conduent has responded to Cognizant's counterclaims by denying the allegations. Cognizant is seeking to file a second amended counterclaim seeking an additional $42.8 million to satisfy the minimum revenue commitment attributable to the years 2017-2020 alleged to be due and owing by Conduent under the Contract, which Conduent will assert will not be due if Conduent prevails on its claims that it terminated the Contract for cause. Conduent will continue to vigorously defend itself against the counterclaims but the Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters

Since 2014, Xerox Education Services, Inc. (XES) has cooperated with several federal and state agencies regarding a variety of matters, including XES' self-disclosure to the U.S. Department of Education (the "Department") and the Consumer Financial Protection Bureau (CFPB) that a small percentage of third-party student loans under outsourcing arrangements for various financial institutions required adjustments. The Company has resolved the investigations the CFPB and several state agencies commenced and continues to work with the Department and the U.S. Department of Justice to resolve all outstanding issues, including a number of operational projects that XES discovered and disclosed since 2014. The Company cannot provide assurance that the CFPB, another regulator, a financial institution on behalf of which the Company serviced third-party student loans, or another party will not ultimately commence a legal action against XES in which fines, penalties or other liabilities are sought from XES. Nor is the Company able to predict the likely outcome of these matters, should any such matter be commenced, or reasonably provide an estimate or range of estimates of any loss in excess of current reserves. The Company could, in future periods, incur judgments or enter into settlements to resolve these potential matters for amounts in excess of current reserves and there could be a material adverse effect on the Company's results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Other Contingencies

Certain contracts, primarily in the Company's Government Services and Transportation segments, require the Company to provide a surety bond or a letter of credit as a guarantee of performance. As of June 30, 2019, the Company had $633 million of outstanding surety bonds used to secure its performance of contractual obligations with its clients and $232 million of outstanding letters of credit issued to secure the Company's performance of contractual obligations to its clients as well as other corporate obligations. In general, the Company would only be liable for the amount of these guarantees in the event of default in the Company's performance of its obligations under each contract. The Company believes it has sufficient capacity in the surety markets and liquidity from its cash flow and its various credit arrangements (including its Credit Facility) to allow it to respond to future requests for proposals that require such credit support.

Note 14 – Preferred Stock

Series A Preferred Stock

In December 2016, the Company issued 120,000 shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393,000 shares (reflecting an initial conversion price of approximately $22.25 per share of common stock), subject to customary anti-dilution adjustments.

Note 15 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

	Three Months Ended June 30,		Six Months Ended June 30,	
(in millions, except per share data in whole dollars and shares in thousands)	2019	2018	2019	2018
Net income (loss)	$ (1,029)	$ 11	$ (1,337)	$ (39)
Cash dividend paid - preferred stock	(3)	(3)	(5)	(5)
Adjusted Net Income (Loss) Available to Common Shareholders	$ (1,032)	$ 8	$ (1,342)	$ (44)
Weighted average common shares outstanding	208,496	205,296	208,207	205,184
Common shares issuable with respect to:				
Stock options	—	146	—	—
Restricted stock and performance units / shares	—	3,447	—	—
Adjusted Weighted Average Common Shares Outstanding	208,496	208,889	208,207	205,184
Net Income (Loss) per Share:				
Basic	$ (4.94)	$ 0.05	$ (6.44)	$ (0.21)
Diluted	$ (4.94)	$ 0.04	$ (6.44)	$ (0.21)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):				
Stock Options	109	—	109	295
Restricted stock and performance shares/units	6,228	201	6,228	6,329
Convertible preferred stock	5,393	5,393	5,393	5,393
Total Anti-Dilutive Securities	11,730	5,594	11,730	12,017

Note 16 – Supplementary Financial Information

The components of Other assets and liabilities were as follows:

(in millions)	June 30, 2019	December 31, 2018
Other Current Assets		
Prepaid expenses	$ 105	$ 87
Income taxes receivable	48	40
Value-added tax (VAT) receivable	27	22
Restricted cash	9	9
Other	126	76
Total Other Current Assets	$ 315	$ 234
Other Current Liabilities		
Accrued liabilities	$ 379	$ 307
Legal settlements	176	147
Current operating lease liabilities	106	—
Software accruals	10	23
Restructure reserves	16	36
Income tax payable	15	3
Other taxes payable	18	15
Other	27	36
Total Other Current Liabilities	$ 747	$ 567
Other Long-term Assets		
Internal use software, net	$ 142	$ 123
Deferred contract costs, net	81	100
Product software, net	18	18
Other	134	88
Total Other Long-term Assets	$ 375	$ 329
Other Long-term Liabilities		
Legal settlements	$ —	$ 144
Income tax liabilities	19	29
Unearned income	26	32
Restructuring reserves	12	13
Other	48	62
Total Other Long-term Liabilities	$ 105	$ 280

Note 17 – Goodwill

In the first quarter of 2019, the Transportation reporting unit experienced unanticipated losses of certain customer contracts, lower than expected new customer contracts and higher costs of delivery (all subsequent to February 2019), and as a result, the growth of this reporting unit decreased resulting in its fair value being below its carrying value by an estimated $284 million. Accordingly, the Company recorded a pre-tax impairment charge of $284 million for the three months ended March 31, 2019.

In the second quarter, there were further unanticipated losses of certain customer contracts, lower potential future volumes and lower than expected new customer contracts (all subsequent to May 9, 2019). This led to actual results being below budget and a further downward revision of the long-term forecast across all the Company's reporting units (Financial Services & Healthcare, Consumer & Industrial, Europe (together comprising Commercial Industries), Government Services, and Transportation). As a consequence of the business performance and the strategy pivot due to changes in management that occurred in the second quarter, the Company lowered its sales outlook, average margin expectation for the future years, and increased its weighted average cost of capital.

Based upon the information identified in the second quarter, the Company performed an interim goodwill impairment assessment for all its reporting units which resulted in a pre-tax impairment charge of $1.1 billion for the three months ended June 30, 2019. The cumulative impairment charge for the six months ended June 30, 2019 was $1.4 billion.

The following table presents the changes in the carrying amount of goodwill, by reportable segments:

(in millions)	Commercial Industries	Government Services	Transportation	Total
Balance at December 31, 2017	$ 1,399	$ 1,310	$ 657	$ 3,366
Foreign currency translation	(10)	—	(16)	(26)

Other[(1)]	(1)	—	—	(1)
Balance at June 30, 2019	$ 874	$ 1,150	$ 81	$ 2,105

(1) Represents true-up to 2018 and 2017 Assets held for sale, respectively.

ITEM 2 — MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated and its consolidated subsidiaries. MD&A is provided as a supplement to, and should be read in conjunction with, our Condensed Consolidated Financial Statements and the accompanying Notes.

Overview

We are a leading provider of digital business services with expertise in transaction-intensive processing, analytics and automation. Our portfolio covers both front office and back office operations; however, the majority of our revenue and differentiation derives from engagements where we serve on behalf of our clients to manage end-user interactions across a wide-range of domains. Examples include payments, collections, benefit administration and end-user engagement services. We create value for our clients through more efficient service delivery combined with a personalized and seamless experience for the end-user. We apply our expertise, technology and innovation to continually modernize our offerings for improved customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation, complemented by tightly aligned investments. Headquartered in Florham Park, New Jersey, we have a team of approximately 65,000 people as of June 30, 2019, servicing customers from service centers in 23 countries.

Financial Review of Operations

Income (Loss) From Continuing Operations	**$ (1,337)**	**$ (39)**	**$ (1,298)**	

Revenue

Revenue for the three and six months ended June 30, 2019 decreased, compared to the prior year periods, primarily due to the impact from divestitures completed in 2018 and 2019, strategic decisions by management as part of our portfolio rationalization, including exiting certain unprofitable contracts, pricing pressure, contract losses and currency fluctuations. Partially offsetting these declines were increases from the ramp of new business.

Cost of Services (excluding depreciation and amortization)

Cost of services for the three and six months ended June 30, 2019 decreased, compared to the prior year periods, mainly driven by reductions in real estate, information technology and labor costs from our strategic transformation initiatives, lost business, strategic contract actions taken by management as part of portfolio management, lower volumes and divestitures completed in 2018 and 2019.

Selling, General and Administrative (SG&A) (excluding depreciation and amortization)

Lower SG&A for the three and six months ended June 30, 2019, compared to the prior year periods, was reflective of the impact of our strategic transformation initiatives, primarily due to reductions in labor costs as well as the reduction in 401(k) costs, other variable compensation costs and negotiated IT contract costs.

Depreciation and Amortization

Depreciation and amortization for the three and six months ended June 30, 2019 decreased, compared to the prior year periods, primarily due to the divestitures in 2018.

Restructuring and Related Costs

Restructuring and related costs for the three months ended June 30, 2019 include $13 million of severance costs due to headcount reductions of approximately 800 employees worldwide, $9 million of costs related to data center migration, $2 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint and $2 million of strategic transformation costs.

Restructuring and related costs for the six months ended June 30, 2019 include $16 million of severance costs due to headcount reductions of approximately 1,100 employees worldwide, $18 million of costs related to data center migration, $6 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint, and $2 million of strategic transformation costs.

Restructuring and related costs for the three months ended June 30, 2018 include $5 million of severance costs due to headcount reductions of approximately 600 employees worldwide and $12 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint.

Restructuring and related costs for the six months ended June 30, 2018 include $19 million of severance costs due to headcount reductions of approximately 1,400 employees worldwide and $17 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint and $1 million of strategic transformation costs.

Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Refer to Note 7 – Restructuring Programs and Related Costs to the Condensed Consolidated Financial Statements for additional information regarding our restructuring programs.

Interest Expense

Interest expense represents interest on long-term debt and the amortization of debt issuance costs. Decreases in Interest expense for the three and six months ended June 30, 2019, compared to the prior year periods, were driven primarily by lower average debt balances resulting mostly from the tender offer in 2018 and repricing. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional information.

Goodwill Impairment

The goodwill impairment for the three and six months ended June 30, 2019 related to the write-down of the carrying values of the Financial Services & Healthcare (FS&H), Consumer & Industrial (C&I), Europe, Government Services and Transportation reporting units. Refer to Note 17 – Goodwill to the Condensed Consolidated Financial Statements and the MD&A—Critical Accounting Policies - Goodwill for additional information regarding these impairment charges.

(Gain) Loss on Divestitures and Transaction Costs

The six months ended June 30, 2019, consists of $5 million of changes in estimates related to losses on divestitures and $9 million of transaction and related costs, $4 million of which relates to costs to remediate Payment Card Industry Data Security Standards compliance issues related to the sale of select standalone customer care contracts to Skyview Capital LLC.

Litigation Costs (Recoveries), Net

Net litigation costs for the six months ended June 30, 2019, consist primarily of the expense related to the Texas litigation whereas the prior year period expenses were primarily due to the establishment of reserves for the Cognizant terminated contracts.

Refer to Note 13 – Contingencies and Litigation to the Condensed Consolidated Financial Statements for additional information.

Income Taxes

The effective tax rate for the three months ended June 30, 2019 was 8.0%, compared with 79.6% for the three months ended June 30, 2018. The June 30, 2019 rate was lower than the U.S. statutory rate of 21%, primarily due to the goodwill impairment charge being partially non-deductible for tax, the geographic mix of income and the inclusion of Global Intangible Low Tax Income (GILTI). The effective tax rate for the three months ended June 30, 2018 was higher than the statutory tax rate of 21%, primarily due to the impacts of the divestiture of the Commercial Vehicle Operation (CVO) business and the geographic mix of income, partially offset by U.S. foreign tax credits and related valuation allowance release.

Excluding the impact of the goodwill impairment, divestitures, amortization and restructuring, the normalized effective tax rate for the three months ended June 30, 2019 was 30.2%. The normalized effective tax rate of 11.1% for the three months ended June 30, 2018, was predominantly impacted by the exclusion of the Base Erosion Anti-Abuse Tax (BEAT), amortization, restructuring, divestiture related costs and the impact of the sale of the CVO business.

The effective tax rate for the six months ended June 30, 2019 was 8.2%. The effective tax rate for the six months ended June 30, 2018 was anomalous. The June 30, 2019 rate was lower than the U.S. statutory rate of 21%, primarily due to the goodwill impairment charge being partially non-deductible for tax and the geographic mix of income, partially offset by U.S. federal tax credits and tax benefits recognized on the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC. The June 30, 2018 anomalous rate was primarily due to goodwill allocated to the divested CVO business that is not deductible for U.S. tax purposes and the geographic mix of income, partially offset by U.S. foreign tax credits and related valuation allowance release.

Excluding the impact of the goodwill impairment, divestitures, the Texas litigation reserve, amortization and restructuring, the normalized effective tax rate for the six months ended June 30, 2019 was 32.6%. The normalized effective tax rate of 22.9% for the six months ended June 30, 2018, was predominantly impacted by the exclusion of BEAT, amortization, restructuring, divestiture related costs and the impact of the sale of the CVO business.

The Company believes it is reasonably possible that unrecognized tax benefits of approximately $13 million will reverse within 12 months due to an anticipated audit settlement.

Operations Review of Segment Revenue and Profit

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three segments:

- Commercial Industries,
- Government Services, and
- Transportation.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

We are modernizing a significant portion of our information technology infrastructure with new systems and processes and consolidating our data centers as part of our transformation initiatives. We expect that these changes will provide greater strategic and operational flexibility and efficiency and better control of our systems and processes. Based on our continuing review of our cybersecurity, we are making additional investments to enhance our cybersecurity protection. There is a risk, however, that our modernization efforts and data center consolidations could materially and adversely disrupt our operations. See Part I, Item 1A – Risk Factors of our 2018 Annual Report on Form 10-K for additional information.

Revenues by segment were:

(in millions)	Three Months Ended June 30,						
	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
2019				Divestitures	Other

Commercial Industries Segment

Revenue

Commercial Industries revenue for the three and six months ended June 30, 2019 decreased, compared to the prior year periods, primarily driven by contract losses, price pressure and strategic exits, partially offset by revenue from new contracts.

Segment Profit and Adjusted EBITDA

Decreases in the Commercial Industries segment profit and adjusted EBITDA margin for the three and six months ended June 30, 2019, compared to the prior year periods, were mainly driven by overall revenue declines, partially offset by reductions in real estate and labor costs from our strategic transformation initiatives.

Government Services Segment

Revenue

Government Services revenue for the three and six months ended June 30, 2019, decreased compared to the prior year periods, primarily driven by contract losses, volume pressure and pricing and scope changes associated with a large renewal. These declines were partially offset by ramp of new business.

Segment Profit and Adjusted EBITDA

Increase in the Government Services segment profit and adjusted EBITDA margin for the three months ended June 30, 2019, compared to the prior year period, was mainly driven by reductions in IT, real estate and labor costs from our strategic transformation initiatives and contract remediation, offset by revenue decrease.

Decrease in the Government Services segment profit and adjusted EBITDA margin for the six months ended June 30, 2019, compared to the prior year period, was mainly driven by lower revenue and higher IT and delivery costs.

Transportation Segment

Revenue

Transportation revenue for the three and six months ended June 30, 2019 increased, compared to the prior year periods, primarily driven by ramp of new business and volume increases.

Segment Profit and Adjusted EBITDA

Transportation segment profit and adjusted EBITDA margin for the three and six months ended June 30, 2019 increased, compared to the prior year periods, mainly driven by increased revenue and reduced IT platform spend as well as reductions in real estate and labor costs from our strategic transformation initiatives.

Other

Revenue

Other revenue for the three and six months ended June 30, 2019 decreased, compared to the prior year periods, driven mainly by the divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.

Segment Profit (Loss) and Adjusted EBITDA

Decrease in Other segment profit and adjusted EBITDA for the three and six months ended June 30, 2019, compared to the prior year periods, were primarily due to divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.

Shared IT / Infrastructure & Corporate Costs

Shared IT/Infrastructure and Corporate costs for the three months ended June 30, 2019 increased, compared to the prior year period. This was primarily driven by a centralization of certain IT costs that were previously allocated within the segments.

Shared IT/Infrastructure and Corporate costs for the six months ended June 30, 2019 decreased, compared to the prior year period. This was primarily driven by reduced costs in the first quarter as a result of reductions in real estate, IT and labor costs from our strategic transformation initiatives, as well as a reduction in negotiated IT contract costs.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table exclude divestitures.

	Three Months Ended June 30,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
New business TCV	$ 328	$ 346	$ (18)	(5)%
Renewals TCV	485	1,541	(1,056)	(69)%
Total Signings	$ 813	$ 1,887	$ (1,074)	(57)%
Recurring revenue signings[1]	$ 84	$ 79	$ 5	6 %
Non-recurring revenue signings[2]	$ 49	$ 61	$ (12)	(20)%

	Six Months Ended June 30,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
New business TCV	$ 553	$ 713	$ (160)	(22)%
Renewals TCV	1,212	2,467	(1,255)	(51)%
Total Signings	$ 1,765	$ 3,180	$ (1,415)	(44)%
Recurring revenue signings[1]	$ 136	$ 160	$ (24)	(15)%
Non-recurring revenue signings[2]	$ 81	$ 114	$ (33)	(29)%

(1) Recurring revenue signings are for new business contracts longer than one year.

(2) Non-recurring revenue signings are for contracts shorter than one year.

Signings for the three months ended June 30, 2019 decreased, compared to the prior year period, mainly due to a continued focus on strategic wins with acceptable margins, longer lead times and delays in signings.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rates for the three months ended June 30, 2019 and 2018 were 60% and 99%, respectively, and for the six months ended June 30, 2019 and 2018 were 78% and 97%, respectively. A large part of the reduction in the three and six months ended June 30, 2019 renewal rate, compared to prior quarter was due to a loss of our contract with California MMIS, one of our largest clients.

Critical Accounting Policies - Goodwill

In the second quarter, there were further unanticipated losses of certain customer contracts, lower potential future volumes and lower than expected new customer contracts (all subsequent to May 9, 2019). This led to actual results being below budget and a further downward revision of the long-term forecast across all the Company's reporting units (FS&H, C&I, Europe, Government Services, and Transportation). As a consequence of the business performance and the strategy pivot due to changes in management that occurred in the second quarter, we lowered our sales outlook, average margin expectation for the future years, and increased our weighted average cost of capital.

The table below summarizes key factors (by reporting unit) impacting our revised forecast within the second quarter goodwill assessment.

Key Factors	FS&H	C&I	Europe	Government Services	Transportation
Lower anticipated new business	X	X	X	X	X
Potential higher than anticipated contract losses	X		X	X	X
Potential volume pressures		X	X		X
Strategic pivot	X	X	X	X	X

Based upon the information identified in the second quarter, we performed an interim goodwill impairment assessment for all our reporting units which resulted in a pre-tax impairment charge of $1.1 billion for the three months ended June 30, 2019. The cumulative impairment charge for the six months ended June 30, 2019 was $1.4 billion.

Capital Resources and Liquidity

As of June 30, 2019, and December 31, 2018, total cash and cash equivalents were $276 million and $756 million, respectively. The Company also has a $750 million revolving line of credit for its various cash needs, of which $81 million has been utilized for letters of credit.

In May 2019, the Company entered into the First Amendment to Settlement Agreement and Release with the State of Texas. Pursuant to the terms of the Amended Agreement, the amount payable to the State by the Conduent Defendants in full settlement of the State Action is as follows: (1) $40 million on or before April 15, 2019; (2) $78 million on or before May 15, 2019 (together constitute the "First Payment"); (both of which the Company has already paid); and (3) $118 million on or before January 15, 2020 (the "Second Payment"). In order to secure the Second Payment, the Company provided bank issued letters of credit to the State in the full amount of the Second Payment (the "LCs") which the State may present for payment to the issuing banks if the Conduent Defendants do not make the Second Payment.

As of June 30, 2019, there were $1.5 billion outstanding borrowings under our Credit Agreement of which $52 million was due within one year. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional debt information.

We expect our operating cash flows combined with cash on hand and financing activities to be sufficient to fund expected operating and anticipated capital and other funding requirements for at least the next twelve months.

Cash Flow Analysis

The following table summarizes our cash flows, as reported in our Condensed Consolidated Statement of Cash Flows in the accompanying Condensed Consolidated Financial Statements:

	Six Months Ended June 30,		
(in millions)	2019	2018	Better (Worse)
Net cash provided by (used in) operating activities	$ (234)	$ 60	$ (294)
Net cash provided by (used in) investing activities	(209)	322	(531)
Net cash provided by (used in) financing activities	(39)	(40)	1

Historically the Company generates much of its cash from operating activities in the last two quarters of the year.

Operating activities

Net increase in cash used in operating activities of $294 million was the result of $131 million in payments for the Texas and other litigation, as well as negative working capital.

Investing activities

The increase in cash used in investing activities of $531 million for the six months ended June 30, 2019, compared to the prior year period, was primarily due to the absence of the proceeds from divestitures in 2018 and the acquisition of HSP and increased spending for capital expenditures related to modernizing our information technology infrastructure for both customer-facing and internal functions in 2019.

Financing activities

The decrease in cash used in financing activities for the six months ended June 30, 2019, compared to the prior year period, was related to lower debt payments.

Market Risk Management

We are exposed to market risk from changes in foreign currency exchange rates which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We may utilize derivative financial instruments to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We also may hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify nor change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 9 – Financial Instruments in the Condensed Consolidated Financial Statements for additional discussion on our financial risk management.

ITEM 3 — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information set forth under the “Market Risk Management” section in Item 2 of this Quarterly Report on Form 10-Q is hereby incorporated by reference in answer to this Item.

ITEM 4 — CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company's management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act"), as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company's management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting

Beginning January 1, 2019, we implemented the new lease accounting standard. Although the adoption of this standard did not have a material impact on our Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2019, we did implement changes to our internal controls related to the implementation of the new lease accounting standard. These changes included performing a comprehensive lease scoping analysis to identify, disaggregate and evaluate each of our lease categories and implementing a new information technology application to calculate ROU assets and lease liabilities values for our leases. There were no other changes in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1 — LEGAL PROCEEDINGS

The information set forth under Note 13 – Contingencies and Litigation in the Condensed Consolidated Financial Statements of this Quarterly Report on Form 10-Q is incorporated herein by reference in answer to this Item.

ITEM 1A — RISK FACTORS

Reference is made to the Risk Factors set forth in Part I, Item 1A of our 2018 Annual Report on Form 10-K. There have been no material changes to our risk factors as previously reported in our 2018 Annual Report on Form 10-K.

ITEM 2 — UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Sales of Unregistered Securities during the Quarter ended June 30, 2019

During the quarter ended June 30, 2019, the Company did not issue any securities in transactions that were not registered under the Securities Act of 1933, as amended.

(b) Issuer Purchases of Equity Securities during the Quarter ended June 30, 2019

None.

ITEM 6 — EXHIBITS

3.1	Restated Certificate of Incorporation of Registrant filed with the Department of the State of New York on December 31, 2016. Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016.
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016. Incorporated by reference to Exhibit 3.2 to Registrants Current Report on Form 8-K dated December 23, 2016.
10.6(h)	Letter Agreement dated May 21, 2019 between Conduent Incorporated and Clifford Skelton regarding compensation arrangements. Incorporated by reference to Exhibit 10.6(h) to the Registrant's Current Report on Form 8-K dated May 28, 2019. (See SEC File Number 001-37817).
10.6(i)	Separation Letter Agreement dated June 4, 2019 between Conduent Incorporated and Ashok Vemuri. Incorporated by reference to Exhibit 10.1 to the Registrant's Current Report on Form 8-K dated June 4, 2019. (See SEC File Number 001-37817).
10.6(j)	Letter Agreement dated August 6, 2019 between Registrant and Clifford Skelton regarding compensation arrangements. Incorporated by reference to Exhibit 10.6(j) to the Registrant's Current Report on Form 8-K dated August 6, 2019. (See SEC File Number 001-37817).
31(a)	Certification of CEO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
31(b)	Certification of CFO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
32	Certification of CEO and CFO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101.INS	XBRL Instance Document - the instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
101.CAL	XBRL Taxonomy Extension Calculation Linkbase.

CEO CERTIFICATIONS

I, Clifford Skelton, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Brian J. Webb-Walsh
Principal Financial Officer

CERTIFICATION OF CEO AND CFO PURSUANT TO 18 U.S.C. § 1350, AS ADOPTED PURSUANT TO § 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Form 10-Q of Conduent Incorporated, a New York corporation (the "Company"), for the quarter ended June 30, 2019, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Clifford Skelton, Chief Executive Officer of the Company, and Brian J. Webb-Walsh, Chief Financial Officer of the Company, each hereby certifies, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, to the best of his/her knowledge, that:

(1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
(2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

/s/ CLIFFORD SKELTON

Clifford Skelton
Chief Executive Officer

August 8, 2019

/s/ BRIAN J. WEBB-WALSH

Brian J. Webb-Walsh
Chief Financial Officer

August 8, 2019

This certification accompanies this Report pursuant to § 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by the Sarbanes-Oxley Act of 2002, be deemed filed by the Company for purposes of § 18 of the Securities Exchange Act of 1934, as amended.

A signed original of this written statement required by § 906 has been provided to Conduent Incorporated and will be retained by Conduent Incorporated and furnished to the Securities and Exchange Commission or its staff upon request.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q and any exhibits to this Report may contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. The words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. These statements reflect management's current beliefs, assumptions and expectations and are subject to a number of factors that could cause actual results to differ materially. As with any projection or forecast, forward-looking statements are inherently susceptible to uncertainty and changes in circumstances. Our actual results may vary materially from those expressed or implied in our forward-looking statements.

Important factors and uncertainties that could cause our actual results to differ materially from those in our forward-looking statements include, but are not limited to: our ability to successfully manage the leadership transition and the potential for disruptions to our business from the transition and strategic and operational review; government appropriations and termination rights contained in our government contracts; our ability to renew commercial and government contracts, including contracts awarded through competitive bidding processes; our ability to recover capital and other investments in connection with our contracts; our ability to attract and retain necessary technical personnel and qualified subcontractors; our ability to deliver on our contractual obligations properly and on time; competitive pressures; our significant indebtedness; changes in interest in outsourced business process services; our ability to obtain adequate pricing for our services and to improve our cost structure; claims of infringement of third-party intellectual property rights; the failure to comply with laws relating to individually identifiable information and personal health information and laws relating to processing certain financial transactions, including payment card transactions and debit or credit card transactions; breaches of our information systems or security systems or any service interruptions; our ability to estimate the scope of work or the costs of performance in our contracts; our continuing emphasis on and shift toward technology-led digital transactions; customer decision-making cycles and lead time for customer commitments; our ability to collect our receivables, including those for unbilled services; a decline in revenues from, or a loss of, or a reduction in business from or failure of significant clients; fluctuations in our non-recurring revenue; our failure to maintain a satisfactory credit rating; our ability to attract and retain key employees; increases in the cost of telephone and data services or significant interruptions in such services; our failure to develop new service offerings; our ability to modernize our information technology infrastructure and consolidate data centers; our ability to comply with data security standards; our ability to receive dividends or other payments from our subsidiaries; changes in tax and other laws and regulations; changes in government regulation and economic, strategic, political and social conditions; changes in U.S. GAAP or other applicable accounting policies; and other factors that are set forth in the “Risk Factors” section, the “Legal Proceedings” section, the “Management's Discussion and Analysis of Financial Condition and Results of Operations” section and other sections of this Quarterly Report on Form 10-Q, our quarterly reports on Form 10-Q for the quarters ended March 31, 2019 and June 30, 2019, as well as in our 2018 Annual Report on Form 10-K filed with the Securities and Exchange Commission and any Current Report on Form 8-K. Any forward-looking statements made by us in this Quarterly Report on Form 10-Q speak only as of the date on which they are made. We are under no obligation to, and expressly disclaim any obligation to, update or alter our forward-looking statements, whether as a result of new information, subsequent events or otherwise.

CONDUENT INCORPORATED
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – Basis of Presentation

References herein to “we,” “us,” “our,” the “Company” and “Conduent” refer to Conduent Incorporated and its consolidated subsidiaries unless the context suggests otherwise.

Description of Business

Conduent is a global enterprise and leading provider of mission-critical services and solutions on behalf of businesses and governments – creating exceptional outcomes for its clients and the millions of people who count on them. Through people, process expertise in transaction-intensive processing, and technology such as analytics and automation, Conduent solutions and services create value by improving efficiencies, reducing costs and enabling revenue growth. A majority of Fortune 100 companies and over 500 government entities depend on Conduent every day to manage their business processes and essential interactions with their end users. The Company's portfolio includes industry-focused solutions in attractive growth markets such as healthcare and transportation, as well as solutions that serve multiple industries such as transaction processing, customer care, human resource solutions and payment services.

Basis of Presentation

The unaudited interim Condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) on a basis consistent with reporting interim financial information in accordance with instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). The year-end Condensed Consolidated Balance Sheet was derived from the audited Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. Certain reclassifications have been made to prior year information to conform to current year presentation. Intercompany balances and transactions have been eliminated. In the opinion of management, all adjustments necessary for a fair statement of the financial position, results of operations and cash flows have been made. These adjustments consist of normal recurring items. The interim results of operations are not necessarily indicative of the results of the full year. These financial statements should be read in conjunction with the Company’s Consolidated Financial Statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2018.

Note 2 – Recent Accounting Pronouncements

The Company's significant accounting policies are described in Note 1–Basis of Presentation and Summary of Significant Accounting Policies in the Company's Annual Report on Form 10-K for the year ended December 31, 2018. Summarized below are the accounting pronouncements adopted subsequent to December 31, 2018 that were applicable and material to the Company.

New Accounting Standards Adopted

Leases: The Company adopted the new lease guidance as of January 1, 2019, using the cumulative-effect adjustment transition method, which applies the provisions of the standard at the effective date without adjusting the comparative periods presented. The Company has elected the package of practical expedients, which allows the Company not to reassess (1) whether any expired or existing contracts as of the adoption date are, or contain, leases, (2) lease classification for any expired or existing leases as of the adoption date and (3) initial direct costs for any existing leases as of the adoption date. The Company did not elect to apply the hindsight practical expedient. Additionally, the Company has elected not to include short-term leases, with a term of 12 months or less, on its Condensed Consolidated Balance Sheets.

The impact of adopting this new guidance included the establishment of Operating lease right-of-use (ROU) assets of $387 million, an increase to Other current liabilities of $103 million, a decrease to Other long-term liabilities of $21 million, the establishment of Operating lease liabilities of $316 million and a net decrease to opening retained earnings (deficit) of $8 million, as of January 1, 2019. The adoption did not have an impact on the Company's Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows.

Summary of Accounting Policies

Leases

The Company determines if an arrangement is a lease at the inception of the contract and whether that lease meets the classification criteria of a finance or operating lease. The Company has operating and finance leases for real estate and equipment. Operating leases are included in Operating lease ROU assets, Other current liabilities, and Operating lease liabilities in our Condensed Consolidated Balance Sheets. Finance leases are included in Land, buildings and equipment, net, Current portion of long-term debt, and Long-term debt in our Condensed Consolidated Balance Sheets.

ROU assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. ROU assets and liabilities are recognized at the commencement date based on the net present value of lease payments over the lease term using the Company's incremental borrowing rates or implicit rates. The Company's lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option based on economic factors. The Company recognizes operating fixed lease expense and finance lease depreciation on a straight-line basis over the lease term. Variable lease expense is recognized in the period in which the obligation for those payments is incurred. The Company accounts for lease and non-lease components separately for its equipment leases, based on the estimated standalone price of each component, and combines lease and non-lease components for its real estate leases.

The components of lease costs were as follows:

(in millions)	Three Months Ended September 30, 2019	Nine Months Ended September 30, 2019
Finance Lease Costs:		
Amortization of right of use assets	$ 2	$ 8
Interest on lease liabilities	—	1
Total Finance Lease Costs	$ 2	$ 9
Operating lease costs:		
Base rent	$ 25	$ 85
Short-term lease costs	—	7
Variable lease costs[(1)]	8	23
Sublease income	(2)	(4)
Total Operating Lease Costs	$ 31	$ 111

(1) Primarily related to taxes, insurance and common area and other maintenance costs for real estate leases.

Supplemental cash flow information related to leases was as follows:

(in millions)	Nine Months Ended September 30, 2019
Cash paid for the amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	$ (93)
Operating cash flows from finance leases	(1)
Total Cash Flow from Operating Activities	$ (94)
Financing cash flow from finance leases	$ (9)
Supplemental non-cash information on right of use assets obtained in exchange for new lease obligations:	
Operating leases	$ 27

Supplemental balance sheet information related to leases was as follows:

(in millions)	September 30, 2019
Operating lease assets:	
Operating lease right-of-use assets	$ 290
Operating lease liabilities:	
Other current liabilities	$ 97
Operating lease liabilities	245
Total Operating Lease Liabilities	$ 342
Finance lease assets:	
Land, buildings and equipment, net	$ 16
Finance lease liabilities:	
Current portion of long-term debt	$ 7
Long-term debt	10
Total Finance Lease Liabilities	$ 17

The Company's leases generally do not provide an implicit rate, therefore the Company uses its incremental borrowing rate as the discount rate when measuring operating lease liabilities. The incremental borrowing rate represents an estimate of the interest rate the Company would incur at lease commencement to borrow an amount equal to the lease payments on a collateralized basis over the term of a lease within a particular currency environment. The weighted average discount rates for operating and finance leases were 5.5% and 4.8%, respectively.

The weighted average remaining lease terms for operating and finance leases at September 30, 2019, were 5 years and 3 years, respectively.

Maturities of operating lease liabilities were as follows:

(in millions)	September 30, 2019 Operating Lease Payments
2019 (remaining)	$ 30
2020	104
2021	77
2022	53
2023	35
Thereafter	94
Total undiscounted operating lease payments	393
Less imputed interest	51
Present value of operating lease liabilities	$ 342

Maturities of finance lease liabilities were as follows:

(in millions)	September 30, 2019 Finance Lease Payments
2019 (remaining)	$ 3
2020	6
2021	5
2022	3
2023	1
Thereafter	—
Total undiscounted finance lease payments	18
Less imputed interest	1
Present value of finance lease liabilities	$ 17

As of September 30, 2019, the Company had entered into additional operating lease agreements for real estate of $15 million, which have not commenced and have not been recognized on the Company's Consolidated Balance Sheet. These operating leases are expected to commence between the fourth quarter of 2019 and the first quarter of 2020 with lease terms of 4 to 10 years.

As previously disclosed in Note 5 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018, under the previous lease accounting standard, future minimum lease payments for operating leases having initial or remaining non-cancelable lease term in excess of one year were as follows:

(in millions)	December 31, 2018 Operating Lease Payments
2019	$ 153
2020	113
2021	78
2022	53
2023	33
Thereafter	76
Total minimum operating lease payments	$ 506

New Accounting Standards To Be Adopted

Credit Losses: In June 2016, the FASB updated the accounting guidance related to measurement of credit losses on financial instruments, which requires financial assets measured at amortized cost to be presented at the net amount expected to be collected. This updated guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Company is currently evaluating the impact on its Consolidated Financial Statements.

Note 3 – Revenue

Disaggregation of Revenue

During the second quarter of 2019, the Company changed how it presents the disaggregated revenue by major service line for Government Services and Healthcare and State and local to reflect how the businesses are managed. This change had no impact on disaggregated revenue by reportable segment or the timing of revenue recognition. All prior periods presented have been revised to reflect this change.

The following table provides information about disaggregated revenue by major service line, the timing of revenue recognition and a reconciliation of the disaggregated revenue by reportable segments. Refer to Note 4 – Segment Reporting for additional information on the Company's reportable segments.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2019	2018	2019	2018
Commercial Industries:				
Omni-channel communications	$ 194	$ 209	$ 597	$ 627

Point in time	$ 38	$ 33	$ 111	$ 103
Over time	1,060	1,271	3,257	4,008
Total Revenue	$ 1,098	$ 1,304	$ 3,368	$ 4,111

Contract Balances

The Company receives payments from customers based upon contractual billing schedules. Accounts receivable are recorded when the right to consideration becomes unconditional. Contract assets are the Company's rights to consideration for services provided when the right is conditioned on something other than passage of time (for example, meeting a milestone for the right to bill under the cost-to-cost measure of progress). Contract assets are transferred to Accounts receivable, net when the rights to consideration become unconditional. Unearned income includes payments received in advance of performance under the contract, which are realized when the associated revenue is recognized under the contract.

The following table provides information about the balances of the Company's contract assets, unearned income and receivables from contracts with customers:

(in millions)	September 30, 2019	December 31, 2018
Contract Assets (Unearned Income)		
Current contract assets	$ 165	$ 177
Long-term contract assets[(1)]	7	7
Current unearned income	(95)	(112)
Long-term unearned income[(2)]	(23)	(32)
Net Contract Assets (Unearned Income)	$ 54	$ 40
Accounts receivable, net	$ 840	$ 782

(1) Presented in Other long-term assets in the Condensed Consolidated Balance Sheets

(2) Presented in Other long-term liabilities in the Condensed Consolidated Balance Sheets

Revenues of $16 million and $97 million were recognized during the three and nine months ended September 30, 2019, respectively, related to the Company's unearned income at December 31, 2018. Revenues of $25 million and $128 million were recognized during the three and nine months ended September 30, 2018, respectively, related to the Company's unearned income at January 1, 2018.

Transaction Price Allocated to the Remaining Performance Obligations

Estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied or partially satisfied at September 30, 2019, was approximately $1.8 billion. The Company expects to recognize approximately 66% of this revenue over the next two years and the remainder thereafter.

Note 4 – Segment Reporting

The Company's reportable segments correspond to how the Company organizes and manages the business and are aligned to the industries in which the Company's clients operate.

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three reportable segments: Commercial Industries, Government Services and Transportation.

Commercial Industries: Our Commercial Industries segment provides business process services and customized solutions to clients in a variety of industries. Across the Commercial Industries segment, we deliver end-to-end, business-to-business and business-to-customer services that enable our clients to optimize their key processes. Our multi-industry competencies include omni-channel communications, human resource management and finance and accounting services.

Government Services: Our Government Services segment provides government-centric business process services to U.S. federal, state and local and foreign governments for public assistance, program administration, transaction processing and payment services.

Transportation: Our Transportation segment provides systems and support services to transportation departments and agencies globally. Offerings include support for electronic toll collection, public transit, parking and photo enforcement.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

Selected financial information for our reportable segments was as follows:

	Three Months Ended September 30,						
(in millions)	Commercial Industries	Government Services	Transportation	Other		Shared IT / Infrastructure & Corporate Costs	Total
2019				Divestitures	Other		
Revenue	$ 577	$ 320	$ 201	$ —	$ —	$ —	$ 1,098

Other adjustments	—	(1)	4	(2)
Adjusted EBITDA	$ 127	$ 157	$ 364	$ 484

Refer to Note 3 – Revenue for additional information on disaggregated revenues of the reportable segments.

Note 5 – Assets/Liabilities Held for Sale

In February 2019, the Company completed the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC. During the first quarter of 2019, the Company recorded an additional loss, inclusive of transaction costs, of $12 million on the sale of this portfolio, reflecting certain changes in estimates that were made when recording the initial charge. The revenue generated from this business was $36 million for the three months ended March 31, 2019 and $439 million for the year ended December 31, 2018.

Note 6 – Business Acquisition

In January 2019, the Company completed the acquisition of Health Solutions Plus (HSP), a software provider of healthcare payer administration solutions, for a total base consideration of $90 million and a maximum contingent consideration payment of $8 million based on a cumulative achievement over two years. Revenues recorded for the three and nine months ended September 30, 2019, were $6 million and $15 million, respectively. Pre-tax income for the three and nine months ended September 30, 2019, were $2 million and $4 million, respectively.

The Company's purchase price allocation for the HSP acquisition is preliminary and subject to revision as additional information related to the fair value of assets and liabilities becomes available. The preliminary purchase price based upon the current determination of fair value at September 30, 2019 was as follows:

(in millions)	September 30, 2019
Fair Value of Consideration Transferred:	
Cash paid	$ 90
Recorded earn-out payable	7
Total Consideration	$ 97
Allocation of Purchase Price:	
Net tangible assets	$ 10
Developed technology	20
Costs Assigned to Intangible Assets	
Customer relationships	18
Trademarks and trade names	1
Goodwill	48
Total Intangible Assets	67
Total Assets	$ 97

The weighted average amortization periods are 7 years, 15 years and 1.5 years for Developed technology, Customer relationships and Trademarks and trade names, respectively. The acquired goodwill is associated with the Company's Commercial Industries segment. This acquired goodwill, while tax deductible, includes $7 million related to contingent consideration payable that is not tax deductible until it is earned and paid. The goodwill recognized is attributable primarily to expected synergies and the assembled workforce of HSP. The Developed technology is classified as Product Software within Other long-term assets on the Condensed Consolidated Balance Sheets.

The Company has not presented separate results of operations or combined pro forma financial information of the Company and the acquired interests because the results of operations of the acquired business are considered immaterial.

Note 7 – Restructuring Programs and Related Costs

The Company engages in a series of restructuring programs related to downsizing its employee base, exiting certain activities, outsourcing certain internal functions and engaging in other actions designed to reduce its cost structure and improve productivity. The implementation of the Company's strategic transformation program and various productivity initiatives have reduced the Company's real estate footprint across all geographies and segments resulting in increased lease cancellation and other related costs. Also included in Restructuring and related costs are incremental, non-recurring costs related to the consolidation of the Company's data centers, which totaled $0 million and $18 million for the three and nine months ended September 30, 2019, respectively. Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Costs associated with restructuring, including employee severance and lease termination costs, are generally recognized when it has been determined that a liability has been incurred, which is generally upon communication to the affected employees or exit from the leased facility. In those geographies where we have either a formal severance plan or a history of consistently providing severance benefits representing a substantive plan, we recognize employee severance costs when they are both probable and reasonably estimable.

A summary of the Company's restructuring program activity during the nine months ended September 30, 2019 and 2018 was as follows:

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2018	$ 13	$ 36	$ 49
Restructuring provision	22	34	56
Adjustments to prior accruals	(5)	(3)	(8)
Total Net Current Period Charges	17	31	48
Payments and other charges against reserve and currency	(17)	(27)	(44)
Adoption of new lease standard	—	(22)	(22)
Asset impairment	—	(11)	(11)
Accrued Balance at September 30, 2019	$ 13	$ 7	$ 20

(in millions)	Severance and Related Costs	Lease Cancellation and Other Costs	Total
Accrued Balance at December 31, 2017	$ 14	$ 30	$ 44
Restructuring provision	34	33	67
Adjustments to prior accruals	(4)	5	1
Total Net Current Period Charges	30	38	68
Payments and other charges against reserve and currency	(28)	(27)	(55)
Other	—	3	3
Accrued Balance at September 30, 2018	$ 16	$ 44	$ 60

In addition, the Company recorded professional support costs associated with the strategic transformation program in Restructuring and related costs of $2 million and $0 million for the nine months ended September 30, 2019 and 2018, respectively.

The following table summarizes the total amount of costs incurred in connection with these restructuring programs by segment:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2019	2018	2019	2018
Commercial Industries	$ 3	$ 11	$ 14	$ 25
Government Services	—	1	1	1
Transportation	—	1	1	1
Other	(1)	2	—	5
Shared IT / Infrastructure & Corporate Costs	6	17	32	36
Total Net Restructuring Charges	$ 8	$ 32	$ 48	$ 68

Note 8 – Debt

Long-term debt was as follows:

(in millions)	September 30, 2019	December 31, 2018
Term loan A due 2022	$ 667	$ 705
Term loan B due 2023	827	833
Senior notes due 2024	34	34
Finance lease obligations	17	26
Principal debt balance	1,545	1,598
Debt issuance costs and unamortized discounts	(27)	(31)
Less: current maturities	(50)	(55)
Total Long-term Debt	$ 1,468	$ 1,512

Note 9 – Financial Instruments

The Company is a global company that is exposed to foreign currency exchange rate fluctuations in the normal course of its business. As a part of the Company's foreign exchange risk management strategy, the Company uses derivative instruments, primarily forward contracts, to hedge the funding of foreign entities which have a non-dollar functional currency, thereby reducing volatility of earnings or protecting fair values of assets and liabilities.
At September 30, 2019 and December 31, 2018, the Company had outstanding forward exchange contracts with gross notional values of $217 million and $167 million, respectively. Approximately 74% of these contracts mature within three months, 10% in three to six months, 12% in six to twelve months and 4% in greater than twelve months. Most of these foreign currency derivative contracts are designated as cash flow hedges and did not have a material impact on the Company's balance sheet, income statement or cash flows for the periods presented.

Refer to Note 10 – Fair Value of Financial Assets and Liabilities for additional information regarding the fair value of the Company's foreign exchange forward contracts.

Note 10 – Fair Value of Financial Assets and Liabilities

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP established a hierarchy framework to classify the fair value base on the observability of significant inputs to the measurement. The levels of the fair value hierarchy are as follows:

Level 1: Fair value is determined using an unadjusted quoted price in an active market for identical assets or liabilities.

Level 2: Fair value is estimated using inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.

Level 3: Fair value is estimated using unobservable inputs that are significant to the fair value of the assets or liabilities.

Unless noted herein, the Company's valuation methodologies for assets and liabilities measured at fair value are described in Note 10 to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2018.

Summary of Financial Assets and Liabilities Accounted for at Fair Value on a Recurring Basis

The following table represents assets and liabilities measured at fair value on a recurring basis. The basis for the measurement at fair value in all cases is Level 2.

(in millions)	September 30, 2019	December 31, 2018
Assets:		
Foreign exchange contract - forward	$ 3	$ 3
Total Assets	$ 3	$ 3
Liabilities:		
Foreign exchange contracts - forwards	$ —	$ 1
Total Liabilities	$ —	$ 1

Summary of Other Financial Assets and Liabilities

The estimated fair values of our other financial assets and liabilities were as follows:

	September 30, 2019		December 31, 2018	
(in millions)	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Assets held for sale	$ —	$ —	$ 15	$ 15
Liabilities:				
Long-term debt	$ 1,468	$ 1,434	$ 1,512	$ 1,463
Liabilities held for sale	$ —	$ —	$ 40	$ 40

The fair value amounts for Cash and cash equivalents, Restricted cash, Accounts receivable, net and Short-term debt approximate carrying amounts due to the short-term maturities of these instruments.

The fair value of the Assets held for sale and the Liabilities held for sale were measured based on the sales price less estimated transactions costs (Level 3).

The fair value of Long-term debt was estimated based on the current rates offered to the Company for debt of similar maturities (Level 2).

Note 11 – Employee Benefit Plans

The Company has post-retirement savings and investment plans in several countries, including the U.S., U.K. and Canada. In many instances, employees from those defined benefit pension plans that have been amended to freeze future service accruals were transitioned to an enhanced defined contribution plan. In these plans, employees are allowed to contribute a portion of their salaries and bonuses to the plans. Historically, the Company matched a portion of employee contributions. However, beginning in 2019, the Company has suspended its match to the 401(k) plan for all U.S. salaried employees.

The Company recognized an expense related to its defined contribution plans of $2 million and $7 million for the three months ended September 30, 2019 and 2018, respectively, and $7 million and $23 million for the nine months ended September 30, 2019 and 2018, respectively. As a result of suspending 401(k) match for U.S. employees as indicated above, there was a $3 million and a $9 million reduction in expense for the three and nine months ended September 30, 2019, respectively.

Note 12 – Accumulated Other Comprehensive Loss (AOCL)

Below are the balances and changes in AOCL[(1)]:

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2018	$ (426)	$ 2	$ (1)	$ (425)
Other comprehensive income (loss) before reclassifications	(9)	1	—	(8)
Amounts reclassified from accumulated other comprehensive loss	15	—	(1)	14
Net current period other comprehensive income (loss)	6	1	(1)	6
Balance at September 30, 2019	$ (420)	$ 3	$ (2)	$ (419)

(in millions)	Currency Translation Adjustments	Gains (Losses) on Cash Flow Hedges	Defined Benefit Pension Items	Total
Balance at December 31, 2017	$ (437)	$ 1	$ (58)	$ (494)
Reclassification of amounts impacted by Tax Reform	—	—	(5)	(5)
Other comprehensive income (loss) before reclassifications	(27)	(3)	64	34
Amounts reclassified from accumulated other comprehensive loss	41	—	—	41
Net current period other comprehensive income (loss)	14	(3)	64	75
Balance at September 30, 2018	$ (423)	$ (2)	$ 1	$ (424)

(1) All amounts are net of tax. Tax effects were immaterial.

Note 13 – Contingencies and Litigation

As more fully discussed below, the Company is involved in a variety of claims, lawsuits, investigations and proceedings concerning: governmental entity contracting, servicing and procurement law; intellectual property law; employment law; commercial and contracts law; the Employee Retirement Income Security Act (ERISA); and other laws, regulations and matters. The Company determines whether an estimated loss from a contingency should be accrued by assessing whether a loss is deemed probable and can be reasonably estimated. The Company assesses its potential liability by analyzing its litigation and regulatory matters using available information. The Company develops its view on estimated losses in consultation with outside counsel handling its defense in these matters, which involves an analysis of potential results, assuming a combination of litigation and settlement strategies. Should developments in any of these matters cause a change in the Company's determination as to an unfavorable outcome and result in the need to recognize a material accrual, or should any of these matters result in a final adverse judgment or be settled for significant amounts in excess of any accrual for such matter or matters, this could have a material adverse effect on the Company's results of operations, cash flows and financial position in the period or periods in which such change in determination, judgment or settlement occurs. The Company believes it has recorded adequate provisions for any such matters as of September 30, 2019. Litigation is inherently unpredictable, and it is not possible to predict the ultimate outcome of these matters and such outcome in any such matters could be in excess of any amounts accrued and could be material to the Company's results of operations, cash flows or financial position in any reporting period.

Additionally, guarantees, indemnifications and claims arise during the ordinary course of business from relationships with suppliers, customers and non-consolidated affiliates when the Company undertakes an obligation to guarantee the performance of others if specified triggering events occur. Nonperformance under a contract could trigger an obligation of the Company. These potential claims include actions based upon alleged exposures to products, real estate, intellectual property such as patents, environmental matters and other indemnifications. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of these claims. However, while the ultimate liabilities resulting from such claims may be significant to results of operations in the period recognized, management does not anticipate they will have a material adverse effect on the condensed consolidated financial position or liquidity. As of September 30, 2019, the Company had accrued its estimate of liability incurred under its indemnification arrangements and guarantees.

Litigation Against the Company

State of Texas v. Xerox Corporation, Conduent Business Services, LLC (f/k/a Xerox Business Services, LLC), Conduent State Healthcare, LLC (f/k/a Xerox State Healthcare, LLC, f/k/a ACS State Healthcare, LLC) and Conduent Incorporated: On May 9, 2014, the State of Texas, via the Texas Office of Attorney General (the “State”), filed a lawsuit in the 53rd Judicial District Court of Travis County, Texas. The lawsuit alleged that Conduent State Healthcare LLC (f/k/a Xerox State Healthcare, LLC and ACS State Healthcare) (“CSH”), Conduent Business Services LLC (“CBS”) and Conduent Incorporated (“CI”) (collectively, CSH, CBS and CI are referred to herein as the "Conduent Defendants") and Xerox Corporation (together with the Conduent Defendants, the “Defendants”) violated the Texas Medicaid Fraud Prevention Act in the administration of its contract with the Texas Department of Health and Human Services (“HHSC”) (the “State Action”). In February 2019 a settlement agreement and release was reached among the Defendants, the State and HHSC which was amended in May 2019 ("Texas Agreement"). Pursuant to the terms of the Texas Agreement, the Conduent Defendants were required to pay the State of Texas $236 million, of which $118 million was paid in 2019 with a balance of $118 million due in January 2020, which is fully reserved. The Company provided bank issued letters of credit to the State in the amount of $118 million to secure the payment due in January 2020 which will be released on the 91st day following the Company’s payment. The case has been dismissed with prejudice with a full release and discharge of the Defendants.

Dennis Nasrawi v. Buck Consultants et al.: On October 8, 2009, plaintiffs filed a lawsuit in the Superior Court of California, Stanislaus County, and on November 24, 2009, the case was removed to the U.S. Court for the Eastern District of California, Fresno Division. Plaintiffs allege actuarial negligence against Buck Consultants, LLC (“Buck”), which was a wholly-owned subsidiary of Conduent, for the use of faulty actuarial assumptions in connection with the 2007 actuarial valuation for the Stanislaus County Employees Retirement Association (“StanCERA”). Plaintiffs allege that the employer contribution rate adopted by StanCERA based on Buck’s valuation was insufficient to fund the benefits promised by the County. On July 13, 2012, the Court entered its ruling that the plaintiffs lacked standing to sue in a representative capacity on behalf of all plan participants. The Court also ruled that plaintiffs had adequately pleaded their claim that Buck allegedly aided and abetted StanCERA in breaching its fiduciary duty. Plaintiffs then filed their Fifth Amended Complaint and added StanCERA to the litigation. Buck and StanCERA filed demurrers to the amended complaint. On September 13, 2012, the Court sustained both demurrers with prejudice, completely dismissing the matter and barring plaintiffs from refiling their claims. Plaintiffs appealed, and ultimately the California Court of Appeals (Sixth District) reversed the trial court’s ruling and remanded the case back to the trial court as to Buck only, and only with respect to Plaintiffs' claim of aiding and abetting StanCERA in breaching its fiduciary duty. This case has been stayed pending the outcome of parallel litigation the plaintiffs are pursuing against StanCERA. The parallel litigation was tried before the bench in June 2018, and on January 24, 2019, the court found in favor of StanCERA, holding that it had not breached its fiduciary duty to plaintiffs. On April 26, 2019, Plaintiffs in the parallel litigation filed an appeal. Nasrawi remains stayed until the parallel litigation is finally concluded. Absent the court finding that StanCERA breached its fiduciary duty, plaintiffs’ claim against Buck for aiding and abetting said breach would not appear viable. Buck will continue to aggressively defend these lawsuits. In August 2018, Conduent sold Buck Consultants, LLC; however, the Company retained this liability after the sale. The Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome or loss, if any, in excess of currently recorded reserves.

Conduent Business Services, LLC v. Cognizant Business Services, LLC: On April 12, 2017, Conduent Business Services LLC (“Conduent”) filed a lawsuit against Cognizant Business Services Corporation (“Cognizant”) in the Supreme Court of New York County, New York. The lawsuit relates to the Amended and Restated Master Outsourcing Services Agreement effective as of October 24, 2012, and the service delivery contracts and work orders thereunder, between Conduent and Cognizant, as amended and supplemented (the “Contract”). The Contract contains certain minimum purchase obligations by Conduent through the date of expiration. The lawsuit alleges that Cognizant committed multiple breaches of the Contract, including Cognizant’s failure to properly perform its obligations as subcontractor to Conduent under Conduent’s contract with the New York Department of Health to provide Medicaid Management Information Systems. In the lawsuit, Conduent seeks damages in excess of $150 million. During the first quarter of 2018, Conduent provided notice to Cognizant that it was terminating the Contract for cause and recorded in the same period certain charges associated with the termination. Conduent also alleges that it terminated the Contract for cause, because, among other things, Cognizant violated the Foreign Corrupt Practices Act. Cognizant asserted two counterclaims for breach of contract seeking recovery of damages in excess of $47 million, which includes amounts alleged not paid to Cognizant under the contract and an alleged $25 million for termination fees. Conduent has responded to Cognizant’s counterclaims by denying the allegations. Cognizant filed a second amended counterclaim seeking an additional $43 million to satisfy the minimum revenue commitment attributable to the years 2017-2020, which increased Cognizant's damages claim to $90 million. Based on Conduent's breach of contract and termination for cause claims, Conduent does not believe that it has any obligations to Cognizant under the Contract to pay the minimum revenue commitment penalty. Conduent will continue to vigorously defend itself against the counterclaims but the Company is not able to determine or predict the ultimate outcome of this proceeding or reasonably provide an estimate or range of estimate of the possible outcome.

Other Matters

Since 2014, Xerox Education Services, Inc. ("XES") has cooperated with several federal and state agencies regarding a variety of matters, including XES' self-disclosure to the U.S. Department of Education (the "Department") and the Consumer Financial Protection Bureau ("CFPB") that some third-party student loans under outsourcing arrangements for various financial institutions required adjustments. With the exception of an inquiry the Illinois Attorney General's Office recently commenced, the Company has resolved the investigations the CFPB and several state agencies commenced and continues to work with the Department and the U.S. Department of Justice to resolve all outstanding issues, including a number of operational projects that XES discovered and disclosed since 2014. The Company cannot provide assurance that the CFPB, another regulator, a financial institution on behalf of which the Company serviced third-party student loans, or another party will not ultimately commence a legal action against XES in which fines, penalties or other liabilities are sought from XES. Nor is the Company able to predict the likely outcome of these matters, should any such matter be commenced, or reasonably provide an estimate or range of estimates of any loss in excess of current reserves. The Company could, in future periods, incur judgments or enter into settlements to resolve these potential matters for amounts in excess of current reserves and there could be a material adverse effect on the Company's results of operations, cash flows and financial position in the period in which such change in judgment or settlement occurs.

Other Contingencies

Certain contracts, primarily in the Company's Government Services and Transportation segments, require the Company to provide a surety bond or a letter of credit as a guarantee of performance. As of September 30, 2019, the Company had $564 million of outstanding surety bonds used to secure its performance of contractual obligations with its clients and $229 million of outstanding letters of credit issued to secure the Company's performance of contractual obligations to its clients as well as other corporate obligations. In general, the Company would only be liable for the amount of these guarantees in the event of default in the Company's performance of its obligations under each contract. The Company believes it has sufficient capacity in the surety markets and liquidity from its cash flow and its various credit arrangements (including its Credit Facility) to allow it to respond to future requests for proposals that require such credit support.

Note 14 – Preferred Stock

Series A Preferred Stock

In December 2016, the Company issued 120,000 shares of Series A convertible perpetual preferred stock with an aggregate liquidation preference of $120 million and an initial fair value of $142 million. The convertible preferred stock pays quarterly cash dividends at a rate of 8% per year ($9.6 million per year). Each share of convertible preferred stock is convertible at any time, at the option of the holder, into 44.9438 shares of common stock for a total of 5,393,000 shares (reflecting an initial conversion price of approximately $22.25 per share of common stock), subject to customary anti-dilution adjustments.

Note 15 – Earnings per Share

We did not declare any common stock dividends in the periods presented.

The following table sets forth the computation of basic and diluted earnings per share of common stock:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions, except per share data in whole dollars and shares in thousands)	2019	2018	2019	2018
Net income (loss)	$ (16)	$ (237)	$ (1,353)	$ (276)
Cash dividend paid - preferred stock	(2)	(2)	(7)	(7)
Adjusted Net Income (Loss) Available to Common Shareholders	$ (18)	$ (239)	$ (1,360)	$ (283)
Weighted average common shares outstanding	209,626	206,605	208,741	205,739
Common shares issuable with respect to:				
Stock options	—	—	—	—
Restricted stock and performance units / shares	—	—	—	—
Adjusted Weighted Average Common Shares Outstanding	209,626	206,605	208,741	205,739
Net Income (Loss) per Share:				
Basic	$ (0.09)	$ (1.16)	$ (6.52)	$ (1.38)
Diluted	$ (0.09)	$ (1.16)	$ (6.52)	$ (1.38)
The following securities were not included in the computation of diluted earnings per share as they were either contingently issuable shares or shares that if included would have been anti-dilutive (shares in thousands):				
Stock Options	—	193	—	193
Restricted stock and performance shares/units	4,473	5,097	4,473	5,097
Convertible preferred stock	5,393	5,393	5,393	5,393
Total Anti-Dilutive Securities	9,866	10,683	9,866	10,683

Note 16 – Supplementary Financial Information

The components of Other assets and liabilities were as follows:

(in millions)	September 30, 2019	December 31, 2018
Other Current Assets		
Prepaid expenses	$ 99	$ 87
Income taxes receivable	40	40
Value-added tax (VAT) receivable	21	22
Restricted cash	8	9
Other	145	76
Total Other Current Assets	$ 313	$ 234
Other Current Liabilities		
Accrued liabilities	$ 363	$ 330

Other taxes payable	17	15
Other	20	36
Total Other Current Liabilities	$ 693	$ 567
Other Long-term Assets		
Internal use software, net	$ 148	$ 123
Deferred contract costs, net	83	100
Product software, net	35	18
Other	104	88
Total Other Long-term Assets	$ 370	$ 329
Other Long-term Liabilities		
Litigation related accruals	$ —	$ 144
Income tax liabilities	14	29
Unearned income	23	32
Restructuring reserves	7	13
Other	43	62
Total Other Long-term Liabilities	$ 87	$ 280

Note 17 – Goodwill

In the first quarter of 2019, the Transportation reporting unit experienced unanticipated losses of certain customer contracts, lower than expected new customer contracts and higher costs of delivery (all subsequent to February 2019), and as a result, the growth of this reporting unit decreased resulting in its fair value being below its carrying value by an estimated $284 million. Accordingly, the Company recorded a pre-tax impairment charge of $284 million for the three months ended March 31, 2019.

In the second quarter of 2019, there were further unanticipated losses of certain customer contracts, lower potential future volumes and lower than expected new customer contracts (all subsequent to May 9, 2019). This led to actual results being below budget and a further downward revision of the long-term forecast across all the Company's reporting units (Financial Services & Healthcare, Consumer & Industrial, Europe (together comprising Commercial Industries), Government Services, and Transportation). As a consequence of the business performance and the strategy pivot due to changes in management that occurred in the second quarter of 2019, the Company lowered its sales outlook, average margin expectation for the future years, and increased its weighted average cost of capital.

Based upon the information identified in the second quarter of 2019, the Company performed an interim goodwill impairment assessment for all its reporting units which resulted in a pre-tax impairment charge of $1.1 billion for the three months ended June 30, 2019. The cumulative impairment charge for the nine months ended September 30, 2019 was $1.4 billion.

The following table presents the changes in the carrying amount of goodwill, by reportable segments:

(in millions)	Commercial Industries	Government Services	Transportation	Total
Balance at December 31, 2017	$ 1,399	$ 1,310	$ 657	$ 3,366
Foreign currency translation	(10)	—	(16)	(26)
Assets held-for-sale	(12)	—	—	(12)
Other[1]	14	66	—	80
Balance at December 31, 2018	$ 1,391	$ 1,376	$ 641	$ 3,408
Foreign currency translation	(5)	(8)	(1)	(14)
Acquisition	48	—	—	48
Impairment	(565)	(226)	(560)	(1,351)
Other[1]	(1)	—	—	(1)
Balance at September 30, 2019	$ 868	$ 1,142	$ 80	$ 2,090

(1) Represents true-up to 2018 and 2017 Assets held for sale, respectively.

There was no impairment identified in the third quarter of 2019 for any of our reporting units.

Note 18 – Related Party Transactions

During the third quarter of 2019, Carl C. Icahn and his affiliates (shareholders) increased their ownership interest in the Company. In the normal course of business, the Company provides services to, and purchases from, certain related parties with the same shareholders. The services provided to these entities included those related to human resources, end-user support and other services and solutions. The purchases from these entities included office equipment and related services and supplies. Revenue and purchases from these entities were included in Revenue and Costs of services / Selling, General and administrative, respectively, on the Company's Condensed Consolidated Statements of Income (Loss).

Transactions with related parties were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2019	2018	2019	2018
Revenue from related parties	$ 7	$ 10	$ 25	$ 32
Purchases from related parties	$ 6	$ 6	$ 18	$ 23

The Company's receivable and payable balances with related party entities were not material as of September 30, 2019 and December 31, 2018.

ITEM 2 — MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of Conduent Incorporated and its consolidated subsidiaries. MD&A is provided as a supplement to, and should be read in conjunction with, our Condensed Consolidated Financial Statements and the accompanying Notes.

Overview

We are a global enterprise and leading provider of mission-critical services and solutions on behalf of businesses and governments – creating exceptional outcomes for its clients and the millions of people who count on them. Through people, process expertise in transaction-intensive processing, and technology such as analytics and automation, Conduent solutions and services create value by improving efficiencies, reducing costs and enabling revenue growth. A majority of Fortune 100 companies and over 500 government entities depend on Conduent every day to manage their business processes and essential interactions with their end users. The Company's portfolio includes industry-focused solutions in attractive growth markets such as healthcare and transportation, as well as solutions that serve multiple industries such as transaction processing, customer care, human resource solutions and payment services.

We create value for our clients through efficient service delivery combined with a personalized and seamless experience for the end-user. We apply our expertise, technology and innovation to continually modernize our offerings for improved customer and constituent satisfaction and loyalty, increase process efficiency and respond rapidly to changing market dynamics. Our strategy is to drive portfolio focus, operational discipline, sales and delivery excellence and innovation, complemented by tightly aligned investments. Our differentiated services and solutions improve experiences for millions of people every day. Conduent's solutions deliver exceptional outcomes for its clients, including $16 billion in medical bill savings, $11 billion in child support payments processed more efficiently, up to 40% efficiency increase in HR operations, and up to 40% improvement in processing costs, while driving higher end-user satisfaction.

Headquartered in Florham Park, New Jersey, we have a team of approximately 68,000 people as of September 30, 2019, servicing customers from service centers in 23 countries.

Financial Review of Operations

Income tax expense (benefit)	(118)	24	(142)	
Net Income (Loss)	$ (1,353)	$ (276)	$ (1,077)	

Revenue

Revenue for the three and nine months ended September 30, 2019 decreased, compared to the prior year periods, primarily due to the impact from divestitures completed in 2018 and 2019, pricing pressure, contract losses and currency fluctuations. Partially offsetting these declines were increases from the ramp of new business.

Cost of Services (excluding depreciation and amortization)

Cost of services for the three and nine months ended September 30, 2019 decreased, compared to the prior year periods, mainly driven by divestitures completed in 2018 and 2019, reductions in real estate, information technology and labor costs from our strategic transformation initiatives, lost business, strategic contract actions taken by management as part of portfolio management and lower volumes.

Selling, General and Administrative (SG&A) (excluding depreciation and amortization)

Lower SG&A for the three and nine months ended September 30, 2019, compared to the prior year periods, was reflective of the impact of our strategic transformation initiatives, primarily due to reductions in labor costs, including reductions in 401(k) costs, other variable compensation costs, sub-contracting and negotiated IT contract costs.

Depreciation and Amortization

Depreciation and amortization for the three months ended September 30, 2019 increased, compared to the prior year period, primarily due to the HSP acquisition and increased capitalized software amortization for new projects placed in service.

Depreciation and amortization for the nine months ended September 30, 2019 decreased, compared to the prior year period, primarily due to the divestitures in 2018, partially offset by the HSP acquisition and increased capitalized software amortization for new projects placed in service. Refer to Note 6 – Business Acquisition to the Condensed Consolidated Financial Statements for additional information regarding the HSP acquisition.

Restructuring and Related Costs

Restructuring and related costs for the three months ended September 30, 2019 include $1 million of severance costs and $7 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint.

Restructuring and related costs for the nine months ended September 30, 2019 include $17 million of severance costs due to headcount reductions worldwide, $18 million of costs related to data center migration, $13 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint, and $2 million of strategic transformation costs.

Restructuring and related costs for the three months ended September 30, 2018 include $11 million of severance costs due to headcount reductions worldwide and $21 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint.

Restructuring and related costs for the nine months ended September 30, 2018 include $30 million of severance costs due to headcount reductions worldwide and $38 million of lease cancellation and other costs as part of our effort to consolidate our real estate footprint.

Management continues to evaluate the Company's business, and in the future, there may be additional provisions for new plan initiatives and/or changes in previously recorded estimates as payments are made, or actions are completed.

Refer to Note 7 – Restructuring Programs and Related Costs to the Condensed Consolidated Financial Statements for additional information regarding our restructuring programs.

Interest Expense

Interest expense represents interest on long-term debt and the amortization of debt issuance costs. Decreases in Interest expense for the three and nine months ended September 30, 2019, compared to the prior year periods, were driven primarily by lower average debt balances resulting mostly from the tender offer in 2018 and repricing. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional information.

Goodwill Impairment

The goodwill impairment for the nine months ended September 30, 2019 related to the write-down of the carrying values of the Financial Services & Healthcare (FS&H), Consumer & Industrial (C&I), Europe, Government Services and Transportation reporting units. Refer to Note 17 – Goodwill to the Condensed Consolidated Financial Statements and the MD&A – Critical Accounting Policies – Goodwill for additional information regarding these impairment charges.

(Gain) Loss on Divestitures and Transaction Costs

The three months ended September 30, 2019, was related to a loss on sale of assets and transaction costs. The nine months ended September 30, 2019, consists of $5 million of changes in estimates related to losses on divestitures, $2 million related to a loss on sale of assets and $12 million of transaction and related costs, $4 million of which relates to costs to remediate Payment Card Industry Data Security Standards compliance issues related to the sale of select standalone customer care contracts to Skyview Capital LLC.

Litigation Costs (Recoveries), Net

Net litigation costs for the nine months ended September 30, 2019, consist primarily of the recognition of the $13 million discount on the fair value of the Texas litigation liability established in 2018 due to the acceleration of the settlement in 2019. The prior year period expenses were primarily due to the increases in reserves for the Texas litigation and establishment of reserves for the Cognizant terminated contracts.

Refer to Note 13 – Contingencies and Litigation to the Condensed Consolidated Financial Statements for additional information.

Income Taxes

The effective tax rate for the three months ended September 30, 2019 was (14.3)%, compared to 6.0% for the three months ended September 30, 2018. The September 30, 2019 rate was lower than the U.S. statutory rate of 21%, primarily due to pre-tax loss and tax from the geographic mix of income and the inclusion of Global Intangible Low Tax Income (GILTI). The effective tax rate for the three months ended September 30, 2018 was lower than the U.S. statutory tax rate of 21%, primarily due to tax impacts from the divestitures.

Excluding the impact of the divestitures, amortization and restructuring, the normalized effective tax rate for the three months ended September 30, 2019 was 28.8%. The normalized effective tax rate of 25.6% for the three months ended September 30, 2018, was predominantly impacted by the exclusion of the divestitures, the Texas litigation reserve, the loss on extinguishment of debt, amortization of intangible assets, restructuring and divestiture related costs.

The effective tax rate for the nine months ended September 30, 2019 was 8.0%, compared to (9.5)% for the nine months ended September 30, 2018. The September 30, 2019 rate was lower than the U.S. statutory rate of 21%, primarily due to the goodwill impairment charge being partially non-deductible for tax and the geographic mix of income, partially offset by U.S. federal tax credits and tax benefits recognized on the sale of a portfolio of select standalone customer care contracts to Skyview Capital LLC. The September 30, 2018 rate was lower than the U.S. statutory tax rate of 21%, primarily due to pre-tax loss and tax from the divestitures, partially offset by U.S. foreign tax credits.

Excluding the impact of the goodwill impairment, divestitures, the Texas litigation reserve, amortization and restructuring, the normalized effective tax rate for the nine months ended September 30, 2019 was 31.3%. The normalized effective tax rate of 23.9% for the nine months ended September 30, 2018, was predominantly impacted by the exclusion of divestitures, the Texas litigation reserve, the loss on extinguishment of debt, amortization of intangible assets, restructuring and divestiture related costs.

The Company believes it is reasonably possible that unrecognized tax benefits of approximately $13 million will reverse within 12 months due to an anticipated audit settlement.

Operations Review of Segment Revenue and Profit

Our financial performance is based on Segment Profit / (Loss) and Segment Adjusted EBITDA for the following three segments:

- Commercial Industries,
- Government Services, and
- Transportation.

Other includes our divestitures and our Student Loan business, which the Company exited in the third quarter of 2018.

We are modernizing a significant portion of our information technology infrastructure with new systems and processes and consolidating our data centers as part of our transformation initiatives. We expect that these changes will provide greater strategic and operational flexibility and efficiency and better control of our systems and processes. Based on our continuing review of our cybersecurity, we are making additional investments to enhance our cybersecurity protection. There is a risk, however, that our modernization efforts and data center consolidations could materially and adversely disrupt our operations. See Part I, Item 1A – Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2018 for additional information.

Results of financial performance by segment were:

Commercial Industries Segment

Revenue

Commercial Industries revenue for the three months ended September 30, 2019 decreased, compared to the prior year period, primarily driven by contract losses and price pressure, partially offset by revenue from new contracts.

Commercial Industries revenue for the nine months ended September 30, 2019 decreased, compared to the prior year period, primarily driven by contract losses, strategic exits and volume and price pressure, partially offset by revenue from new contracts.

Segment Profit and Adjusted EBITDA

Decreases in the Commercial Industries segment profit and adjusted EBITDA margin for the three months ended September 30, 2019, compared to the prior year period, were mainly driven by overall revenue declines.

Decreases in the Commercial Industries segment profit and adjusted EBITDA margin for the nine months ended September 30, 2019, compared to the prior year period, were mainly driven by overall revenue declines, partially offset by reductions in IT, real estate and labor costs from our strategic transformation initiatives.

Government Services Segment

Revenue

Government Services revenue for the three and nine months ended September 30, 2019, decreased compared to the prior year periods, primarily driven by contract losses and pricing and scope changes associated with a large renewal. These declines were partially offset by ramp of new business.

Segment Profit and Adjusted EBITDA

Decrease in the Government Services segment profit and adjusted EBITDA margin for the three and nine months ended September 30, 2019, compared to the prior year periods, were mainly driven by lower revenue, partially offset by lower IT and delivery costs.

Transportation Segment

Revenue

Transportation revenue for the three and nine months ended September 30, 2019 increased, compared to the prior year periods, primarily driven by ramp of new business and volume increases, partially offset by client losses.

Segment Profit and Adjusted EBITDA

Transportation segment profit and adjusted EBITDA margin for the three and nine months ended September 30, 2019 increased, compared to the prior year periods, mainly driven by increased revenue and reduced IT platform spend as well as reductions in real estate and labor costs from our strategic transformation initiatives.

Other

Revenue

Other revenue for the three and nine months ended September 30, 2019 decreased, compared to the prior year periods, driven mainly by the divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.
Segment Profit (Loss) and Adjusted EBITDA

Decrease in Other segment profit and adjusted EBITDA for the three and nine months ended September 30, 2019, compared to the prior year periods, were primarily due to divestitures completed in 2018 and 2019 and the run-off of our Student Loan Services business.

Shared IT / Infrastructure & Corporate Costs

Shared IT/Infrastructure and Corporate costs for the three months ended September 30, 2019 increased, compared to the prior year period. This was primarily driven by an increase in shared IT, partially offset by reduced corporate overhead.

Shared IT/Infrastructure and Corporate costs for the nine months ended September 30, 2019 decreased, compared to the prior year period. This was primarily driven by corporate cost reductions.

Metrics

Signings

Signings are defined as estimated future revenues from contracts signed during the period, including renewals of existing contracts. Total Contract Value (TCV) is the estimated total contractual revenue related to signed contracts. The amounts in the following table exclude divestitures.

	Three Months Ended September 30,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
New business TCV	$ 234	$ 264	$ (30)	(11)%
Renewals TCV	512	474	38	8 %
Total Signings	$ 746	$ 738	$ 8	1 %
Recurring revenue signings[1]	$ 71	$ 65	$ 6	9 %
Non-recurring revenue signings[2]	$ 43	$ 63	$ (20)	(32)%

	Nine Months Ended September 30,		2019 vs. 2018	
($ in millions)	2019	2018	$ Change	% Change
New business TCV	$ 787	$ 977	$ (190)	(19)%
Renewals TCV	1,724	2,941	(1,217)	(41)%
Total Signings	$ 2,511	$ 3,918	$ (1,407)	(36)%
Recurring revenue signings[1]	$ 207	$ 225	$ (18)	(8)%
Non-recurring revenue signings[2]	$ 124	$ 177	$ (53)	(30)%

(1) Recurring revenue signings are current period revenue for new business contracts longer than one year.

(2) Non-recurring revenue signings are for contracts shorter than one year.

Signings for the three months ended September 30, 2019 increased, compared to the prior year period, mainly due increased renewals, partially offset by decreased new business due to sales headcount challenges and a continued focus on strategic wins with acceptable margins.

Signings for the nine months ended September 30, 2019 decreased, compared to the prior year period, mainly due to sales headcount challenges and a continued focus on strategic wins with acceptable margins, longer lead times and delays in signings.

Renewal Rate

Renewal rate is defined as the annual recurring revenue (ARR) on contracts that are renewed during the period as a percentage of ARR on all contracts for which a renewal decision was made during the period, excluding any contracts that were not renewed and where a strategic action to improve the risk or profitability had been initiated.

Excluding our strategic decision not to renew certain contracts, renewal rates for the three months ended September 30, 2019 and 2018 were 93% and 90%, respectively, and for the nine months ended September 30, 2019 and 2018 were 83% and 96%, respectively.

Critical Accounting Policies - Goodwill

In the second quarter of 2019, there were further unanticipated losses of certain customer contracts, lower potential future volumes and lower than expected new customer contracts (all subsequent to May 9, 2019). This led to actual results being below budget and a further downward revision of the long-term forecast across all the Company's reporting units (FS&H, C&I, Europe, Government Services, and Transportation). As a consequence of the business performance and the strategy pivot due to changes in management that occurred in the second quarter of 2019, we lowered our sales outlook, average margin expectation for the future years, and increased our weighted average cost of capital.

The table below summarizes key factors (by reporting unit) impacting our revised forecast within the second quarter of 2019 goodwill assessment.

Key Factors	FS&H	C&I	Europe	Government Services	Transportation
Lower anticipated new business	X	X	X	X	X
Potential higher than anticipated contract losses	X		X	X	X
Potential volume pressures		X	X		X
Strategic pivot	X	X	X	X	X

Based upon the information identified in the second quarter of 2019, we performed an interim goodwill impairment assessment for all our reporting units which resulted in a pre-tax impairment charge of $1.1 billion for the three months ended June 30, 2019. The cumulative impairment charge for the nine months ended September 30, 2019 was $1.4 billion. There was no impairment identified in the third quarter of 2019 for any of our reporting units.

Capital Resources and Liquidity

As of September 30, 2019, and December 31, 2018, total cash and cash equivalents were $228 million and $756 million, respectively. The Company also has a $750 million revolving line of credit for its various cash needs, of which $79 million has been utilized for letters of credit.

In February 2019 a settlement agreement and release was reached among the Company, the State of Texas ("State") and the Texas Department of Health and Human Services, which was amended in May 2019 ("Texas Agreement"). Pursuant to the terms of the Texas Agreement, the Company was required to pay the State $236 million, of which $118 million was paid in 2019 with a balance of $118 million due in January 2020, which is fully reserved. The Company provided bank issued letters of credit to the State in the amount of $118 million to secure the payment due in January 2020 which will be released on the 91st day following the Company's payment. The case has been dismissed with prejudice with a full release and discharge of the Company.

As of September 30, 2019, there were $1.5 billion outstanding borrowings under our Credit Agreement of which $50 million was due within one year. Refer to Note 8 – Debt in the Condensed Consolidated Financial Statements for additional debt information.

We expect our operating cash flows combined with cash on hand and financing activities to be sufficient to fund expected operating and anticipated capital and other funding requirements for at least the next twelve months.

Cash Flow Analysis

The following table summarizes our cash flows, as reported in our Condensed Consolidated Statement of Cash Flows in the accompanying Condensed Consolidated Financial Statements:

	Nine Months Ended September 30,		
(in millions)	2019	2018	Better (Worse)
Net cash provided by (used in) operating activities	$ (216)	$ 30	$ (246)
Net cash provided by (used in) investing activities	$ (253)	$ 534	(787)
Net cash provided by (used in) financing activities	$ (60)	$ (627)	567

Operating activities

Net increase in cash used in operating activities of $246 million was primarily related to $131 million in payments for the Texas and other litigation and higher accounts payable payments of $136 million due to timing.

Investing activities

The increase in cash used in investing activities of $787 million for the nine months ended September 30, 2019, compared to the prior year period, was primarily due to the absence of the proceeds from divestitures and assets sales in 2018, acquisition of HSP and increased spending for capital expenditures related to modernizing our information technology infrastructure for both customer-facing and internal functions in 2019.

Financing activities

The decrease in cash used in financing activities for the nine months ended September 30, 2019, compared to the prior year period, was related to lower debt payments.

Market Risk Management

We are exposed to market risk from changes in foreign currency exchange rates which could affect operating results, financial position and cash flows. We manage our exposure to these market risks through our regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. We may utilize derivative financial instruments to hedge economic exposures, as well as to reduce earnings and cash flow volatility resulting from shifts in market rates. We also may hedge the cost to fund material non-dollar entities by buying currencies periodically in advance of the funding date. This is accounted for using derivative accounting.

Recent market events have not caused us to materially modify nor change our financial risk management strategies with respect to our exposures to foreign currency risk. Refer to Note 9 – Financial Instruments in the Condensed Consolidated Financial Statements for additional discussion on our financial risk management.

ITEM 3 — QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information set forth under the “Market Risk Management” section in Item 2 of this Quarterly Report on Form 10-Q is hereby incorporated by reference in answer to this Item.

ITEM 4 — CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company's management evaluated, with the participation of our principal executive officer and principal financial officer, or persons performing similar functions, the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act"), as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information we are required to disclose in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms relating to Conduent Incorporated, including our consolidated subsidiaries, and was accumulated and communicated to the Company's management, including the principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting

Beginning January 1, 2019, we implemented the new lease accounting standard. Although the adoption of this standard did not have a material impact on our Condensed Consolidated Statements of Income (Loss) or Condensed Consolidated Statements of Cash Flows for the nine months ended September 30, 2019, we did implement changes to our internal controls related to the implementation of the new lease accounting standard. These changes included performing a comprehensive lease scoping analysis to identify, disaggregate and evaluate each of our lease categories and implementing a new information technology application to calculate ROU assets and lease liabilities values for our leases. There were no other changes in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1 — LEGAL PROCEEDINGS

The information set forth under Note 13 – Contingencies and Litigation in the Condensed Consolidated Financial Statements of this Quarterly Report on Form 10-Q is incorporated herein by reference in answer to this Item.

ITEM 1A — RISK FACTORS

Reference is made to the Risk Factors set forth in Part I, Item 1A of our 2018 Annual Report on Form 10-K. There have been no material changes to our risk factors as previously reported in our 2018 Annual Report on Form 10-K.

ITEM 2 — UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Sales of Unregistered Securities during the Quarter ended September 30, 2019

During the quarter ended September 30, 2019, the Company did not issue any securities in transactions that were not registered under the Securities Act of 1933, as amended.

(b) Issuer Purchases of Equity Securities during the Quarter ended September 30, 2019

None.

ITEM 6 — EXHIBITS

3.1	Restated Certificate of Incorporation of Registrant filed with the Department of the State of New York on December 31, 2016. Incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated December 23, 2016.
3.2	Amended and Restated By-Laws of Registrant as amended through December 31, 2016. Incorporated by reference to Exhibit 3.2 to Registrants Current Report on Form 8-K dated December 23, 2016.
31(a)	Certification of CEO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
31(b)	Certification of CFO pursuant to Rule 13a-14(a) or Rule 15d-14(a).
32	Certification of CEO and CFO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101.INS	XBRL Instance Document - the instance document does not appear in the Interactive Data File because its XBRL tags are embedded within the Inline XBRL document.
101.CAL	XBRL Taxonomy Extension Calculation Linkbase.
101.DEF	XBRL Taxonomy Extension Definition Linkbase.
101.LAB	XBRL Taxonomy Extension Label Linkbase.
101.PRE	XBRL Taxonomy Extension Presentation Linkbase.
101.SCH	XBRL Taxonomy Extension Schema Linkbase.
104	Cover Page Interactive Data File (formatted as Inline XBRL and contained in Exhibit 101).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CEO CERTIFICATIONS

I, Clifford Skelton, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Conduent Incorporated;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

This certification accompanies this Report pursuant to § 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by the Sarbanes-Oxley Act of 2002, be deemed filed by the Company for purposes of § 18 of the Securities Exchange Act of 1934, as amended.

A signed original of this written statement required by § 906 has been provided to Conduent Incorporated and will be retained by Conduent Incorporated and furnished to the Securities and Exchange Commission or its staff upon request.

4.8 RFP Section 4.2.5 Disclosure of Dark Money Spending Compliance [RFP Attachment C]

REQUIREMENT: RFP Section Attachment C

Offerors must complete the declaration form in eMACS to receive scoring.

By Executive Order 15-2018, entities seeking to do business with the State of Montana must disclose contributions or expenditures they have made in Montana elections. A copy of the Executive Order can be found at http://sfsd.mt.gov/Portals/24/SPB/Dark%20Money/EO-15-2018_Disclosure%20Requirement.pdf?ver=2019-04-25-124741-437.

All vendors must complete the declaration form in eMACS http://sfsd.mt.gov/Portals/24/SPB/Dark%20Money/EO_DECLARATION%20FORM_04102019.pdf?ver=2019-04-25-124741-453

Those vendors who mark "yes" on the declaration form, will be required to submit a disclosure form. http://sfsd.mt.gov/Portals/24/SPB/Dark%20Money/dark_Money_Disclosure_Template.xlsm

Conduent provides the following required and completed documents for disclosure of dark money:

- EO Declaration Form
- Dark Money Disclosure Excel Form

These documents are uploaded, along with the rest of this proposal, to the State's eMACS portal.

Declaration Form

Dark Money Spending Disclosure Requirements

Contracting Entity shall comply with the State of Montana Executive Order No. 15-2018 requiring the disclosure of dark money spending.

Definitions. As used in this declaration form, the following definitions apply:

Electioneering Communication: A paid communication that is publicly distributed by radio, television, cable, satellite, internet website, mobile device, newspaper, periodical, billboard, mail, or any other distribution of printed or electronic materials, that is made within 60 days of the initiation of voting in an election in Montana, that can be received by more than 100 recipients in the district in Montana voting on the candidate or ballot issue, and that:

a. refers to one or more clearly identified candidates in that election in Montana;

b. depicts the name, image, likeness, or voice of one or more clearly identified candidates in that election in Montana; or

c. refers to a political party, ballot issue, or other question submitted to the voters in that election in Montana.

The term does not mean:

a. a bona fide news story, commentary, blog, or editorial distributed through the facilities of any broadcasting station, newspaper, magazine, internet website, or other periodical publication of general circulation unless the facilities are owned or controlled by a candidate or political committee;

b. a communication by any membership organization or corporation to its members, stockholders, or employees;

c. a commercial communication that depicts a candidate's name, image, likeness, or voice only in the candidate's capacity as owner, operator, or employee of a business that existed prior to the candidacy; or

d. a communication that constitutes a candidate debate or forum or that solely promotes a candidate debate or forum and is made by or on behalf of the person sponsoring the debate or forum.

In this definition, the phrase "made within 60 days of the initiation of voting in an election" means:
(a) in the case of mail ballot elections, the initiation of voting occurs when official ballot packets are mailed to qualified electors pursuant to 13-19-206, MCA, or
(b) in other elections the initiation of voting occurs when absentee ballot packets are mailed to or otherwise delivered to qualified electors pursuant to 13-13-214, MCA.

Contracting Entity: A bidder, offeror, or contractor.

Covered Expenditure means:

a. A contribution, expenditure, or transfer made by the Contracting Entity, any of its parent entities, or any affiliates or subsidiaries within the entity's control, that:

   i. is to or on behalf of a candidate for office, a political party, or a party committee in Montana; or

   ii. is to another entity, regardless of the entity's tax status, that pays for an Electioneering Communication, or that makes contributions, transfers, or expenditures to another entity, regardless of its tax status, that pays for Electioneering Communication; and

b. The term excludes an expenditure made by the Contracting Entity, any of its parent entities, or any affiliates or subsidiaries within the entity's control made in the ordinary course of business conducted by the entity making the expenditure; investments; or expenditures or contributions where the entity making the expenditure or contribution and the recipient agree that it will not be used to contribute to candidates, parties, or Electioneering Communication.

Solicitation Requirements. The Contracting Entity shall disclose Covered Expenditures that the Contracting Entity has made within two years prior to submission of its bid or offer.

The disclosure of Covered Expenditures is only required by the bidder/offeror whenever the aggregate amount of Covered Expenditures made within a 24-month period by the bidder/offeror, any parent entities, or any affiliates or subsidiaries within the bidder/offeror's control exceeds $2,500.

If the bidder/offeror meets the disclosure requirements, the bidder/offeror shall submit this signed declaration form indicating "Yes" AND the required disclosure form with its bid/proposal.

If the bidder/offeror does NOT meet the disclosure requirements, the bidder/offeror shall submit this signed declaration form with its bid/proposal indicating "No".

Annual Contract Requirements. The Contracting Entity agrees that if awarded a contract and the contract term exceeds, or has the potential to exceed 24 months, it must annually review and complete a new declaration form and disclosure form, if necessary.

☐ No- I do NOT meet the disclosure requirements. I certify that I have read, understand these requirements and the Contracting Entity has not made Covered Expenditures in excess of $2,500 in the 24 months immediately preceding the submission of this form.

4.9 RFP Section 4.2.7 Equal Pay for Women Certificate of Compliance [RFP Attachment C]

REQUIREMENT: RFP Section Attachment C

Offerors must complete, sign and upload in Buyers Attachments in eMACS to receive the points.

Conduent State Healthcare, LLC is committed to promoting equal pay for Montana women working on this contract, as directed by the Department of Administration and Executive Order No. 12-2016. Per RFP requirement 4.2.7, we completed, signed, and uploaded the Equal Pay for Women Certificate of Compliance in Buyers Attachments in eMACS.

We submit our completed and signed certificate on the following page.

© 2020 Conduent State Healthcare, LLC

4.9 RFP Section 4.2.7 Equal Pay for Women Certificate of Compliance

Executive Order No. 12-2016 promoting equal pay for Montana women directs the Department of Administration to include incentives in the RFP process for contractors who engage in best practices to promote wage transparency. These best practices include the following:

(a) posting salary ranges in employment listings;
(b) certifying that the contractor will not ask about wage history in employee interviews; and
(c) certifying that the contractor will not retaliate or discriminate against employees who discuss or disclose their wages in the workplace.

(a) posting salary ranges in employment listings;
(b) certifying that the contractor will not ask about wage history in employee interviews; and
(c) certifying that the contractor will not retaliate or discriminate against employees who discuss or disclose their wages in the workplace.

☐ No, I do not agree.

4.10 RFP Section 4.2.6 Oral Presentation / Product Demonstration / Interview [RFP Section 4.2.6]

REQUIREMENT: RFP Section 4.2.6

Offerors selected to participate in product demonstrations/interviews will be notified by the State in advance. For planning purposes, the State will submit an agenda and specific guidance as deemed appropriate to promote productive and efficient product demonstrations. The Offeror is expected to demonstrate and answer questions on the products and/or services outlined in the Offeror's proposal to meet the requirements of this RFP. It is required that the Contractor have a demonstration environment that is comprised of the proposed solution components that are currently operating in a production environment. Product Demonstrations/Interviews will be scheduled for all Offerors who received an 80% or higher score on the technical proposal.

Offerors will be required to bring certain key personnel to the product demonstrations/interviews. At a minimum, the following key staff for core services are expected to be present. Offerors are welcome to bring additional staff at their discretion.

Core Claims:

1. Project Manager
2. Operations Manager
3. Claims Manager
4. Technical Manager
5. Contract Manager
6. Testing Lead
7. Integration Lead
8. Certification Lead

Offerors should also bring their key personnel for each Optional Service in which they bid. At a minimum, the following key staff for optional services are expected to be present. Offerors are welcome to bring additional staff at their discretion.

Option A – Financial

1. Financial Services Project Manager
2. Financial Services Lead Analyst

Option B – Call Center

1. Call Center Implementation Project Manager
2. Call Center Lead Analyst

Option C – Federal Reporting

1. Federal Reporting Implementation Project Manager
2. Federal Reporting Lead Analyst for TMSIS
3. Federal Reporting Lead Analyst for CMS-64, CMS-21, CMS-37
4. Federal Reporting Lead Analyst for all other state and Federal reporting

If Conduent is selected to participate in product demonstrations/interviews, we will comply with DPHHS' requirements and expectations related to the State's Oral Presentation/Product Demonstration/Interview process as cited in this Section.

5 RFP Sections 5 [RFP Attachment C]

REQUIREMENT: RFP Section Attachment C
The Offeror must certify their understanding for these sections.

Conduent has responded to all requirements as mandated by the RFP.

5.1 Section 5: Cost Proposal [RFP Section 5]

REQUIREMENT: RFP Section Section 5
All subsections of Section 5 require a response. The Offeror must indicate certification of understanding for the Section and the Offeror must restate the subsection number and the text immediately prior to the written response.
5.3 Payments

Conduent is a trusted partner providing a wide scope of services, scalable solutions, dedicated and knowledgeable industry experts at a cost that does not place an undue burden on your program.

Conduent recognizes that every program must be fiscally responsible with their program dollars and utilize a solution that offers functionality, security, and scalability at a cost that does not divert money from their program that could otherwise be used to service its members. In understanding the State budget and the requirements of this RFP, Conduent is offering a solution that provides the State with the functional and technical requirements to assure its members and stakeholders have a trusted solution for years to come, while providing a solution at a price that will not create a financial burden to your program.

We understand the need for a timely and risk-mitigated system delivery; therefore, our proposed work plan includes 5 months of parallel testing as part of our 28-month DDI, Integration, Implementation, and Certification timeline. Parallel testing is an extremely effective way to identify problematic issues before moving into a go-live state, thus reducing risk to the program and its stakeholders. Costs provided within our response also assume 92 months of Operations and Maintenance.

Conduent indicates certification of our understanding with the RFP Section 5, Cost Proposal, and we restate the subsection number and our text immediately prior to our written response.

© 2020 Conduent State Healthcare, LLC

Estimated Budget

DPHHS has established the following estimated budget amount for the Claims Processing and Management Services module. This estimate is based on the amounts approved in the DPHHS modularity I-APD but the estimated budget does not represent a budgeted amount for Option A, Option B or Option C Services or a maximum budget for Claims Processing and Management Services. Table 5.1 outlines the Claims Processing and Management Services module estimated budget:

Table 5.1 Estimated Claims Services Module Budget by Phase and Duration

Phase	Duration in Months	Total Amount
DDI, Integration, Implementation, and Certification	28 *	$20,275,225
Operations and Maintenance (Base Years)	44	$44,000,000
Operations and Maintenance (Optional Years)	48	$50,400,000
System Enhancement Hours (7,500 DDI Hours)		$937,500
System Enhancement Hours (4,000 *8 Operations years)		$4,000,000
Total Estimated Budget		$119,612,725

*The number listed in the Duration in Months column for DDI Integration, Implementation, and Certification represent the Department's estimates for the duration of DDI activities. These estimated durations should not influence the vendors proposed timeline.

Conduent understands that Table 5.1 Estimated Claims Services Module Budget by Phase and Duration within the RFP represents an estimated budget and the amount approved in the DPHHS modularity I-APD. This estimate does not represent a budgeted amount for Option A, Option B, or Option C Services, which we intend to offer in our response. We further understand that the estimated budget does not indicate a maximum budget for Claims Processing and Management Services. Conduent always makes a concerted effort to meet or come below a State's budget whenever possible. This information is helpful when developing solutions and pricing.

Price Schedules

In order to allow Offerors more flexibility in their pricing, the cost proposal was constructed using a multivariate approach:

A) Fee for Service Annual Spend per State: A five (5) tier scale using ten years of historical Fee for Service annual spending for every State. Attachment N offers a detailed table of the Fee for Service spending ranges of every Tier (See Table 5.2.1 below). When a State is ready to sign a participating addendum, they will identify their total Fee for Service dollars spent in the previously completed Federal Fiscal Year that is published on the CMS website. Once they have identified that number, they will go to the corresponding Federal Fiscal Year columns and find the row for the range that contains their total Fee for Service dollar spend. That row is the State's Claims Pricing Tier.

Table 5.2.1 Claims Processing and Management Services Fee for Service Spend Tiers (FY2019)

Claims Pricing Tiers			
Claims Pricing Tier	Lower Limit	Higher Limit	Range Spend
Tier 1	$ 0	$ 1,499,999,999	$ 1,499,999,999
Tier 2	$ 1,500,000,000	$ 3,499,999,999	$ 2,000,000,000
Tier 3	$ 3,500,000,000	$ 6,499,999,999	$ 3,000,000,000
Tier 4	$ 6,500,000,000	$ 13,999,999,999	$ 7,500,000,000
Tier 5	$ 14,000,000,000	+	infinite

Conduent understands that each of the five tiers represents the total fee-for-service spend range for a State program. We used the detailed information in Attachment N to determine each State's tier along with the associated cost impacts. We also compared that information to other States in the same tier as well as States in the same group to ensure that costs and pricing were appropriate and adjusted as needed.

© 2020 Conduent State Healthcare, LLC

B) Total Number of Members per State: a seven (7) group scale based on the number of active de-duplicated Members served by each State across healthcare programs (Fee-for-Service and Managed Care) was created within each one of the five Fee for Service tiers. To further expand the difference between how an Offeror will use the Tier/Group, please observe the table 5.2.2 below:

Table 5.2.2 Groups (Member Range)

Groups (Member Range)							
	0-249,999	250K – 399,999	400K – 899,999	900K – 1,349,000	1.35M – 1,799,999	1.8M – 3,999,999	4M +
Tier 1	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7
Tier 2	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7
Tier 3	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7
Tier 4	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7
Tier 5	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7

Conduent understands that the State will use a multivariate approach in order to provide more flexibility in our pricing. Table 5.2.2 Groups (Member Range) will be utilized upon participating addendum to identify a States Group, by matching a States number of active de-duplicated members served across State healthcare program (Fee-for-Service and Managed Care).

The combination of "Tier" based on the Fee for Service annual spend and "Group" number of Members being served by each State provides the Contractor additional flexibility to tailor the cost to the size and scale of the states in their cost proposal.

The Table 5.2.3 below presents the number of States that are in each Tier and Group combination based on 2018 figures.

Table **5.2.3 Count of States per Tier/Group**

Count of State/ Territory	Groups							
Tiers	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6	Group 7	Grand Total
Tier 1	6	5	1					12
Tier 2	2	3	3	2	2			12
Tier 3			3	5	3	2		13
Tier 4			2	2	2	4	1	11
Tier 5							3	3
Grand Total	8	8	9	9	7	6	4	51

Conduent understands the challenge of providing a pricing structure that can accurately assign rates based on the number of Medicaid members and total fee-for-service spend. Conduent identified where each State fell in the Tier/Group map above. We then conducted rigorous testing to ensure that base rates and variable rates for both DDI and O&M were appropriate for each State and each group/tier combination. This level of testing was completed for the Claims Processing and Management Services module, Option A, Option B, and Option C.

© 2020 Conduent State Healthcare, LLC

Attachment G – Pricing Schedules is comprised of five 5 workbooks, one for each Tier. Each workbook represents a Tier derived from the Total Fee for Services Spend per State. Offerors must complete all of the Price Schedules for each of the five Tier workbooks provided in Attachment G. Offerors shall propose a firm fixed price for each of the fields contained on the pricing schedules. These schedules serve as the representation of Offeror's price. Offeror should include additional information, if requested, to explain the Offeror's price. No cost information shall be included in the technical proposal. All schedules must be completed in full at the time of submittal. The Offeror's complete cost proposal shall be represented in Attachment G –Pricing Schedules and includes the costs for the items included in Attachment L - Technology Matrix.

Conduent carefully reviewed all relevant information provided from the State, including Amendment 5, and we confirm that we understand the cost schedules. We provide a high level summary of each of the schedules below:

- **Schedule A.** Represents the cost summary for the Claims Processing and Management Services module, including all Options.
- **Schedule B.** Represents the percentage of the total cost for Design, Development and Implementation. It does not include Operations costs.
- **Schedule C.** Represents the total cost of operations including four base years and five optional years. We further understand this will be completed as an attachment to a Participating Addendum using Schedule F-2 for Core Claims Services, Schedule G-2 for Option A Claims Services, Schedule H-2 for Option B Claims Services, and Schedule I-2 for Option C Claims Services.
- **Schedule D.** Represents the cost for enhancement pool hours for both the DDI and Operations phases of the proposal. We further understand this schedule will be completed as an attachment to a Participating Addendum using Schedule F, tabs F-3 and F-4 for Core Claims Services, and if applicable Schedule G, tabs G-3 and G-4, Schedule H, tabs H-3 and H-4, and Schedule I, tabs I-3 and I-4.
- **Schedule E.** Represents the hourly rates for resources in both the DDI and Operations phases. This schedule will be completed as an attachment to a Participating Addendum based on the duration and scope of work determined in the Participating Addendum. All hourly rates will be updated by the Consumer Price Index Urban (CPI-U) once the Participating State Tab is filled.
- **Schedule F.** Represents the Claims Processing and Management Services core scope of work costs by group/tier combination for the DDI, Operations, DDI enhancement pool, and operations enhancement pool.
- **Schedule G.** Represents the Option A (Financial) scope of work costs by group/tier combination for the DDI, Operations, DDI enhancement pool, and operations enhancement pool.
- **Schedule H.** Represents the Option B (Call Center) scope of work costs by group/tier combination for the DDI, Operations, DDI enhancement pool, and operations enhancement pool.
- **Schedule I.** Represents the Option C (Federal Reporting) scope of work costs by group/tier combination for the DDI, Operations, DDI enhancement pool, and operations enhancement pool.
- **Schedule J.** Represents the Claims Services Integration Service Types. Offerors need to determine the number of hours for every resource specified in every one of the Integration Types:
  - Major Integration Service Type Effort
  - Complex Integration Service Type Effort
  - Standard Integration Service Type Effort

© 2020 Conduent State Healthcare, LLC

- Simple Integration Service Type Effort
- Onboarding Integration Service Type Effort

- **Schedule K.** Represents the DDI Requisitioned Integration Services Pool Hours and Cost. Offerors need to determine the Total Cost for the DDI Requisitioned Integration Services Pool Hours. Schedule K will only be considered complete and valid when the green highlighted cell has a value.
- **Schedule L.** Represents the Total Costs for the Optional Years for Data Conversion (years 4 to 9). The State further clarifies that Data Conversion Optional Years (Data Conversion Optional Years of Data) are optional conversion costs and are not part of the payment schedule in Schedule B-2. These costs will be reimbursed when the associated conversion is completed, accepted by the Department, and deployed to production.
- **Schedule M.** Represents the placeholder for Claims Services Option D (State Specific) Scope of Work Cost by Members. This Schedule is a placeholder for the costs associated with the State Specific requirements not currently found in the RFP but will be added during the Participating Addendum process. Offerors are only required to complete Schedules M-1 thru M-4 if the Participating States decide to have State Specific requirements that are not covered in the Core, Option A, Option B, or Option C requirements. The State further clarifies in responses to questions, Pricing Schedules M-1 through M-4 would only be completed as part of the Participating Addendum process if a State has additional state specific requirements to add to the scope.

5.3.1 Procurement Administrative Fees

The Offeror will be required to pay two separate procurement administrative fees as part of this procurement (NASPO ValuePoint Administrative Fee and Participating State Procurement Administrative Fee) for Design, Development, and Implementation (DDI) services portion of the Participating Addendum (e.g., procurement administrative fees will be applied to all DDI expenditures including the "…SVCS DDI Costs" and "…SVCS DDI Pool Costs" from Attachment G – Pricing Schedules, schedules F-1 and F-3, G-1 and G-3, H-1 and H-3, I-1 and I-3, plus any additional optional data conversion years cost required by a state in Schedule L - Data Conversion Optional Years). Procurement administrative fees will not be assessed on the Operations portion of the Participating Addendum. Procurement administrative fees will not be paid by the Participating State. Therefore, the Offeror's total proposed cost must account for the Offeror's responsibility to pay these fees to the respective entity at the time their invoices are paid. These procurement administrative fees support either the administration of the ValuePoint multi-state cooperative procurement program or they support the Participating State procurement activities in support of the multi-state cooperative procurement. The details of each administrative fee are as follows:

a. NASPO ValuePoint Administrative Fee: The Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter of one percent (0.25% or 0.0025) on DDI payments received from the Participating Entity no later than sixty (60) days following the end of each calendar quarter. The NASPO ValuePoint Administrative Fee shall be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping) performed up until the time Design, Development, and Implementation (DDI) is completed. This fee is to be included as part of the pricing submitted with any proposal to a potential Participating Entity.

b. Participating State Procurement Administrative Fee: If required by the Participating State, the Contractor shall pay to the Participating State Chief Procurement Officer, or its assignee, a Participating State Procurement Administrative Fee of no more than two percent (2.0% or 0.02) on DDI payments received from the Participating Entity no later than sixty (60) days following the end of each calendar quarter (or subject to the terms of the Participating Addendum whichever is sooner). The Participating State Procurement Administrative Fee shall be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping) performed up until the time Design, Development, and Implementation (DDI) is completed. This fee is to be included as part of the pricing submitted with any proposal to a potential Participating Entity. If a Participating State chooses to assess a procurement administrative fee in excess of two percent, the Offeror will be allowed to adjust their proposed cost for the Participating Sate to account for the difference. If the Participating State does not choose to assess a Procurement Administrative fee or if the Participating State Procurement Administrative Fee is less than 2.0%, the Contractor shall reduce their cost proportionally as part of the Participating Addendum.

Conduent agrees to and understands that the Offeror will be required to pay two separate procurement administrative fees as part of this procurement (NASPO ValuePoint Administrative Fee and Participating State Procurement Administrative fee) for Design, Development, and Implementation (DDI) services portion of the Participating Addendum. This cost is included in our pricing.

© 2020 Conduent State Healthcare, LLC

Payments

During the DDI phase of the Contract, the Contractor will be paid for each successful payment milestone identified in Attachment G, Pricing Schedule B – DDI Payment Milestones, based on the approval and acceptance of the milestone by DPHHS. The Contractor will submit an invoice for each milestone after DPHHS acceptance. The Department shall pay such invoices within 30 calendar days following receipt of an acceptable invoice.

During operations, Contractor may submit monthly invoices equal to 1/12 of the fixed price proposed for that contract year as identified in Attachment G, Pricing Schedule C – Cost of Operations. The Contractor will submit an invoice at the beginning of the month following the month for which services were performed. The Department shall pay such invoices within 30 calendar days following receipt of an acceptable invoice.

Enhancement pool hours for both the DDI and Operations phase will be paid for each enhancement upon acceptance and approval by DPHHS. The Contractor will submit a monthly System Enhancement Pool Report itemizing the hours for accepted and approved enhancements during the previous month. The Department shall pay for associated hours in the approved System Enhancement Pool Report within 30 calendar days of acceptance of the enhancement based on the proration of rates provided in Attachment G, Pricing Schedule D – Enhancement Pool Hours.

DDI Phase Milestone Payments

Conduent agrees and understands that during the DDI phase of the contract, the Contractor will be paid for each successful payment milestone identified in Attachment G, Pricing Schedule B – DDI Payment Milestones, based on the approval and acceptance of the milestone by DPHHS. We further agree to the payment timeline identified in this requirement.

Operations Payments

Conduent understands that during operations, Contractor may submit monthly invoices equal to 1/12 of the fixed price proposed for that contract year as identified in Attachment G, Pricing Schedule C – Cost of Operations. We further agree to submit our invoice within the timeline identified in this requirement.

Enhancement Pool Hours Payment

Conduent agrees and understands that enhancement pool hours for both the DDI and Operations phase will be paid for each enhancement upon acceptance and approval by DPHHS. We further agree to submit a monthly System Enhancement Pool Report and understand the payment timeline indicated in this requirement.

© 2020 Conduent State Healthcare, LLC

Section 6: Evaluation Process

REQUIREMENT: RFP Section 6

The Scope of Services, Offeror Qualifications, and Cost Proposal will be evaluated based on the criteria set forth below. The Offeror must indicate certification of understanding for the Section and the Offeror must restate the subsection number and the text immediately prior to the written response.

Conduent State Healthcare, LLC (Conduent) is pleased to submit our response to Section 6, Evaluation Process for the Claims Processing and Management Services for Montana's Program for Automating and Transforming Healthcare (MPATH) Request for Proposal.

In accordance with the Section 6 Evaluation Process, Conduent indicates certification of our understanding of the evaluation process cited in this section, including steps, conditions, guidelines, and scoring criteria. Additionally, we include the subsection number and text prior to each response consistent with Section 6 RFP requirements, including:

- 6.1 Basis of Evaluation
- 6.1.1 Scoring Guide
- 6.2 Evaluation Criteria

6.1 Basis Of Evaluation

REQUIREMENT: RFP Section 6.1

The evaluator/evaluation committee will review and evaluate the offers according to the following criteria. Each service category (Core, Option A, Option B, Option C) are scored independently. Each service category evaluation is based on a total number of 5,000 possible points.

Core Services

The ability to meet the Detailed Scope of Work, Company Profile and Experience, Resumes, and Product Demonstrations/Interviews portions of the proposal will be evaluated based on Section 6.1.1 Scoring Guide below. The Offeror simply repeating requirements for any and/or all Sections of 3.10 does not qualify as a good response as defined in Section 6.1.1 of this RFP. Compliance, Performance Standards, Financial Stability, Disclosure of Dark Money Spending, Subcontractors, and References portions of the proposal will be evaluated on a pass/fail basis. Receiving a "fail" for any one of the pass/fail portions will result in the Offeror being eliminated from further consideration. Compliance with Executive Order No. 12-2016 will be assigned 5% of the available points. The basis of evaluation will be a multi-step process as outlined below:

Step 1: Technical Proposal will be evaluated first. Proposals receiving at least 80% of possible points for the technical proposal will move to Step 2. Proposals failing to obtain 80% of possible points will be eliminated from further consideration.

Step 2: Product Demonstrations/Interviews will be scheduled for all Offerors who received the minimum required score in Step 1. Product demonstrations receiving evaluation scores of 80% or better will move to Step 3. Product Demonstrations failing to meet the 80% threshold will be eliminated from further consideration.

Step 3: Compliance with Executive Order 12-2016 will be awarded 5% of the available points, and will be considered after Step 2. Those who do not comply with Executive Order 12-2016, will be awarded zero points for this criteria.

Step 4: Cost proposals will only be evaluated for those offerors who passed both the minimum scores in Step 1 (Technical Proposal) and Step 2 (Product Demonstrations/Interviews) of the evaluation process.

Offerors must submit a workbook for each of the five tiers as part of their cost proposal. The offeror must submit a cost proposal for Core services (Schedules F1-F4 and Schedule K). Each Tier workbook will be assigned 200 points of the 1,000 possible points. The Offeror with the lowest cost for each Tier will receive the maximum allotted points (200). All other Offerors will receive a percentage of the 200 points available for that Tier based on their cost relationship to the best cost. The Department has selected a state from

© 2020 Conduent State Healthcare, LLC

each Tier that would be the basis for scoring that particular Tier. To ensure Offeror pricing is not influenced, the State that will be used for each Tier will be revealed immediately after the RFP has closed.

Example: Total possible points for cost are 1,000. For Tier 1 there are 200 possible points. Offeror A's Tier 1 cost is $20,000. Offeror B's cost is $30,000. Offeror A would receive 200 points. Offeror B would receive 133 points (($20,000/$30,000) = 67% x 200 points = 133). Tiers 2-5 would be scored individually like the example for Tier 1 above.

Once all Tiers have been scored, the Offeror's points for each Tier are combined for their total cost score.

Example: Offeror A received the following points:

Tier 1: 200 points
Tier 2: 150 points
Tier 3: 83 points
Tier 4: 200 points
Tier 5: 145 points
Total Cost Score: 778 points

Option A – Financial

The ability to meet the Detailed Scope of Work, Company Profile and Experience, Resumes, and Product Demonstrations/Interviews portions of the proposal will be evaluated based on Section 6.1.1 Scoring Guide below. The Offeror simply repeating requirements for any and/or all Sections of 3.10 does not qualify as a good response as defined in Section 6.1.1 of this RFP. Compliance, Performance Standards, Financial Stability, Disclosure of Dark Money Spending, Subcontractors, and References portions of the proposal will be evaluated on a pass/fail basis. Receiving a "fail" for any one of the pass/fail portions will result in the Offeror being eliminated from further consideration. Compliance with Executive Order No. 12-2016 will be assigned 5% of the available points. The basis of evaluation will be a multi-step process as outlined below:

Step 1: Technical Proposal will be evaluated first. Proposals receiving at least 80% of possible points for the technical proposal will move to Step 2. Proposals failing to obtain 80% of possible points will be eliminated from further consideration.

Step 2: Product Demonstrations/Interviews will be scheduled for all Offerors who received the minimum required score in Step 1. Product demonstrations receiving evaluation scores of 80% or better will move to Step 3. Product Demonstrations failing to meet the 80% threshold will be eliminated from further consideration.

Step 3: Compliance with Executive Order 12-2016 will be awarded 5% of the available points, and will be considered after Step 2. Those who do not comply with Executive Order 12-2016, will be awarded zero points for this criteria.

Step 4: Cost proposals will only be evaluated for those offerors who passed both the minimum scores in Step 1 (Technical Proposal) and Step 2 (Product Demonstrations/Interviews) of the evaluation process.

Offerors must submit a workbook for each of the five tiers as part of their cost proposal. The offeror must submit a cost proposal for Option A - Financial services (Schedules G1-G4). Each Tier workbook will be assigned 200 points of the 1,000 possible points. The Offeror with the lowest cost for each Tier will receive the maximum allotted points (200). All other Offerors will receive a percentage of the 200 points available for that Tier based on their cost relationship to the best cost. The Department has selected a state from each Tier that would be the basis for scoring that particular Tier. To ensure Offeror pricing is not influenced, the State that will be used for each Tier will be revealed immediately after the RFP has closed.

Example: Total possible points for cost are 1,000. For Tier 1 there are 200 possible points. Offeror A's Tier 1 cost is $20,000. Offeror B's cost is $30,000. Offeror A would receive 200 points. Offeror B would receive 133 points (($20,000/$30,000) = 67% x 200 points = 133). Tiers 2-5 would be scored individually like the example for Tier 1 above.

Once all Tiers have been scored, the Offeror's points for each Tier are combined for their total cost score.

Example: Offeror A received the following points:

Tier 1: 200 points
Tier 2: 150 points
Tier 3: 83 points
Tier 4: 200 points
Tier 5: 145 points
Total Cost Score: 778 points

Option B – Call Center

The ability to meet the Detailed Scope of Work, Company Profile and Experience, Resumes, and Product Demonstrations/Interviews portions of the proposal will be evaluated based on Section 6.1.1 Scoring Guide below. The Offeror simply repeating requirements for any and/or all Sections of 3.10 does not qualify as a good response as defined in Section 6.1.1 of this RFP. Compliance, Performance Standards, Financial Stability, Disclosure of Dark Money Spending, Subcontractors, and References portions of the proposal will be evaluated on a pass/fail basis. Receiving a "fail" for any one of the pass/fail portions will result in the Offeror being eliminated from further consideration. Compliance with Executive Order No. 12-2016 will be assigned 5% of the available points. The basis of evaluation will be a multi-step process as outlined below:

© 2020 Conduent State Healthcare, LLC

Step 1: Technical Proposal will be evaluated first. Proposals receiving at least 80% of possible points for the technical proposal will move to Step 2. Proposals failing to obtain 80% of possible points will be eliminated from further consideration.

Step 2: Product Demonstrations/Interviews will be scheduled for all Offerors who received the minimum required score in Step 1. Product demonstrations receiving evaluation scores of 80% or better will move to Step 3. Product Demonstrations failing to meet the 80% threshold will be eliminated from further consideration.

Step 3: Compliance with Executive Order 12-2016 will be awarded 5% of the available points, and will be considered after Step 2. Those who do not comply with Executive Order 12-2016, will be awarded zero points for this criteria.

Step 4: Cost proposals will only be evaluated for those offerors who passed both the minimum scores in Step 1 (Technical Proposal) and Step 2 (Product Demonstrations/Interviews) of the evaluation process.

Offerors must submit a workbook for each of the five tiers as part of their cost proposal. The offeror must submit a cost proposal for Option B – Call Center services (Schedules H1-H4). Each Tier workbook will be assigned 200 points of the 1,000 possible points. The Offeror with the lowest cost for each Tier will receive the maximum allotted points (200). All other Offerors will receive a percentage of the 200 points available for that Tier based on their cost relationship to the best cost. The Department has selected a state from each Tier that would be the basis for scoring that particular Tier. To ensure Offeror pricing is not influenced, the State that will be used for each Tier will be revealed immediately after the RFP has closed.

Example: Total possible points for cost are 1,000. For Tier 1 there are 200 possible points. Offeror A's Tier 1 cost is $20,000. Offeror B's cost is $30,000. Offeror A would receive 200 points. Offeror B would receive 133 points (($20,000/$30,000) = 67% x 200 points = 133). Tiers 2-5 would be scored individually like the example for Tier 1 above.

Once all Tiers have been scored, the Offeror's points for each Tier are combined for their total cost score.

Example: Offeror A received the following points:

Tier 1: 200 points
Tier 2: 150 points
Tier 3: 83 points
Tier 4: 200 points
Tier 5: 145 points
Total Cost Score: 778 points

Option C - Federal Reporting

The ability to meet the Detailed Scope of Work, Company Profile and Experience, Resumes, and Product Demonstrations/Interviews portions of the proposal will be evaluated based on Section 6.1.1 Scoring Guide below. The Offeror simply repeating requirements for any and/or all Sections of 3.10 does not qualify as a good response as defined in Section 6.1.1 of this RFP. Compliance, Performance Standards, Financial Stability, Disclosure of Dark Money Spending, Subcontractors, and References portions of the proposal will be evaluated on a pass/fail basis. Receiving a "fail" for any one of the pass/fail portions will result in the Offeror being eliminated from further consideration. Compliance with Executive Order No. 12-2016 will be assigned 5% of the available points. The basis of evaluation will be a multi-step process as outlined below:

Step 1: Technical Proposal will be evaluated first. Proposals receiving at least 80% of possible points for the technical proposal will move to Step 2. Proposals failing to obtain 80% of possible points will be eliminated from further consideration.

Step 2: Product Demonstrations/Interviews will be scheduled for all Offerors who received the minimum required score in Step 1. Product demonstrations receiving evaluation scores of 80% or better will move to Step 3. Product Demonstrations failing to meet the 80% threshold will be eliminated from further consideration.

Step 3: Compliance with Executive Order 12-2016 will be awarded 5% of the available points, and will be considered after Step 2. Those who do not comply with Executive Order 12-2016, will be awarded zero points for this criteria.

Step 4: Cost proposals will only be evaluated for those offerors who passed both the minimum scores in Step 1 (Technical Proposal) and Step 2 (Product Demonstrations/Interviews) of the evaluation process.

Offerors must submit a workbook for each of the five tiers as part of their cost proposal. The offeror must submit a cost proposal for Option C – Federal Reporting services (Schedules I1-I4). Each Tier workbook will be assigned 200 points of the 1,000 possible points. The Offeror with the lowest cost for each Tier will receive the maximum allotted points (200). All other Offerors will receive a percentage of the 200 points available for that Tier based on their cost relationship to the best cost. The Department has selected a state from each Tier that would be the basis for scoring that particular Tier. To ensure Offeror pricing is not influenced, the State that will be used for each Tier will be revealed immediately after the RFP has closed.

Example: Total possible points for cost are 1,000. For Tier 1 there are 200 possible points. Offeror A's Tier 1 cost is $20,000. Offeror B's cost is $30,000. Offeror A would receive 200 points. Offeror B would receive 133 points (($20,000/$30,000) = 67% x 200 points = 133). Tiers 2-5 would be scored individually like the example for Tier 1 above.

Once all Tiers have been scored, the Offeror's points for each Tier are combined for their total cost score.

Example: Offeror A received the following points:

Tier 1: 200 points
Tier 2: 150 points
Tier 3: 83 points
Tier 4: 200 points
Tier 5: 145 points
Total Cost Score: 778 points

© 2020 Conduent State Healthcare, LLC

Conduent indicates certification of our understanding that the evaluator/evaluation committee will review and evaluate offers in accordance to Section 5.2.1, Basis of Evaluation and Attachment I – Evaluation and Scoring. We understand that each service category for Core, Option A, Option B, and Option C is scored independently based on a total number of 5,000 possible points and evaluation is based on RFP Section 6.1.1.

We acknowledge that Compliance, Performance Standards, Financial Stability, Disclosure of Dark Money Spending, Subcontractors, and References sections are evaluated on a pass/fail basis and any Offerors proposals that receive a "fail" for any of the pass/fail portions will be eliminated from further consideration. Compliance with Executive Order No. 12-2016 will be assigned 5% of the available points in each category. The committee will review and evaluate our offer according to the criteria shown in Table 6.1-1.

Table 6.1-1. Steps for Evaluating Each Category

Step Number	Description
Step 1	Technical Proposal will be evaluated first. Proposals receiving at least 80% of possible points for the technical proposal will move to step 2. Proposals failing to receive 80% of possible points will be eliminated from further consideration.
Step 2	Product Demonstrations/Interviews will be scheduled for all Offerors who received the minimum required score in Step 1. Product demonstrations receiving evaluation scores of 80% or better will move to Step 3. Product Demonstrations failing to meet the 80% threshold will be eliminated from further consideration.
Step 3	Compliance with Executive Order 12-2016 will be awarded 5% of the available points, and will be considered after Step 2. Those who do not comply with Executive Order 12-2016, will be awarded zero points for this criteria.
Step 4	Cost proposals will only be evaluated for those offerors who passed both the minimum scores in Step 1 (Technical Proposal) and Step 2 (Product Demonstrations/Interviews) of the evaluation process.

Consistent with RFP requirements, we submit a workbook for each of the five tiers as part of our cost proposals. The cost proposal for Core Services contains applicable pricing schedules. Conduent acknowledges that each tier workbook will be assigned 200 of the 1,000 possible points and that the Offeror with the lowest cost for each tier will receive the 200 maximum allotted points, with all other Offerors receiving a percentage of these points based on the cost relation to the best cost available.

Additionally, we understand the Department will select a state from each tier to be the basis for the scoring of that particular tier. To ensure pricing is not influenced, the State used for each tier will be revealed immediately after the RFP has closed.

6.1.1 Scoring Guide [RFP 6.1.1]

6.1.1 Scoring Guide

In awarding points to the evaluation criteria in Steps 1-2, the evaluator/evaluation committee will consider the following guidelines:

Superior Response (95-100%): A superior response is an exceptional reply that completely and comprehensively meets all the requirements of the section. In addition, the response may cover areas not originally addressed within the RFP and/or include additional information and recommendations that would prove both valuable and beneficial to DPHHS.

Good Response (80-94%): A good response clearly meets all the requirements of the section and demonstrates in an unambiguous and concise manner a thorough knowledge and understanding of the project, with no deficiencies noted.

Fair Response (65-79%): A fair response minimally meets most requirements set forth in the section. The Offeror demonstrates some ability to comply with guidelines and requirements of the project, but knowledge of the subject matter is limited.

Failed Response (64% or less): A failed response does not meet the requirements set forth in the section. The Offeror has not demonstrated sufficient knowledge of the subject matter.

Conduent acknowledges our understanding of the evaluator/evaluation committee will consider the guidelines outlined in Table 6.1.1-1 to award points to the evaluation criteria as previously described in Steps 1 and 2.

Table 6.1.1-1. Evaluation Guidelines

Step Number	Description
Superior Response (95-100%)	A superior response is an exceptional reply that completely and comprehensively meets all the requirements of the section. In addition, the response may cover areas not originally addressed within the RFP and/or include additional information and recommendations that would prove both valuable and beneficial to DPHHS.
Good Response (80-94%)	A good response clearly meets all the requirements of the section and demonstrates in an unambiguous and concise manner a thorough knowledge and understanding of the project, with no deficiencies noted.
Fair Response (65-79%)	A fair response minimally meets most requirements set forth in the section. The Offeror demonstrates some ability to comply with guidelines and requirements of the project, but knowledge of the subject matter is limited.
Failed Response (64% or less)	A failed response does not meet the requirements set forth in the section. The Offeror has not demonstrated sufficient knowledge of the subject matter.

Conduent acknowledges our understanding that we are informed of the ability to meet a detailed Level of Scope, Company Profile and Experience, Resumes and Product Demonstrations portions of the proposal will be evaluated following these guidelines as well.

The References, Performance Standards, Subcontractors, and Financial Stability sections will be evaluated on a pass/fail basis. Obtaining a "fail" means the proposal is eliminated from further process.

6.2 Evaluation Criteria [RFP 6.2]

REQUIREMENT: RFP Section 6.2

The evaluation criteria to score and weight the total number of 5,000 points can be found below. For the detailed list of scoring items, please see Attachment I – Evaluation and Scoring.

Conduent acknowledges the criteria cited in Attachment I – Evaluation and Scoring and RFP Section 6.2 Evaluation Criteria to obtain the maximum score of 5,000 points in each of the categories that shape this proposal: Core Services, Option A – Financial, Option B – Call Center, and Option C – Federal Reporting. We cite these criteria in Tables 6.2-1 through 6.2-8.

Attachment F - Requirements Response Matrix

Instructions: This attachment contains a list of all requirements related to the module core claims scope of work in addition to Option A, B, and C requirements. Option D requirements will be identified and confirmed during the Participating Addendum process. The Offeror is expected to fill out this document in full for the base scope of work. The Offeror is expected to fill out Option A and/or Option B and/or Option C requirement responses only if the Offeror will include Option A and/or Option B and/or Option C in their proposal.

Attachment F - Requirements Response Matrix Column Definitions

Column A - Requirement Section - Each value in the Requirement Section column has a corresponding section reference in the MPATH Claims Processing and Management RFP.
Column B - Requirement ID - Each MPATH requirement's unique ID.
Column C - Requirement. Language - This column contains the requirement description.
Column D - Base Requirement Applicable to Core Claims Solution and All Proposed Options - This column indicates whether the requirement is applicable for the core claims solution and any/all of the Optional Services the Offeror proposes. A "Yes" means the requirement applies to the core claims solution as well as Option A, Option B, and Option C. If marked as "No" and Column E "Requirement Option Indicator" is blank, the requirement is only applicable to the core claims solution. If marked as "No" and Column E is "Yes" then the requirement only applies to the Option identified in Column F "Requirement Option Assignment".
Column E - Requirement Option Indicator - This column is a Yes/No indicator that denotes requirements that are part of an Optional Service (Yes) or not part of an Optional Service (No).
Column F - Requirement Option Assignment - If a requirement is marked as "Yes" in Column E (part of an Optional Service), it is assigned an attribute that reflects additional detail regarding the optional assignment. Current valid values of this attribute are:
• Option A - Financial
• Option B - Call Center
• Option C - Federal Reporting
Column G - General Status - Offerors should complete this column regarding their proposed solution status using the values below under "General Status".
Column H - Production Status - Offerors should complete this column regarding their proposed solution status using the values below under "Production Status".
Column I - Product Type - Offerors should complete this column regarding their proposed solution status using the values below under "Product Type".
Column J - Hosting - Offerors should complete this column regarding their proposed solution status using the values below under "Hosting".
Column K - Security Tested - Offerors should complete this column regarding their proposed solution status using the values below under "Security Tested".
Column L - Additional Information - Offerors can add information in this column as necessary to communicate additional details about how their proposed solution meets the requirement that is not addressed in other columns.

Offerors must use only the values listed below. Each column will have only one value.

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, Hosting, and Security Tested.

CoTS - Commercial Off the Shelf

Legend

General Status
A - Included in the base release of the proposed solution
B - Requires configuration of the base solution not to exceed 20 FTE hours
C - Is an integrated third party product (COTS), requires no configuration or custom development
D - Is an integrated third party product (COTS), requires configuration
E - Is an integrated third party product (COTS), requires custom development
F - Requires custom development
G - Is not supported by the proposed solution
NA - This is not a functional or technical requirement
Production Status
S1 - This functionality is currently offered, and in use by other customers
S2 - This functionality is currently offered, but not in use by other customers
S3 - This functionality is not currently offered, but will offer for this engagement (1st client)
S4 - This functionality will be sub-contracted and the sub-contractor is clearly identified in the additional information column
S5 - This functionality will be sub-contracted but the sub-contractor has not yet been identified
NA - This is not a functional or technical requirement
Product Type
SaaS - Software as a Service
PaaS - Platform as a Service
COTS - Commercial Off the Shelf
OS - Open Source Solution
CS - Custom Solution
NA - This is not a functional or technical requirement
Hosting
T - Third Party Hosting
V - Vendor On-Premise Hosting
W - SITSD (State Information Technology Services Division)
O - Other
NA - This is not a functional or technical requirement
Security Tested
Y-The functionality has been security tested based on NIST 800-53 Rev 4. **NOTE:** The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation.
N- The application has not been security tested based on NIST 800-53 Rev 4.
NA - This is not a functional or technical requirement

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Authorizations	AUTH01	The Contractor's solution shall have the ability to track services received against services approved based on service authorizations and/or claims.	No								
Authorizations	AUTH02	The Contractor's solutions shall provide the ability for authorized users (e.g., state staff, case managers, contractors) to enter, store, update, and view service authorizations.	No								
Authorizations	AUTH03	The Contractor's solution shall track and update service authorizations based on information received fr external sources (e.g., claims data, service authorization updates from UR vendor).	No								
Authorizations	AUTH04	The Contractor's solution shall include all standard X12 data elements associated with service authorization requests and responses (e.g., member, provider, code sets, dates of service).	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Authorizations	AUTH05	The Contractor's solution shall have the capability to receive and or enter a retroactive service authorization(s) based on configurable business rules.	No								
Authorizations	AUTH06	The Contractor's solution shall include configurable referral functionality to include creating, updating and sending referrals from primary care providers to other providers (e.g., specialty providers) to allow for claims payment. The solution shall assign a unique number for each referral.	No								
Authorizations	AUTH07	The Contractor's solution shall include processing logic when creating or updating service authorizations (e.g., procedure code not appropriate for gender of member, procedure cannot be billed by the provider type, duplicate service authorization request, invalid data) and route exceptions to the appropriate work queue.	No								
Authorizations	AUTH08	The Contractor's solution shall provide the capability to automatically authorize services by various configurable data elements (e.g., procedure codes, diagnosis codes, provider types, date ranges, dollar amounts, units).	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Authorizations	AUTH09	The Contractor's solution shall have the ability to capture and maintain the requested service authorization details (e.g., units, dollars, begin and end dates) and the approved authorization details (e.g., units, dollars, begin and end dates) on the authorization record and notify (e.g., web portal, fax, phone, letters, X12 278) the requestor of the decision.	No								
Authorizations	AUTH10	The Contractor's solution shall provide the ability to update service authorizations (e.g., extend or limit effective dates, update authorized limits) based on configurable business rules while maintaining a history of the changes to the record.	No								
Authorizations	AUTH11	The Contractor's solution shall have the ability to automatically generate approval and denial notices/communication to requesting and assigned providers, case managers, and members based on their communication preference for service authorizations based on configurable business rules.	No								
Authorizations	AUTH12	The Contractor's solution shall allow for flexible and configurable service authorizations (e.g., required fields, edits, service authorization types, business rules) to support a variety of programs, benefit plans, and claim types. The solution shall assign a unique number to service authorizations.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Authorizations	AUTH13	The Contractor's solution shall have the capability to filter and view service authorizations (service authorization detail list) based on configurable filters (e.g., provider, procedure code, diagnosis code) and allow mass updates from the service authorization detail list.	No								
Authorizations	AUTH14	The Contractor's solution shall have the capability to perform mass updates of referrals (e.g., member changes PCP, PCP who are retiring, service code changes) that may initiate workflow for updates that require review and approval.	No								
Authorizations	AUTH15	The Contractor's solution shall have the capability to perform mass updates to service authorization records (e.g., change a provider ID number, procedure code) with pending or approved but unutilized services that may initiate workflow for updates that require review and approval.	No								
Authorizations	AUTH16	The Contractor's solution shall have the capability to put requested service authorizations in a pending status if any information is invalid, missing or needs to be approved by another entity based on configurable business rules.	No								
Authorizations	AUTH18	The Contractor's solution shall have the capability for authorized users to send requests via workflow or their preferred method of communication (e.g., inbox, fax, mail) for additional information related to service authorization requests.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Authorizations	AUTH20	The Contractor's solution shall have the ability to receive, process, and send electronic health care serv review, request for review, and response transactions required by 45 CFR Part 162, to include pharmacy drug referral certification and authorization; dental, professional and institutional referral certification and authorization (ASC X12N 278).	No								
Authorizations	AUTH22	The Contractor's solution shall provide the ability to allow approved services (e.g. private duty nursing) on one service authorization to be used by multiple providers during overlapping dates of service based on configurable business rules.	No								
Authorizations	AUTH23	The Contractor's solution shall provide and maintain the capability to create, edit and void services authorized and to extend or limit the effective dates of the authorization. The solution shall maintain the original and the change data in the service authorization record.	No								
Benefit & Reference Data Management	BRDM01	The Contractor's solution shall store, maintain, and utilize a list of all NCCI edits with effective and end dates, including identifying additions, changes, and deletions of codes and NCCI edits as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM02	For all historical and current code sets, the Contractor's solution shall receive, store, and maintain the crosswalk of effective and end dated code set relationships by date of service (e.g., Healthcare Common Procedure Coding System (HCPCS), Resource Based Relative Value Scale (RBRVS), All Patient Refined Diagnosis Related Grouping (APR-DRG), Outpatient Prospective Payment System (OPPS) including procedure and APC records, Medicare Severity Diagnosis Related Groups (MS-DRGs), Current Procedural Terminology (CPT), International Statistical Classification of Diseases and Related Health Problems Version 10 (ICD-10-CM (diagnosis) and ICD-10-PCS (procedure)), Diagnostic and Statistical Manual of Mental Disorders (DSM–5), Current Dental Terminology (CDT), Provider Preventable Conditions, modifiers, revenue codes, agency-specific code sets, National Council for Prescription Drug Programs, (NCPDP), National Drug Codes (NDC), Berenson-Eggers Type of Service (BETOS), and MI (Major Diagnostic Categories)) as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM03	The Contractor's solution shall capture, store, maintain, and display a crosswalk of provider characteristics (e.g., type, specialty, taxonomies, accreditations, and certifications) against all code sets using Agency defined configurable business rules.	No								
Benefit & Reference Data Management	BRDM04	The Contractor shall have the capability to create, maintain and manage multiple eligibility group valid values as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Benefit & Reference Data Management	BRDM05	The Contractor's solution shall store and maintain reference files for all reimbursement methodologies as defined by the Agency to include but not limited to the following: (e.g., a) provider contracted rates b) CPT/HCPS/CDT and modifier codes c) fee schedule for the corresponding date d) RBRVS claims e) Manual pricing f) Place of service g) Specialty type h) Pay by report i) Age range j) Category of service k) CDT procedure code fee schedule l) Revenue codes m) APR-DRG (Diagnosis-Related Group) n) APG o) Per Diem at provider specific rates p) Add-on pricing amounts to any pricing structures based on other claim attributes (e.g. service facility, provider type/specialty, place of service etc.) q) Provider specific encounter rate r) Variable percentage of billed charge s) Variable percentage based on provider type (FQHC, RHC, IHSp) t) PMPM with line level detail u) Medicare's Outpatient Prospective Payment System v) Bundled/unbundled pricing w) Global service pricing x) Calculation required for resource-based relative value system fee schedule for radiology, anesthesia and general medical services y) Tiered pricing into which a variety of services are grouped depending on the treatment type and intensity of care required	No								
Benefit & Reference Data Management	BRDM06	The Contractor's solution shall allow automated and manual mass assignments and updates (e.g., service authorization required, medical review required, limits, diagnosis codes) to procedure code(s)/modifier(s) applied to benefit plans as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM07	The Contractor's solution shall provide configurable business rules to allow carve out benefits and procedures (e.g., services allowed to be billed outside of a Managed Care Health plan as fee for service transactions) to benefit plans as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM08	The Contractor's solution shall accept, maintain, and display eligibility and enrollment data (e.g., managed care, TPL, waiver, care programs, primary care provider, Medicare, personal resource, spend-down, buy-in) received via an interface as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM09	The Contractor's solution shall provide configurable benefit and service restriction (e.g., third party liability, lock-in or lock-out, managed care, benefit plan, limits) responses in response to an eligibility inquiry made through a service or a web portal based on Agency defined configurable business rules.	No								
Benefit & Reference Data Management	BRDM10	The Contractor's solution shall update, store, maintain, and display indicators for benefit plans (e.g., procedure include/exclude indicators, modifiers, clinical or utilization and special needs status) as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM11	The Contractor's solution shall create, maintain, and update reference tables with varying federal financial participation rates (e.g., procedure or combinations of procedures, modifier or combinations of modifiers, diagnoses, category of service, benefit plan, waivers, provider type, provider specialty, member demographics) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM12	The Contractor's solution shall store, maintain, and display date sensitive parameters (e.g., effective date, beginning and end date, change date) for each occurrence of all reference data (e.g., benefit plan, procedure, reimbursement methodology) as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM13	The Contractor's solution shall have the ability to maintain and cross reference multiple Member identifiers and aliases.	No								
Benefit & Reference Data Management	BRDM14	The Contractor's solution shall produce and distribute replacement state healthcare program member identification cards in an-Agency defined timeframe.	No								
Benefit & Reference Data Management	BRDM15	The Contractor's solution shall produce and distribute state healthcare program member identification cards and associated materials as defined by the Agency.	No								

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM16	The Contractor's solution shall allow categories of service to be defined by parameters based on Agency-defined configurable business rules including: a. Grouping various combinations of individual and ranges of codes into categories of service, including ICD diagnoses and procedures, HCPCS, procedure modifiers, revenue codes, bill types, places of service, Provider taxonomy or specialty; b. Allow one or more categories of service to be assigned to a benefit plan as either included or excluded for the benefit plan; c. Allow sub-groupings and individual or ranges of codes within a category of service to be included or excluded.	No								
Benefit & Reference Data Management	BRDM17	The Contractor's solution shall allow configurable service limitations and parameters (e.g., specifying limitations, including units, dollars, occurrences, and per day maximums to categories of service and specific sub-grouping(s) and individual or ranges of codes within a category of service or benefit plan, specifying cost sharing parameters such as copay, coinsurance, and deductible, by unit, occurrence, day, length of stay, or other parameters as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM18	The Contractor's solution shall provide a free-form text narrative at the Benefit Plan level as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM19	The Contractor shall create, store, and maintain trauma indicators, including effective and end dates, ICD external cause codes, or other indicators used for identifying potential TPL cases as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM20	The Contractor solution shall store, maintain, and utilize all Claim Adjustment Reason Codes (CARC) and Remittance Advice Remark Codes (RARC) as provided and updated by a third party.	No								
Benefit & Reference Data Management	BRDM21	The Contractor solution shall provide an National Correct Coding Initiative (NCCI) cost savings summary report according to CMS specifications.	No								
Benefit & Reference Data Management	BRDM22	The Contractor's solution shall provide the ability to create, view, maintain and track and list configurable covered services that may be included within benefit plans per as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM23	The Contractor's solution shall receive and store initial and updated member eligibility code(s) and aid category and assign the member eligibility code to the corresponding benefit plan including multiple and overlapping plans, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM24	The Contractor's solution shall provide member lock-in based on configurable business rules (e.g., ber plans, category of service, diagnosis, and procedure codes as defined by the agency.	No								
Benefit & Reference Data Management	BRDM25	The contractor's solution shall receive and store initial and updated member eligibility data and process these transactions in real-time.	No								
Benefit & Reference Data Management	BRDM26	The contractor shall monitor current and future releases of all National and Federal code sets and reimbursement methodologies and coordinate the adoption and implementation as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM27	The Contractor's solution shall provide the capability to clone specific data elements within a benefit plan (e.g., spans, service criteria, parameters) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM28	The Contractor's solution shall store and maintain reimbursement criteria for each service according to date specific rules and limitations applicable to each claim and encounter type (e.g., service, pricing modifiers (multiple), multiple surgeries, cutbacks, benefit plan, category of service, and provider type/specialty) as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM29	The Contractor's solution shall store, maintain and update reference data (e.g., edit and audit processing rules and parameters, specification of the hierarchy of edits and audits, procedures that allow pay-and-chase, supporting documentation) as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM30	The Contractor's solution shall contain the functionality to increase or decrease reimbursement for a service based on a historical previously paid claim(s) as defined by the Agency	No								
Benefit & Reference Data Management	BRDM31	The Contractor's solution shall provide the capability to clone a claim in a test environment to modify specific data fields (e.g., reimbursement methodology, procedure code) and adjudicate the claim.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Benefit & Reference Data Management	BRDM32	The Contractor's solution shall automatically update Insurance plan information on individual records when the carrier plan is changed as defined by the Agency.	No								
Benefit & Reference Data Management	BRDM33	The Contractor's solution shall generate a configurable Explanation of Benefits (EOB) for each member in a selected group of members based on configurable criteria defined by the Agency.	No								
Business Rules	BR02	The Business Rules Engine (BRE) shall allow authorized system users including Department resources the ability to create, configure and maintain rules for business functions in a user-friendly graphical user interface (GUI) that facilitates rules maintenance without coding changes.	Yes								
Business Rules	BR03	The Contractor shall provide real time access to a Business Rules Catalog, in an electronic format approved by the State, that documents all business rule logic used by the solution.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Business Rules	BR04	The Contractor shall update the Business Rules Catalog with all additions or changes.	Yes								
Business Rules	BR05	The Contractor's Business Rules Engine shall be integrated into a testing environment that contains production data to allow users to perform "what if testing" and compare the before and after outcomes. The Contractor will provide Department staff and designated project resources, support and access to reports or reporting tools to evaluate the impact analysis.	Yes								
Business Rules	BR06	The Contractor's Business Rules Catalog shall include granular check-out and check-in rules and an audit trail of business rules changes.	Yes								
Business Rules	BR08	The Business Rules Engine shall allow changes to be made to valid values without impacting production rules engine availability and operations.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Business Rules	BR09	The Business Rules Engine shall include the ability to debug business rules at rule execution.	Yes								
Business Rules	BR10	The Contractor shall provide the ability to allow multiple users to work concurrently on different parts of the same rule base.	Yes								
Business Rules	BR11	The Business Rules Engine shall have the ability to rollback to prior versions of rules without impacting production rules engine availability and operations.	Yes								
Business Rules	BR12	The Contractor shall provide and maintain a graphical representation of business rule flow(s) and orchestration for all business rules.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Business Rules	BR13	The Business Rules Engine shall have mechanisms to identify which rules are executed for each specific business process.	Yes								
Business Rules	BR14	The Business Rules Engine shall be able to produce a report on rules passed or failed for all transactions	Yes								
Business Rules	BR15	The Business Rules Engine shall send alerts to the appropriate resource for issues identified in the rules engine. The Contractor will take appropriate action to address any alerts or rule failures.	Yes								
Business Rules	BR16	The Business Rules Engine rules editor shall allow subject matter experts or technical resources to write natural language business rules (i.e. human readable).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Business Rules	BR17	The Business Rules Engine shall provide the ability to prioritize, sequence, and allow administrators to control processing.	Yes								
Business Rules	BR20	Where applicable, the business rules engine shall use standardized business rules definitions.	Yes								
Business Rules	BR21	The Contractor's business rules shall execute in a runtime environment.	Yes								
Business Rules	BR27	The Contractor shall configure, support and maintain a business rules capability (e.g., add, modify, or remove/retire rules) based on the Service Architecture (SOA).	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Certification	CERT01	The Contractor shall develop a Certification Crosswalk that describes how the Contractor's deliverables and other documentation align with federal certification requirements and MECT milestone reviews.	Yes								
Certification	CERT02	The Contractor shall complete milestone updates of the CMS Certification Checklists as requested by the State.	Yes								
Certification	CERT03	The Contractor shall validate the system against the CMS Certification Checklists	Yes								
Certification	CERT04	The Contractor shall contribute to the quarterly IV&V certification reports.	Yes								
Certification	CERT05	The Contractor shall provide staff resources to support MECT milestone review and certification activities including participating in planning activities, meetings and other activities as required by CMS.	Yes								
Certification	CERT06	The Contractor shall assist the Agency in preparing certification artifacts, evidence and presentation materials, e.g., Requirements/ user stories and/or use cases for functional and non-functional requirements, data, business, capacity/performance, security/privacy/HIPAA compliance, usability, maintainability, interface, 508 compliance, disaster recovery, traceability to test plans or test cases	Yes								
Certification	CERT07	The Contractor shall participate and support as needed in CMS certifications of the other modules	Yes								
Certification	CERT08	The Contractor shall expeditiously correct, all required remediation activities related to certification findings on a schedule to be approved by CMS and the State.	Yes								
Certification	CERT09	The Contractor shall use appropriate testing, configuration and change control procedures for all changes made to the solution during the certification process.	Yes								
Certification	CERT10	The Contractor shall update system, user, and training documentation as necessary to support the certification process and to reflect changes that have been made to the solution during the certification process.	Yes								
Certification	CERT11	The Contractor shall ensure system CMS Certification through correct design, implementation, documentation and certification support.	Yes								
Certification	CERT12	The Contractor shall coordinate with the State to develop CMS Certification Checklist documentation for each MECT Checklist requirement.	Yes								
Certification	CERT14	The Contractor shall populate the certification document repository, as each required item/artifact is completed and approved.	Yes								
Certification	CERT16	The Contractor shall present at milestone reviews and other certification meetings as directed by the State.	Yes								
Claims Data and Reporting	CDR01	The Contractor's solution shall track, maintain, store, and report data from all claims transaction types (e.g., fee for service, encounter) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR02	The contractor's solution shall have the capability to capture, track, store, maintain and report the status of all claims related grievances and appeals from receipt to determination, as defined by the Agency (e.g., number of grievances/appeals received, resolved, rejected, escalated, and timeframe of resolution) as defined by the Agency.	No								
Claims Data and Reporting	CDR03	The Contractor's solution shall create, maintain, and store payment reports as defined by the Agency (i.e., Per member per month, NET or other capitation payments)	No								
Claims Data and Reporting	CDR04	The Contractor's solution shall identify, track, audit and report managed care transactions (e.g., service data, payments) for all healthcare programs, as defined by the Agency.	No								
Claims Data and Reporting	CDR05	The Contractor's solution shall store, maintain, track, display and report all claims processing activity throughout the adjudication process (e.g., backlog, suspended claims by status and location, manual entry, adjustments) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR07	The Contractor's solution shall identify, track and report claims flagged for investigation due to suspect or confirmed third-party liability discrepancies as defined by the Agency.	No								
Claims Data and Reporting	CDR08	The Contractor's solution shall maintain and report on all service authorization activity (e.g., requests, determinations, responses and utilization), as defined by the Agency.	No								
Claims Data and Reporting	CDR09	The Contractor's solution shall maintain, track, and report claims data (e.g., prompt payment of clean claims, claims inventory) to support compliance with 42 CFR 447.45	No								
Claims Data and Reporting	CDR10	The Contractor's solution shall maintain, track, provide audit history, and report all financial transactions between Entities and the Agency (e.g., payments, takebacks, receivables, credit balance, claims), as defined by the Agency	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR11	The Contractor's solution shall track, maintain, and report recoveries for the federal share of overpayments to support compliance with 42 CFR 433.320 as defined by the Agency.	No								
Claims Data and Reporting	CDR12	The Contractor's solution shall track, store, and maintain, and report all user activity (e.g., access history, claims editing, provider updates, benefit plan changes, rate and fee schedule changes) as defined by the Agency.	No								
Claims Data and Reporting	CDR13	The Contractor's solution shall identify, track, store, and report detailed information supporting history-o recoveries and payments as defined by the Agency.	No								
Claims Data and Reporting	CDR14	The Contractor's solution shall identify, track, audit, and report inter and intra-governmental payments a receivables (e.g., Qualified Rate Adjustments (QRA's) and Upper Payment Limits (UPLs)) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR15	The Contractor's solution shall have the ability for authorized users to run pre-defined and adhoc queries on claims data within the solution for reporting, as defined by the Agency.	No								
Claims Data and Reporting	CDR16	The Contractor shall analyze and report on proposed reference file changes (e.g. Benefit Plan, provider rate changes, taxonomy updates, category of service updates) as defined by the Agency.	No								
Claims Data and Reporting	CDR17	The Contractor's solution shall produce premium collection reports, per Agency defined criteria.	No								
Claims Data and Reporting	CDR18	The Contractor's solution shall monitor, track, and report on claims processing quality standards (e.g. percentage of claims resolved, keying error rate, etc.) as defined by the Agency	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR19	The Contractor's solution shall track, store, and report claims paid based on configurable business rule (e.g. using a percent of billed charges with maximum allowable amounts for procedures, provider types, and participant demographics) per Agency defined criteria.	No								
Claims Data and Reporting	CDR20	The Contractor's solution shall create, update, store, and maintain required and supplemental information to identify and group all claims transactions and non-claim transactions for completion of specified federal and state report (e.g. CMS-64, CMS-416 report,) per Agency defined criteria.	No								
Claims Data and Reporting	CDR21	The Contractor's solution shall have the ability to generate a scheduled payment report on all Health Insurance Premium Payments (HIPP), as defined by the Agency.	No								
Claims Data and Reporting	CDR22	The Contractor's Solution shall provide the capability to create, store, maintain CMS invoices and financial transaction summary reports, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR23	The contractors solution shall accept, store, and maintain current and historical provider data, per Agency defined criteria.	No								
Claims Data and Reporting	CDR24	The contractor's solution shall have the ability to maintain and store current and historical batch execution reports (e.g., claims, TPL, eligibility, PA, COBA), per Agency defined criteria.	No								
Claims Data and Reporting	CDR25	The Contractor's solution shall provide a configurable report for all current and future approved HIPAA ASC X12 transactions from covered entities (e.g., health plans, health care clearinghouses, billing companies, trading partners, and health care providers) as defined by the Agency.	No								
Claims Data and Reporting	CDR26	The Contractor's Ad hoc reporting solution shall have the ability to distribute weekly and monthly summarized database views per Agency requirements.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Claims Data and Reporting	CDR46	The Contractor's solution shall have the ability to produce the Abortion Listing report as specified by Agency.	No								
Claims Data and Reporting	CDR47	The Contractor's solution shall have the ability to transmit data directly to other entities (e.g. actuaries) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR48	The Contractor's solution shall receive and store claims processing and payment information by service category or provider type to analyze timely processing of provider claims according to requirements (standards) in 42 CFR 447.45.	No								
Claims Data and Reporting	CDR49	The Contractor's solution shall maintain reporting services that are backward compatible, and the reports functionality is preserved over major or minor releases or the contractor will provide migration support to move reports forward.	No								
Claims Data and Reporting	CDR50	The Contractor's solution shall support payment reimbursement methodology research, analysis and development by providing expenditure data through service codes including but not limited to: -healthcare common procedure coding system (HCPCS), current version -international classification of diseases (ICD), clinical modifier, current version -national drug code (NDC), current version	No								
Claims Data and Reporting	CDR51	The Contractor shall develop a repayment schedule for the payee in coordination with the Agency in circumstances where there are insufficient claims or payee funds to satisfy recoveries within 75 days upon detection of an overpayment.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Claims Data and Reporting	CDR52	The Contractor shall recover all overpayments within 30 calendar days from detection of an overpayment.	No								
Compliance	CMP01	The Contractor shall, upon request by the State or at the end of the contract, transfer or destroy all documentation in the custody of the Contractor. The Contractor shall provide the transferred records and data in a format agreed upon by the State.	Yes								
Compliance	CMP03	The Contractor shall notify the State in writing within five (5) business days following initial detection of suspected fraud or abuse and provide supporting documentation.	Yes								
Compliance	CMP04	The Contractor's solution shall have full integration of the MITA initiative with business, architecture and data required to support the State's healthcare programs.	Yes								
Compliance	CMP05	The Contractor shall adhere to data retention requirements cited in 45 CFR 164.316 and Administrative Rule 37.85.414. The Department may require a longer retention period on an exception basis to support ongoing business needs (e.g., TPL recovery and drug rebate).	Yes								
Compliance	CMP06	The Contractor shall have written policies governing access to, and duplication and dissemination of all individual or entity information.	Yes								
Compliance	CMP07	The Contractor shall comply with all sections of the Americans with Disabilities Act (ADA), Section 508 of the Rehabilitation Act and ensure user interface standards account for the various forms of colorblindness.	Yes								
Compliance	CMP08	The Contractor and its services, work products and final deliverables provided by the Contractor applicable to the services described in the scope of work shall be knowledgeable of and in compliance with pertinent State and Federal Statutes, CIO Promulgated Rules, State IT policies, rules, and standards for required system hardware, software and development tools and processes, and operational procedures when completed and accepted by the Department. The Contractor shall also be aware of upcoming changes to existing rules and regulations as well as new rules and regulations that may impact the scope of work.	Yes								
Compliance	CMP09	The Contractor shall adhere to recognized best practices during the execution of the scope of work including the latest version of the National Institute of Standards and Technology (NIST) Special Publication (SP) 800 series related to cyber security.	Yes								
Compliance	CMP10	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0 Standards and Conditions-MITA Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data.	Yes								
Compliance	CMP11	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0 Standards and Conditions - Industry Standards Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data. The Contractor shall ensure alignment with, and incorporation of, industry standards, HIPAA, privacy and transaction standards; accessibility standards, and standards that provide greater accessibility for individuals with disabilities and standards under the Affordable Care Act.	Yes								
Compliance	CMP12	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0 Standards and Conditions - Leverage Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data. The Contractor shall promote sharing, leveraging, and reuse of healthcare technologies and systems within and among states.	Yes								
Compliance	CMP13	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0 Standards and Conditions -Business Results Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data. The Contractor shall support effective communications with providers and the public.	Yes								
Compliance	CMP15	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0-Standards and Conditions- Interoperability Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data. The Contractor's solution shall ensure seamless coordination and integration with components, other systems and allow interoperability with health information exchanges, public health agencies, human services programs, and community organizations providing outreach and enrollment assistance services and federal data services.	Yes								
Compliance	CMP16	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0-Standards and Conditions- Modularity Standard or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data. The Contractor's solution shall use a modular, flexible approach to systems development, including the use of open interfaces and exposed Application Programming Interfaces (API); the separation of standardized business rule definitions from core programming; and the availability of standardized business rule definitions in both human and machine readable format.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Compliance	CMP17	The Contractor must provide the Department with compliance assurances for the Contractor scope of work.	Yes								
Compliance	CMP18	The Contractor shall be fully compliant with the Health Insurance Portability and Accountability Act of 19 (HIPAA, Public Law 104-1919) and Administrative Simplification (Subset of Title II) requirements in effect as of the date of release for the RFP and with any changes that subsequently occur, unless otherwise noted.	Yes								
Compliance	CMP19	The Contractor shall enter into a Business Associate Agreement (BAA) prior to the initiation of work. The Contractor and the Department acknowledge and agree that the Business Associate Agreement is subject to HIPAA, and the HIPAA implementation regulations thereunder, and the Health Information Technology for Economic and Clinical Health Act (HITECH), and the HITECH implementation regulations thereunder. Under the Agreement, both parties are responsible for security and privacy compliance and must take advantage of the appropriate security capabilities and measures and adequate data validation, as well as have appropriate policies and procedures in place to minimize or prevent unlawful access by any person who may have access to the entire database.	Yes								
Compliance	CMP20	The Contractor shall ensure all information not specifically identified as Protected Health Information (PHI) or Personally Identifiable Information (PII) as defined under HIPAA and/or HITECH is treated as privileg communications, held confidential, and must meet the terms and conditions specified in the RFP, BAA and Contract.	Yes								
Compliance	CMP21	The Contractor shall ensure that except as provided by law, no information in the possession of the Contractor about any individual shall be disclosed without prior written consent.	Yes								
Compliance	CMP22	The Contractor shall follow all applicable technical standards for site and system security policies and procedures to protect the Department's healthcare data and information systems.	Yes								
Compliance	CMP23	The Contractor's data management approach and operational policies shall meet HIPAA, HITECH, ARRA and other federal and State privacy and security requirements.	Yes								
Compliance	CMP25	The Contractor shall retain, all original paper documents for fifteen (15) calendar days from the date the documents are received and have been scanned, indexed, stored in the ECM and meet verification process standards. Original documents may be destroyed once indexed and stored in the ECM and the retention period is met in accordance with State and Federal guideline	Yes								
Compliance	CMP26	The Contractor shall maintain an auditing system and employ accounting/auditing procedures and practices that conform to GAAP and GAAS. All charges applicable to the contract shall be readily ascertainable from such records.	Yes								
Compliance	CMP27	The Contractor will ensure that all technologies implemented are in compliance with any End User Licensing Agreements or other licensing arrangements.	Yes								
Compliance	CMP29	The Contractor shall comply with Affordable Care Act Section 1104 Administrative Simplification, and Section 1561 Health IT Enrollment Standards and Protocols.	Yes								
Compliance	CMP30	The Contractor's solution shall ensure that all data necessary for legal requirements is retained.	Yes								
Compliance	CMP32	The Contractor shall provide a mechanism to purge source documents in accordance with HIPAA secu provisions and State requirements.	Yes								
Compliance	CMP37	The Contractor's Information Technology Equipment and Software purchased and licensed with monies under this Contract for use by departmental employees, program participants, or members of the public must provide, as required by 18-5-604, MCA, blind or visually impaired persons with access, including interactive use of the equipment and services, that is equivalent to that provided to persons who are not blind or visually impaired.	Yes								
Compliance	CMP39	The Contractor's solution shall be compatible with multiple standard browsers in accordance to the State's IT Standards which can be found in the Procurement Library. The solution shall be compatible with standard browsers without requiring specialized or proprietary plug-ins.	Yes								
Compliance	CMP40	The Contractor shall be knowledgeable of and support the Department to maintain compliance with the "to be" vision of MITA 3.0 Standards and Conditions -Business Results Condition or the latest MITA version that requires states to align to and advance in MITA maturity for business, architecture and data in supp of the business results condition to accurately and timely adjudicate claims.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Correspondence Management	COR01	The Correspondence Management Solution must be able to generate correspondence (e.g., scheduled and ad-hoc correspondence and bulletins) using standard letters or forms, letter templates, and free-form letters.	Yes								
Correspondence Management	COR03	The Contractor's solution shall utilize industry standard barcode technology that is approved by the Department.	Yes								
Correspondence Management	COR04	The Contractor shall utilize letter, notification and other templates for correspondence that are approved by the Department.	Yes								
Correspondence Management	COR06	The Contractor's solution shall send documents and the necessary indexing metadata to the modular integration platform for storage of documents in the enterprise content management solution (ECM).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Stat**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Correspondence Management	COR07	The Contractor's solution shall store all sent or received documents in the ECM.	Yes								
Correspondence Management	COR08	The Contractor's Correspondence Management Solution must be able to integrate variable data to maximize efficiency.	Yes								
Correspondence Management	COR10	The Contractor shall generate applicable notices to members, providers, and other entities (e.g., enrollment/disenrollment notices, requests for information, and program information).	Yes								
Correspondence Management	COR13	The Contractor's solution shall provide the ability to create materials at between a sixth and eighth grade reading level and for a culturally diverse population.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Stat**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Correspondence Management	COR24	The Contractor's correspondence engine shall be configured to generate, print, and mail enterprise correspondence.	No								
Correspondence Management	COR25	The Contractor shall ensure that correspondence, printing, and mailing expenditures that are approved by the Department will be handled as pass-through expenditures.	No								
Data Conversion, Cleansing and Migration	DC02	The Contractor shall provide authorized Department or other designated staff access to an environment to validate converted data and provide support for the data validation effort.	Yes								
Data Conversion, Cleansing and Migration	DC03	The Contractor shall work with the State to identify the data elements that will be converted into the Contractor's solution. For legacy data elements that cannot be converted into the Contractor's solution, the Contractor shall work with the State to achieve desired business outcomes using the data elements in the Contractor's solution.	Yes								
Data Conversion, Cleansing and Migration	DC04	The Contractor shall work with the State to identify data elements or fields in the Contractor's solution that are not available to be converted from the legacy system, and whether the conversion programs should fill them with default or initial values.	Yes								
Data Conversion, Cleansing and Migration	DC05	The Contractor must perform one or more trial conversions as necessary, before final conversion of the data, and present the results to the State.	Yes								
Data Conversion, Cleansing and Migration	DC06	The Contractor shall produce the reports necessary to demonstrate adequate checks and balances within the data conversion process.	Yes								
Data Conversion, Cleansing and Migration	DC08	The Contractor shall convert electronic documents identified by the Department in a format approved by the Department.	Yes								
Data Conversion, Cleansing and Migration	DC16	The Contractor shall provide access to converted electronic documents in their solution from systems being replaced.	No								
Data Conversion, Cleansing and Migration	DC17	The Contractor shall convert all member and provider data history for any member or provider that has been active within the past three years and three (3) years of all applicable operational data from the State's legacy systems. The Department may require additional data to be converted on an exception basis to support ongoing business needs (e.g., TPL recovery, SURS recovery and drug rebate). In addition, the Contractor shall convert all data related to: once in a lifetime events, active SURS or TPL cases, future TPL case (e.g., members over 55 years of age that have ever been in a nursing home), drug rebates, and service frequency limits as defined by the Agency. The Contractor shall produce comparative reports for all converted data. Any data quality issues will be addressed by the State within each source system.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM02	The Contractor's solution shall provide an indicator to suppress generation of documents containing Member identification for confidential services.	Yes								
Data Management	DM03	The Contractor's solution shall maintain a record/audit trail of a Member's requests for copies of personal records (including time/date, source, type, and status of request).	Yes								
Data Management	DM04	The Contractor's solution shall maintain record/audit trail of errors during update processes, accounting for originating source and user.	Yes								
Data Management	DM05	The Contractor's solution shall be able to store existing relationships created in other systems (e.g., a filing unit, parent/legal guardian/caretaker to a child/dependent, and any other member relationship(s) required to administer the State's healthcare programs).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM06	The Contractor's solution shall maintain a current and historical record of benefit plan assignment(s) for members, including periods of dual-eligibility. historical record of benefit assignment(s) for a client including identifying dual-eligibility spans.	Yes								
Data Management	DM09	The Contractor's solution shall provide audit trails to allow information on all transactions to be traced from receipt of the transaction through the completion of the transaction, capture at a minimum date/timestamp, data source, worker id, action taken and log any errors encountered for reporting.	Yes								
Data Management	DM10	The Contractor shall ensure that all narrative descriptions of codes and abbreviations are available for reporting.	Yes								
Data Management	DM11	The Contractor shall develop and maintain an electronic data dictionary using industry best practices to approved by the Department. At a minimum, the data dictionary shall contain for each field: field name in human readable format, field description, database field name, database table, field type and length, valid values and their corresponding descriptions.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM114	The Contractor's solution shall use the most current version of clinical codes (e.g., ICD-10, HCPCS, CPT, ICD Surgical Procedure Codes, NDCs).	Yes								
Data Management	DM115	The Contractor's solution shall collect, store, and maintain the data necessary for T-MSIS reporting as required by CMS.	Yes								
Data Management	DM13	The Contractor shall be able to demonstrate the ability to support requirements for backup and archiving consistent with Department SLAs and CMS, State, and industry standards. The Contractor shall also adhere to data retention requirements cited in 45 CFR 164.316 and the State's Administrative Rules.	Yes								
Data Management	DM138	The contractor shall participate in governance processes led by the Agency and including the System Integrator and other module vendors as appropriate during design, definition, and any subsequent revisions of data formats to be used for communicating data to and from the module.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM139	The Contractor shall provide the capability to exchange data in standard and non-standard formats as well as structured and unstructured data with multiple sources.	Yes								
Data Management	DM14	The Contractor's solution shall maintain an audit trail of all changes to data, including changes that were made in error and subsequently backed out of or suspended.	Yes								
Data Management	DM140	For audit and reporting purposes, the system shall provide and maintain the following data for all reference codes: a. Effective date b. End date c. Date when last changed d. Who made last change e. Short description f. Long description g. Create date h. Create user	No								
Data Management	DM141	The Contractor shall provide real-time access to transactional data (e.g., detailed data for member, provider, claims, and claims-related functions) for all module components).	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM142	The Contractor's solution shall provide the ability to modify transactions (e.g., updates to reference information, member demographics and eligibility, provider information, service authorization details and amount used, TPL information) in real-time	No								
Data Management	DM143	The Contractor's solution shall capture, maintain, and link relevant information (e.g., member and provi associated with the claim (for all claims) during the adjudication process for the claim date of service.	No								
Data Management	DM144	The Contractor's solution shall retain in the module, after implementation, seven (7) years of electronically imaged documents and data. After seven (7) years, the data will be purged (deleted) from that module. All active records (active providers, active members, active cases, etc.) and 100% of all history for any entity or case that has been active within the last seven years will be retained. Any entity and/or case that has been continuously inactive for the last seven years will not be retained, will be purged, and will no longer be accessible by users in that module. In addition, the following exceptions apply to the data retention limitations: once in a lifetime events, active SURS or TPL cases, future TPL case (e.g, .members over 55 years of age that have ever been in a nursing home), drug rebates, and service frequency limits as defined by the Agency.	Yes								
Data Management	DM145	The Contractor's solution shall provide, implement, operate, and maintain a data modeling tool to develop and maintain comprehensive structural metadata data models for data processed by, stored in, or delivered for consumption from the solution for the duration of the Contract that includes the documentation and illustration of data elements, structures, and their relationships of the following: ● Conceptual Data Model - a graphical depiction of the conceptual data model for the solution that identifies data field names and relationships. Business process flows and data models (e.g., Entity Relationship Diagrams (ERD) and any other descriptive graphic document) of the entire system and all modules and functions, showing all inputs, processes, programs, interfaces, program interrelationships, and outputs ● Logical Data Model - a graphical depiction of the logical data model for the solution that provides data field names, attributes and relationships, data tables, and primary key fields ● Physical Data Model - a graphical depiction of the physical data model for the solution that identifies data field names, attributes and relationships, data tables, and primary key fields. Unlike the conceptual and logical data models that use descriptive table and field names, the physical data model will reference actual table and field names used for coding.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM17	The Contractor's solution shall provide the ability to store and apply updates to all applicable codes upd new release at an interval appropriate for the data or when requested by the Department.	Yes								
Data Management	DM18	The Contractor's solution shall perform batch control including logging and reporting.	Yes								
Data Management	DM19	The Contractor's solution shall archive all versions of reference information and update transactions.	Yes								
Data Management	DM20	The Contractor's solution shall have the ability to void or reverse recent changes by rolling back to prior configurations.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM21	The Contractor's data management strategy shall include the following concepts: Data Integrity (data cannot be modified undetectably), Data Availability (access is not inappropriately blocked or denied), Data Authenticity (validation of transactions), Data Security (encryption and Department approved security protocols and processes), Non-repudiation of Data (parties to a transaction cannot deny their participation in the transaction).	Yes								
Data Management	DM22	The Contractor's solution shall provide entity search capability including the ability to search by entity type, entity name, entity address elements, entity phone number(s), unique identifier for entity type, any alternate identifiers including EIN, SSN, TIN and other demographic elements.	Yes								
Data Management	DM24	The Contractor shall ensure complete transparency of all data fields in reports generated by the system including: providing the Department with SQL, pseudo code, narrative description, analytic protocols and assumptions to document the logic and formulas used in all calculations.	Yes								
Data Management	DM25	The Contractor shall create and maintain a suite of State/Contractor-defined on-line reports to allow users to choose from pre-built defined parameters (such as provider number, procedure code, date of service, etc.) to generate customized reports for monitoring the daily operations of the system and Fiscal Agent Operations.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM26	The Contractor shall certify that any and all unmasked or unscrambled Department data will reside in data centers located in the continental United States. Additionally, this data will only be accessible by resour within the continental United States that have completed the necessary HIPAA and PHI training. Any data that will be accessed by resources that are not physically located in the United States will be masked or scrambled (which would make it impossible to establish a connection between claims data and a specific member or provider associated with the claim) thereby removing the HIPAA and PHI connection between interested parties and the claim data.	Yes								
Data Management	DM31	The Contractor's solution shall be configured and maintained to validate and standardize addresses according to United States Postal Service (USPS) verification, validation and standardization rules.	Yes								
Data Management	DM37	The Contractor's solution shall facilitate real-time data processing including data cleansing, data loading data brokerage, integration, validation, reconciliation, and synchronization with the State's enterprise.	Yes								
Data Management	DM38	The Contractor's solution shall optimize and consolidate data management storage.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM39	The Contractor's solution shall maintain all data sets defined by the HIPAA Implementation Guides to support storage of all transactions required under HIPAA Administrative Simplification Rule (e.g., Gender, Reason Code) for seven (7) years.	Yes								
Data Management	DM40	The Contractor's solution shall maintain a normalized RDBMS with referential integrity and is optimized to meet performance requirements.	Yes								
Data Management	DM41	The Contractor's solution shall provide a method to access, query, and report against archived data external to the Operational Data Store (ODS).	Yes								
Data Management	DM43	The Contractor shall demonstrate through data analysis that the implementation outcomes have been validated and are accurate.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM44	The System shall maintain a snapshot of member eligibility and plan enrollment information (i.e., full audit history or equivalent capabilities) that existed at the time of claims/encounters/capitation adjudication or payment. All transactions, including the execution of database scripts, need to be recorded in the full audit history.	Yes								
Data Management	DM47	The Contractor shall participate in ongoing data governance meetings as required by the Department.	Yes								
Data Management	DM52	The Contractor's solution must have the flexibility to quickly accept new and incremental data items from module components required by the ongoing component, product or service integration.	Yes								
Data Management	DM54	While the Department prefers real-time/event driven process, the Contractor shall provide a tool to easily administer and execute scheduled events (e.g. reports, file transfers, processes, notifications) to be performed on a regular basis (e.g. daily, weekly, monthly).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM56	The Contractor's solution shall receive and process member eligibility information from external sources (such as through the State's Eligibility Systems) on a real-time or near real-time basis, including: a. Producing total and detailed information that supports error correction and synchronization. b. Applying reconciliation changes.	Yes								
Data Management	DM57	The Contractor shall standardize the structure and visibility of data and applications to support automated electronic data exchanges within the State's enterprise to promote interoperability.	Yes								
Data Management	DM58	The Contractor's solution shall maintain online access to at least four (4) years of selected management reports and five (5) years of annual reports.	Yes								
Data Management	DM60	The Contractor shall be responsible for data management including ensuring the architecture addresses data semantics, data harmonization, and shared-data ownership.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM61	The Contractor's solution shall collect and maintain the relevant data necessary to support the budget neutrality reporting requirements specified in the State's 1115 Waiver (including the ability to identify those Members who would be ineligible for Medicaid in the absence of the State's 1115 Waiver).	Yes								
Data Management	DM62	The Contractor's solution will ensure current and historical provider IDs are linked back to one universal/common identifier.	Yes								
Data Management	DM63	The Contractor's solution shall assign standardized unique internal identifiers for entities and prevent the creation of duplicate records.	Yes								
Data Management	DM64	The Contractor shall be responsible for backup and retention of data to include: 1. Daily incremental backups with retention of sixty-one (61) days. 2. Weekly incremental backups with retention of twelve (12) weeks. 3. Monthly full backups with retention of eighteen (18) months. 4. Annual full backups with retention of seven (7) years.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

Data Management	DM65	The Contractor's solution will provide service authorization search based on user defined criteria (e.g., provider name, provider ID, member name, member Medicaid ID number, date of submission range, dates of service requested range, service requested, status of the request).	No								
Data Management	DM69	The Contractor's solution shall maintain online access to all reference tables with an option to search and display by reference data type and code.	Yes								
Data Management	DM70	The Contractor's solution shall maintain user controlled parameters for all standards and messages.	Yes								
Data Management	DM71	The Contractor's solution shall verify that all dates are valid and reasonable.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM72	The Contractor's solution shall provide proper data validation rules (e.g., all fields defined as alphabetic contain only alphabetic data, fields defined as numeric contain only numeric data, items with definitive upper and/or lower bounds are within the proper range).	Yes								
Data Management	DM73	The Contractor's solution shall capture and maintain the data items needed for State or Federal reporting requirements.	Yes								
Data Management	DM74	The Contractor's solution shall validate calculated data items.	Yes								
Data Management	DM75	The Contractor's solution shall validate, and/or verify that all data items that contain self-checking digits (e.g., National Provider Identifier) passes a specified check-digit test.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Data Management	DM79	The Contractor's solution shall support the Extract, Transform and Load (ETL) processes from real-time web services or batch processes.	Yes								
Design, Configuration and Build	DCB01	The Contractor's solution shall accommodate customer preferences for communications by electronic inbox, written correspondence, email, text, and phone.	Yes								
Design, Configuration and Build	DCB03	The Contractor shall conduct collaborative design sessions to address all gaps identified during requirements validation.	Yes								
Design, Configuration and Build	DCB04	The Contractor shall, in the design sessions, recommend solutions for each configuration gap, as defined in requirements validation, that will produce the desired business outcomes. If a gap cannot be addressed via configuration, the Department may consider making policy changes before approving customizations to the solution.	Yes								
Design, Configuration and Build	DCB05	The Contractor shall demonstrate completed functionality frequently as the solution is configured/built, using a fully functioning environment.	Yes								
Design, Configuration and Build	DCB06	The Contractor shall migrate completed releases promptly through various testing levels all the way to User Acceptance Testing (UAT).	Yes								
Design, Configuration and Build	DCB07	The Contractor shall provide the design for online help approach and documentation, as appropriate.	Yes								
Design, Configuration and Build	DCB08	The Contractor shall work with the Systems Integrator and the Department to establish required interfaces as defined in the detailed scope of work.	Yes								
Design, Configuration and Build	DCB09	The Contractor shall provide office space for Contractor staff and meeting rooms as necessary to support the scope of work and contractual obligations.	Yes								
Design, Configuration and Build	DCB11	The Contractor shall develop auditing and general controls to ensure the effective use of the technical architecture and data in meeting requirements.	Yes								
Design, Configuration and Build	DCB12	The Contractor must provide all technology and equipment for contractor staff necessary to support and complete the scope of work and the contractual obligations.	Yes								
Design, Configuration and Build	DCB13	The Contractor shall be responsible for operating and maintaining any software needed to support all module components and project tools in use by the Contractor.	Yes								
Design, Configuration and Build	DCB14	The Contractor's solution shall have the ability to print a properly formatted representation of the entire screen (including sections not displayed without scrolling) and associated data in the application.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Design, Configuration and Build	DCB15	The Contractor shall provide recommendations for simplified business rules and business processes to Department.	Yes								
Design, Configuration and Build	DCB18	The Contractor shall configure, support and maintain all components of the solution in a manner that reflects performance expectations described in this RFP.	Yes								
Design, Configuration and Build	DCB19	The Contractor's solution shall be free of any software components that are the result of legacy code transformation.	Yes								
Design, Configuration and Build	DCB20	The Contractor's solution shall provide Web based content that is supported by standard web browsers and are mobile and tablet compatible.	Yes								
Design, Configuration and Build	DCB21	The Contractor's solution shall allow the Department to edit and change any static text in the application and correspondence templates. All static text must be approved by the Department.	Yes								
Design, Configuration and Build	DCB27	The Contractor shall develop and submit a design and configuration schedule, agendas, and minutes fo review by the Department.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC01	The Contractor shall develop, execute, maintain and deliver for the State's approval, a System Security Plan (SSP) that will document the current level of security controls within the module scope of work that protects the confidentiality, integrity and availability (CIA) of the solution and its information. This is a living document and will be updated no less than annually and when new vulnerabilities are identified and mitigated and when additional functionality and/or components are implemented. The System Security Plan must be approved before any State data is transferred or entered into the solution. The State must approve all revisions of the System Security Plan. If the Contractor's solution is hosted by the State, the State will provide supporting information to the Contractor to complete the SSP. The SSP must address the following topics: • Adherence to the State's requirements outlined in the "Security and Privacy Controls Requirements" document, included in the Procurement Library; • Compliance with the Centers for Medicare and Medicaid Services (CMS) Acceptable Risk Safeguards (ARS) to assess CIA and NIST SP 800-53 Rev 4 at a "moderate" control level; • Data center physical security; • Network segmentation, access controls, and forensics; • Perimeter security; • Application security and data sensitivity classification, including Protected Health Information (PHI) and Personally Identifiable Information (PII); • End-point protections such as multiple redundant firewalls and host-based intrusion detection systems;	Yes								
Documentation	DOC02	The Contractor shall develop and maintain a Certification Plan that defines the contractor's approach to CMS certification. It must describe the processes and procedures that will be used to manage Certification requirements. The Certification Plan must comply with the most current MECT process to ensure the system will meet all certification requirement	Yes								
Documentation	DOC03	The Contractor shall develop, submit, and maintain a Data Management, Conversion and Migration Plan to include the following: a. A data management strategy that will support integration, optimization, quality, stewardship, standards, and governance of data. b. description of appropriate skill sets, processes, technologies/tools, and any naming conventions followed. c. Approach to conversion, cleansing and migration. d. Approach to risk management for data conversion effort. e. Approach for testing migration or converted data; f. Approach to reporting the number of records successfully converted vs. errors or exceptions. g. Approach for cleansing data to prepare it for loading to the proposed solution that is refined as necessary. h. Approach to resolving data conversion errors and issues. i. Approach for supporting the Department validation of converted data. j. Tasks, timelines, and responsible parties for all conversion and migration tasks.	Yes								
Documentation	DOC04	Prior to beginning design and configuration/build activities, the Contractor must develop and submit to the State an Application Configuration and Maintenance Plan that describes the Contractor's approach to applications configuration and enhancements including: a. Approach to conducting design sessions or walkthroughs. b. Approach to conducting sprints or iterations. c. Configuration management. d. Schedule of major and minor releases. e. Tasks, timelines, and responsible parties for design and configure/build tasks. f. Approach to system enhancements g. Programming and coding standards The plan must be maintained through the system implementation. Revisions must be approved by	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC07	The Contractor shall provide during the initiation phase of the project and maintained throughout the project, user documentation. The State requires User Documentation for use by a novice business user to understand the automated system or application from a business function perspective. The Contractor shall provide comprehensive, well-organized user documentation. The Contractor's User Documentation shall include at a minimum: • Written in a procedural step-by-step format. (Instructions for sequential functions must follow the flow of actual activity). • Manuals that helps users understand the purpose and operation of the module/module component(s) for each business process/major program/functional area. • Acronyms used in user instructions must be identified and must be consistent with windows, screens, reports, and the data element dictionary. • Cover system navigation, online help, and policies and procedures. • The documentation must be available on-line and provide an on-line search capability with context-sensitive help. • Provide the ability to produce a PDF version upon request • Use version control to retain historical versions of documentation and revisions must be clearly identified. • User documentation must be written and organized so that novice users can learn from reading the documentation how to access the on-line windows/screens, read reports, and perform all other user functions. • User manuals must contain a table of contents and an index.	Yes								
Documentation	DOC08	The Contractor shall develop and maintain annually, a Business Continuity and Disaster Recovery Plan that must be in place before any Department data is transferred or entered into the solution. The Plan must contain procedures for data backup, restoration, and emergency mode operations in the event of: a. Hardware or Software Failures; b. Human Error; c. Natural Disaster; and/or d. Other unforeseeable emergencies. The Business Continuity and Disaster Recovery Plan must be approved by the Department.	Yes								
Documentation	DOC09	The Contractor's Business Continuity portion of the plan must include the following: a. Identification of the core business processes involved in the production solution. For each core business process include: 1) Identification of potential failures for the process; 2) Risk analysis; 3) Impact analysis; and 4) Definition of minimum acceptable levels of service/output. b. Definition of triggers for activating contingency plans. c. Procedures for activating any special teams for business continuity. d. A plan for recovery of business functions, units, processes, human resources, and technology infrastructure.	Yes								
Documentation	DOC10	The Contractor's Disaster Recovery portion of the plan must address, at a minimum: a. Retention and storage of backup files and software; b. Hardware backup for critical solution components; c. Facility backup; d. Backup for any telecommunications links and networks; e. Backup procedures and support to accommodate the loss of any online communications; f. A detailed file backup plan, procedures, and schedules, including rotation to an off-site storage facility. g. The off-site storage facility must provide security of the data stored there, including protections against unauthorized access or disclosure of the information, fire, sabotage, and environmental considerations. h. An enumeration of the prioritized order of restoration for Contractor's proposed solution. i. Provide a short-term uninterruptible power supply to facilitate an orderly shutdown of the information system in the event of a primary power source loss.	Yes								
Documentation	DOC11	The Contractor shall update all project documentation (e.g., system design documentation, user and training documentation) as necessary throughout all phases of the project.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC12	The Contractor shall provide and maintain an Operations, Maintenance and Configuration Plan for the Department's approval that describes post-implementation processes for areas such as: a. Architecture/hosting operations. b. Monitoring daily operations performance. c. Performing routine maintenance. d. Maintaining user documentation. e. Online help approach and documentation, as appropriate. f. Configuration and change management. g. Approach to enhancements and other new requirements. h. Maintaining system documentation. i. Maintaining training documentation. j. Archiving requirements. k. Tasks, timelines, and responsible parties for design and configure/build tasks. l. Reporting status against relevant Service Level Agreements (SLAs) m. Schedule of major and minor releases.	Yes								
Documentation	DOC14	The State defines System Design Document (SDD) as documentation that describes how the functional and nonfunctional requirements recorded in the Requirements Response Matrix transform into more technical system design specifications from which the system is configured and built. The SDD documents the high-level system design and the low-level detailed design specifications. The SDD describes design goals and considerations, provides a high-level overview of the system architecture, and describes the data design associated with the system, as well as the human-machine interface and operational scenarios. The high-level system design is further decomposed into low-level detailed design specifications for each system component, including hardware, internal communications, software, system integrity controls, and external interfaces. The SDD documents and tracks the necessary information required to effectively define architecture and system design in order to give the development team guidance on the architecture of the system to be developed. Design documents are incrementally and iteratively updated during the system development cycle and includes proprietary contractor material (this excludes proprietary information related to COTS products). Its intended audience is the project manager, project team, and development team. The Contractor shall provide and maintain system design documentation that includes at a minimum: • A description of each component, their purpose, including basic functions and the business areas supported • User stories/use cases • User interface design • Physical database design • A module system diagram, including all components, identifying all business process diagrams, data flows, systems functions, and their associated data storage	Yes								
Documentation	DOC15	The Contractor shall develop and maintain a Communication Plan. The purpose of the Communication Plan is to provide a description of the communication that will occur on the project and how it will be managed. This includes details about various types and means of communication, communication channels, communication flow within the organizational structure, escalation, guidelines for meetings, dissemination of knowledge, and communication effectiveness. The Communication Plan shall ensure the communication approach addresses communication across multiple vendors. Effective	Yes								
Documentation	DOC16	The Contractor shall develop and maintain a Quality Management Plan. The Quality Management Plan identifies the quality standards for the project and how quality standards are measured. It includes the process steps and quality tools that will be used (e.g., templates, standards, and checklists).	Yes								
Documentation	DOC18	The Contractor shall develop and maintain a Change Management Plan. The Change Management Plan must include the following elements. a. Tools to support change management b. Change management process steps c. Escalation process d. Training	Yes								
Documentation	DOC19	The Contractor shall provide and maintain Technical Documentation including written description of module component(s) design, function and architecture that will provide guidance to system developers. Additionally, the Contractor must include a detailed list of all environments, each environments' IT technologies including software, middleware, hardware, utility applications, development tools, testing tools, and provides detailed information on the programming languages and protocols used.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC21	The Contractor shall provide a Solution Architecture Document. The Solution Architecture Document includes a technical explanation of all aspects of the solution including detailed architectural diagrams, data flows, component specifications, SaaS, COTS products and hosting environment details. The document will include architectural tradeoffs using the Architecture Tradeoff Analysis Method (ATAM) method or other suitable method for evaluating the proposed platform architecture relative to the enterprise goals to identify risks that would inhibit the achievement of Agency's business goals.	Yes								
Documentation	DOC22	The Contractor shall develop and maintain a Defect Management Plan that describes the process of submitting, monitoring and resolving defects. The plan will detail the following: a. Approach and tools utilized to assign, identify, prioritize, track, resolve, and test system defects. b. Approach to defect severity categorization using an industry standard methodology. c. Approach to reporting and documenting defects. d. Describe how the Contractor will work collaboratively with other State healthcare programs enterprise vendors. e. Describe the defect management processes related to all test types and levels in the RFP (e.g., the relationship between defect resolution and the coordinated test case execution). f. Describe the defect management processes after implementation.	Yes								
Documentation	DOC24	The Contractor shall submit and maintain a Staffing Plan as part of the Project Management Plan. The Staffing Plan must include: a. Identify the roles and responsibilities by resource type throughout all phases of the contract, including identifying key and non-key personnel as well as FTE allocation for all personnel. b. Staffing Levels (estimated by resource type by phase for the duration of the project) to be reported in the Resource Allocation Matrix. c. Detail how the staffing levels shall achieve consistent, dependable service regardless of changes that may influence work volume. d. Detail differentiated by Proposer staff, subcontractor staff, if applicable, and State project staff. e. Identify total hours to be expended, per phase or effort, and for the entire project, by Proposer staff and by State project staff. f. Tools and processes used to screen available staff and fill positions.	Yes								
Documentation	DOC26	The Contractor shall develop, submit and maintain a Master Test Plan that describes the Contractor's plan for all testing activities, processes, types and levels. Testing must be as automated and self-documenting as possible (e.g., continuous unit testing). At a minimum, the Master Test Plan must address the following: a. Overall testing strategy for the following testing types: unit testing, system testing, integration testing, regression testing, parallel testing, performance and load testing, manual and automated and/or scripted testing, disaster recovery and end-to-end integration testing of COTS products if any. b. Approach to planning and preparing the test/staging environment c. Approach to conducting each test level. d. Approach for supporting UAT. e. Approach for testing nonfunctional requirements. f. Approach to test documentation (e.g., test cases, test scripts, test case matrices added as design progresses). g. Approach to quality control/quality assurance. h. Approach to bi-traceability to requirements and design. i. Tools, techniques, and methods. j. Reporting mechanisms, traceability and metrics. k. Defects and defects resolution. l. Entrance and exit criteria for each test level including alignment with industry standards.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC28	The Contractor shall develop in collaboration with the Department, a System Test Plan that describes the Contractor's System Testing approach and includes at a minimum the following: a.Test Coverage b.Walkthroughs and Inspections c.Test Data Considerations d.Entrance Criteria e.Exit Criteria f.Configuration Management g.Testing Documentation h.Process Steps i. Inputs to System Testing j. Outputs for System Testing k.Metrics l. Pass/Fail Criteria m.Suspension Criteria and Resumption requirements	Yes								
Documentation	DOC29	The Contractor shall provide during the initiation phase of the project and maintain throughout the project, system documentation that at a minimum includes: • A description of each component, their purpose, including basic functions and the business areas supported • User stories/use cases • Screen layouts, report layouts, and other output definitions, including examples and content definitions • Physical database design • A module system diagram, including all components, identifying all business process diagrams, data flows, systems functions, and their associated data storage • Configurations • Job streams within each module, identifying programs, inputs and outputs, control, job stream flow, operating procedures, and error and recovery procedures. • A network schematic showing all network components and technical security control • Listing of the edits and audits applied to each input item and the corresponding error messages. • As applicable, listing and description of all control reports • Interface Control Documents • Narrative descriptions of each of the reports and an explanation of their use must be presented.	Yes								
Documentation	DOC37	At least twelve (12) months before the start of the final Contract year (including option years that have been exercised) the Contractor shall provide, a Turnover Plan to the Department. The Plan will include: a. Proposed approach to turnover. b. Tasks and subtasks for turnover. c. Schedule for turnover. d. Updated operational tasks and procedures during turnover. e. Description of vendor coordination activities that will occur during the turnover task and implementation of the activities to ensure continued system and services as deemed necessary by the Department. f. List of incomplete tasks, such as system defects, modifications or enhancements, mass adjustments, reference updates, and configuration requests. g. A detailed description of the services that would be required by another Contractor to fully take over system, technical, and business functions outlined in the Contract. The description shall also include an estimate of the number and type of personnel required to support the technical platform and supporting services. h. The data and documentation shall be organized in a format required by the State (e.g., by provider	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Documentation	DOC38	The Risk Management portion of the Project Management Plan must describe at a minimum: a. Proactive identification and analysis of risks before they become issues. b. Development of risk avoidance, transfer, mitigation or management strategies. c. Approach to monitoring, communicating, reporting of risk status including procedures for documenting, resolving, and reporting issues and risks identified by the Contractor, the Department or other project contractors. d. Approach to root cause analysis. e. The appropriate methods, tools, and techniques for active and ongoing identification and assessment of project risks.	Yes								
Documentation	DOC39	The Contractor shall develop comprehensive Desk Level Procedures which provide guidelines for the operation and use of the Contractor's solution. At minimum the Desk Level Procedures shall contain policies, processes and workflows for the MPATH module.	No								
Documentation	DOC40	The Issues Management Plan portion of the Project Management Plan must describe at a minimum: a. Approach to issue management. b. Issue management process steps including: -Approach to prioritizing, tracking, escalating, communicating, reporting issues -Approach to documenting, reporting, and resolving issues identified by the Contractor, the Department or other module contractors. -Approach to impact analysis. c. Tools, and techniques for active and ongoing identification and monitoring of project issues. d. Roles and responsibilities. e. Describe how issues will be quantified and qualified.	Yes								
Documentation	DOC41	The Contractor shall provide a Deliverable Expectations Document (DED) for each deliverable that describes the purpose, content, applicable MECT minimum required content and industry standards (e.g., PMI, IEEE/ISO, CMS XLC) that are satisfied for each Deliverable. Each DED is a deliverable.	Yes								
Documentation	DOC42	The Contractor shall develop a comprehensive Operations Procedure Manual which shall provide guidelines for the operation and use of the module and/or module component(s). At minimum the Operations Procedure Manual shall contain policies, processes and workflows for the module and/or module component(s).	Yes								
Documentation	DOC44	The Contractor shall maintain Attachment L- Technology Matrix, and deliver annually for the Department for review.	Yes								
Documentation	DOC46	The Contractor shall provide a User Interface Style Guide or equivalent document defining the design standards for user interfaces. The User Interface Style Guide must demonstrate how the solution meets the most current MECT user interface requirements including: a. User ability to customize or make adjustments (e.g. language support, font size) to portal presentation. b. Users utilizing scripting languages and/or assistive technology have the ability to access the information, field elements, and functionality required for electronic form or page completion and submission including directions and cues. c. User Interface organization so documents are readable without requiring an associated style sheet. d. User Interfaces identifying row and column headers for data tables. e. User Interfaces informing users when a timed response is required and given sufficient time to indicate more time is required. f. User Interfaces providing a method that permits users to skip repetitive navigation links. g. User Interfaces provide text titles for frames to facilitate frame identification and navigation.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Stat**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Documentation	DOC50	The Contractor shall develop a Module Implementation Plan in conjunction with the State that describes, at a minimum: a. The rollout approach, including phased implementation, if necessary. b. Overall integration approach c. Approach to continuous integration of other modules or data from other data providing entities. d. Integration Testing, including coordination procedures with System Integrator, other modules, other stakeholders and vendors. e. Approach to continuous integration of other modules or data from other data providing entities. f. The proposed implementation schedule. g. The rollback strategy. h. Communication and Contractor support procedures. i. Contractor and State roles and responsibilities	No								
Documentation	DOC51	The Contractor shall develop and submit a Training Plan that, at a minimum, addresses the following: a. Summary of the Contractor's training approach that focuses on methodology, objectives, and desired outcomes. b. Training needs analysis, including an assessment of the target audience and their knowledge and skills. c. Recommendations on type and delivery approach based on training needs analysis. d. Summary of proposed training materials and documentation in addition to hands-on training. e. Approach to maintaining training documentation and accompanying materials. f. Approach to providing training necessary to support new functionality and/or major software releases that materially change the user interaction. g. Approach for incorporating feedback to improve training effectiveness over the life of the Contract. h. Training schedule to be approved by the agency	No								
ECM	ECM01	The Contractor will configure, support and maintain Enterprise Content Management (ECM) functionality (including Document Management, Workflow, OCR/ICR) to meet the business needs of the State's enterprise.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
ECM	ECM02	The Contractor's ECM solution must be able to support all common document types (i.e., Word, PDF, Visio, Excel, PowerPoint, TIFF, and JPEG) and must integrate seamlessly with the most common document viewing and editing tools used by the Department.	Yes								
ECM	ECM03	The Contractor's ECM solution must allow users to access documents from any platform with all core features available across platforms (desktop, web, mobile). The ECM must allow users to view all documents and images without the use of plug-ins.	Yes								
ECM	ECM04	The Contractor's ECM solution must support role-based control and access of documents, as well as including the following: a. Granular authorizations for access, preview, editing and sharing. b. Automatic access expirations for documents deemed sensitive by the Department. c. Content security policy enforcement, such as unusual document access activity and sharing of documents with sensitive information of uploads/downloads of prohibitive data.	Yes								
ECM	ECM05	The Contractor's ECM solution must include a flexible search engine, including document and content search capabilities.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

ECM	ECM06	The Contractor's ECM solution must allow users to associate metadata with documents.	Yes								
ECM	ECM07	The Contractor's ECM solution must support simple integration with scanning solutions (support for bulk scanning).	Yes								
ECM	ECM08	The Contractor's ECM solution must support version control.	Yes								
ECM	ECM09	The Contractor's ECM solution must be configurable to comply with the Department's document retention policies.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
ECM	ECM11	The Contractor's ECM solution must scan all uploaded documents for viruses prior to storage.	Yes								
ECM	ECM12	The Contractor's solution shall be able to index, link and display incoming correspondence or uploaded documentation with the entity record.	Yes								
ECM	ECM13	The Contractor's solution shall send all documentation to the Systems Integration Services module for storage in the centralized ECM.	Yes								
ECM	ECM15	The Contractor's solution shall accept, record, store, and retrieve freeform or HIPAA attachment documents submitted with or in reference to claim submission activity (e.g. operative reports, occupational, physical, and speech therapy reports, durable medical equipment and warranty data, manufacture's tracking data for implants, waivers and demonstration specific requirements).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
ECM	ECM17	The Contractor's solution shall have an integrated electronic document management solution to meet the business needs of the State's healthcare program enterprise.	No								
ECM	ECM18	The Contractor's ECM solution must support event based document workflows with configurable reviews/approvals (e.g., work type, role, priority, dollar amount) with the ability to collect digital signatures.	Yes								
Edits, Processing, and Adjustments	EPA01	The Contractor's solution shall receive, store with encryption, maintain, and index all imaged documents. Imaged documents shall be indexed with sufficient metadata to allow users to search and retrieve images and easily differentiate between similar documents.	No								
Edits, Processing, and Adjustments	EPA02	The Contractor's shall provide the ability to automatically suspend claims based on configurable business rules (e.g., inactive eligibility, one day-specific eligibility, nursing home span, attachment) including the ability to cycle claims for adjudication automatically when criteria is met as defined by the Agency	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA03	The Contractor's solution shall have the ability to receive service authorizations for services to be performed by specific and non-specific providers.	No								
Edits, Processing, and Adjustments	EPA04	The Contractor shall adhere to data retention requirements cited in 45 CFR 164.316 and State specific policies. The Agency may require a longer retention period on an exception basis to support ongoing business needs (e.g., TPL recovery and drug rebate).	No								
Edits, Processing, and Adjustments	EPA05	The Contractor's solution shall adjudicate all claims transactions and apply edits based on configurable business rules (e.g., Duplicate Checking Edits, History Checking Edits, Bundling Edits, Payment Error Rate Measurements (PERM) Audit Support, Edits based on trend analysis against claims history, NCCI / MUE – Medically Unlikely Edits, NCCI / PTP – Procedure to Procedure Edits, Edits for CPT4 to HCPCS Relationship, Maximum allowable units by Revenue Code/HCPCS relationship, Limit checks for client accumulators such as dollar and units limits reached monthly, annual, and lifetime, diagnosis codes to procedure code relationships, service authorizations, age, gender, eligibility, provider type/specialty, category of service) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA06	The Contractor's solution shall process all claims transactions using edits and business rules during adjudication to validate transactions against service authorization(s), track utilization (e.g., authorized vs. used) and post edits if there are duplicate service authorizations or one or more service authorizations that conflict with each other as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Edits, Processing, and Adjustments	EPA11	The Contractor's solution shall retain the relationship between the service authorization and any claim adjudicated against the service authorization, as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA12	The Contractor's solution shall capture, store, maintain, and display the status of each claims transaction (e.g., as suspended, paid, denied, to be paid, to be denied) based on Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA13	The Contractor's solution shall enforce timely filing requirements using configurable business rules as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA14	The Contractor's solution shall provide the capability for Agency staff to mass adjust claims based on specific criteria and allow for edits to be bypassed as defined by Agency. At the direction of the Agency the Contractor's must perform the requested mass adjustment using the Agency's specific criteria.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA15	The Contractor's solution shall provide searchable options that are applicable to specific business rules including but not limited to: client, provider, benefits, reference data, claims processing, prior authorization, third party liability (TPL), and financial, as defined by Agency	No								
Edits, Processing, and Adjustments	EPA16	The Contractor's solution shall optimize the processing steps for working suspended claims to maximize user efficiency and meet or exceed claim suspension service level agreements.	No								
Edits, Processing, and Adjustments	EPA17	The Contractor's solution shall accept attachments through the following mechanisms: fax, mail, electronic upload via the online provider portal. Additionally the Contractor's solution shall accept attachments via standard HIPAA transaction formats or any standard healthcare delivery methods.	No								
Edits, Processing, and Adjustments	EPA18	The Contractor's solution shall provide a base set of effective dated claims edits, audits, and rules for Agency use and maintain a version history of rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA19	The Contractor's solution shall create, store, and maintain configurable edits and audits (e.g., member groups, benefit plan, age, region, claim type, procedure, provider type and/or specialty, provider taxonomy, tooth number, modifiers, benefit plan or lock-in or lock-out) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA20	The Contractor's solution shall identify and deny or suspend duplicate or suspected duplicate claims across all claims transactions (e.g., fee for service, encounter) submitted by all enrolled providers, organizations, MCOs based on configurable business rules as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA21	The Contractor's solution shall process and adjudicate all claims transactions using configurable business rules (e.g., bundle vs. unbundled, suspect or exact duplicates, invalid tooth number, age vs. procedure, category of eligibility vs. procedure, mutually exclusive, incidental, emergent visits) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA22	The Contractor's solution shall receive, process, and store encounter data from a variety of sources (e.g., Managed Care Health Plans, NEMT vendors) based on configurable business rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA23	The Contractor's solution shall, using configurable business rules, automatically review suspended claims based on Agency defined timeframes. The priority for these claims will systematically increase and where appropriate be automatically escalated for additional evaluation. All claims shall be electronically tracked until the claim is finalized.	No								
Edits, Processing, and Adjustments	EPA24	The Contractor's solution shall automatically identify missing claims attachments (e.g., required forms, reporting, medical records) and automatically search the document repository for relevant documentation (e.g., a document associated to the member and service type for the attachment) and associate the document with the claim.	No								
Edits, Processing, and Adjustments	EPA25	The Contractor's solution shall allow for user friendly manual entry of claims and adjustments by Contractor's and Agency staff.	No								
Edits, Processing, and Adjustments	EPA26	The Contractor's solution shall identify, store, and display and report all edits, audits, and exceptions (error codes) applied to the claim during processing and provide viewable audit trail for all edits and exceptions that are applied to a claim as it is processed, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA27	The Contractor's solution shall create notification for requesting and performing providers, case managers, authorized users and participants of service authorization activity, as defined by the Agency	No								
Edits, Processing, and Adjustments	EPA28	The Contractor's solution shall adjudicate and finalize claims at a frequency (e.g., real-time, near-real-time processing, and batch processing where appropriate and/or necessary) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA29	The Contractor's solution shall identify and utilize third-party and/or Medicare coverage/payments at the header or line level to pay (e.g., pay in full, pay reduced amount, pay at zero, or pay coinsurance and deductible) or deny as defined by Agency business rules.	No								
Edits, Processing, and Adjustments	EPA30	The Contractor's solution shall process all claims transactions utilizing specific information contained in a benefit plan (e.g., member's healthcare coverage, provider, procedure/service, cost share, diagnosis) using Agency defined configurable business rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA31	The Contractor's solution shall identify, rollback/recover, reprocess and report on all claims transactions processed in error (e.g., system malfunction, sending or receiving error, Contractor's error) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA32	The Contractor's solution shall provide the ability to process claims with Medicaid-covered, non-covered and non-healthcare services (e.g., DME, transportation, EPSDT, home modifications, waiver services) as defined by Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA33	The Contractor's solution shall provide the capability to waive timely filing on claims based on Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA34	The Contractor's solution shall accept, validate, and process all current and future approved HIPAA ASC X12 transactions from covered entities (e.g., health plans, health care clearinghouses, billing companies, trading partners, and health care providers)	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA35	The Contractor shall have an online solution for providers to complete submission of claim transactions with efficient keying of claims without requiring additional keystrokes such as slashes, dashes or double entry (e.g., allow providers to submit individual and/or batch claims file, allow providers to submit through direct data entry, allow providers to submit adjustments, voids, replacements, and corrections to existing claims as well as resubmissions of denied claims, allow providers to submit service authorization requests, allow providers to submit required participant attachments, forms, and requests for information, including the ability to submit supporting claims documentation, allow providers to review upfront validation of claims data at the point of entry by the billers, and allow for necessary correction) and allow for any additional types of submissions as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA36	The Contractor's solution shall accept and process all current and future paper claim types (e.g.,, CMS 1500 (Professional Claim form), UB04 (Institutional Claim), ADA (Dental Claim) and paper adjustments as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA37	The Contractor's solution shall display claims and associated documents which shall be searchable and printable as defined by the Agency	No								
Edits, Processing, and Adjustments	EPA38	The Contractor's solution shall allow manual override of edits that do not suspend for manual intervention based on the Agency's configurable business rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA39	The Contractor's solution shall have the ability to configure edit dispositions (i.e. deny, pay, pay and report, suspend, and super-suspend), as defined by the Agency's configurable business rules.	No								
Edits, Processing, and Adjustments	EPA40	The Contractor's solution shall provide the capability to apply and maintain edits and pricing rules for EPSDT related services or Agency defined name for a EPSDT program.	No								
Edits, Processing, and Adjustments	EPA41	The Contractor's solution shall allow manual (e.g., force, deny, clear edit, super-suspend) and system overrides, and bypass criteria for edits on an individual claim or batch of claims including the source of the override as part of each individual claim record.	No								
Edits, Processing, and Adjustments	EPA42	The Contractor's solution shall receive, store, maintain, display, and use current and support all future versions of the Council for Affordable Quality Healthcare (CAQH) Committee on Operating Rules (CORE) standards: Claim Adjustment Group Codes (CAGC), Claim Adjustment Reason Code (CARC), and Remittance Advice Remark Code (RARC).	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA43	The Contractor's solution shall provide the ability to view summary level claim information for a member. Users shall have the ability to view utilization by service type (e.g., dental, vision, therapy), the ability to view header and line level edits, including the ability to filter the claims (e.g., date of service, date of payment, claim status, provider type, claim type, rendering provider, pay-to provider) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA44	The Contractor's solution shall have the ability to create, receive, maintain, and issue service authorizations for service(s) to be provided to a member with or without a specified provider using configurable business rules (e.g., service type) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA45	The Contractor's solution shall provide a service/prior authorization process that is flexible (e.g. across numerous programs, benefit plans, external systems interfaces, claim types, and services).	No								
Edits, Processing, and Adjustments	EPA46	The Contractor's solution shall provide the ability to generate claim based event notifications to providers of required action (e.g., provide missing attachments) based on their preferred method of communication. The frequency (e.g., once per adjudication cycle) and content of the notification must be aggregated into a single event and configurable by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA47	The Contractor's system shall have the capability to create and maintain and configurable set of work queues to support the routing and assignment of suspended claims based on edits using Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA48	The Contractor's solution shall automatically reprocess suspended transactions after any modification(s) or edit resolution(s) based on Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA49	The Contractor's solution shall adjudicate claims transactions against all identified member third-party payer benefits (e.g., primary, secondary, tertiary). The Contractor shall ensure all third-party payer benefits are exhausted prior to billing Medicaid.	No								
Edits, Processing, and Adjustments	EPA50	The Contractor's solution shall have the ability to create, receive, update, and store member Third Party Liability (TPL) information (e.g., primary, secondary, tertiary) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA51	The Contractor's solution shall support coordination of benefits pricing and editing when TPL sources such as Medicare, private, commercial, or other insurance is present, based on Agency configurable business rules.	No								
Edits, Processing, and Adjustments	EPA52	The Contractor's solution shall capture, track, maintain, store, and report claims processing and payment information based on configurable business rules (e.g. service category, provider type, submission date, entry date, claim input media, adjudication date, payment date) and Federal requirements as defined by the Agency	No								
Edits, Processing, and Adjustments	EPA53	The Contractor's solution shall capture, track, maintain, store, and report claims processing and payment information based on configurable business rules (e.g. service category, provider type, submission date, entry date, claim input media, adjudication date, payment date) to validate requirements contained in 42 CFR 447.45.	No								
Edits, Processing, and Adjustments	EPA54	The Contactor's solution shall adjudicate claims transactions and edit against provider enrollment status based on Agency defined configurable business rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA55	The Contactor's solution shall identify all claims in the adjudication cycle by billing provider, group by claim status (e.g., paid, denied, suspended, adjusted) and generate a remittance or downloadable remittance using a current or future HIPAA standard format following CAQH core operating rules.	No								
Edits, Processing, and Adjustments	EPA56	The Contractor's solution shall have the ability to automatically and/or manually configure an edit to process claims or adjustments for a specific event (e.g., retroactive rate adjustment) or group of claims (e.g., edit, batch, provider type, member, claim type) as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA57	The Contractor's web portal real-time direct data entry claims solution shall support the creation and maintenance of provider type specific claim templates for recurring billing (i.e., roster billing to allow institutional or residential service providers to create a template with multiple members for monthly billing, enter patient days, generate and submit claims, recall the template, add or remove members or service authorization numbers, and generate claims for the next month, recall a specific claim from the template for adjustment/void) and provide notification to the provider via secure inbox if a template is not regenerated within a timeframe defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA58	The Contractor's solution shall assign each claims transaction, adjustment, and void a unique identification number (i.e. ICN or TCN). The unique ID must be assigned to each claim and associated attachment pr to adjudication.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Edits, Processing, and Adjustments	EPA59	The Contractor's solution shall process claims adjustments and voids; maintain the original claim and list all adjustments and voids to allow users to easily view the claim processing history as defined by the Agency.	No								
Edits, Processing, and Adjustments	EPA60	The Contractor's solution shall have the ability to edit new claims against prior history of adjudicated an process claims (e.g., once in a lifetime service limits, cumulative limits, duplicates) using Agency's defir configurable business rules.	No								
Edits, Processing, and Adjustments	EPA61	The Contractor's solution shall, in the absence of required information (i.e. missing attachment) and afte multiple adjudication cycles over a timeframe defined by Agency, auto-deny the edit and process the claim.	No								
Edits, Processing, and Adjustments	EPA62	The Contractor's solution shall have the ability for users to manually route suspended claims to work queues based on Agency defined business rules.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM69	The Contractor's solution shall provide the ability to enter financial transactions in real-time as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM70	The Contractor's solution shall provide the ability to copy a financial transaction (e.g., adjustment) so that users can edit selected information without having to re-enter all the information as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM71	The Contractor's solution shall have the ability to transfer payment information to an Entity for producing payments (e.g., warrant, check, EFT, journal, prepaid debit card, EBT card) as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM72	The Contractor's solution shall allow multiple adjustments for each financial transaction as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM73	The Contractor's solution shall allow for the transfer of an accounts receivable when Payees go through change of ownership or other legal restructuring as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM74	The Contractor's solution shall have the ability to manually or automatically identify, generate, and process refunds on a flexible schedule (e.g.,, specific day, date of the month, once a specific dollar amount has been reached) as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM75	The Contractor's solution shall allow a single or group of financial transactions and related documents (e.g. statements, remittance advice, payments) to be held based on configurable business rules(e.g., member on review, provider on review, span dates).	No	Yes	Option A - Financial						
Fiscal Management	FSCM76	The Contractor's solution shall have the ability to deny, or cutback, the financial transaction (e.g. fund availability, contracted amounts) and reason will be noted on the invoice or remittance advice as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM77	The Contractor's solution shall provide the ability to receive, record, and process all payments received drug rebate in accordance with State and Federal requirements as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM78	The Contractor's solution shall ensure interfaces are initiated or accepted by a specific time of day based on configurable business rules.	No	Yes	Option A - Financial						
Fiscal Management	FSCM79	The Contractor's solution shall capture journal details (e.g., journal ID, journal status, date) from the return file from another Entity as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM80	The Contractor's solution shall allow authorized users to manually initiate or generate any financial correspondence (e.g., statements, delinquency notices). Contractor will display the notice on-screen and submit the notice via the Payees preferred notification method as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM81	The Contractor's solution shall have the capability to upload attachments and associate the attachments to the payee or line level on the appropriate financial transaction as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM82	The Contractor's solution shall allow authorized users to manually create and modify journal entries as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM83	The Contractor's solution shall allow users to manually apply recoupment rules across individual claims within a group of claims as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM84	The Contractor's solution shall perform real-time audit/balance of interfaces (e.g. journals) within same business unit where the lines should balance to zero by fund and provide notification if they do not balance as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM85	The Contractor's solution shall provide the ability to view detailed and consolidated history of all transactions (e.g., claims, invoices, payments, receipts, debt assessment, correspondence) applied to an account (e.g., Provider, Member, Payee). Allow the user to sort, filter, and group by transaction details (e.g., Payer, transaction type, date, status) as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM86	The Contractor's solution shall have the ability to assign unique Payee ID to each Payee who is uniquely identified by Tax ID as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM87	The Contractor's solution shall receive, store, maintain, and display detailed information on bank accounts as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM88	The Contractor's solution shall have the capability to modify a Payee's bank account information (e.g. manually, automatically) within the system based on Agency policy using configurable business rules.	No	Yes	Option A - Financial						
Fiscal Management	FSCM89	The Contractor's solution shall maintain effective dated payee information and link each payment to the payee information that was used at the time of payment as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM90	The Contractor's solution shall have the ability for authorized users to produce or initiate payments in different formats (e.g., check, ACH, journal, prepaid debit card, EBT) retain detailed data related to the payment (e.g., Payee identification, reason for issuance) as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM91	The Contractor's solution shall have a process for all payments to be recorded and deposited daily, including payments from Payees who are not yet in the system, and link to an account receivable as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM92	The Contractor's solution shall calculate, receive, store, maintain, and display medical expenditure transactions processed outside of the Contractor's solution (e.g. spend-down, Member premium) as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM93	The Contractor's solution shall automatically apply claims or financial transactions to a contract total based on configurable business rules and display a running total of the contract balance as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM94	The Contractor's solution shall be scalable to receive additional financial transactions as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM95	The Contractor's solution shall receive, store, maintain, and display payment request information with a unique identifier to trace the payment back to the source as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM96	The Contractor's solution shall receive, store, maintain, and display payment suspension, rejection, or cancellation reasons (e.g., incomplete tax information, payment below minimum threshold from the payment processing system) as defined by the Agency.	No	Yes	Option A - Financial						
Fiscal Management	FSCM97	The Contractor's solution shall allow authorized users to work and resolve suspended payments and release them for submission as defined by the Agency.	No	Yes	Option A - Financial						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Fiscal Management	FSCM98	The Contractor's solution shall automatically reprocess system suspended transactions based on configurable business rules.	No	Yes	Option A - Financial						
Fiscal Management	FSCM99	The Contractor's solution shall allow for a unique identifier for each transaction allowing users the ability to research and follow a transaction through the entire life cycle as defined by the Agency.	No	Yes	Option A - Financial						
Hosting and Environments	ENV03	The Contractor's hosting solution shall provide the flexibility to integrate other solutions for security and regulatory purposes in the future and be cost-effective with burst capacity.	Yes								
Hosting and Environments	ENV06	The Contractor shall provide the ability to run multiple sessions /environments/applications/areas/views simultaneously. This includes providing sufficient environments and configurations (e.g., multiple environments, multiple application layers, hub architecture) necessary to perform all required functions (e.g., testing, training, production operations, modeling, disaster recovery).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Hosting and Environments	ENV09	The Contractor's environments (e.g., development, testing, training and production) shall be available and accessible twenty-four (24) hours a day, seven (7) days a week, with the exception of planned downtime due to system upgrades or routine maintenance. All planned downtime and maintenance outages shall be coordinated and approved by the Department at least five (5) business days in advance.	Yes								
Hosting and Environments	ENV10	The Contractor shall provide hosting services that shall meet all functional and non-functional requirements defined in the RFP.	Yes								
Hosting and Environments	ENV11	The Contractor shall identify the physical location(s) where the Contractor's solution is installed and operating. In the event the Contractor is utilizing a SaaS or PaaS-based service the Contractor shall provide the State with sufficient identifying characteristics of the physical location(s) and allow the State to independently verify the security of said location(s). To the extent possible, the State must have transparent access to this location(s).	No								
Implementation and Acceptance	IA01	The Contractor shall follow the following process for deploying each proposed solution(s) to production: a. Submit an implementation letter to the State confirming that the solution is ready for implementation. b. Receive the State's approval of the implementation letter, accepting the Contractor's confirmation. c. Deploy the solution according to the approved Implementation Plan. d. Provide confirmation that the solution has been deployed to production and the Contractor has completed three (3) calendar days of operations without significant operational issues defined as no critical or high defects. e. Receive the State's acceptance of the system implementation.	Yes								
Implementation and Acceptance	IA02	The Contractor shall monitor the initial operation of the solution to ensure that there are no immediate or ongoing adverse effects on the Department's programs according to the performance expectations identified in the Contractor's scope of work.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Stat**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Implementation and Acceptance	IA03	The Contractor shall demonstrate that the System infrastructure (hardware, software, and interfaces) is operational and meets federal and State architectural, technical, security and privacy requirements as w as the business and functional requirements.	Yes								
Implementation and Acceptance	IA04	The Contractor shall provide Operational Readiness test results demonstrating that the solution meets all Service Level Agreements for system performance as defined in the scope of work.	Yes								
Implementation and Acceptance	IA05	The Contractor shall conduct an Operational Readiness Walkthrough with the Department to validate the operational readiness of the Contractor, the solution, and the Department. The Department must formally sign off on the Operational Readiness Checklist prior to proceeding to implementation.	Yes								
Implementation and Acceptance	IA06	The Contractor shall develop Operational Readiness Review Checklists (ORR) that will examine the actual solution characteristics and the procedures of the product's operation to ensure that all hardware, software, resources, procedures, and user documentation accurately reflect the deployed state of the system.	Yes								
Integration	INT01	The Contractor's solution shall have the ability to identify errors in member information and member eligibility transactions and immediately notify the source system of the specific errors including whether the errors have precluded loading and/or using the data.	Yes								
Integration	INT02	The Contractor's solution shall support retrieval and presentation of data associated with geographic indicators such as by state, by county, by zip code, by peer group, or other geographical indicators specified by the Agency.	Yes								
Integration	INT10	The Contractor shall develop operational procedures in coordination with other enterprise module vendors to restore system availability.	Yes								
Integration	INT107	The Contractor's solution shall provide an architecture designed to support vertical and/or horizontal infrastructure and application scaling to meet increases in demand.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT108	The Contractor's solution shall use standard messaging formats (e.g. XML, JSON, EDI, etc.) to ensure interoperability.	Yes								
Integration	INT109	All service endpoints/APIs shall be exposed to the State's Integration Platform and are able to receive and submit messages through the State's Integration Platform.	Yes								
Integration	INT110	The Contractor's solution shall have the ability to identify errors in transactions and immediately notify the State's Integration Platform and the source system of the specific errors including whether the errors have precluded loading and/or using the data.	Yes								
Integration	INT111	The Contractor's solution shall be integrated in loosely coupled design patterns with the rest of the enterprise by encapsulating its core functions and interacting with the rest of the enterprise via interfaces to and from the State's Integration Platform which leverage interoperability data standards.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT112	The Contractor's solution shall support standard web services and specifications (e.g., REST, WSDL, WS-*, SOAP, JSON, XML, EDI).	Yes								
Integration	INT113	The Contractor's solution must be capable of receiving, translating, and processing data to and from the variety of secure protocols (e.g., HTTPS, FTPs, SFTP, AS2, AS3). The Contractor shall include in their response a list of protocols supported.	Yes								
Integration	INT114	The Contractor shall participate in the Data Governance process, as defined and administered by the Agency. The Data Governance process will define processes and adjudicate concerns for items includ but not limited to: • Enterprise data lifecycle management processes (including master data management) • Data synchronization processes • Data formats for data exchanged by/between systems in Agency's Enterprise • Management of reference data (i.e. code list versions) • Dispute resolution for data management issues	No								
Integration	INT115	The Contractor's solution shall support full and incremental data synchronization between the solution and the State's Integration Platform for data entities as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT116	The Contractor's solution shall ensure that module operational data is available and is supplied to the State's Integration Platform in a format and frequency as defined by the Agency. The State's Integration Platform may require periodic data refreshes at agreed upon intervals.	No								
Integration	INT117	The Contractor shall work with the Agency and the Systems Integrator if data quality issues arise and s assist in remediating those issues.	No								
Integration	INT118	The Contractor shall participate in the API Governance process, as defined and administered by the Agency. The API Governance process will define processes and adjudicate concerns for items including but not limited to: • Design and definition of solution endpoint API specifications • Revisions to solution endpoint APIs (minor & major) • Deprecation of solution APIs • Definition of data formats and code lists utilized by an API • Dispute resolution for API designs and behavior	No								
Integration	INT119	The Contractor shall implement interfaces with the State's Integration Platform in accordance with technical specifications approved by the Agency.	No								

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT120	The Contractor's solution shall support query-based service calls (e.g. request & response) for data entities and associated query parameters as required by the Agency.	No								
Integration	INT121	The Contractor's solution shall support real-time notifications as required by the Agency including but not limited to: changes to solution's data, transaction events, etc.	No								
Integration	INT122	The Contractor's solution shall transmit all dates in a format specified by the Agency (ISO8601).	No								
Integration	INT123	The Agency reserves the right to make use of and share with stakeholders at the Agency's discretion, the technical specifications supplied by the Contractor for the solution endpoints exposed to the State's Integration Platform.	No								
Integration	INT124	The Contractor shall ensure that all data, transactions and service calls between the Contractor's solution and other modules (including legacy systems) are routed through the State's Integration Platform as required by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT125	The Contractor shall route data, transactions and service calls between the Contractor's solution and third party systems and federal systems (e.g., CMS, IRS, SSA) through the State's Integration Platform as required by the Agency.	No								
Integration	INT126	The Contractor's solution shall utilize supporting services, data sources, or data feeds (master indices, reference data, etc.) provided by the State's Integration Platform as required by the Agency.	No								
Integration	INT127	The Contractor shall generate and supply solution test data (including synthetic or de-identified data). Test data shall approximate production data with sufficient fidelity to ensure reliability and accuracy of test results.	No								
Integration	INT128	The Contractor shall coordinate security configurations and data sensitivity for multiple environments (e.g., integration testing, pre-production) with the State's Integration Platform as required by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT129	The Contractor's solution shall capture, log, maintain and supply upon request to the Agency metadata for transactions and service calls between the solution and the State's Integration Platform. Metadata shall include but is not limited to, enterprise-supplied transaction IDs, transaction success/failure status, and other information as defined by the Agency.	No								
Integration	INT130	The Contractor must maintain any and all hardware and software products required to support the Contractor's solution at their most current major version (patches, fixes, upgrades, and releases for all software, firmware and operating systems) or no more than one version back from the most current major version.	No								
Integration	INT35	The Contractor shall provide an architecture that has clearly defined service endpoints.	Yes								
Integration	INT40	The Contractor shall provide technical, functional and performance documentation required by the IV&V Contractor for the solution in order to support IV&V reporting needs identified in the most current version of MECT.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT52	The Contractor shall collaborate with all State enterprise contractors and solutions to accurately collect, process, and distribute applicable HIPAA EDI transactions.	Yes								
Integration	INT54	The Contractor's solution shall require (when appropriate), capture, and maintain the 10-digit NPI.	Yes								
Integration	INT55	The Contractor's solution, shall accept the NPI in all applicable standard electronic transactions mandated under HIPAA	Yes								
Integration	INT59	The Contractor shall ensure all hardware, software, and communication components installed for use by State staff are compatible with the State currently supported versions of the Microsoft Operating System, Microsoft Office Suite and Internet Explorer; and current technologies for data interchange.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

Integration	INT78	The Contractor shall provide an environment where components can be added or replaced quickly.	Yes								
Integration	INT79	The Contractor's solution shall allow internal and external users to enter data using electronic forms and receive documents electronically from other systems.	Yes								
Integration	INT81	The Contractor's solution shall have the capability to receive and display data , messages, and alerts from other systems in real-time.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Integration	INT87	The Contractor's solution shall provide context sensitive help (situational clarification and support associated with process specific steps), to support user activities (e.g., provider enrollment and maintenance activities).	Yes								
Integration	INT88	The Contractor shall implement a solution where module components are loosely coupled and can be added or replaced quickly.	Yes								
Integration	INT93	The Contractor shall provide electronic notification including detailed release notes for Major and Minor version, patches, updates and fixes deployed to the production environment.	Yes								
Integration	INT94	The Contractor shall work collaboratively with module vendors to reconcile ODS data elements with the data elements for each module component.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Interfaces	INR01	The Contractor's solution must ensure that all data exchanges including inbound and outbound interfaces shall comply with industry standards (e.g., National Information Exchange Model (NIEM), National Institute of Standards and Technology (NIST), HIPAA-compliance standards, Health level 7 (HL7), Fast Healthcare Interoperability Resources (FHIR)).	Yes								
Interfaces	INR02	The Contractor shall support the exchange of data between the System and the systems with which it interfaces (including external entities) to facilitate business functions that meet the requirements of Department policy, and federal and State rules and regulations.	Yes								
Interfaces	INR04	The system shall send and receive real-time discrete transactions between modules and the State's integration platform to reduce the need for bulk data transfers.	Yes								
Interfaces	INR05	The Contractor's solution shall provide the ability to view raw daily interface files for up to sixty (60) calendar days. Archive raw daily interface files after sixty (60) calendar days and maintain for up to six (6) months.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

Interfaces	INR06	The Contractor's solution shall provide the ability to view raw monthly and quarterly interface files for up to one year (365) calendar days. Archive raw monthly and quarterly interface files for two years (730) calendar days and maintain for up to two (2) years.	Yes								
Interfaces	INR08	The Contractor's solution shall include a process and toolset to maintain interfaces, code, and data models.	Yes								
Interfaces	INR11	The Contractor shall design, develop and maintain interfaces. Each Application Program Interface (API) and components that will interface with the Systems Integration Services Integration Platform will be documented using a mutually agreed upon ICD template. This effort is performed in collaboration with other stakeholders in the State's healthcare programs enterprise.	Yes								
Interfaces	INR12	The Contractor shall ensure proprietary interfaces and protocols between modules are not used.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Interfaces	INR33	The Contractor shall document all interfaces in the Agency's Interface Control Document (ICD) format which will include data layout documentation, data mapping crosswalk, inbound/outbound capability and frequency of all interfaces. The Agency will approve finalized interface designs detailed in the ICDs.	Yes								
Interfaces	INR34	The Contractor's solution shall include all integrations/interfaces listed in Attachment F - Requirements Response Matrix in their overall fixed price.	No								
Key Personnel and Resources	KR01	The Contractor can use off-shore and near-shore resources. However, offshore or near shore resources cannot develop security controls. The Contractor shall advise the Department when work is being completed by offshore or near shore resources. The Contractor shall ensure that all Contractor practices and procedures, including but not limited to secure coding practices are used by all resources.	Yes								
Key Personnel and Resources	KR02	The Contractor, and any of its subcontractors, shall work cooperatively with module Contractors and Department staff to ensure the success of the program.	Yes								
Key Personnel and Resources	KR03	The Contractor shall help prevent project delays and address them if they occur. This includes assuran that sufficient resources and knowledgeable, experienced staff are available to meet the required project schedule.	Yes								
Key Personnel and Resources	KR04	The Contractor shall provide sufficient personnel to administer and execute required project activities, including approvals, during development, implementation, and operations.	Yes								
Key Personnel and Resources	KR07	Key personnel described in the proposal shall become named resources on the project and are subject to the following requirements: a. Key personnel shall not be transferred or removed without prior approval of the Department. b. The Department will approve key personnel assigned to the Contract. c. The Department reserves the right to request removal of any Contractor staff or subcontractor staff, if applicable, assigned to the project, and the Contractor shall comply with any such request immediately. d. If a vacancy occurs in a key role, the Contractor shall fill the position in compliance with identified SLAs.	Yes								
Key Personnel and Resources	KR08	The Contractor must designate a Project Manager to represent and oversee the day-to-day activities of the project. This individual shall serve as the Department's primary point of contact for matters relating to the project and serve as a liaison for certification, collaborating with other contractors, and stakeholders.	Yes								
Key Personnel and Resources	KR09	The Contractor's Project Manager must meet the following qualifications including: a. A minimum of seven (7) years' project management experience managing projects of similar size and scope, preferably in Medicaid or the healthcare industry. This experience must include relevant experience within the last three (3) years from the release date of the RFP. b. Project Management experience should include each phase of the system development life cycle. c. Project management certification through the Project Management Institute (PMI) is preferred.	Yes

Key Personnel and Resources	KR11	The Contractor's Integration Lead must meet the following qualifications including: a. Minimum of five (5) years leading system design and integration projects, including the technical des and implementation of projects similar in size and scope to this project. b. Experience must involve directing multi-discipline technical teams producing integration solutions (e.g., Service Oriented Architecture, network, hardware and software). c. A Bachelor's Degree in Information Systems Engineering, Computer Science, or a related field is	Yes								
Key Personnel and Resources	KR12	The Contractor must designate a Testing Lead to coordinate all testing activities.	Yes								
Key Personnel and Resources	KR13	The Contractor's Testing Lead must meet the following qualifications including: a. Minimum of three (3) years experience leading testing activities for a project similar in size and scope to this project. b. In-depth understanding of the testing lifecycle and all artifacts required to successfully validate the system	Yes								
Key Personnel and Resources	KR14	The Contractor must designate a Contract Manager to be the single point of contact for matters concerning the Contractor's performance under the Contract. This person shall have the authority to make decisions that are binding to the Contract, shall be responsible for timely completion of the project, and shall be responsible for meeting all contractual obligation	Yes								
Key Personnel and Resources	KR15	The Contractor's Contract Manager must have a minimum of five (5) years' contract management experience managing related services with similar budgets, preferably in Medicaid or the healthcare industry and for a project similar in size and scope to this projec	Yes								
Key Personnel and Resources	KR16	The Contractor shall submit two (2) references for each of the key personnel being proposed for the project. Each reference should depict relevant and current experience for work completed no more than seven (7) years prior to the date of this RFP	Yes								
Key Personnel and Resources	KR17	The Contractor must demonstrate that it can commit an adequate level of technical and human resources sufficient to complete the project within the required time frame and to meet the quality requirements outlined in this RFP. Furthermore, the level of technical and human resources which the Contractor agrees to commit to the project at the time of proposal must be maintained throughout the life of the pro at a necessary level to complete the scope of wor	Yes								
Key Personnel and Resources	KR18	The Contractor's staff shall have sufficient experience appropriate for their role.	Yes								
Key Personnel and Resources	KR19	The Contractor must supply a Personnel Background Check Attestation (written documentation) of a favorable background check for Contractor personnel who might reasonably be expected to access sensitive and confidential member data contained in any system accessed during the course of the Contract. The Department may request the removal of staff for disqualifying offenses. Contractor must describe their process for performing background checks for non-US citizens or Green Card holders.	Yes								
Key Personnel and Resources	KR20	The Contractor's Project Manager shall be required to perform work at the State's primary project location (e.g., city, state), unless approved by the Department to work remotely.	Yes								
Key Personnel and Resources	KR21	The Contractor's staff shall be available Monday through Friday as early as 7:00 AM and as late as 6:00 PM in the time zone of the participating State.	Yes								
Key Personnel and Resources	KR22	For any work performed at a location other than the primary Project site, the Contractor must identify the specific location (city, state, country), describe the type of work to be performed, and the percent of the total hours for that type of work at that locatio	Yes								
Key Personnel and Resources	KR23	The Contractor's staff working remotely, must be available to work in the State's primary project location at the Department's' request for functions necessary to support the scope of work (e.g., risk review meetings, root cause analysis sessions, integration planning, release planning, operational readiness reviews, UAT, implementation, and production deploymer	Yes								
Key Personnel and Resources	KR25	The Contractor's key personnel and/or management replacement must meet the minimum qualifications for the position . The Contractor shall provide a detailed resume for a proposed key personnel and/or management replacement. Replacements are subject to Department approval prior to any assignment	Yes								
Key Personnel and Resources	KR26	The Contractor shall provide the appropriate level of knowledge transfer/training to Contractor staff.	Yes								
Key Personnel and Resources	KR28	The Contractor must designate a Certification Lead to coordinate all certification activities.	Yes								
Key Personnel and Resources	KR29	The Contractor's Certification Lead must meet the following qualifications including: a. Minimum of three (3) years experience certifying systems against industry standards for projects similar in size and scope to this project. b. In-depth understanding of the most current MECT certification lifecycle required to successfully valid the system	Yes								
Key Personnel and Resources	KR34	The Contractor's key personnel positions may not be vacant for more than 10 Business Days without a qualified substitute (temporary replacement). A qualified substitute must be in place no more than 10 Business Days after the separation date of the vacating resource. The definition of a qualified substitute is someone meeting the requirements of the RFP and Contract Section 4. The Contractor may not fill vacant key personnel positions with other existing key personnel without approval by the Department. The Department will also have the authority to approve proposed replacements of key personnel by the Contractor	Yes								
Key Personnel and Resources	KR35	The Contractor must designate an Integration Lead to coordinate with the Systems Integrator, other module vendors, and other stakeholders, manage the design, configuration/build, integration, defect management, and implementation of the Contractor's scope of wo	Yes								
Key Personnel and Resources	KR36	The Contractor shall provide key personnel that at a minimum include the Project Manager, Technical Manager, Contract Manager, Claims Manager, Testing Lead, Integration Lead and a Certification Lead during the DDI and Certification Phases of the Program. For the Operations Phase of the Program, the Contractor shall provide key personnel that at a minimum include the Project Manager, Operations Manager, Claims Manager, Technical Manager, and Contract Manager. Key personnel shall not hold more than one key role unless otherwise approved by the Agency. The Agency will review and	No								
Key Personnel and Resources	KR37	For Option A - Financial, the Contractor shall provide defined key personnel of Financial Manager for the Operations, Maintenance and Configuration phase of the project. The Contractor must identify other key personnel for the Operations, Maintenance and Configuration phase of the project. The Department will review and approve all key personne	No	Yes	Option A - Financial						
Key Personnel and Resources	KR38	For Option B - Call Center, the Contractor shall provide defined key personnel of Provider Relations Manager and Enrollment Broker Manager for the Operations, Maintenance and Configuration phase of the project. The Contractor must identify other key personnel for the Operations, Maintenance and Configuration phase of the project. The Department will review and approve all key person	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Statu**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Key Personnel and Resources	KR39	For Option C - Federal Reporting, the Contractor shall provide defined key personnel of Federal Reporting Manager for the Operations, Maintenance and Configuration phase of the project. The Contractor must identify other key personnel for the Operations, Maintenance and Configuration phase of the project. The Department will review and approve all key personn	No	Yes	Option C - Federal Reporting						
Key Personnel and Resources	KR40	For Option D - State Specific Requirements, the Contractor shall provide key personnel for the Operations, Maintenance and Configuration phase of the project as defined in the Participating State's Participating Addendum. The Contractor must identify other key personnel for the Operations, Maintenance and Configuration phase of the project. The Department will review and approve all key personnel	No	Yes	Option D - State Specific Requirements						
Key Personnel and Resources	KR41	For Option A - Financial, The Contractor shall provide key personnel at a minimum that include a Finan Services Project Manager, Financial Services Lead Analyst, during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key personn	No	Yes	Option A - Financial						
Key Personnel and Resources	KR42	For Option B - Call Center, The Contractor shall provide key personnel at a minimum that include a Call Center Implementation Project Manager, Call Center Lead Analyst, during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key person	No	Yes	Option B - Call Center						
Key Personnel and Resources	KR43	For Option C - Federal Reporting, The Contractor shall provide key personnel at a minimum that include Federal Reporting Implementation Project Manager, and three Federal Reporting Lead Analysts for the following areas: 1) Transformed Medicaid Statistical Information System (TMSIS), 2) CMS-64, CMS-21, CMS-37, 3) All other state and Federal reporting during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key personn	No	Yes	Option C - Federal Reporting						
Member and Provider Call Center	MPCC01	The Contractor shall staff, operate, and maintain a call center for members and providers with staff that are experienced, knowledgeable, and certified (if necessary) on the Agency's policies and claims solution as defined by the Agency	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC02	The Contractor shall provide an Automated Call Distribution (ACD) solution that intelligently prioritizes, sequences, and routes calls, via configurable workflow processes, in an order (e.g., agent availability, skill level, call type) as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC03	The Contractor's solution shall provide the software and services to enable and support interactive communications via SMS, chat, and email between the call center staff, Agency staff, the Agency's designee , and member and provider stakeholders as defined by the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC04	The Contractor's solution shall provide HIPAA-compliant interactive communication methods (e.g., email, text chat) as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC05	The Contractor's solution shall provide automatic screen presentation of member/provider data (e.g., name, provider or member ID, phone number, email address, preferred language, associated documents, historical call records) when the call is answered as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC06	The Contractor's solution shall provide multiple language options (e.g., English, Spanish) and services for the hearing impaired (TTY/TTD) as defined by the agency	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC07	The Contractor's solution shall provide and maintain industry standard quality monitoring capability (e.g., silent monitoring, assignment of unique tracking numbers, voice and screen/multi-media capturing) to analyze the entire call experience as defined by the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC08	The Contractor's solution shall track, store, monitor, maintain, report and display on a dashboard call center statistics at intervals as defined by the Agency (e.g., real time, weekly, monthly, quarterly, and annually) to include, but not limited to: a) Abandon rate b) Availability and agent utilization c) Average speed of answer (ASA) d) Call duration (e.g., minutes, seconds) e) Call volume f) Customer satisfaction g) Contact time (e.g., minutes, seconds) h) One call resolution rate i) Peak hour statistics j) Identification of historical trends k) Busy signal l) Disconnected calls m) Other areas as defined by the Agency	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC09	The Contractor's solution shall provide searchable and viewable communication management system that tracks all call center activities and communications, including all correspondence that is generated to and received from providers and members.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC10	The Contractor's solution shall provide, maintain and operate a secure interactive voice response system (IVRS) with a Contractor-supplied telephone number(s) (e.g., local, toll-free), as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC11	The Contractor shall provide an Interactive Voice Response System (IVRS) that allows a caller to select option to reach a live call center representative during hours of operation with the ability to support call center integration with a configurable menu-driven design, as defined by the Agency, that allows for efficient navigation to the appropriate resource(s). In addition the IVRS shall support configurable scripts for announcements and messages (e.g., regarding hours of operation, emergencies, and system availability) as defined by the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC12	The Contractor's solution shall provide configurable role-based menus to authorized users that restricts user's access to information appropriate for the user type as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC13	The Contractor shall create, configure, and maintain Agency approved IVRS voice messages, messages responses, prompts by the required implementation date.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC14	The Contractor's solution shall provide the appropriate and scalable number of in-bound and out-bound access lines to meet caller demand based on monthly statistics as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC15	The Contractor's solution shall provide the ability to log and track incoming calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC16	The Contractor's solution shall provide the ability to log and track outgoing calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC17	The Contractor's solution shall provide the capability to store, track, prioritize, and maintain a configurable log (e.g.,, date/time reported, issue, description, follow up completed, resolution, escalation contact and workflow) of member and provider complaints received by the call center through the resolution and closure of the complaint. The Agency will have real-time access to detailed information about all complaints.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC18	The Contractor's solution shall capture, store, maintain, and report detailed information, including a unique transaction number, for all inquiries made to the ACD, IVRS and FAXBACK including information requested and conveyed, as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC19	The Contractor's solution shall capture, record, store, and maintain call information (e.g., time and date of call, duration, name and contact information, reason for calling, agent response, status of resolution, resolution description) for operations staff to utilize for research and/or auditing purposes as defined by the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC20	The Contractor's solution shall capture, store, monitor, maintain, report and display all unique transactions (e.g., ACD, IVRS, Faxback) on a dashboard by transaction type with the ability to search and filter (e.g., call type, provider or member ID, name, representative's ID or name, or a combination of these data elements) and view the audit trail of each transaction as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC21	The Contractor's solution shall have the ability to automatically or manually route calls (e.g., internal, external, IVRS/FaxBack, voicemail) between the IVRS and the ACD as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC22	The Contractor's solution shall have the ability to update callers within the queue regarding how long the anticipated wait time is until their call is answered, with a routing option to leave a voicemail as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC23	The Contractor shall conduct quality call monitoring on a randomly selected sample of daily calls (a minimum of one half of one percent (0.005%) and no less than one call per agent, per day). The Contractor shall document and retain results of the quality call monitoring and submit the reports to the Agency.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Member and Provider Call Center	MPCC24	The Contractor shall provide certified language interpretation (for verbal communication) and translation (for written communication) services for all callers and correspondence.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC25	The Contractor's solution shall utilize the same call center solution for both provider and member help line	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC26	The Contractor's solution shall provide users the ability to attach or link one or more associated docume (e.g., MS Word, Excel, PDF, image) to one or more unique call records and allow for viewing , printing, emailing, or faxing of documents from within the call or linked call record, as defined by the Agency.	No	Yes	Option B - Call Center						
Member and Provider Call Center	MPCC27	The Contractor's solution shall provide the ability to survey callers to rate performance measures (e.g., quality, timeliness, and other service delivery elements carried out by the Call Center) as defined by the Agency. The Contractor's solution shall capture caller satisfaction scores to determine the average satisfaction percentage score.	No	Yes	Option B - Call Center						

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Stat**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Member and Provider Call Center	MPCC28	The Contractor shall capture, store, and maintain a multimedia recording of each distinct call center agent interaction with supporting index information (e.g., agent, topic, authorized user id, member id, provider id, date/time) as defined by the Agency. Upon request, provide the Agency with electronic copies of multimedia recordings which shall be archived according to Agency defined retention requirements.	No	Yes	Option B - Call Center						
Operations, Maintenance, and Configuration	OMC01	The Contractor shall cooperate and assist the Department in responding to all law enforcement, federal and State audit and review requests. The Contractor shall provide audit support including, random sample generation, data extracts, hard-copy documents, and provide any requested data or information.	Yes								
Operations, Maintenance, and Configuration	OMC02	The Contractor shall support the disaster recovery activities that will provide timely failover and create relevant documented policies and procedures to implement a recovery.	Yes								
Operations, Maintenance, and Configuration	OMC03	The Contractor shall conduct an annual test of the Disaster Recovery and Business Continuity Plan and submit the Disaster Recover/Business Continuity Test Report that includes the outcome, corrective action plan, and revisions, if any, to the Department.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Operations, Maintenance, and Configuration	OMC04	The Contractor shall provide Operations support, Maintenance, and ongoing Configuration of the provided Solution(s) throughout the life of the Contract. This includes providing Operations support as described in the scope of work as well as providing Maintenance and Enhancements to the provided Solution(s). The Contractor will follow project management and system development processes throughout the life of the Contract. The Department defines maintenance for each module as follows: 1. Making configuration updates as requested by the State. Configuration includes changes to table values, parameters, codes, and business logic, including hardcoded business logic. 2. Correcting deficiencies (defects) found in the solution(s) based on detailed requirements described in the scope of work and published design specifications. 3. Correcting deficiencies (defects) found in the solution(s) based on a failure to meet the detailed requirements in completed enhancement, configuration or maintenance requests. 4. Conducting research requested by the State or required to support the Department. For example: a. System behavior and results b. New healthcare initiatives c. Best practices research across states and industry d. Impacts of new State and federal legislation 5. Performing mass adjustments or mass changes as requested by the State or required to support the State's healthcare programs (for example, errors in pricing, eligibility, cost share, and financial code assignments, TPL discovery, and provider reimbursement change	Yes								
Operations, Maintenance, and Configuration	OMC05	The Contractor shall provide a notification web page that displays when the system is unavailable for scheduled maintenance or unscheduled outages.	Yes								
Operations, Maintenance, and Configuration	OMC06	The Contractor shall have processes in place to restrict access when inappropriate system access or misuse is detected.	Yes								
Operations, Maintenance, and Configuration	OMC07	The Contractor shall test and implement all production ready patches, upgrades, and releases for all software, firmware and operating systems in a timely manner, in coordination with other modules.	Yes								
Operations, Maintenance, and Configuration	OMC12	The Contractor shall notify the appropriate user community, as defined by the State, of system events (e.g., major system changes and system outages).	Yes								
Operations, Maintenance, and Configuration	OMC15	The module Contractor shall provide help desk services to provide level 0 (customer self-service) level 1(basic support), level 2 (moderate support) that includes as appropriate, escalation to the State and level 3 (technical/integration) support related to the functionality of the module's scope of work. Level 1 help desk is the first point of contact and is responsible for logging the issue and, if possible, assisting the user	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Operations, Maintenance, and Configuration	OMC16	The Contractor shall provide online help for external and internal users.	Yes								
Operations, Maintenance, and Configuration	OMC18	The Contractor shall notify the Department when updated reference materials (e.g., Requirements Matrices, Manuals, System Documentation, System Design Documentation, User Documentation, Business Rules Catalog, and Training Materials) are available for review.	Yes								
Operations, Maintenance, and Configuration	OMC19	The Contractor shall provide 24x7 access to the Department for all reference materials (e.g., Requirements Matrices, Manuals, System Documentation, System Design Documentation, User Documentation, Business Rules Catalog, and Training Materials).	Yes								
Operations, Maintenance, and Configuration	OMC30	The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.	No								
Operations, Maintenance, and Configuration	OMC31	The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.	No								
Operations, Maintenance, and Configuration	OMC32	The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option A - Financial						
Operations, Maintenance, and Configuration	OMC33	The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option A - Financial						
Operations, Maintenance, and Configuration	OMC34	The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option B - Call Center

The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option C - Federal Reporting						
Operations, Maintenance, and Configuration	OMC38	The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option D - State Specific Requirements						
Operations, Maintenance, and Configuration	OMC39	The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.	No	Yes	Option D - State Specific Requirements						
Performance	PRFM01	The Contractor shall develop a method for maintaining performance compliance with Service Level Agreements (SLA).	Yes								
Performance	PRFM04	The Contractor shall meet Service Level Agreements and integrate tools for monitoring system and component performance and create the necessary reports or supply a dashboard to support SLAs.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Project Management	PMT01	The Contractor shall provide licenses as required by the Agency to allow users access to perform all necessary business functions.	Yes								
Project Management	PMT02	The Contractor shall support the Department in all program governance activities as necessary.	Yes								
Project Management	PMT03	The Contractor shall be responsible for the capture and dissemination to the Department of agendas, meeting minutes and documentation necessary for successful execution of the project.	Yes								
Project Management	PMT04	The Contractor shall participate in necessary meetings with the stakeholders and/or other Contractors.	Yes								
Project Management	PMT05	The Contractor shall provide deliverables or documentation as defined in the Project Work Plan (PWP) and approved by the Department.	Yes								
Project Management	PMT08	The Contractor shall support the State and its Contractor(s) in Independent Verification and Validation (IV&V) activities associated with the contract including CMS Certification(s).	Yes								
Project Management	PMT09	The Contractor shall conduct a monthly status meeting to discuss project tasks and activities (e.g., deliverables, milestones, issues, risks, and SLAs).	Yes								
Project Management	PMT10	The Contractor shall conduct weekly meetings to discuss issues, risks, progress of current projects, solution changes, resource changes, and other areas specific to the scope of work.	Yes								
Project Management	PMT11	The Contractor must employ a project management approach that will satisfy the scope of work and incorporate all activities described in the RFP. The Contractor shall adjust the project management approach or project schedules, as necessary, to collaborate with the module vendors in order to incrementally build the enterprise platform.	Yes								
Project Management	PMT12	The Contractor shall conduct a project initiation kick-off meeting with key stakeholders and the State's project team.	Yes								
Project Management	PMT13	The Contractor shall implement procedures and tools for tracking project action items, decisions, issues, risks and defects.	Yes								
Project Management	PMT14	The Contractor shall provide an electronic document repository for project documents and deliverables. The Contractor, Department staff and other contractors with the appropriate security level must have the ability to upload/attach new or revised versions of documents. The repository must perform version control and allow users to view all prior version.	Yes								
Project Management	PMT16	The Contractor shall provide deliverables that at a minimum meet the following quality standards: a. Provide accurate and comprehensive content, reflecting the specific requirements for the deliverable. b. Ensure appropriate technical level for the audience. c. Utilize correct grammar, spelling, and versioning. d. Ensure diagrams are clear, concise, and value added. e. Follow industry-related standards. f. Appropriately define and reference information.	Yes								
Project Management	PMT17	The Contractor shall submit a monthly status report. The monthly status report must contain, at a minimum: a. A complete set of updated and current output from the Project Work Plan along with a copy of the corresponding Project schedule files in electronic version. b. A description of the overall completion status of the Project including schedule variations that report the earned value of the work completed, the planned value of the work completed, and the variance. c. Planned tasks and activities for the next month. d. The Deliverable status, with percentage of completion and time ahead or behind schedule for particular tasks. e. Identification of any staffing issues or changes in the Resource Allocation Matrix. f. An updated status on all issues being monitored. g. An updated status on all risks being monitored. h. Provide metrics necessary to support the State CIO's Legislative Finance Committee (LFC) reporting requirements. i. Provide testing status and metrics. j. Provide System enhancement hourly pool total hours used and total hours remaining. k. An updated status on all SLA being monitored.	Yes								
Project Management	PMT18	The Contractor shall develop and maintain a Project Management Plan (PMP): The purpose of the Project Management Plan is to provide a comprehensive baseline of what needs to be achieved by the project, how it is to be achieved, who will be involved, how it will be reported and measured and how information will be communicated with the project. It will serve as a reference for decision and clarifications. All relevant project plans including but not limited to the Communication Plan, Change Management Plan, Staffing Management Plan, Quality Management Plan, Risk Management Plan, Issue Management Plan and the Work Breakdown Structure are incorporated into the Project Management Plan. It is a living document that evolves as the project progresses and is updated with the latest relevant information as required. The Project Management Plan may be broken into separate documents, but all documents will considered sections of the Project Management Plan.	Yes								
Project Management	PMT21	The Contractor shall coordinate with the Department and with the module vendors as required by the Department, to support the program-level change management process consistent with the Enterprise Change Management Plan.	Yes								
Project Management	PMT25	The Contractor shall be required to work collaboratively with the Department and the System Integrator to provide schedule information to be included in the Integrated Master Schedule (IMS). Elements necessary for the IMS include; start and end dates of major phases, key project milestones, integration points, cross module dependencies, and sufficient information to support the State CIO's Legislative Finance Committee (LFC) reporting requirement.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Project Management	PMT27	The Contractor shall coordinate module deliverable and milestone walkthroughs and participate in other module walkthroughs as required by the Department.	Yes								
Project Management	PMT29	The Contractor shall submit a monthly System Enhancement Pool report that details tickets invoiced to the hourly pool and must include hours used and hours remaining for the Department's approval.	Yes								
Project Management	PMT31	The Contractor shall cooperate with the State's PMO and the IV&V contractor to give an accurate, honest reporting of the project status.	Yes								
Project Management	PMT32	The Contractor shall contribute to the State's and/or the Systems Integration Services collaboration site technical and non-technical project artifacts for the Contractor's module or module components including requirements, use cases, user stories, storyboards, system design documents, supplemental specifications, test cases, test scripts, test results, user, system and training documentation at the State's direction.	Yes								
Project Management	PMT36	The Contractor shall develop and maintain a detailed Project Work Plan (PWP) and a Gantt Chart that is aligned with the scope of the work outlined in this RFP, and the resulting contract. The PWP must identify detailed project tasks, realistic person hours for each task, the sequence of tasks and activities including duration necessary to meet deliverable and milestone dates for each phase, estimated baseline start and completion dates, actual start and completion dates, the critical path(s), resources (by name or by resource type if not known), dependencies, permanent tracking number for each task, completion percentages, and phase-level milestones. The dates and hours in the approved PWP form the project baseline. Once established, the baseline will only be modified with approval from the State. Additionally, the PWP must be continually refined and updated as the project progresses and will retain the baseline comparative reporting. From the approved work plan, the Contractor must calculate the required information necessary to meet the Department's reporting requirements to the Legislative Finance Committee (LFC) which include: the work percent complete, SPI, CPI, earned value, planned value, schedule variance, planned amount pe	Yes								
Project Management	PMT37	The Contractor shall provide toll-free or call-back telephone and WebEx web-based conferencing capabilities (or an alternative solution approved by the Agency) to support contract activities.	Yes								
Project Management	PMT38	The Contractor shall establish and utilize a deliverable review and acceptance process agreed upon by the Department that incorporates the following: a. Review cycles, which will be conducted and scaled to the size and complexity of the deliverables. Security-related deliverables will have a 20-day review by the State after first submission, 10-day review cycle by the State after second submission; 5-day review cycle by the State after the third submission. All other deliverables will have a 10-day review by the State after first submission, 5-day review cycle by the State after second submission; 5-day review cycle by the State after the third submission) b. Deliverables will need to reflect coordination with the overall modular program and will follow agreed upon change control processes. c. Informal reviews and walkthroughs of draft and final deliverables are encouraged.	No								
Requirements Management	RQM01	During the requirements validation sessions, the Contractor must demonstrate a fully functioning solution that has been initially configured based on the Contractor's understanding of the requirements described in the RFP and publicly available policy documents, manuals, and fee schedules.	Yes								
Requirements Management	RQM02	The Contractor shall work with the Department to confirm the Contractor's understanding of the requirements and to clarify and/or elaborate requirements where necessary to achieve desired business outcomes.	Yes								
Requirements Management	RQM03	The Contractor shall document any gaps between the initially configured solution and the business requirements in the requirements management tool. Gaps must show bi-directional traceability with applicable business requirement(s), design, test cases, test results, MECT criteria and certification artifacts.	Yes								
Requirements Management	RQM04	The Contractor shall, during requirement validation, provide designated Department staff access to a fully functioning environment to become familiar with the solution.	Yes								
Requirements Management	RQM05	The Contractor shall utilize project control tools to formally track all requirements and related design, configuration, testing, and certification artifacts. The Contractor's requirements management tool shall ensure approved changes to requirements are linked back the approved change requ	Yes								
Requirements Management	RQM06	The Contractor shall develop, maintain and submit a Requirements Traceability Matrix (RTM) to show bi-directional traceability with applicable business requirements and their realization throughout all project phases (e.g., requirements, design, testing and certification (MECT) checklist items). This should include how the requirement is realized (e.g., configuration, custom development, base functionality). All revisions must be reviewed and approved by the Stat	Yes								
Requirements Management	RQM07	The Contractor's requirements management tool shall have the ability to manage requirements traceability by module(s), MITA business area, MITA business process and MECT checklists.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC01	The System shall provide a physical and electronic environment that uses public key infrastructure to verify all transactions and the identity of all users and denies access to unauthorized users. For example: a. Require unique sign-on (ID and password) b. Require authentication of the receiving entity prior to a system-initiated session, such as transmitting responses to eligibility inquiries.	Yes								
Security	SEC02	The Contractor shall ensure that any data being transmitted or transported either physically or electronically will be encrypted.	Yes								
Security	SEC03	The Contractor shall ensure that any unneeded hardware, software, and licenses have been decommissioned.	Yes								
Security	SEC04	The Contractor shall protect all government data from loss or unauthorized disclosure.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC05	The Contractor's solution shall streamline electronic transactions by incorporating electronic and digital signatures compliant with HIPAA and other State and federal statutes.	Yes								
Security	SEC06	The Contractor's solution shall provide tools (e.g., alerts or reports), which identifies usage anomalies or users who may have misused the system.	Yes								
Security	SEC07	The Contractor's solution shall automatically maintain an audit trail of users , including database administrators, who pass through or view a record, regardless of whether data is changed.	Yes								
Security	SEC08	The Contractor's solution shall have security audit trail reporting capabilities (e.g. security, level, locale, IP address, user ID, before and after changes).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC09	The Contractor's solution shall ensure the audit trail that cannot be modified.	Yes								
Security	SEC10	The Contractor's solution shall contain information determined by the Department and must meet Health Information Technology for Economic and Clinical Health Act (HITECH) auditing standards.	Yes								
Security	SEC11	Risk assessments and security audit reports shall be completed on an annual basis and when additions or changes to functionality impact the security framework, architecture or when a new vulnerability exists.	Yes								
Security	SEC12	The Contractor's solution shall manage role-based permissions and provide a National Institute of Standards and Technology (NIST) compliant identification, authentication and accounting solution.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC13	The Contractor's solution shall have multiple layers of external and internal security that provide administrative, physical, and technical mechanisms to protect sensitive or confidential information used in performing the responsibilities and duties defined for the module scope of work.	Yes								
Security	SEC14	The Contractor's solution shall not include any code of unknown origin.	Yes								
Security	SEC15	The Contractor shall provide an independent third party to perform penetration testing within six (6) mo prior to implementation. Penetration testing must also be performed by an independent third party on an annual basis and when additions or changes to functionality impact the security framework, architecture or when a new vulnerability exists. Penetration Test Report results shall be supplied to the Department and any major or critical vulnerabilities mitigated	Yes								
Security	SEC16	The Contractor shall provide the primary and disaster recovery facility(s) which will ensure security, performance and disaster recovery requirements outlined in the module scope of work.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC17	The Contractor shall maintain policies and procedures for security clearance and staffing controls for allowing access to confidential information and/or to restricted areas within the Contractor's solution.	Yes								
Security	SEC18	The Contractor shall maintain adequate technical support/staffing to provide 24x7x365 coverage.	Yes								
Security	SEC19	The Contractor's data encryption solution shall meet Federal Information Processing Standard (FIPS) 140-2 and at a minimum use AES 128 encryption.	Yes								
Security	SEC20	The Contractor shall ensure that all data, regardless of its location, is encrypted at rest.	Yes								
Security	SEC22	The Contractor will provide a completed Security Audit Report with results to the Department by the 30th (thirtieth) of September each year. The Security Audit Report must include either an electronic data processing (EDP) systems audit using SSAE - 18 at a minimum level service organization control (SOC) Type II or a NIST 800-53 rev 4 assessment at a "moderate" system risk control level. The Contractor shall provide a mitigation plan for all reported deficiencies. Major and critical deficiencies must be corrected within forty (40) calendar days of the report submission to the Department.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC23	The Contractor's solution shall provide security features that support increasing the complexity of the authentication and authorization as the sensitivity of the data or functionality increases.	Yes								
Security	SEC24	All Contractor's module components shall adhere to any applicable Department system security practices, configurations & procedures.	Yes								
Security	SEC25	The Contractor's solution shall provide the ability to grant authorization through role-based security (create, delete, modify and view) access to user interfaces, reports, data elements/field level, and menu items.	Yes								
Security	SEC26	The Contractor's solution shall allow access and role changes to be made in real-time with appropriate authorizations.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC27	The Contractor's solution, in order to protect the database from SQL injection attacks, shall access the database from the application through a standard database abstraction layer.	Yes								
Security	SEC28	The Contractor's solution shall be easy-to-use and provide a user interface that allows authorized users to edit, create, and implement role-based and group-based security at the data element/field level for authorized users based upon individual characteristics or functional security groups.	Yes								
Security	SEC30	The Contractor must limit access to its off-site facilities; including storage facilities. The Department has the right to perform physical security audits of the Contractor's off-site and on-site facilities at the Department's discretion.	Yes								
Security	SEC31	The Contractor shall establish security and privacy standards and standard operating procedures. These standards include HIPAA, Federal Information Security Management Act (FISMA), Privacy Act, Federal Tax Information (FTI), and other Federal and State laws, regulations, and policies. The Contractor shall also establish business and technical protocols to ensure that the transmission and storage of information remains secure.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC38	The Contractor's solution shall employ malicious code protection mechanisms at IT systems entry and exit points, at workstations, servers, and mobile computing devices on the network to detect and eradicate malicious code.	Yes								
Security	SEC39	The Contractor's solution shall use foundational technical standards such as X.509 Certificate format and Public Key Cryptography Standard (PKCS).	Yes								
Security	SEC41	The Contractor shall collaborate with the Systems Integration Services Contractor to integrate the Contractor's solution into the State's integration platform for single sign-on and federated identity management.	Yes								
Security	SEC42	The Contractor shall have an overall data security process that supports data security auditing.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC43	The Contractor shall provide, configure, support, maintain and manage a federated identity and access management solution that will perform user authentication and authorization through single sign-on for all module components.	No								
Security	SEC44	The Contractor must be compliant with the security processes outlined in the "Security and Privacy Controls Requirements" document that has been included in the Procurement Library.	Yes								
Security	SEC45	The Contractor shall monitor system activity and prevent and detect intrusion, hacking, unusual activity, or system compromise. The Contractor shall immediately report any incidents of such, regardless of the outcome to the state, activate a Department approved communication strategy, perform mitigation activities, and provide continuous status updates to the Department until the issues are resolved to the Department's satisfaction. Only authorized contractor personnel may override system security alerts and edits.	Yes								
Security	SEC46	The Contractor shall provide and operate solutions that terminate access immediately and/or generate alerts for conditions that violate security rules, unauthorized attempts to access data and system functio and system activity based on security parameters.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC47	The Contractor's solution shall ensure that only authorized users have access to systems and data, by requiring the following: - Unique authentication credentials identifiable to each user of the system, not allowing for the re-use of credentials; - Authenticates the receiving entity prior to a system initiated session, such as transmitting responses to case inquiries; - Maintenance of key user information as part of a user profile including user ID, name, employer/state agency, - Identity verification information, and an indicator of employee versus contractor; - Multi-factor user authentication and the ability to restrict or permit a user's access to system functions, features, and processes based on the user's assigned roles based on business need and user security profile and a unique user ID and password and including a read-only access level; - Column and row-level security access, data classification schemes, and/or the designation of data at multiple levels (e.g., case, individual) as restricted or sensitive (e.g., substance abuse treatment data) with the ability to define and implement exclusion controls on a per-user or user-group basis within a multi-level organizational structure, (e.g., external agencies and Appeals units). - A method for authentication of all internal and external users and systems and the ability to deny access to all invalid users and systems; - Encrypted passwords in storage and in transmission;	Yes								
Security	SEC48	The Contractor shall provide to the Department, upon request, a listing of all users having access to the Contractor's module components and/or data with details regarding the access granted to each user.	Yes								
Security	SEC49	The Contractor shall provide and operate solutions for security incident reporting and mitigation mechanisms. The Contractor shall preserve and report specified audit data when security violations are detected and mitigated.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC50	The Contractor shall comply with NIST Special Publication 800-111: Guide to Storage Encryption Technologies for End User Devices where required by CMS to protect confidential information stored on end user devices.	Yes								
Security	SEC51	The Contractor shall comply with NIST Federal Information Processing Standards (FIPS) Publication 180-4: Secure Hash Standards as required by CMS for use of secure hash algorithms.	Yes								
Security	SEC52	The Contractor shall comply with NIST Federal Information Processing Standards (FIPS) Publication 186-4: Digital Signature Standard as required by CMS for use of secure algorithms in digital signatures.	Yes								
Security	SEC53	The Contractor shall comply with the Harmonized Security and Privacy Framework - Exchange Reference Architecture Supplement Version 1.0 and as required by CMS.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC54	The Contractor shall comply with the OASIS Web Services Security - Simple Object Access Protocol (SOAP) Message Security Specifications to build secure web services to implement message content integrity and confidentiality.	Yes								
Security	SEC55	The Contractor shall respond to all risks identified through the periodic security risk assessments with a CMS Information Security Program Plan of Action and Milestones (POA&M) containing clarifying information, a proposed mitigation strategy if necessary, a timeline for implementation, and shall work with the Department to successfully execute the POA&M.	Yes								
Security	SEC56	The Contractor shall ensure all contractor and subcontractor personnel providing services under this contract are familiar with and comply with the Business Associate Agreement and the privacy and secu policies included in the RFP.	Yes								
Security	SEC57	The Contractor shall provide logical segregation of the Contractor's solution, components, and network connections with other entities and prevent any unauthorized disclosure of the States' data.	Yes								
Security	SEC58	The Contractor's solution code shall never run from a system level account with unlimited privileges such as "root" or "administrator".	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC59	The Contractor shall ensure the confidentiality, privacy, and security of all state data passing through the Contractor and subcontractor networks.	Yes								
Security	SEC60	The Contractor shall establish and implement emergency access procedures for the Department to obtain secure access to module data during an emergency. Emergency access procedures shall be subject to the Department's approval.	Yes								
Security	SEC61	The Contractor's solution must protect data from improper alteration or destruction including authentica mechanisms and to corroborate that the data has not been altered or destroyed in an unauthorized manner.	Yes								
Security	SEC62	The Contractor's solution shall display a security warning banner prior to allowing entry into the system. The solution shall have security warning banners and headers and footers that adhere to Federal, state, and other applicable standards that are prominently displayed introductory screens.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC63	The Contractor shall utilize cloud-based technology wherever advantageous to maximize the efficient and effective utilization of technology.	Yes								
Security	SEC64	The Contractor shall ensure user account access is reviewed on a quarterly basis at a minimum. User accounts should be appropriately disabled as roles and responsibilities change.	Yes								
Security	SEC66	The Contractor's solution shall meet the minimum password requirements below: 1. Must not contain the user's account name or parts of the user's full name that exceed two consecutive characters 2. Minimum password length: 8 characters 3. Contain characters from 3 of the following 4 categories a. English uppercase characters (A through Z) b. English lowercase characters (a through z) c. Base 10 digits (0 through 9) d. Non-alphabetic characters (for example, !, $, #, %) (these will not work when logging into ReRite from Toshiba printers ... not on the key pad) 4. History: Cannot reuse a password for 24 password changes, user cannot reset password again for 24 hours 5. Expiration time frame: 60 day 6. Lockouts for failed attempts – account locks after 3 failed attempts, will unlock after 15 minutes	Yes								
Security	SEC67	The Contractor's solution shall track disclosures of ePHI; provide authorized users access to and reports on the disclosures.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC68	The Contractor shall support the State in developing a Privacy Impact Analysis for each module or modu component that includes the following information: Use of personally identifiable information (PII) or personal health information (PHI) and a description of the types of data that will be collected Sources of PII/PHI, populations, and transfer and disclosure mechanisms Legal environment (legal authorities and state privacy laws) Details about the entities with which the collected information will be shared Privacy and security standards for its business partners and other third parties and the agreements that bind these entities Incident handling procedures	Yes								
Security	SEC70	The Contractor shall provide the ability to de-identify and/or redact data for entities not authorized to receive PII or PHI and utilize de-identification algorithms to allow for re-identification of data if required.	Yes								
Security	SEC71	The Contractor shall provide a process for masking, sanitizing, scrambling, or de-sensitizing sensitive d (e.g., PII/PHI) when extracting data from the production environment for use in non-production environments.	Yes								
Security	SEC72	The Contractor shall review and identify monthly, any unneeded hardware, software, and licenses, pres recommendations to the State for review and ensure that any unneeded hardware, software, and licenses have been decommissioned upon approval from the State.	Yes								
Security	SEC82	The Contractor's transmission security shall use, at a minimum, TLS 1.2, SHA 2 with a minimum of a 2048 bit key, or a more advanced industry standard transmission security protocol.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Security	SEC83	The Contractor will provide the completed reports with the results of the service organization control (S 1 Type II audit annually on date identified by the State. The Contractor shall provide a mitigation plan for all areas of non-compliance. Issues found to be non-compliant shall be corrected within ninety (90) calendar days of the report submission to the Department.	No								
Subcontractor	SUB02	If the Contractor transfers resources required to fulfill the contract to a third party, the third party is considered a sub-contractor and the transfer will be subject to the 40% subcontractor limitation.	Yes								
Subcontractor	SUB03	The Contractor shall list all subcontractors, if any, in the proposal.	Yes								
Subcontractor	SUB04	The Contractor shall provide a detailed description of all work to be subcontracted to third parties.	Yes								
Subcontractor	SUB05	The Contractor must submit to the Department annually, a Subcontractor Usage Report on the use of subcontractors and certify that all subcontractors are in compliance with the employment practices mandated by federal and State statutes and regulations. The Subcontractor Usage Report must at a minimum contain the total subcontract dollar value, total subcontractor FTE's, total subcontractor hours	Yes								
Subcontractor	SUB06	The subcontractor will be required to enter into a signed Business Associate Agreement (BAA) as a part of the contract, that is in compliance with the Privacy and Security provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) prior to start of work. The BAA is included in the contract template found in the Procurement Libra	Yes								
Subcontractor	SUB07	The Contractor shall allow Department personnel direct access to all subcontractor or third-party personnel serving in critical roles on the project and shall not act as an intermediary between the Department and such parties for questions about the proposed solution or operation of the proposed solution. The Department reserves the right to discuss design, configuration, implementation, operation, routine maintenance, and enhancement of the proposed solution(s) directly with any subcontractors or third parties involved in performing work for the Departme	Yes								
Subcontractor	SUB08	The Department shall have the right to review and approve any subcontracts through the Contractor.	Yes								
Subcontractor	SUB09	The Contractor may use subcontractors for no more than forty percent (40%) of the scope of work included in the contract. The subcontractor 40% will be determined using the highest proportional value among the following factors: subcontract dollar value relative to the overall contract value, subcontractor FTE's relative to the total contract FTE's, subcontractor hours relative to the total contract hours. If the proposed solution to meet the core functional requirements (e.g., core product) is a commercially licens COTS or SaaS product (e.g., the State will receive a commercially available license for the product), the specific product that satisfies this condition can be excluded from the 40% subcontractor calculation. In Attachment L - Technology Matrix, the vendor must include "Commercially Licensed" in the column titled "Other" for the specific line item. This exclusion also applies to infrastructure, infrastructure software, or software that supports the core product.	Yes								
System Administration & Operations	SAO01	The Contractor shall establish and maintain an automated reconciliation of all electronic claims received and provide a dashboard with daily aggregate summary and the ability to drill down by specific trading partner, billing provider, transaction type (e.g., 837I, 837P, 837D, encounter) and search capabilities using all available data elements to validate all transactions received are processed according to Agency defined business rules.	No								
System Administration & Operations	SAO02	The Contractor shall provide staff to develop, organize, lead, and conduct training and education activities (e.g., provider and Agency staff training) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO03	The Contractor's solution shall provide flexible publishing capabilities (e.g., formatting and stylistic consistency, allow control of format, font, graphics, layout, and page design, allow creation of master pages and style sheets to automate and structure documents, utilize industry standard tools to assure proper spelling, punctuation, grammar, capitalization, and checks for technical compliance with printing industry standards before publication) as defined by the Agency.	No								
System Administration & Operations	SAO04	The Contractor shall provide flexible publishing capabilities for multi-chapter publications and large technical documents (e.g., generate and insert footnotes and endnotes, generate table of contents, generate indices, include appendices, manage chapter files, manage centralized style sheets, manage tabular material, import tables from various data sources into controlled table structures) as defined by the Agency.	No								
System Administration & Operations	SAO05	The Contractor shall provide flexible publishing capabilities to allow for control over all typographical characteristics (e.g., leading and kerning) and support for full color output as defined by the Agency	No								
System Administration & Operations	SAO06	The Contractor's solution shall provide a ticket (e.g., customer service request, state task request) dashboard to include, but not limited to: request, design, analysis of change (e.g., level of effort, schedu resources), ticket type (e.g., Enhancements, Deficiencies, Maintenance, Research, Configuration and Mass Adjustments), test, implement, and approval and provide a detailed and viewable status of all ticket requests (including linking related tickets) from receipt through approval as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Statu**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
System Administration & Operations	SAO07	The Contractor shall create and maintain a communication inventory (e.g., letter, email templates) with necessary information (e.g., content, stakeholders) to communicate specific events (e.g., system or staff change) and develop appropriate communication and notifications for stakeholders as defined by the Agency.	No								
System Administration & Operations	SAO08	The Contractor's solution shall provide for the creation and processing of online surveys, store indexed survey results (e.g., survey number, date, topic, response date) and provide the results and supporting data of online surveys to authorized users as defined by the Agency.	No								
System Administration & Operations	SAO09	The Contractor shall supply staff to meet all service level agreements and perform all claims processing functions (e.g., claims supervisor, claims processing staff, quality assurance staff, publication staff, training staff) as defined by the Agency.	No								
System Administration & Operations	SAO10	The Contractor shall supply staff to analyze, develop, configure, and maintain all claims pricing and payment methodologies (e.g., claims processing updates, payment methodology updates, Federal and State policy guideline changes, ad hoc impact analysis, changes with third party tools) as defined by the Agency.	No								
System Administration & Operations	SAO11	The Contractor must receive approval from the Agency to make any changes to the system (e.g., applications, programs, procedures, specifications, parameters, disposition codes, definitions or objectives.) In the event that an emergency system change is required to continue normal system operations and the Contractor is unable to obtain Agency approval for the change, the Contractor must notify the Agency as soon as the change is made and the system returns to normal operations using the communication process as defined by the Agency.	No								
System Administration & Operations	SAO13	The Contractor must support the Agency during all audits and reviews conducted by CMS, authorized agencies and contractors, and/or by the State over the life of the contract, to include but not limited to: assisting the Agency and the auditing entity in sample selections, documentation and data gathering, and responding to questions as defined by the Agency.	No								
System Administration & Operations	SAO14	The Contractor shall provide and maintain a telecommunications link and associated hardware (e.g., VPN site to site connection) between the claims solution and all associated systems and subsystems.	No								
System Administration & Operations	SAO15	The Contractor's solution shall proactively monitor claims processing statistics (e.g., denial rates, denial reasons, claim suspense reasons and resolution) and identify and provide necessary training to mitigate continued claim denials as defined the Agency.	No								
System Administration & Operations	SAO16	The Contractor's solution shall maintain claims history available for adjustments and inquiry for a duration as defined by the Agency; and all "once in a lifetime" claims.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO17	The Contractor's solution shall create, store, and return a unique identification number (e.g., internal control number) for all claims transactions as defined by the Agency.	No								
System Administration & Operations	SAO18	The Contractor's solution shall have the ability to create, maintain, and produce regularly-scheduled and ad-hoc publications (both print and electronic) of multilingual documents as defined by the Agency.	No								
System Administration & Operations	SAO19	The Contractor shall provide translator and integrated mapping software (e.g., flexible mapping functionality supporting all required formats and transactions, allowing for structure and information to be extracted directly from database tables, providing the ability to receive, assemble, validate, encrypt, respond, and transport batches of data to and from covered entities and other trading partners; accept, code, decode, balance, and transmit all current and future HIPAA healthcare transactions (e.g., 837, 835, 270, 271, 276, 277 (including unsolicited), 278, 820, 834, 997,999, 991, 824, TA-1) and providing support for automatically re-submitting the transaction when a transmission error occurs) as defined by the Agency.	No								
System Administration & Operations	SAO20	The Contractor's solution shall provide predictive modeling capability for the management of quality and cost-effectiveness of healthcare services, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO21	The Contractor shall develop and maintain a configurable summary dashboard for ticket requests with the ability to drill-down to detailed information to include, but not limited to: ticket type, identifier, prioritization, description, related notes or comments, request date, requester, start date, assigned resource(s), estimated completion date, estimated hours, hours worked to date, documentation impact and status, testing reports and status, agency approval, implementation date, post implementation updates as defined by the Agency.	No								
System Administration & Operations	SAO22	The Contractor's solution shall serve as the EDI broker/gateway to create, edit, receive, and respond (e.g., real-time, SFTP, batch file upload), translate, and process X12, standardized transactions and current and future HIPAA standard transactions as defined the Agency.	No								
System Administration & Operations	SAO23	The Contractor shall provide a secure web portal with the ability for members to receive REOMB and respond, as defined by the Agency.	No								
System Administration & Operations	SAO24	The Contractor shall receive, track, monitor, and respond (e.g., using Agency approved template, free-form) to inquiries through a secure portal inbox, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO25	The Contractor's secure web portal shall allow external users inquiry of member information (e.g., eligibility, demographic, detailed description of covered benefits and utilization information, service authorization requirements, copayment and out-of-pocket accumulation) as defined by the Agency.	No								
System Administration & Operations	SAO26	The Contractor shall provide a secure web portal with the ability to view, retrieve, download and print remittance advice (e.g., x12 835, PDF) as defined by the Agency.	No								
System Administration & Operations	SAO27	The Contractor provide a web portal with the capability to receive, store, maintain (e.g., version history) and upload documents, as defined by the Agency.	No								
System Administration & Operations	SAO28	The Contractor's solution shall provide a web portal with the ability for a secondary navigation scheme (e.g., breadcrumb trail) for navigation on the web portal as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO29	The Contractor's solution shall provide operational support and maintenance of the web portal to include a dashboard detailing usage statistics (e.g., user count, transactions, uploads, downloads, secure messages) as defined by the Agency.	No								
System Administration & Operations	SAO30	The Contractor's solution shall provide a web portal with comprehensive functionality (e.g., contacting the Agency or a payee, view summary and detail information, remittance advices, warrant summaries, complete and submit an EDI trading partner application, frequently asked questions) as defined by the Agency.	No								
System Administration & Operations	SAO31	The Contractor's solution shall manage and maintain EDI transaction sets and permissions (e.g., eligibility inquiry and response only, 837 Dental submission and response only) for covered entities and/or trading partners as defined by the Agency.	No								
System Administration & Operations	SAO32	The Contractor shall create, maintain (e.g., current and historical versions) Agency-specific EDI companion guides in a format and timeframe defined by the Agency. All EDI companion guides must ha the required Agency and/or federal approval.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO33	The Contractor shall provide a web portal with the ability to post and archive user specific or non-specific announcements or alerts (e.g., member, provider, specific benefit plan, and user role) that are displayed at user sign-on or at a frequency defined by the Agency. Users should be required to acknowledge the announcement so that it is not repeatedly displayed at subsequent sign-on, as defined by the Agency.	No								
System Administration & Operations	SAO34	The Contractor shall provide an interactive web portal with smart links to Agency, Federal, provider, and member resources and information (e.g., provider manuals, instructions, bulletins, program descriptions and updates, fee schedules, eligibility criteria, forms, member guides, certifying agencies, SSA, public health care and nutritional programs) for viewing, downloading, and printing as defined by the Agency.	No								
System Administration & Operations	SAO35	The Contractor shall establish and maintain a reconciliation process for all paper claims and attachments received and provide a dashboard with daily aggregate summary and the ability to drill down by specific billing provider, claim type (e.g., professional, institutional, dental, nursing home) and search capabilities using all available data elements to validate all claims and attachments received are processed according to Agency defined business rules.	No								
System Administration & Operations	SAO36	The Contractor shall identify, procure, and maintain licenses for all reference data (e.g., payment methodologies, claims editing, translator(s)) and electronic copies (e.g., implementation guides, reimbursement methodologies, National Correct Coding Initiative policy manual) necessary to support the acceptance, editing, pricing, adjudication, and payment of healthcare and non-healthcare claims for use by all modules as defined by the Agency. These licenses must allow the reference data to be shared with other modules (e.g., care management, EDW, provider services, TPL, customer care, fraud waste and abuse) to support the administration of the Agency healthcare programs.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO37	The Contractor's Electronic Data Interchange solution shall provide the ability to support the exchange of EDI transactions with multiple distinct segregated testing environments with the full functionality of the production environment (including transaction processing, editing, validation, and reporting). The EDI solution will have the capability to create, update, and maintain X12 transactions (i.e. 834, 837, 270/271) as part of targeted testing scenario groups to support comprehensive system wide regression testing across all claim types, eligibility groups, and provider types as defined by the Agency. Following the execution of each EDI regression test group, Contractor will perform automated reconciliation between test outcomes and the expected outcomes. Whenever possible, EDI regression tests should utilize rea production transactions and outcomes for EDI regression tests.	No								
System Administration & Operations	SAO38	The Contractor shall establish and operate a mailroom for the intake of physical correspondence (e.g., scanning, batching claims, claims and attachments, faxes, adjustments and/or voids, medical records, appeals and grievances, letters, documents, surveys, returned mail) and processing and mailing of outbound physical correspondence (e.g., claims that fail prescreening, letters, documents, surveys, handbooks, mass mailings) including producing mailing labe	No								
System Administration & Operations	SAO39	The Contractor shall provide a courier to pick up and drop off mail at the Agency designated USPS faci including delivering provider correspondence, administrative mail, and other non-claims mail to the appropriate functional areas (e.g., Agency staff).	No								
System Administration & Operations	SAO40	The Contractor's solution shall test all current and future HIPAA transaction processing according to guidelines developed by the Strategic National Implementation Process as defined by the Agency (e.g., compliance testing; application, operations, and interface testing; business to business testing).	No								
System Administration & Operations	SAO41	The Contractor's shall create materials at a reading level and for a culturally diverse population in a language or format (e.g., Braille, large-fonts, recordings) preferred by the intended recipient (e.g., member, provider) as defined by the Agency.,	No								
System Administration & Operations	SAO42	The Contractor shall not require travel by Agency staff outside of the primary project location to support contract activities, as defined by the Agency.	No								
System Administration & Operations	SAO43	The Contractor's solution shall provide a configurable dashboard to display transaction activity (e.g., average processing time and transaction volume) as defined by the Agency.	No								
System Administration & Operations	SAO44	The Contractor shall create and maintain the comprehensive conceptual, physical, and logical data mode for all data throughout the life of the contract as defined by the Agency.	No								
System Administration & Operations	SAO45	The Contractor shall allow the state to purchase software licenses and software maintenance directly, if determined to be in the best interest of the Agency, for use within the solution as defined by the Agency.	No								
System Administration & Operations	SAO46	The Contractor's solution shall only utilize production data for testing with approval as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO47	The Contactor's solution shall have the capability for use of the Web Portal to report fraud, waste, and abuse as defined by the Agency.	No								
System Administration & Operations	SAO48	The contractor's solution shall have the ability for members to manage their account using a Web Portal (e.g., verify eligibility (request a replacement Medicaid ID card), view claims information, and file complaints) as defined by the Agency.	No								
System Administration & Operations	SAO49	The Contractor shall supply staff to analyze, develop, and configure payment methodologies and coordinate with Agency staff during rule and policy changes as defined by the Agency.	No								
System Administration & Operations	SAO50	The Contractor's solution shall provide a web portal with the ability to upload forms and supplemental claim documents (e.g., primary payer EOB, medical records, contractor published documents, requests for information) and automatically associate the file to the claim or member record, as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO51	The Contractor's solution shall process the following transactions: 837I Healthcare Claim: Institutional 837P Healthcare Claim: Professional 837D Healthcare Claim: Dental 835 Healthcare Claim Payment/Remittance Advice 270 Eligibility, Coverage, or Benefit Inquiry 271 Eligibility, Coverage, or Benefit Information 276 Healthcare Claim Status Request 277 Healthcare Claim Status Response 278 Healthcare Services Review – Request and Response 820 Premium Payment 834 Benefit Enrollment and Maintenance 997 Acknowledgement 824 Application Advice.	No								
System Administration & Operations	SAO52	The Contractor's solution shall accept, screen, date-stamp, assign unique control numbers, and store h copy all claim forms and attachments.	No								
System Administration & Operations	SAO54	The Contractor's hosting environment for all module components shall be compliant with Statement on Standards for Attestation Engagements (SSAE-18) SOC 2 Type 2 and has Federal Risk and Authorization Management Program (FedRAMP) Certification, FedRAMP Risk Assessment that indicates compliance has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. If the Contractor proposes either a multi-tenant solution or a public cloud, hybrid cloud (Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS)), or community cloud enviornment, the vendor must ensure that the environment is either FedRAMP certified or that the shared resources are only accessible by HIPAA-covered entities as defined in 45 CFR 160.103.	No								
System Administration & Operations	SAO55	In the event the Contractor is unable to continue meeting the requirements for the approved hosting model or if the Contractor desires to transition to different hosting model that is compliant with the requirements of the contract, the Contractor must: 1) provide the state with the opportunity to verify compliance of the new hosting environment with the contract requirements in advance of transition, 2) ensure that there is additional cost to the state for the new hosting model, and 3) ensure that there is no disruption of service [illegible]	No								
System Administration & Operations	SAO56	The Contractor's solution shall receive, store, create, and maintain an indicator and effective dates of an enrolled provider's participation in state specific programs (e.g., health home, primary care enhanced rate) as defined by the Agency.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO58	The Contractor's solution must evaluate criteria defined by the agency (e.g. provider participation flags specified programs) to adjudicate claims and established pricing.	No								
System Administration & Operations	SAO59	The Contractor's solution shall validate that the member is assigned to the provider and has active eligi for the period prior to payment.	No								
System Administration & Operations	SAO64	The Contractor's claims processing environment will be sized to process up to 200 concurrent transactions per second.	No								
System Administration & Operations	SAO65	The Contractor shall provide tools for comprehensive performance monitoring and reporting via a dashboard, for SLAs related to the claims processing and management services scope of work and performance of the claims solution.	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
System Administration & Operations	SAO66	The Contractor must provide a secure communication mechanism that can be accessed by multiple vendors based on user role as defined by the Agency.	No								
System Administration & Operations	SAO67	To support exchange of data with the MMIS requested by other entities, the contractor shall establish network connections with other MMIS vendors or State trading partners as determined necessary by the State and shall host related hardware and software components to support secure network connectivity at a reasonable cost that is paid by the other MMIS vendors or trading partners and shall establish Interconnection Security Agreements that document interface characteristics, security requirements, and the nature of the information communicated over the connection	No								
System Administration & Operations	SAO69	Contractor shall ensure that individuals occupying Key Personnel positions shall, at a minumum, provide services between 8:00 a.m. and 5:00 p.m. local time Monday through Friday unless a resource-specific alternative schedule is approved by the Agency.	No								
System Administration & Operations	SAO70	The Contractor's solution shall allow authorized users to search and view Claims Based Medical History	No								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Testing	TEST02	At a minimum, the Contractor shall provide sufficient segregated environments to support testing processes that are equivalent to the following: a. Integration Testing: End-to-end testing performed to expose defects in the interfaces and in the interactions between integrated module components or other systems and validate the system's readiness to meet non-functional requirements. b. System testing: The process of demonstrating that a program, function, or integrated system components meets its requirements and objectives as stated in the requirements specification. c. Regression Testing: Testing of a previously tested function following modification to ensure that defects have not been introduced or uncovered, as a result of the changes made. It is performed each time the software or its environment is changed, and typically involves automated testing scripts. d. Parallel Testing: Validates that the system achieves the same results as compared to another system (e.g., a legacy system) or previous software version. e. Performance and Load Testing: Verifies the performance of a system will meet service level agreements and also measures the behavior of the system with increasing load (e.g. number of parallel users and/or numbers of transactions to determine what load can be handled by the system). f. User Acceptance Test: Testing conducted by the user or customer to determine whether or not a system satisfies the defined user acceptance criteria in an isolated environment.	Yes								
Testing	TEST03	The Contractor must identify and resolve interdependencies that restrict or impede required testing of the Contractor's solution, other enterprise modules, or module components from performing required testing. Unless otherwise identified by the State strategies to resolve interdependencies must be reviewed and approved by the State prior to implementing the resolution strateg	Yes								
Testing	TEST04	The Contractor shall perform testing and present the results for each of the following test levels: Performance Test results, System Test results, Parallel Test results, Regression Test results, Integration Test results. Test results shall be traced to the use case/user story and design documentation being tested	Yes								
Testing	TEST05	The Contractor shall provide sufficient environments and resources for the following: a. Synchronize the software and the data from the production environment and testing and impact analysis environment at a minimum on a quarterly basis or at the discretion of the Department. b. Synchronize the software and the data from the production environment and training environment following software deployments. c. Provide a fully functioning online test environment, which includes batch and online programs, files, and supporting systems. d. Provide technical and functional support to create and analyze "what-if" scenarios and compare results between scenarios in the impact analysis environment. Provide an analysis of outcomes in impact analysis environment and another environment, such as production or test. e. Provide State, Contractor, and IV&V staff a minimum of read-only access to all environments and tools. f. Provide sufficient resources to support the execution of automated regression testing. h. Provide comparative analysis support of regression testing results. i. Conduct testing of approved system configuration changes, corrections or enhancements or before implementation.	Yes								
Testing	TEST06	The Contractor shall ensure, in order to release code to UAT or production, it must meet the minimum acceptable defect levels: • Critical: 100% have been resolved. • High: 100% have been resolved	Yes								
Testing	TEST08	The Department plans to perform UAT on all software releases as part of the contract. The Contractor's approach to establishing testing environments should not impact the Department's ability to conduct continuous UAT in a separate, dedicated environmen	Yes								
Testing	TEST09	The Contractor shall facilitate UAT as follows: a. Provide test cases and scripts from previous test levels. b. Assist the Department in developing UAT test cases. c. Provide a dedicated UAT environment to the Department and maintain the environment as needed to support continuous UAT throughout design, configure/build and testing. d. Refresh data, execute processes, and migrate releases or code fixes as requested or on an agreed-upon schedule. e. Provide test data.	Yes								
Testing	TEST10	The Contractor shall provide Department resources or their designee access to test cases, test results defect tracking via online tools. The Department reserves the right to inspect artifacts and results at any time	Yes								
Testing	TEST11	The Department reserves the right to conduct independent testing of the solution at any time. The Contractor must cooperate with the Department or its designee, and provide environments, data, and technical support for independent testing	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Testing	TEST12	The Contractor's Performance and UAT test environments shall be sized to be capable of mirroring the production System in its infrastructure, files, databases, processing, and reporting.	Yes								
Testing	TEST13	The Contractor shall work proactively with the State's designated testing resources to review all test results and provide the necessary system and functional information to create verification procedures and user acceptance test cases.	Yes								
Testing	TEST19	The Contractor shall develop test criteria and algorithms for expected outcomes prior to production of reports.	Yes								
Testing	TEST20	The Contractor shall ensure that the Project Work Plan allocates sufficient time to the State's user acceptance testing activities relative to the detailed scope of work, requirements and gaps, the number of manually executed test cases, and the complexity of module integration. The Contractor will be responsible for extended user acceptance testing if the proposed testing duration is not sufficient for the State to validate the module.	Yes								
Testing	TEST22	The Contractor shall plan and execute testing for all inbound and outbound interfaces, ensure accurate and secure data transmission between the contractor's solution and the State's Integration Platform and coordinate with external entities as appropriate.	Yes								
Testing	TEST23	The Contractor shall coordinate with the Department, Systems Integrator, and specific module component vendors to conduct integration testing.	Yes								
Training	TRN01	The Contractor shall provide technical training to agency project resources and designated contractors to develop an understanding of how to monitor the system using available tools and dashboards while leveraging technical and functional documentation and/or report	Yes								
Training	TRN04	The Contractor shall update training materials when changes occur.	Yes								
Training	TRN05	The Contractor shall collaborate with the agency to finalize a training schedule.	Yes								
Training	TRN06	The Contractor shall maintain and update the training environment with training data to use during user training.	Yes								
Training	TRN08	The Contractor shall utilize a variety of delivery methods to best meet the training objectives. Examples include online self-paced training presentations, in-person classroom setting, written material, and demonstrations.	Yes								
Training	TRN09	The Contractor must provide training necessary to support new functionality and/or major software releases that materially change the user interaction.	Yes								
Training	TRN10	The Contractor shall provide training to Agency staff and other designated module vendors on the overall data management strategy and investigating data or process issues related to module integration.	Yes								
Training	TRN13	The Contractor shall provide training and support to State staff and individuals designated by the State (e.g., IV&V, QA/QC vendor), on the use of DDI tools provided by the contractor. This may include traceability tools, document repositories and testing tool.	Yes								
Training	TRN14	The Contractor shall provide training on the system for UAT testers. The Contractor shall provide upda User and System Documentation to UAT testers to support the UAT effort.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Workflow	WKF01	The Contractor's workflow solution shall provide a runtime engine that facilitates process events throughout the work type lifecycle.	Yes								
Workflow	WKF02	The Contractor's workflow solution shall provide configurable work distribution and redistribution based on work type, worker skill, priority, and age of work which can be configured by the State.	Yes								
Workflow	WKF03	The Contractor's workflow solution shall provide a user-friendly Graphical User Interface (GUI) for proc definition, execution, monitoring, and management. Support a role-based interface for process definition that leads the user through the steps of defining the workflow associated with a business process includ processes that are managed by Department staff only, and that captures all the information needed by the workflow engine to execute that process.	Yes								
Workflow	WKF04	The Contractor shall support and assist the Department in mapping all business processes and subprocesses to the workflow application and in transitioning from manual to automated process execution.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Statu	roduct Typ	Hosting	Security Tested	Additional Information
Workflow	WKF05	The Contractor's workflow solution shall support work-type processing that includes internal and external dependencies.	Yes								
Workflow	WKF06	The Contractor's workflow solution shall provide the ability to view alerts and/or reminders by user, by w type.	Yes								
Workflow	WKF07	The Contractor's workflow solution shall provide the ability to set alerts and or reminders by user, by wor type.	Yes								
Workflow	WKF08	The Contractor's workflow solution shall automatically set the state of the work item, based on the processing steps when completed to provide transparent, accurate status of the work at all times.	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	Requirement ID	Requirement Language	Base Requirement Applicable to Core Claims Solution and All Proposed Options	Requirement Option Indicator	Requirement Option Assignment	General Status	roduction Stat	roduct Typ	Hosting	Security Tested	Additional Information
Workflow	WKF09	The Contractor's workflow solution shall provide supervisors access and control of work by type and by user.	Yes								
Workflow	WKF11	The workflow engine shall be configured to support capturing business processes using Business Proc Model and Notation (BPMN) 2.0 or later, even if the engine uses a separate coding of the rules for execution.	Yes								
Workflow	WKF12	The workflow engine shall be configured to support the establishment of work queues allowing in-proces knowledge, data, and documentation to flow from one-solution to another solution.	Yes								
Workflow	WKF13	The workflow engine shall be configured to support workflow access, assignments, and execution for all essential aspects of the business processes (e.g., provider enrollment, provider screening, client communications).	Yes								

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

Matrix of Requirements											
Requirement Section	**Requirement ID**	**Requirement Language**	**Base Requirement Applicable to Core Claims Solution and All Proposed Options**	**Requirement Option Indicator**	**Requirement Option Assignment**	**General Status**	**roduction Statu**	**roduct Typ**	**Hosting**	**Security Tested**	**Additional Information**
Workflow	WKF14	The Contractor shall configure, support and maintain a configurable document management, workflow, and ICR/OCR solution that meets the State's requirements. If the Contractor's solution does not include an integrated content management solution that meets the state's requirements, the Contractor will be required to leverage the State of Montana's Perceptive Content Management solution with their overall solution.	Yes								
Workflow	WKF16	The Contractor's solution shall deliver automated business process/workflow management to support the establishment of work queues via an assigned worker portal allowing in-process knowledge, data, and documentation to route from one worker's queue to another as well as across solutions. The Contractor's solution shall ensure compliance with defined processes.	Yes								

Attachment L - Technology Matrix

Revision History

Date	Document Version	Revision Description	Author
10/28/2019	1.0	Final for RFP Release	DPHHS

Attachment L - Technology Matrix

Attachment L - Technology Matrix represents the technology being proposed by Offeror including product type, operating system, licensing, number of seat(s), hosting strategy, cost information and renewal information. The Offeror must provide the detailed hardware and software information for each applicable row using the values defined in the Legend below. The Offeror must include the costs for each component including all ongoing costs and annual maintenance costs detailed in the Technology Matrix. The costs outlined in the Technology Matrix must be included the appropriate Attachment G - Pricing Schedules. If the DDI duration extends beyond one year, the offeror should include the additional maintenance cost in the DDI Maintenance Cost column.

Complete a row for any solution being proposed. Every column should be filled out for the solution.

The Offeror shall only use the values detailed below in the matrix for each column. Each column will have only one value.

All rows must have responses in each of the columns.

Attachment L - Interface Categories

Below is a list of interfaces that are common to the sourcing states. The Contractor should use this information as a guide in determining which specific interfaces (e.g., inbound, outbound) to include in the Contractor's base cost. It is important to understand each category can represent one or more distinct interfaces to be listed in tab L-2 Interfaces.

Interface Category	Interface Category Description
Eligibility	A set of interfaces to or from the Eligibility system for the purposes of updating/maintaining member eligibility information (e.g. member demographics, member eligibility spans, provider lock-in info).
Provider	A set of interfaces to or from the Provider module for the purposes of updating/maintaining provider information such as demographics, ownership, credentials, etc.
Third Party Liability (TPL)	A set of interfaces to or from the TPL vendor for the purposes of supporting and managing TPL functions (e.g. paid claims, recoveries).
Recovery Audit Contractor (RAC)	A set of interfaces to or from the Recovery Audit Contractor to supply information necessary for audit activities (e.g. paid claims).
Enterprise Data Warehouse (EDW)	A set of interfaces to support comprehensive exports of operational data relevant for reporting and analysis to the Enterprise Data Warehouse.
Statewide Financial System	A set of interfaces to support the sharing of relevant financial data with the Statewide Financial System.
Auditor	A set of interfaces to the Auditor systems to support furnishing of the data for audit purposes.
Electronic Data Interchange (EDI)	Interfaces to/from providers, clearinghouses and other modules/systems for the purposes of sending and receiving all EDI transactions. As described in requirement SAO19
Utilization Review	Interfaces to or from a module or system responsible in the utilization review to support receipt and processing of service/prior authorizations.
Cost share coordination	Interfaces to or from each of the paying systems to support updating of maximum out of pocket cost share information.
Care/Case management	Interfaces to or from care/case management module and system(s) in order to support care/case management functions.

Attachment L - Interface Categories

Below is a list of interfaces that are common to the sourcing states. The Contractor should use this information as a guide in determining which specific interfaces (e.g., inbound, outbound) to include in the Contractor's base cost. It is important to understand each category can represent one or more distinct interfaces to be listed in tab L-2 Interfaces.

Interface Category	Interface Category Description
Pharmacy	Interfaces to or from the Pharmacy Benefit Manager (PBM) to support the PBM operation and obtain data on pharmacy claim details.
Centers for Medicare & Medicaid Services (CMS)	Interfaces to or from CMS to support the import of information from or submission of information to CMS (e.g. Reference Data as described in requirement BRDM02, Qualified Medicare Beneficiary outreach file, COBA, Medicare A, B, D information for Buy-In purposes, T-MSIS)
Social Security Administration (SSA)	Interfaces to or from SSA to support the import of SSA data (e.g. beneficiary earnings records, Medicare-eligible members, SSI eligibility information)
Immunization Registry	Interfaces to or from the State Immunization registry to support submission/updates of immunization data.
Managed Care Networks (CMO / MCO)	Interfaces to or from the managed care organizations' systems to support CMO/MCO operations.
Banking	Interfaces to or from banking services provider(s) to support sending and receiving of banking information (e.g. EFT, cleared checks, positive pay)
Internal Revenue Service (IRS)	Interfaces to or from the IRS to support functions like IRS TIN matching, submission of 1099 forms, submission of 1095-B and 1094-B (Health Coverage) forms, etc.
Integrated Voice Response System (IVR)	Interfaces to support Integrated Voice Response functionality.
State's Integration Platform	Interfaces to or from the State's Integration Platform to support authentication, single-sign-on, system health reporting

Attachment H - Resource Allocation Schedules

Revision History

Date	Document Version	Revision Description	Author
10/28/2019	1	Final for RFP Release	DPHHS
11/20/2019	2	Revised the Resource List to Generalize the Resource Titles and include Key Personnel for Core and Options A, B, C, D. Removed the following language on all workbook pages: "Senior (Sr.) Positions are defined by a combination of education and experience and shall have a four year degree in a related field, and at least five (5) years of experience. In lieu of a four year degree, seven (7) years of experience is expected. All other positions must have a minimum of four (4) years of related experience. Please map your resource positions based on years of experience and educational requirements to the following generally named resource positions."	DPHHS

Attachment H - Instructions

List of Schedules	
Schedule	**Title**
Schedule A - Core	Number of Full Time Equivalent
Schedule B - Core	Number of Hours
Schedule A - Option A	Number of Full Time Equivalent
Schedule B - Option A	Number of Hours
Schedule A - Option B	Number of Full Time Equivalent
Schedule B - Option B	Number of Hours
Schedule A - Option C	Number of Full Time Equivalent
Schedule B - Option C	Number of Hours
Schedule A - Option D*	Number of Full Time Equivalent
Schedule B - Option D*	Number of Hours

* Option D Schedules should be completed during the Participating Addedndum process

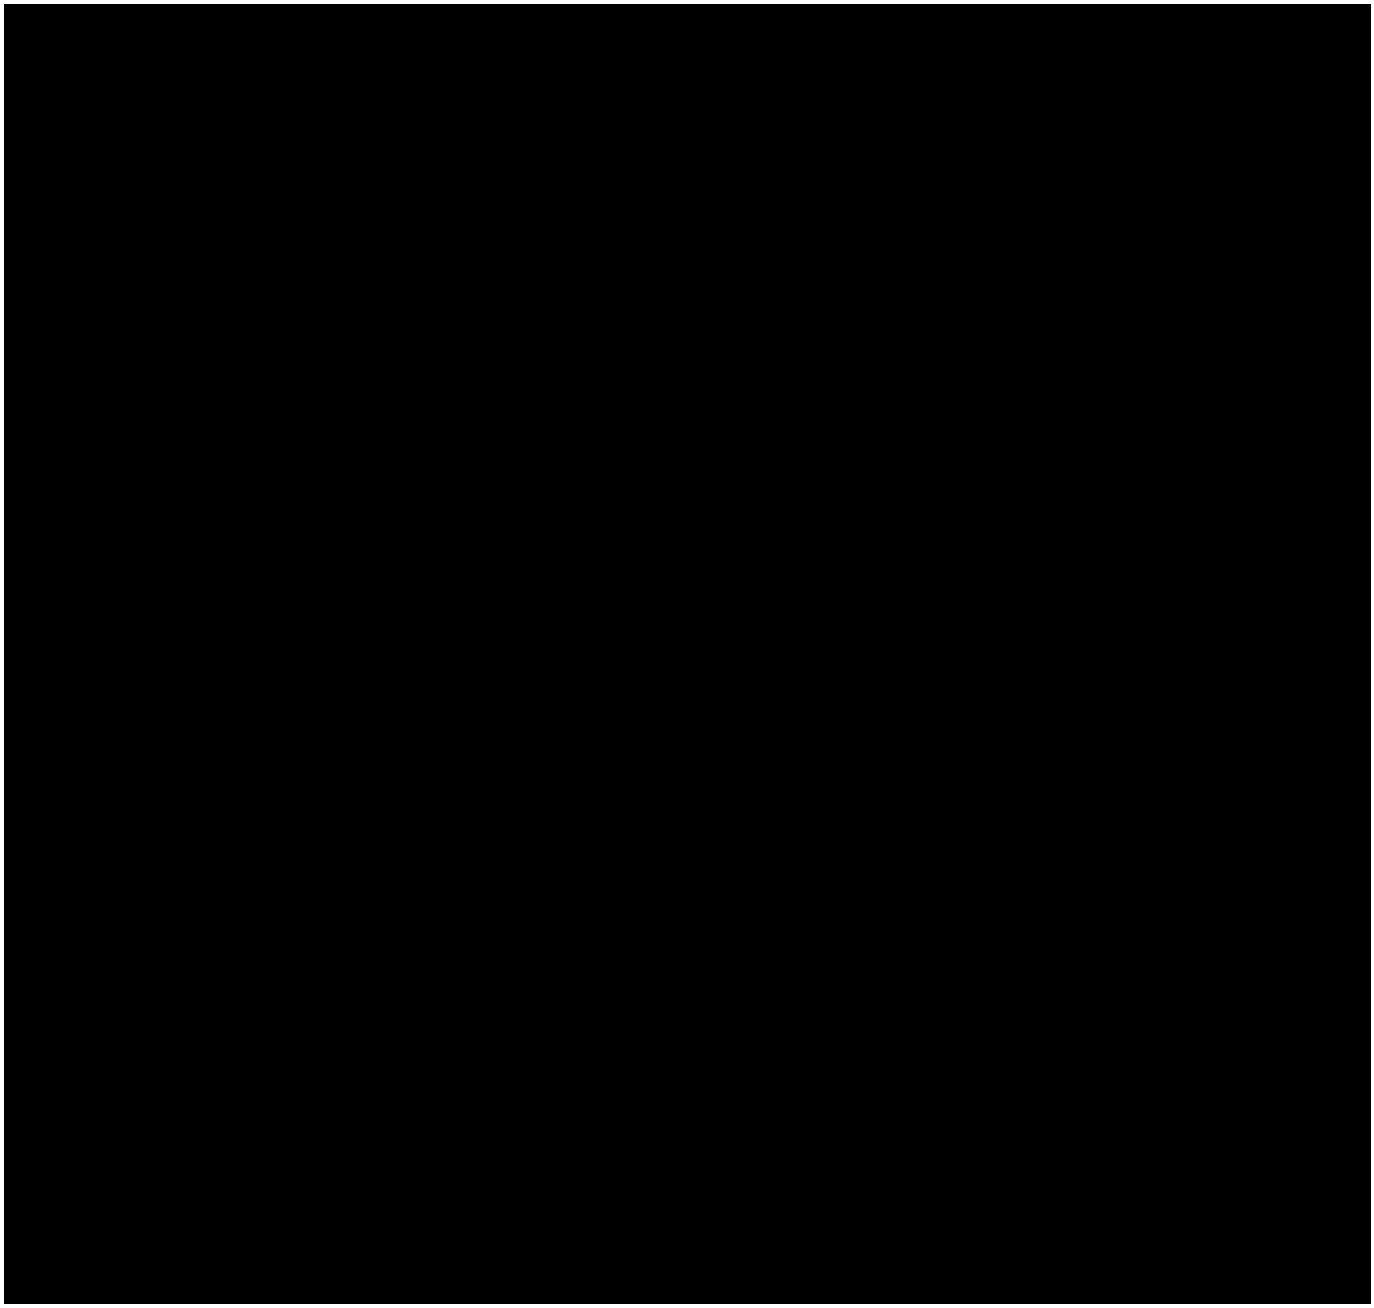
Instructions: Offerors must complete both Resource Allocation Schedules for the Core Claims solution and each Optional Service they intend to bid. These schedules serve as the representation of Offeror's plan for staffing the project by resource type. Offeror should include additional information as necessary to explain the Offeror's resource allocation. If the Offeror has one or more subcontractors, the Offeror must submit a Schedule A and Schedule B with a comprehensive total for all FTE and hours representing the effort of the prime contractor and all subcontractor work in total. In addition, a separate Schedule A and Schedule B for each contractor (prime contractor and subcontractor) must be submitted.

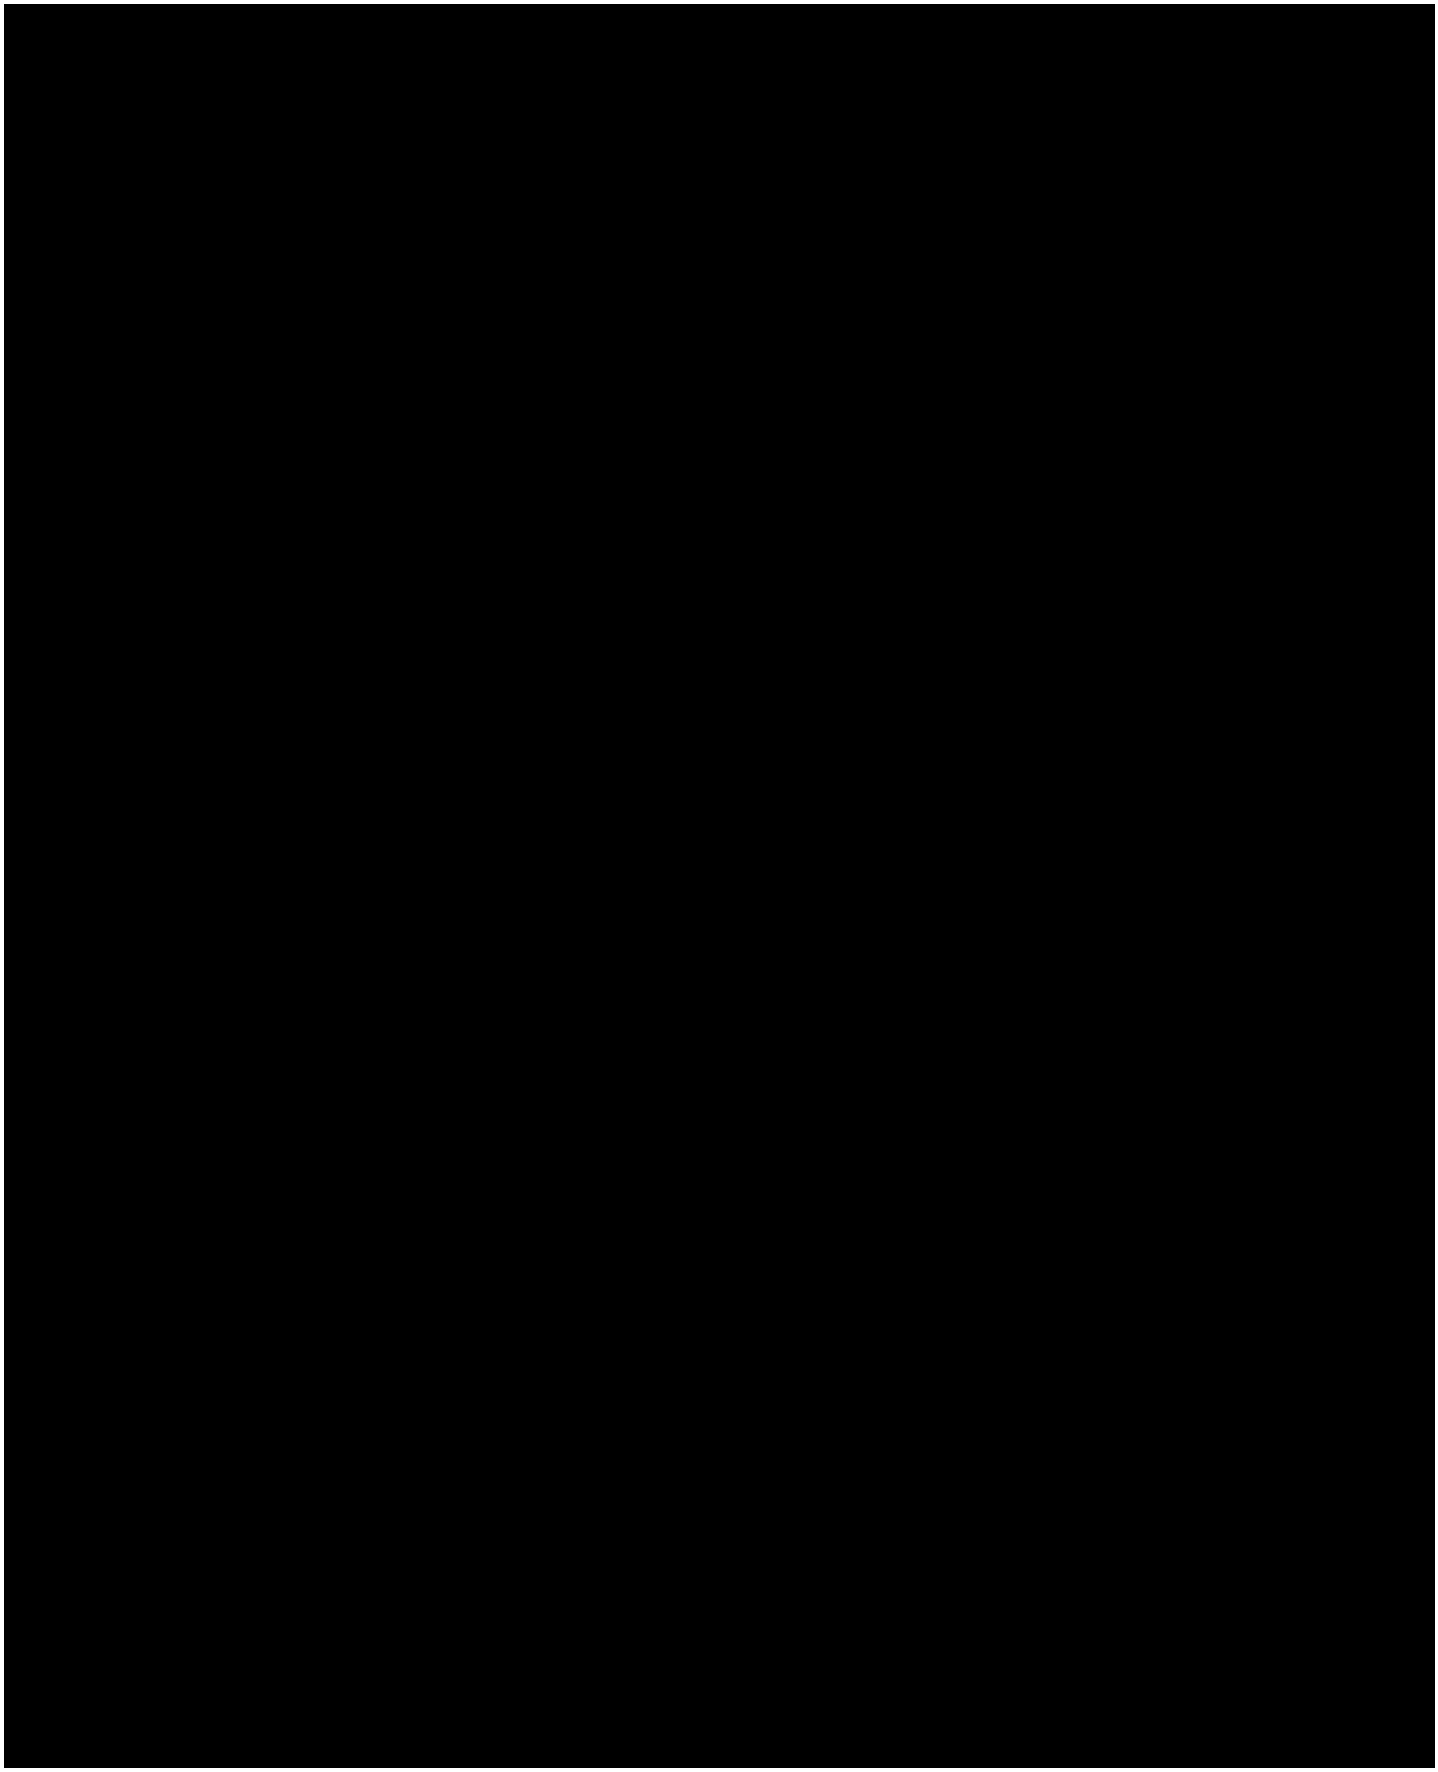
All schedules must be completed in full at the time of submittal, except Option D, which will be completed during the Participating Addendum process. The resource types listed in the schedule are not exhaustive, nor should the Contractor assume that DPHHS is requesting resources from each category. Add resource types necessary to successfully deliver the scope of work.

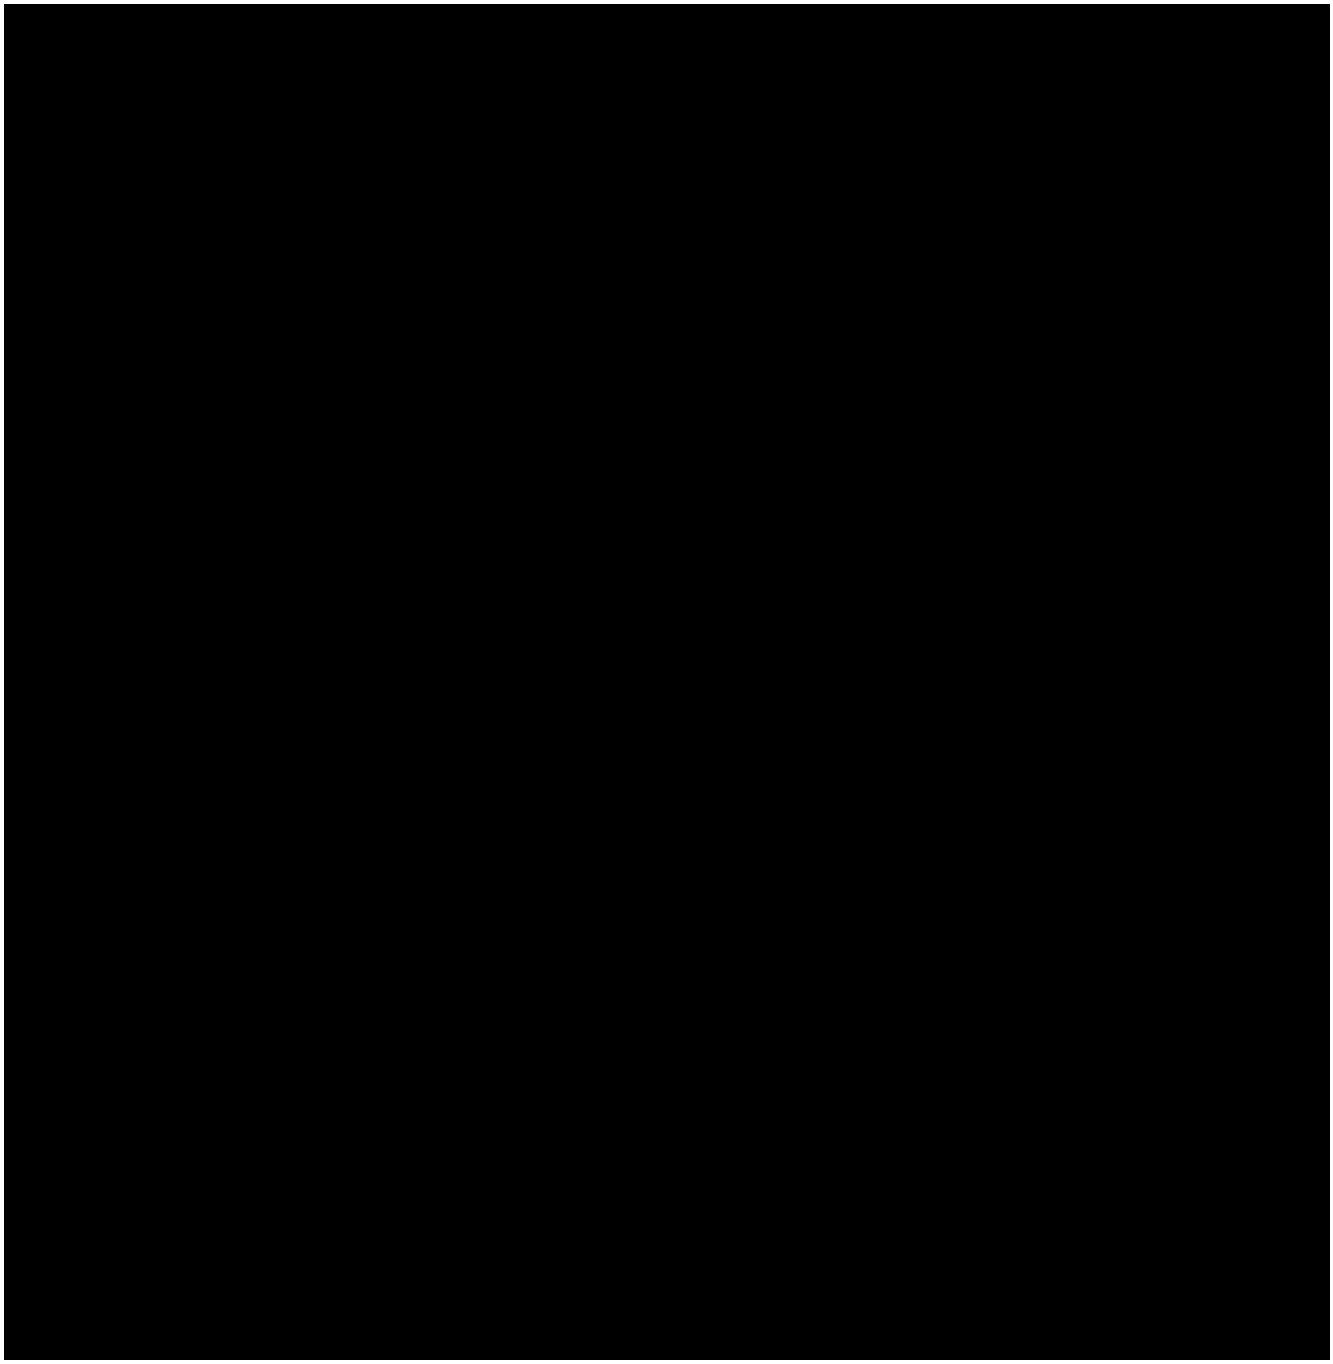
Schedule A: This schedule details the number of full time equivalents the Offeror plans to allocate to the project by phase and by resource type.

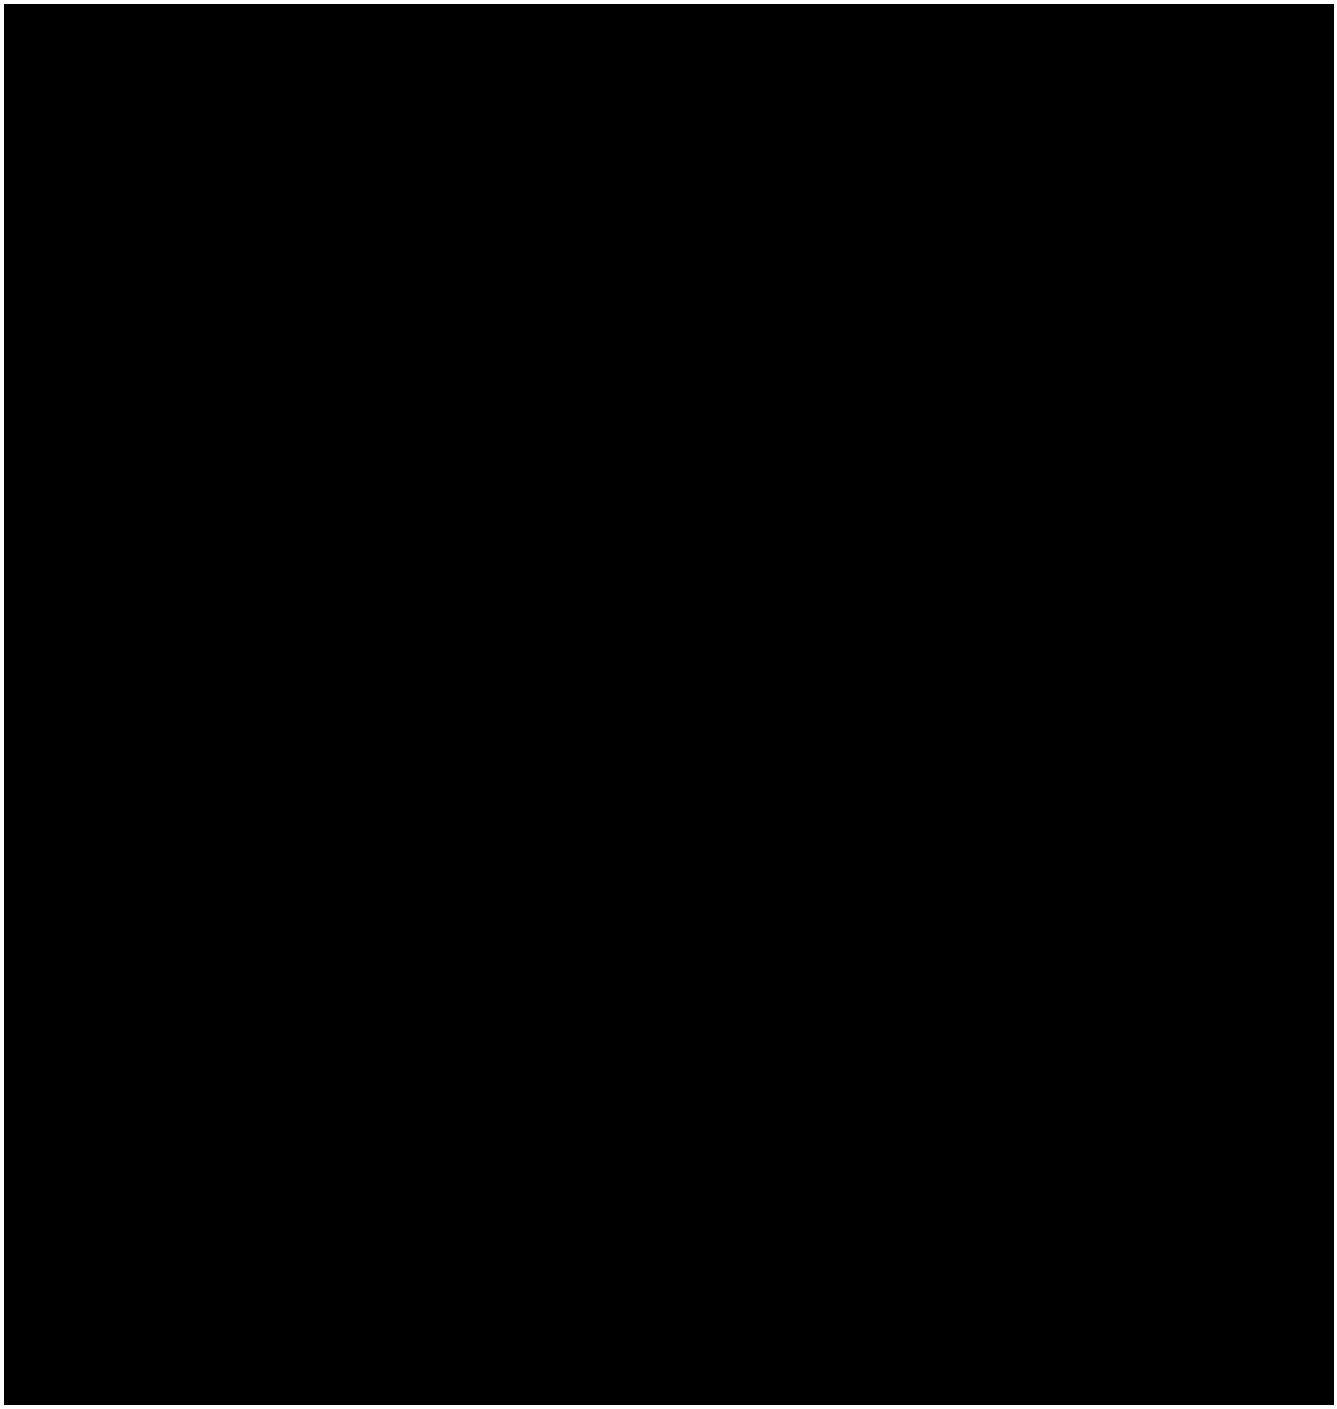
Schedule B: This schedule details the number of resource hours the Offeror plans to allocate to the project by phase and by resource type.

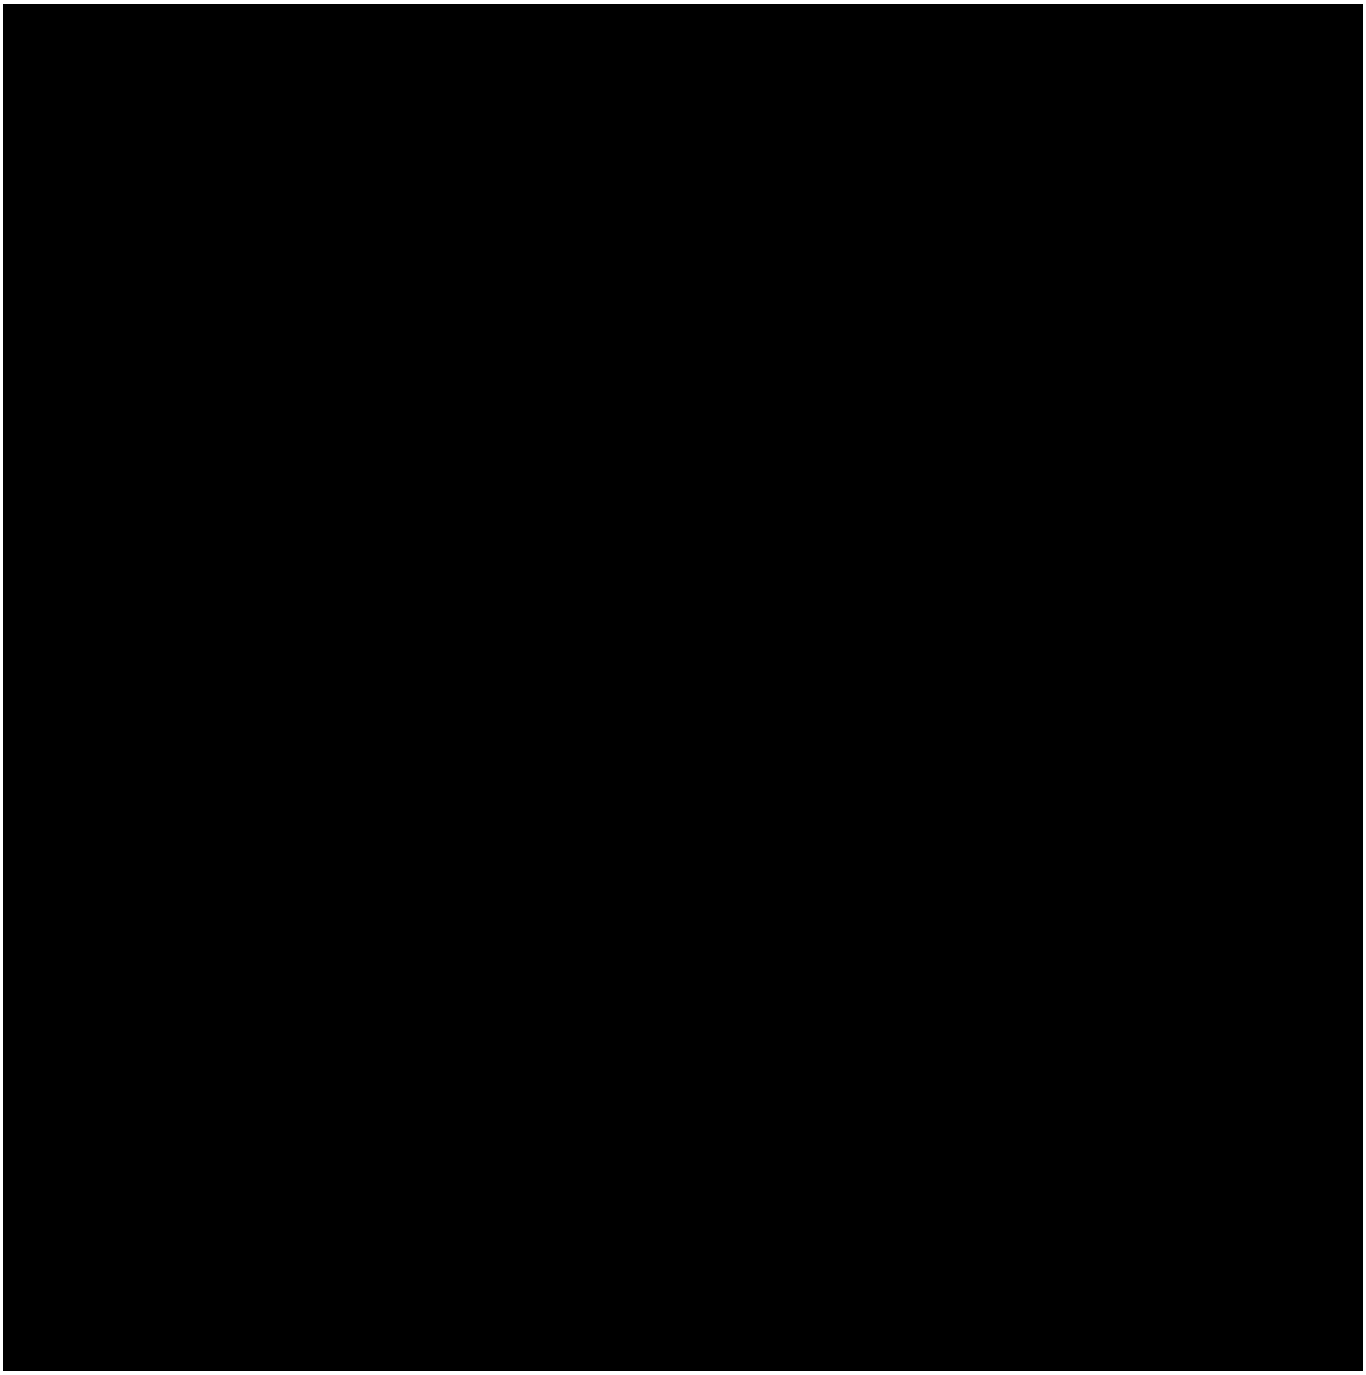
Offerors should include in their submission of Attachment H – Resource Allocation Schedules, resource allocation reflecting Attachment F – Requirements Response Matrix and detailed information found in Attachment E – Sourcing State Information.
Schedule H – Resource Allocation Schedules will be updated as a part of the participating addendum process.

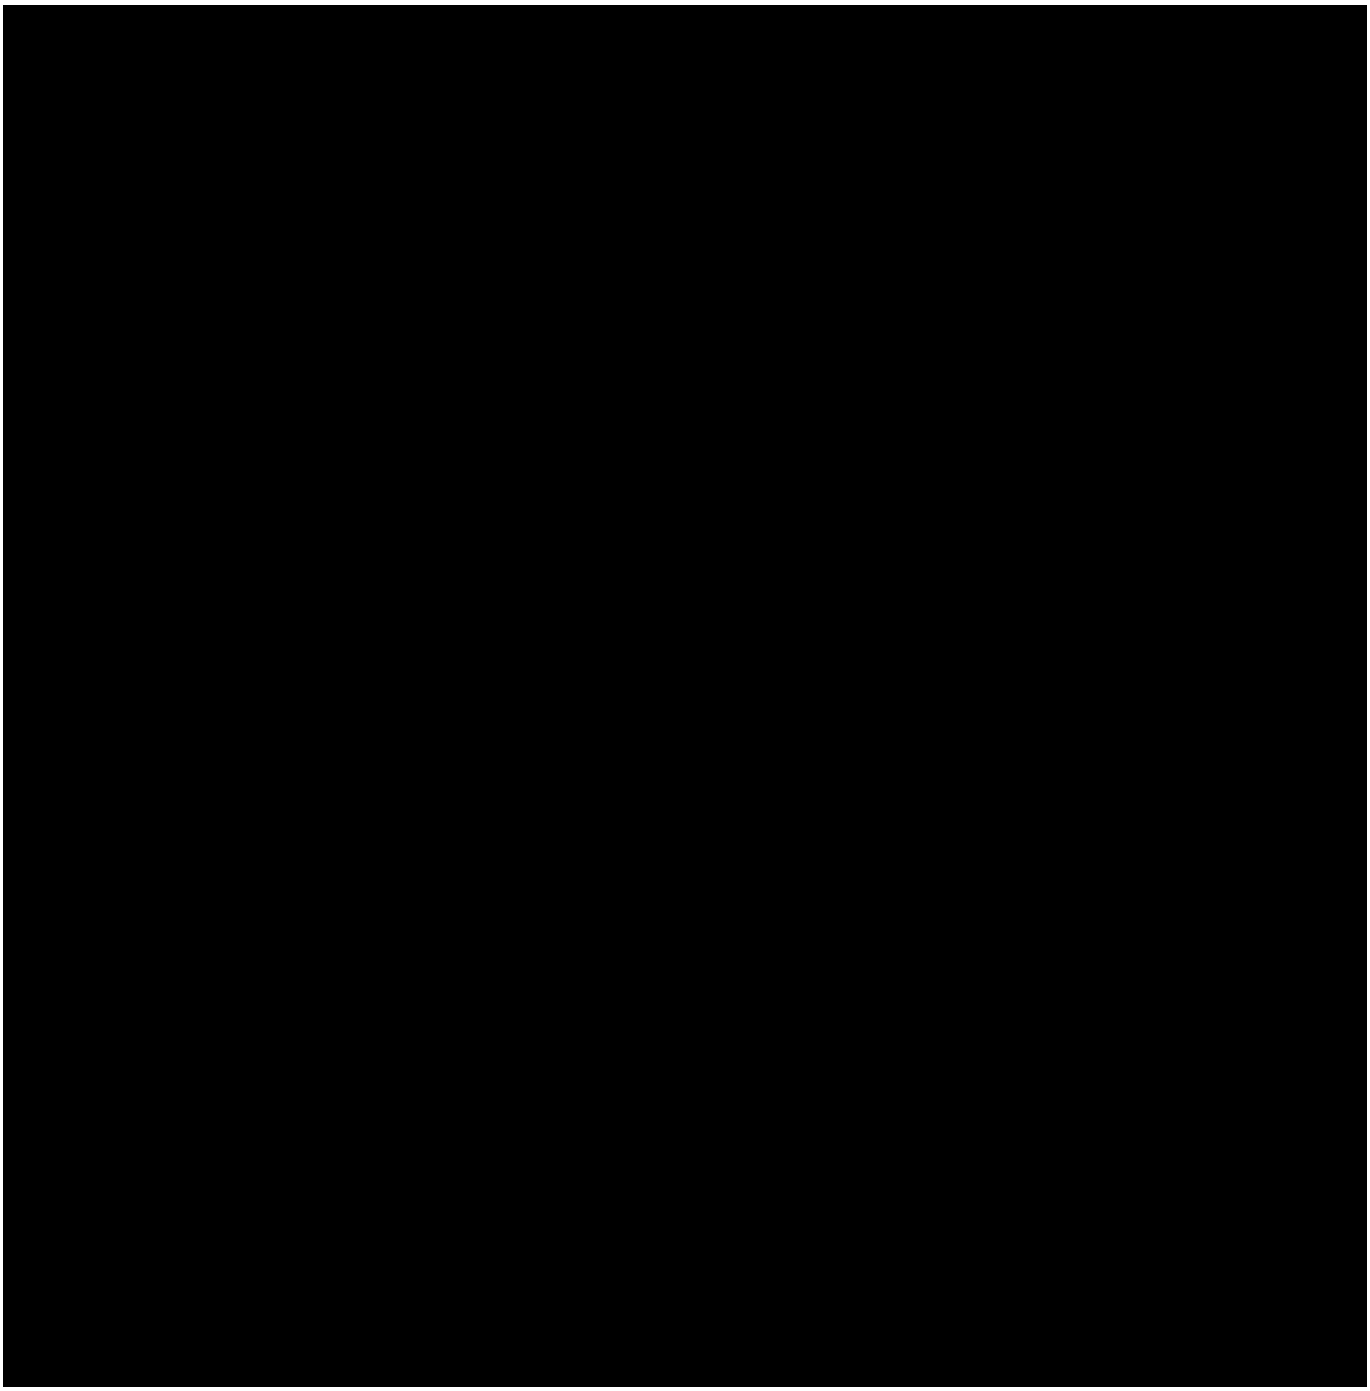


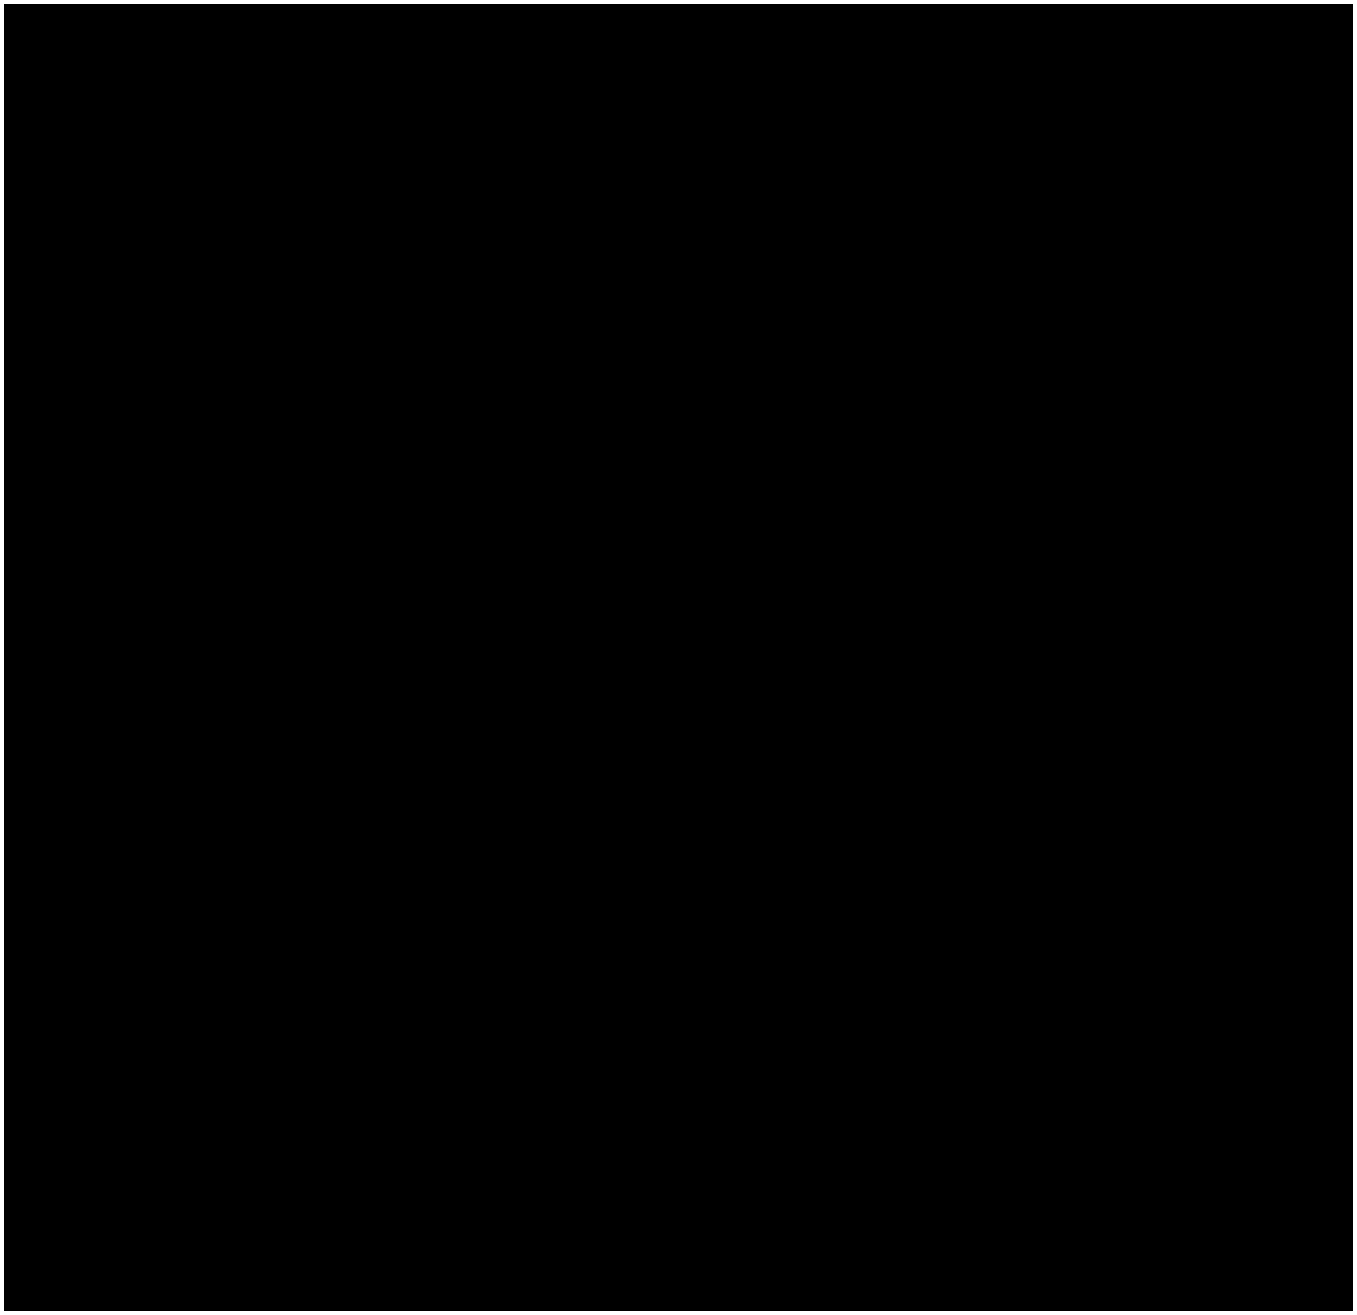


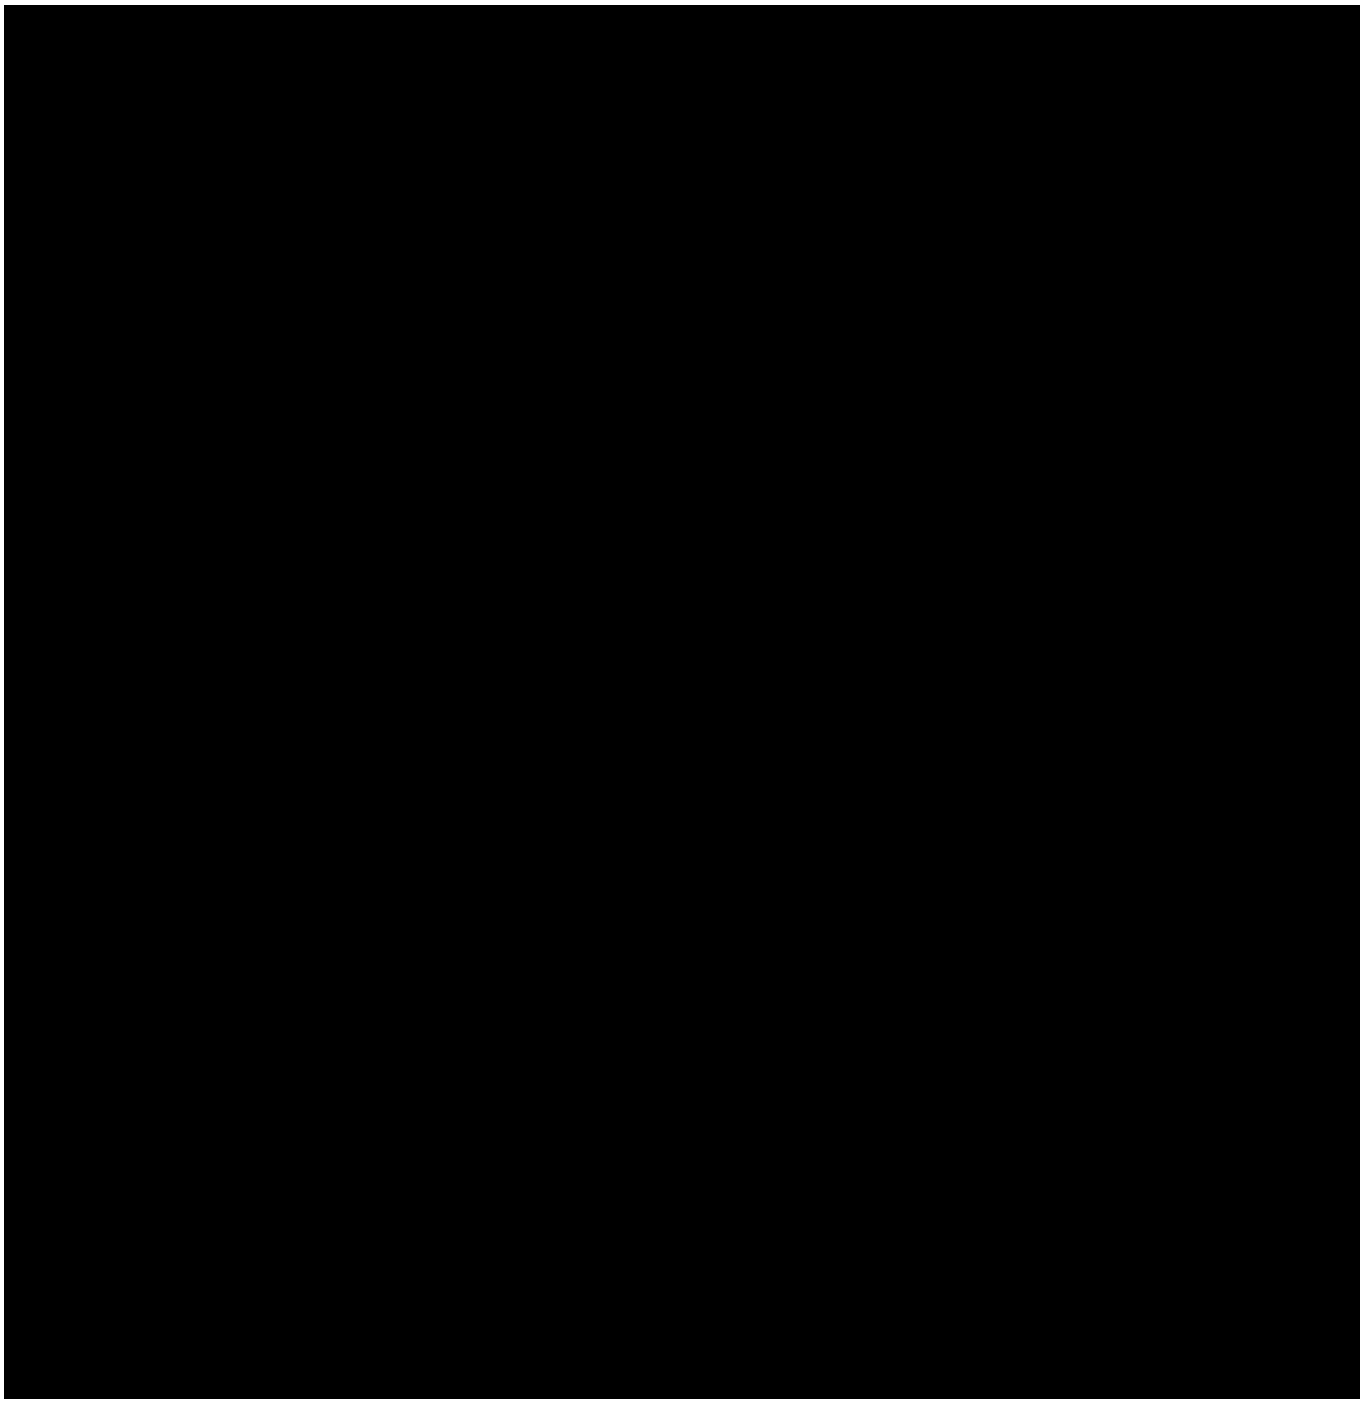


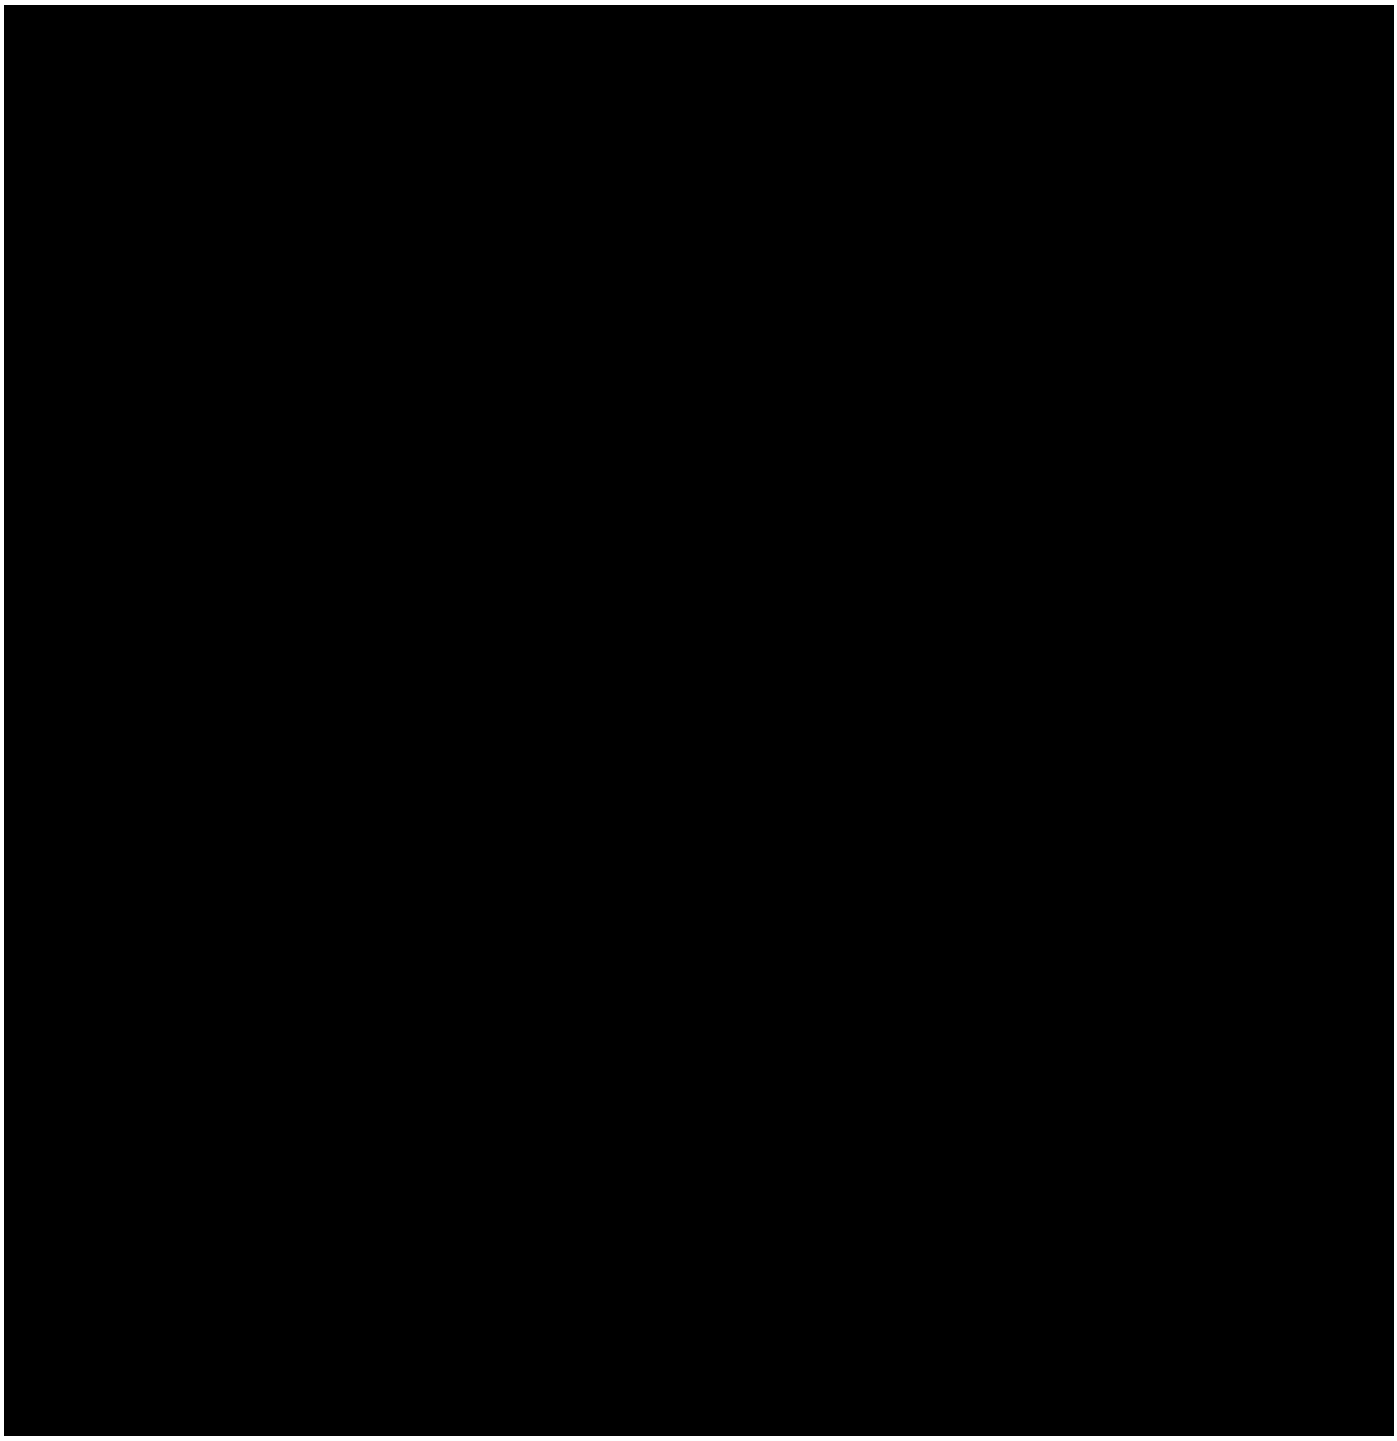


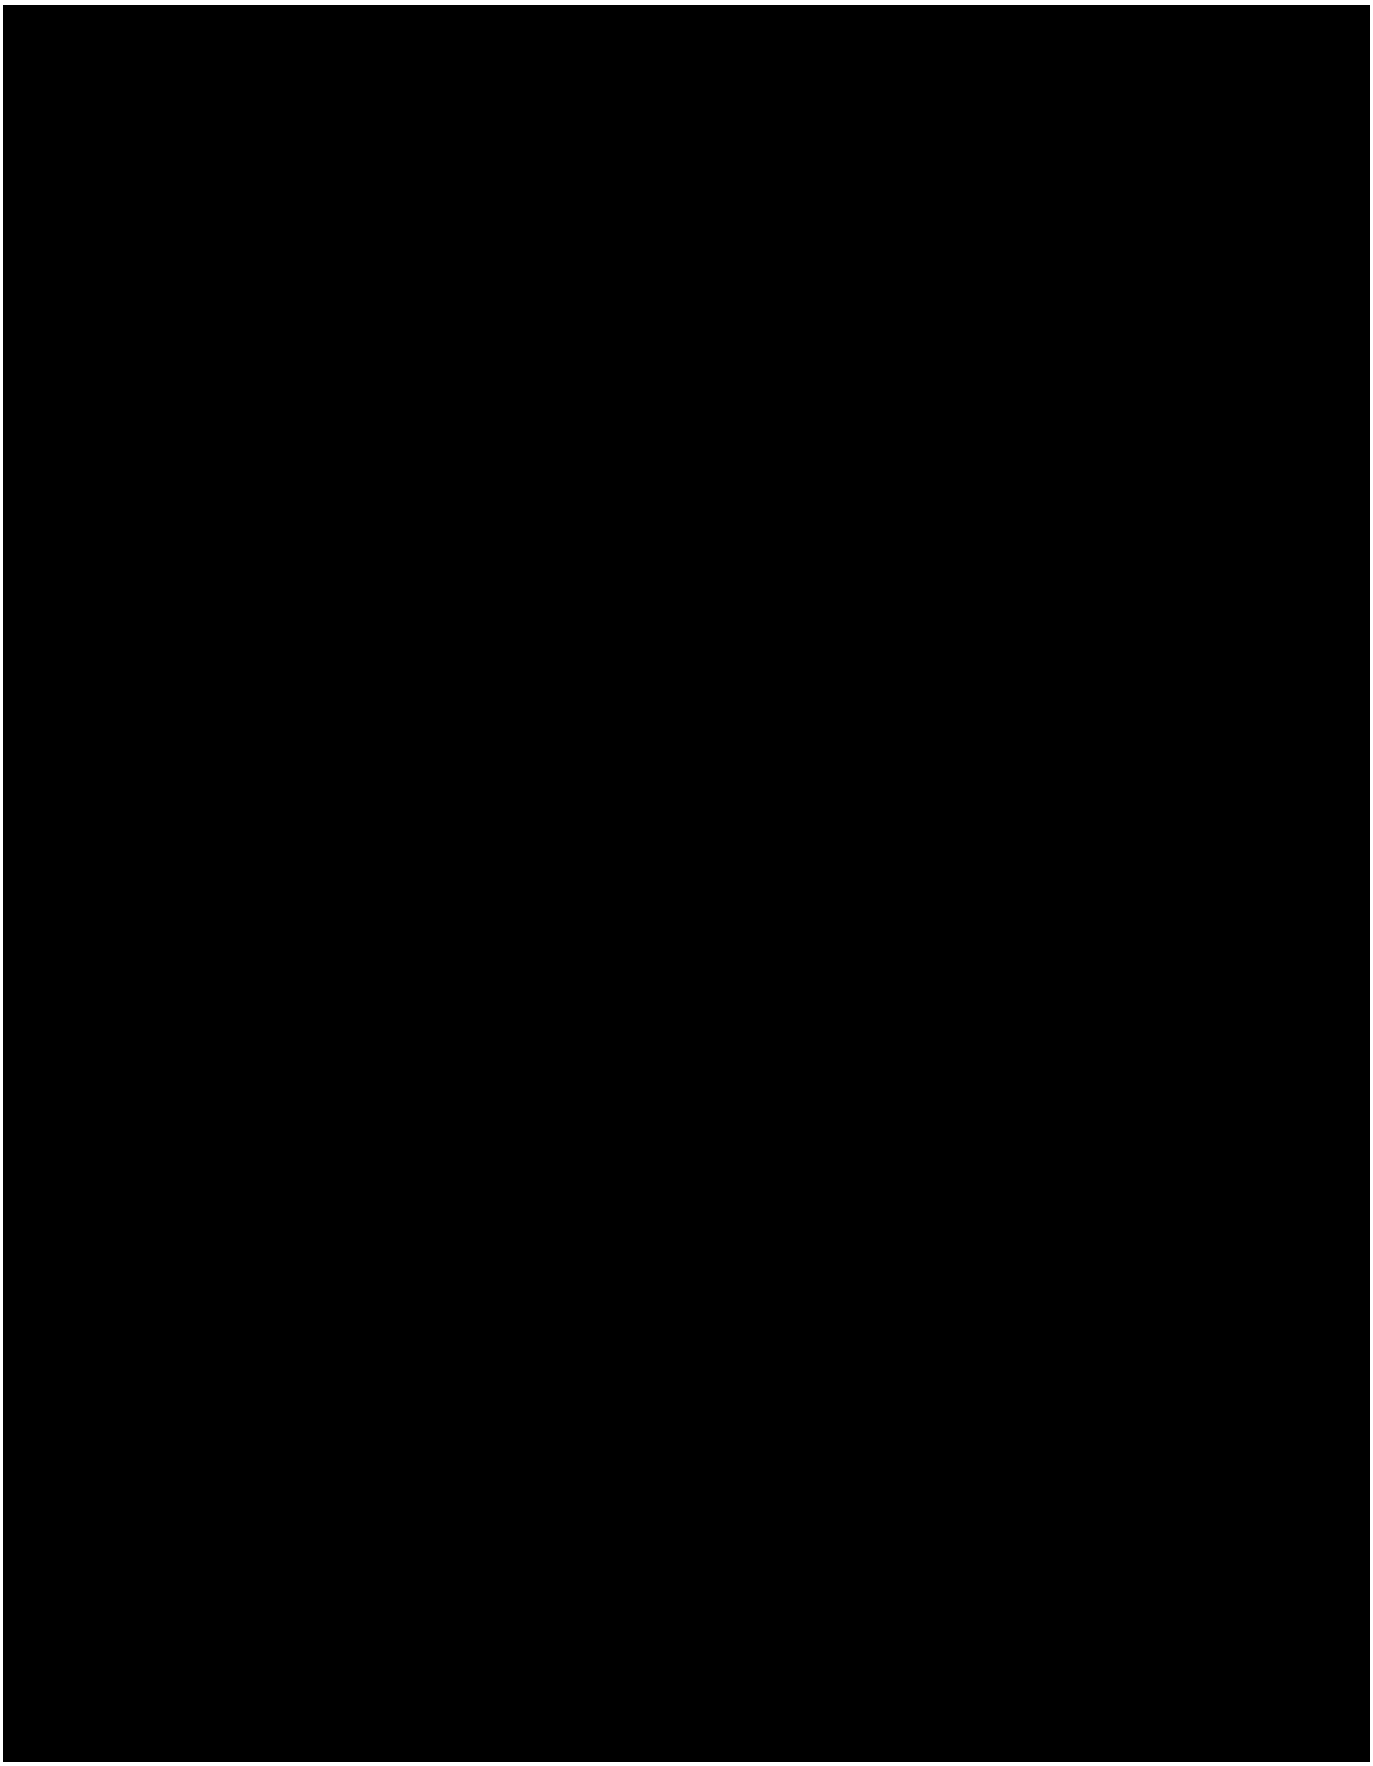


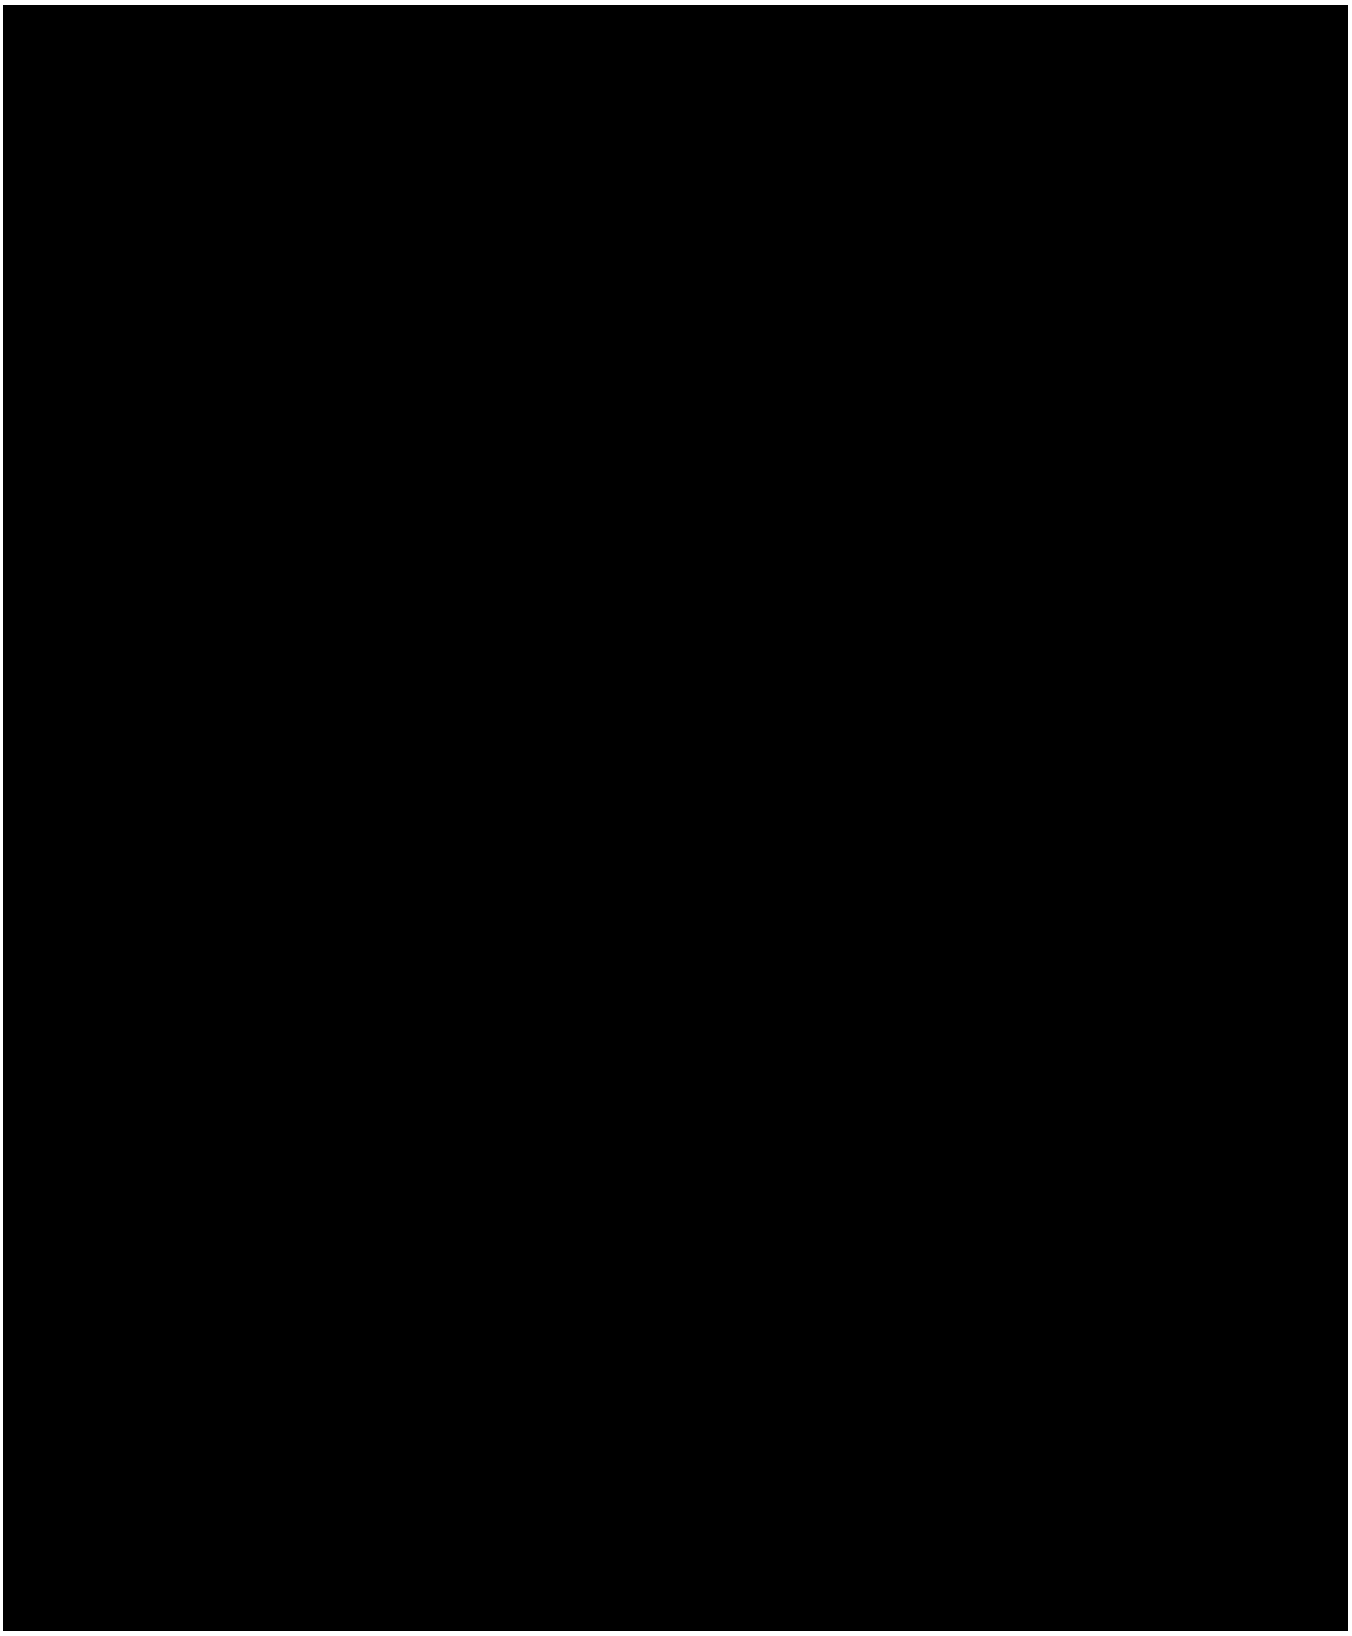


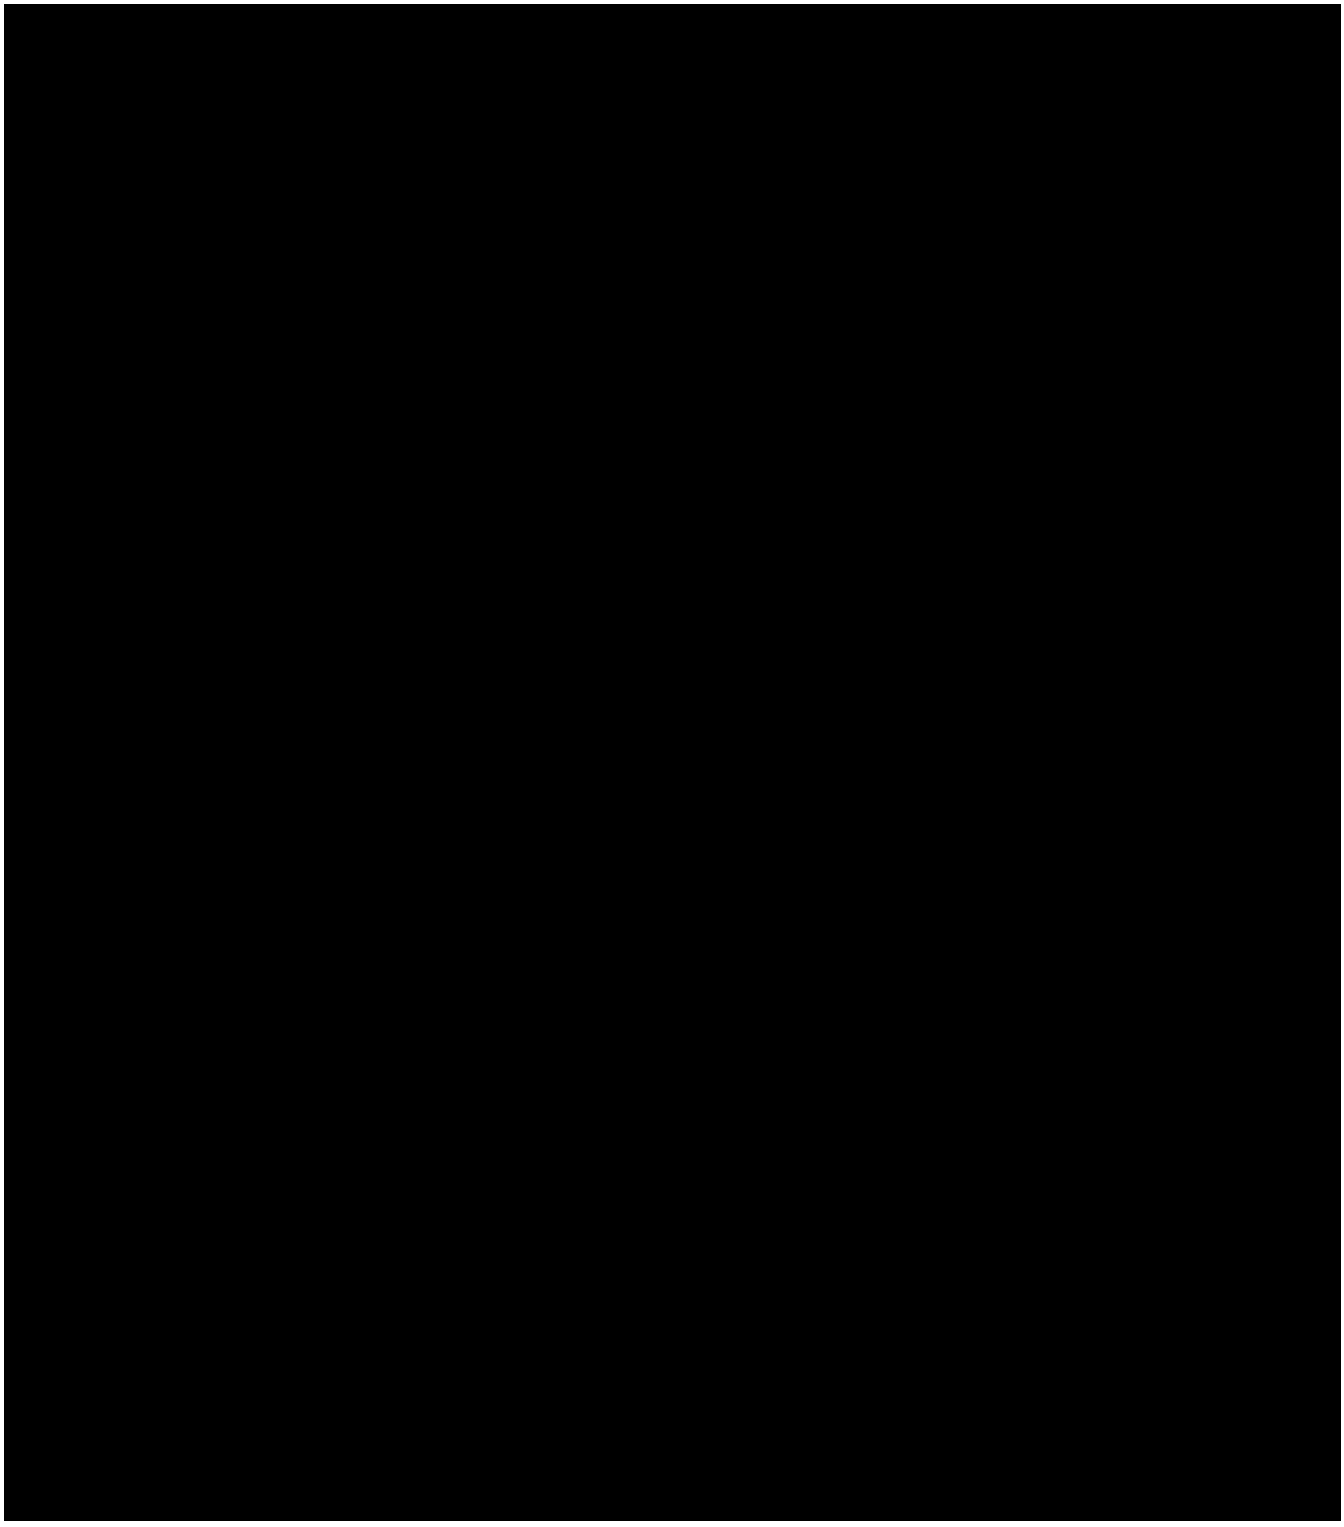


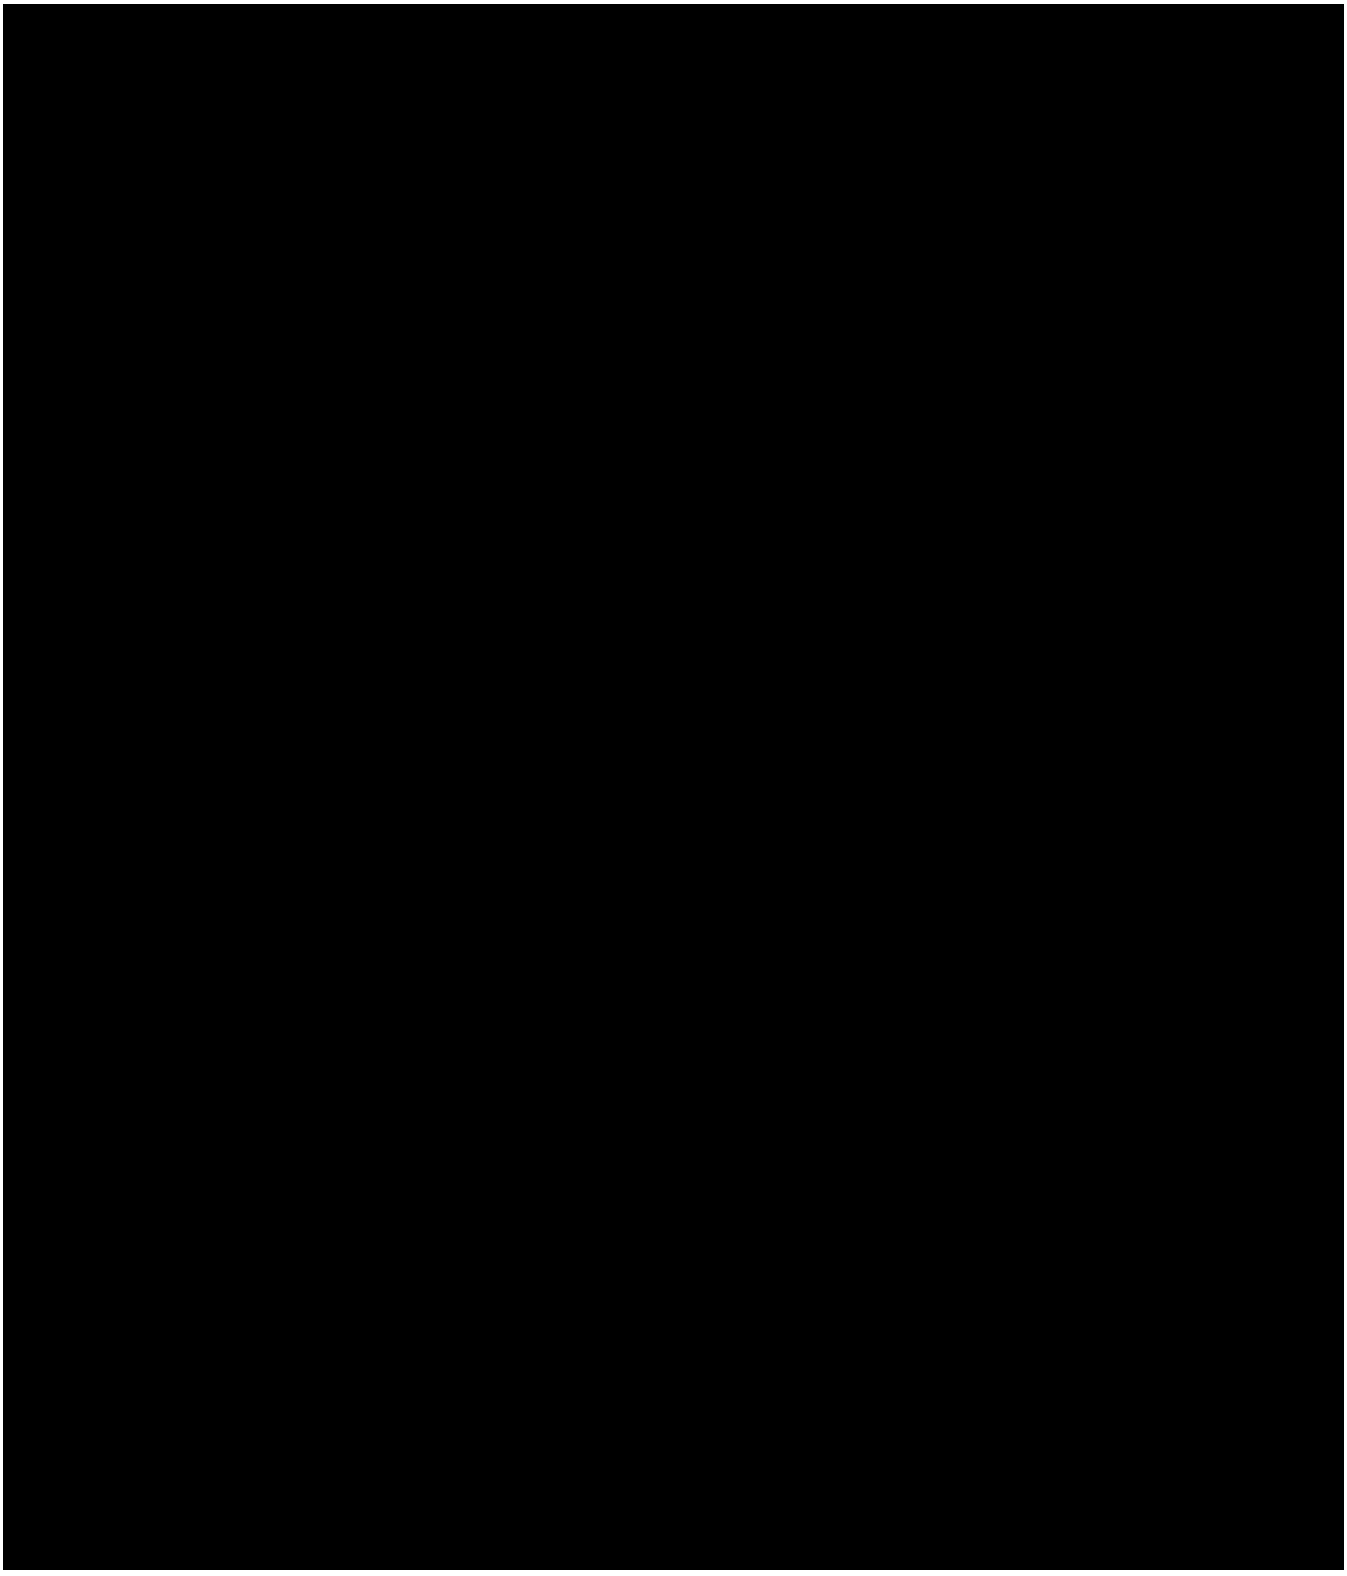


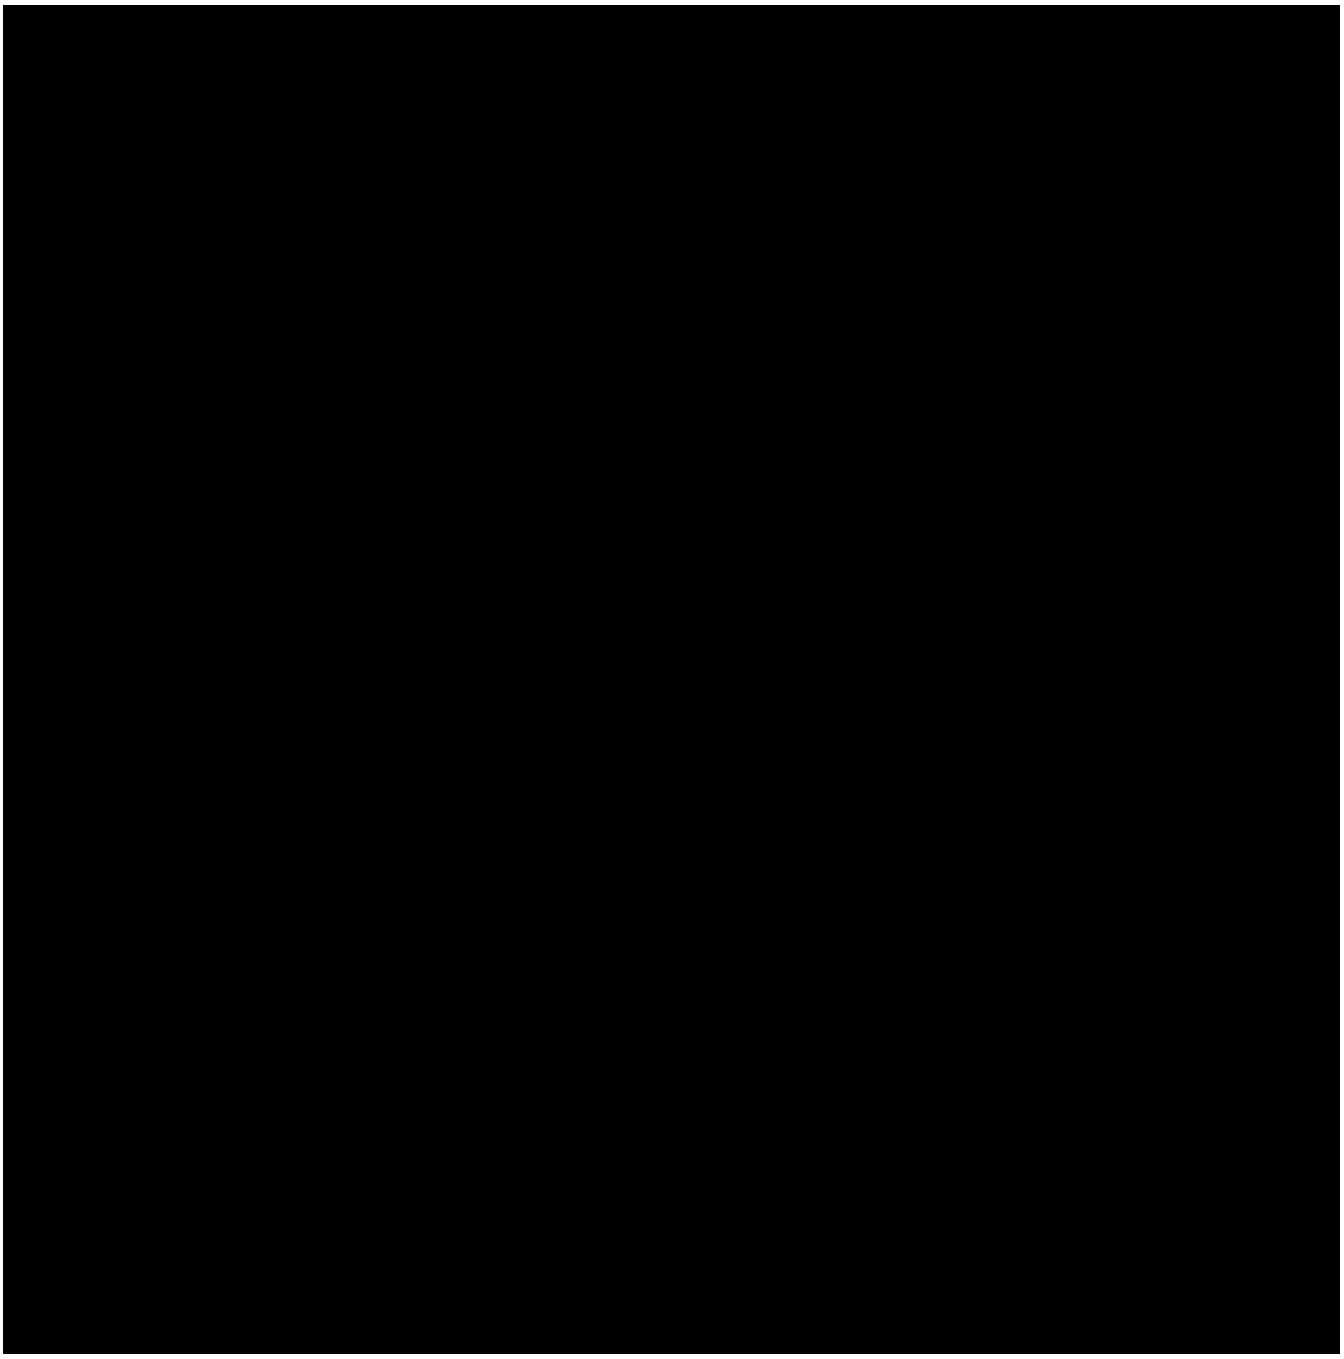


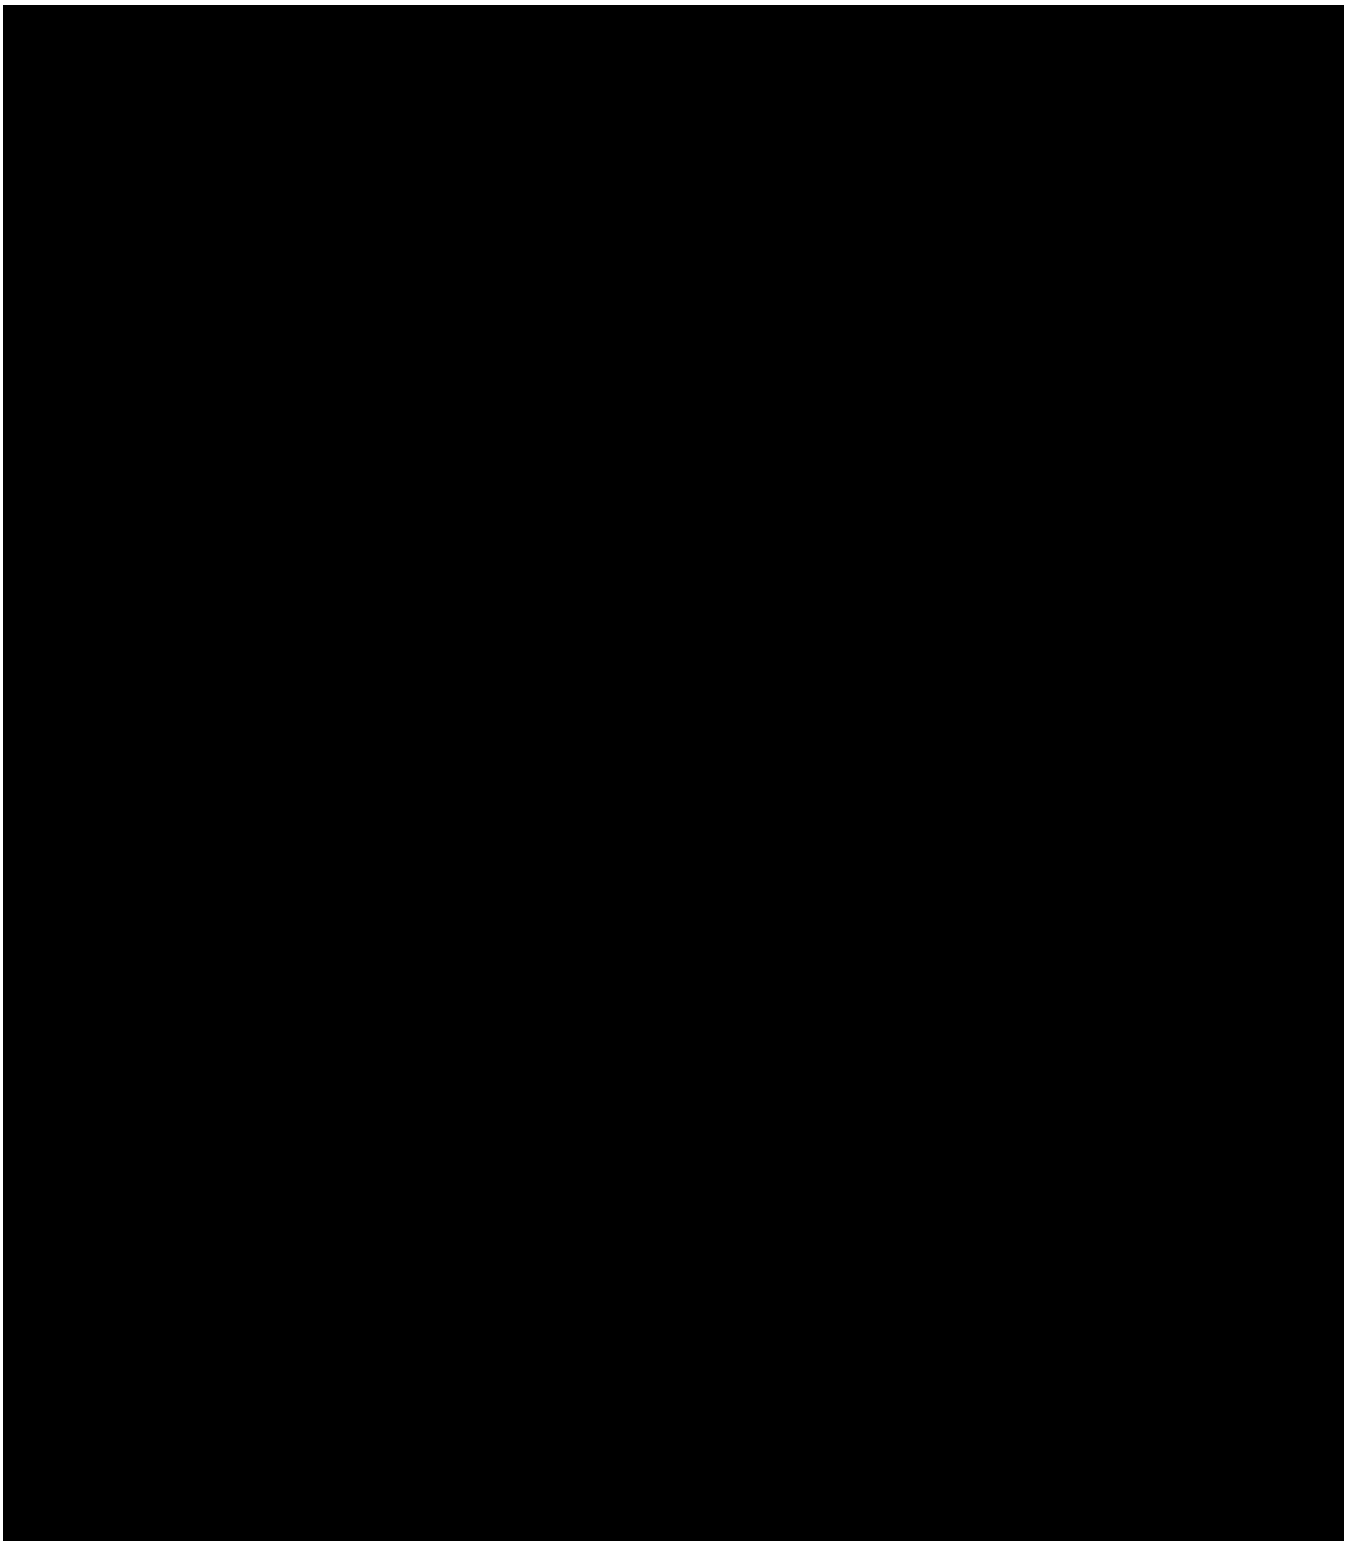


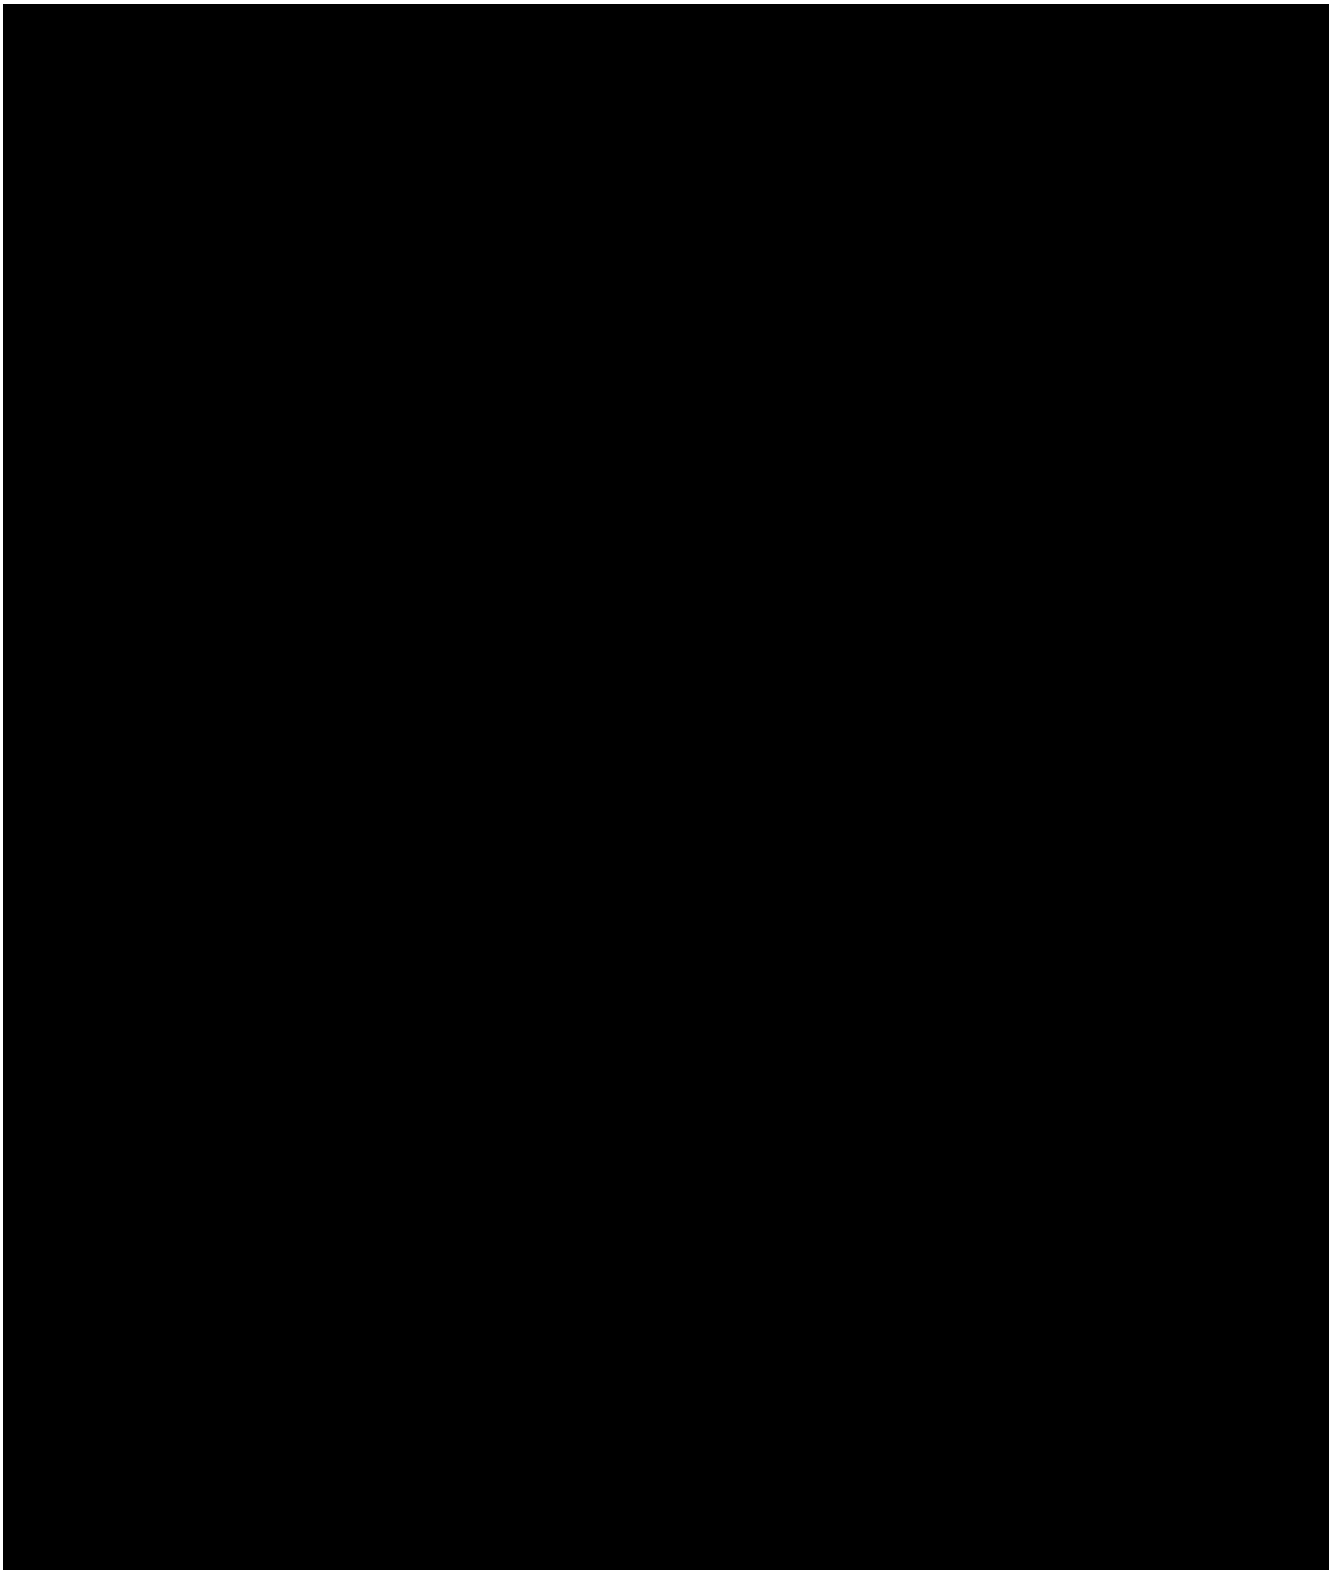












Claims Services Schedule A - Cost Summary

Schedule A-1: Claims Processing and Management Services Core Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Core Claims Solution Installation DDI	$ 1,751,795.43	Insert "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1
Claims Processing and Management Services Core Scope of Work DDI	$ 20,145,647.44	Insert "Total Core Base + Group DDI * CPI-U Costs" from Schedule F, Tab F-1 less "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1
Claims Processing and Management Services Core Scope of Work Operations	$ 98,773,541.52	Insert "Total Core Base + Group Operations * CPI-U Costs" from Schedule F, Tab F-2
Claims Processing and Management Services DDI Requisitioned Integration Services Pool Hours and Cost	$ 5,007,600.00	Insert "Total Cost for DDI Requisitioned Integration Services Pool Hours Cost & CPI-U Adjusted Cost" from Schedule K cell F14
Claims Processing and Management Services DDI Data Conversion Optional Years of Data Cost	$ 3,442,296.00	Insert "Total Optional Conversion Years of Data Costs * CPI-U Costs" from Schedule L cell C26
Claims Processing and Management Services Core Scope of Work DDI Enhancement Pool Hours	$ -	Insert "Total Core DDI Enhancement Pool * CPI-U Costs" from Schedule F, Tab F-3
Claims Processing and Management Services Core Scope of Work Operations Enhancement Pool Hours	$ -	Insert "Total Core Operations Enhancement Pool * CPI-U Costs" from Schedule F, Tab F-4
All Claims Processing and Management Services Core Scope of Work Cost	**$ 129,120,880.39**	

Schedule A-2: Claims Processing and Management Services Option A (Financial) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option A DDI	$ 3,467,491.68	Insert "Total Option A (Financial) Base + Group DDI * CPI-U Costs" from Schedule G, Tab G-1
Claims Processing and Management Services Option A Operations	$ 27,057,496.20	Insert "Total Option A (Financial) Base + Group Operations * CPI-U Costs" from Schedule G, Tab G-2
Claims Processing and Management Services Option A DDI Enhancement Pool Hours	$ -	Insert "Total Option A (Financial) DDI Enhancement Pool * CPI-U Costs" from Schedule G, Tab G-3
Claims Processing and Management Services Option A Operations Enhancement Pool Hours	$ -	Insert "Total Option A (Financial) Operations Enhancement Pool * CPI-U Costs" from Schedule G, Tab G-4
All Claims Processing and Management Services Option A Cost	**$ 30,524,987.88**	

Schedule A-3: Claims Processing and Management Services Option B (Call Center) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option B DDI	$ 1,507,108.98	Insert "Total Option B (Call Center) Base + Group DDI * CPI-U Costs" from Schedule H, Tab H-1
Claims Processing and Management Services Option B Operations	$ 11,809,849.92	Insert "Total Option B (Call Center) Base + Group Operations * CPI-U Costs" from Schedule H, Tab H-2
Claims Processing and Management Services Option B DDI Enhancement Pool Hours	$ -	Insert "Total Option B (Call Center) DDI Enhancement Pool * CPI-U Costs" from Schedule H, Tab H-3
Claims Processing and Management Services Option B Operations Enhancement Pool Hou	$ -	Insert "Total Option B (Call Center) Operations Enhancement Pool * CPI-U Costs" from Schedule H, Tab H-
All Claims Processing and Management Services Option B Cost	**$ 13,316,958.90**	

Schedule A-4: Claims Processing and Management Services Option C (Federal Reporting) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option C DDI	$ 2,400,290.07	Insert "Total Option C (Federal Reporting) Base + Group DDI * CPI-U Costs" from Schedule I, Tab I-1
Claims Processing and Management Services Option C Operations	$ 20,256,413.52	Insert "Total Option C (Federal Reporting) Base + Group Operations * CPI-U Costs" from Schedule I, Tab I-2
Claims Processing and Management Services Option C DDI Enhancement Pool Hours	$ -	Insert "Total Option C (Federal Reporting) DDI Enhancement Pool * CPI-U Costs" from Schedule I, Tab I-3
Claims Processing and Management Services Option C Operations Enhancement Pool Hou	$ -	Insert "Total Option C (Federal Reporting) Operations Enhancement Pool * CPI-U Costs" from Schedule I, Tab I-
All Claims Processing and Management Services Option C Cost	**$ 22,656,703.59**	

Schedule A-5: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option D DDI	$ -	Insert "Total Option D (State Specific Requirements) Base + Group DDI * CPI-U Costs" from Schedule M, Tab M-1
Claims Processing and Management Services Option D Operations	$ -	Insert "Total Option D (State Specific Requirements) Base + Group Operations * CPI-U Costs" from Schedule M, Tab M-2
Claims Processing and Management Services Option D DDI Enhancement Pool Hours	$ -	Insert "Total Option D (State Specific Requirements) DDI Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-3
Claims Processing and Management Services Option D Operations Enhancement Pool Hou	$ -	Insert "Total Option D (State Specific Requirements) Operations Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-
All Claims Processing and Management Services Option D Cost	**$ -**	

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-1: Claims Processing and Management Services Core Scope of Work
Claims Solution Installation for Agency

Payment Milestone	DDI Phase				
	Installation and Access				Total Cost
Claims Solution Installation for Agency	$ 1,751,795.43	N/A	N/A	N/A	$1,751,795.43
Total Claim Solution Installation Cost	**$ 1,751,795.43**	N/A	N/A	N/A	**$1,751,795.43**
Total Percentage By Phase	8.00%	N/A	N/A	N/A	N/A
Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*	5%	N/A	N/A	N/A	N/A
Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*	10%	N/A	N/A	N/A	N/A

**** The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = $10,000,000, the Claim Solution Installation Cost must be between $500,000 and $1,000,000 ($500,000/$10,000,000= 5% and $1,000,000/$10,000,000=10%)***

Schedule B-2: Claims Processing and Management Services Core Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claim Solution Implementation	$ 4,379,488.57	$ 4,817,437.43	$ 7,664,105.00	$ 3,284,616.43	$20,145,647.44	
Total Cost By Phase	$4,379,488.57	$4,817,437.43	$7,664,105.00	$3,284,616.43	$20,145,647.44	$ 20,145,647.44
Total Percentage By Phase	21.74%	23.91%	38.04%	16.30%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
Grand Total	$20,145,647.44					

**** The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%***

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-3: Claims Processing and Management Services Option A (Financial) Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claims Processing and Management Services Option A	$ 866,872.92	$ 693,498.34	$ 1,386,996.67	$ 520,123.75	$ 3,467,491.68

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Total Fixed Hours for Each Onboarding Service Integration:	**192**

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

Claims Processing and Management Services Schedule K - DDI Requisitioned Integration Services Pool Hours and Cost

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Claims Services Schedule A - Cost Summary

Schedule A-1: Claims Processing and Management Services Core Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Core Claims Solution Installation DDI	$ 1,628,002.71	Insert "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1
Claims Processing and Management Services Core Scope of Work DDI	$ 18,722,031.16	Insert "Total Core Base + Group DDI * CPI-U Costs" from Schedule F, Tab F-1 less "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1
Claims Processing and Management Services Core Scope of Work Operations	$ 98,738,980.44	Insert "Total Core Base + Group Operations * CPI-U Costs" from Schedule F, Tab F-2
Claims Processing and Management Services DDI Requisitioned Integration Services Pool Hours and Cost	$ 5,007,600.00	Insert "Total Cost for DDI Requisitioned Integration Services Pool Hours Cost & CPI-U Adjusted Cost" from Schedule K cell F14
Claims Processing and Management Services DDI Data Conversion Optional Years of Data Cost	$ 3,442,296.00	Insert "Total Optional Conversion Years of Data Costs * CPI-U Costs" from Schedule L cell C26
Claims Processing and Management Services Core Scope of Work DDI Enhancement Pool Hours	$ -	Insert "Total Core DDI Enhancement Pool * CPI-U Costs" from Schedule F, Tab F-3
Claims Processing and Management Services Core Scope of Work Operations Enhancement Pool Hours	$ -	Insert "Total Core Operations Enhancement Pool * CPI-U Costs" from Schedule F, Tab F-4
All Claims Processing and Management Services Core Scope of Work Cost	**$ 127,538,910.31**	

Schedule A-2: Claims Processing and Management Services Option A (Financial) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option A DDI	$ 3,428,749.76	Insert "Total Option A (Financial) Base + Group DDI * CPI-U Costs" from Schedule G, Tab G-1
Claims Processing and Management Services Option A Operations	$ 27,149,529.36	Insert "Total Option A (Financial) Base + Group Operations * CPI-U Costs" from Schedule G, Tab G-2
Claims Processing and Management Services Option A DDI Enhancement Pool Hours	$ -	Insert "Total Option A (Financial) DDI Enhancement Pool * CPI-U Costs" from Schedule G, Tab G-3
Claims Processing and Management Services Option A Operations Enhancement Pool Hours	$ -	Insert "Total Option A (Financial) Operations Enhancement Pool * CPI-U Costs" from Schedule G, Tab G-4
All Claims Processing and Management Services Option A Cost	**$ 30,578,279.12**	

Schedule A-3: Claims Processing and Management Services Option B (Call Center) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option B DDI	$ 2,190,456.23	Insert "Total Option B (Call Center) Base + Group DDI * CPI-U Costs" from Schedule H, Tab H-1
Claims Processing and Management Services Option B Operations	$ 17,668,420.44	Insert "Total Option B (Call Center) Base + Group Operations * CPI-U Costs" from Schedule H, Tab H-2
Claims Processing and Management Services Option B DDI Enhancement Pool Hours	$ -	Insert "Total Option B (Call Center) DDI Enhancement Pool * CPI-U Costs" from Schedule H, Tab H-3
Claims Processing and Management Services Option B Operations Enhancement Pool Hou	$ -	Insert "Total Option B (Call Center) Operations Enhancement Pool * CPI-U Costs" from Schedule H, Tab H-
All Claims Processing and Management Services Option B Cost	**$ 19,858,876.67**	

Schedule A-4: Claims Processing and Management Services Option C (Federal Reporting) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option C DDI	$ 2,604,254.26	Insert "Total Option C (Federal Reporting) Base + Group DDI * CPI-U Costs" from Schedule I, Tab I-1
Claims Processing and Management Services Option C Operations	$ 21,717,924.24	Insert "Total Option C (Federal Reporting) Base + Group Operations * CPI-U Costs" from Schedule I, Tab I-2
Claims Processing and Management Services Option C DDI Enhancement Pool Hours	$ -	Insert "Total Option C (Federal Reporting) DDI Enhancement Pool * CPI-U Costs" from Schedule I, Tab I-3
Claims Processing and Management Services Option C Operations Enhancement Pool Hou	$ -	Insert "Total Option C (Federal Reporting) Operations Enhancement Pool * CPI-U Costs" from Schedule I, Tab I-
All Claims Processing and Management Services Option C Cost	**$ 24,322,178.50**	

Schedule A-5: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option D DDI	$ -	Insert "Total Option D (State Specific Requirements) Base + Group DDI * CPI-U Costs" from Schedule M, Tab M-1
Claims Processing and Management Services Option D Operations	$ -	Insert "Total Option D (State Specific Requirements) Base + Group Operations * CPI-U Costs" from Schedule M, Tab M-2
Claims Processing and Management Services Option D DDI Enhancement Pool Hours	$ -	Insert "Total Option D (State Specific Requirements) DDI Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-3
Claims Processing and Management Services Option D Operations Enhancement Pool Hou	$ -	Insert "Total Option D (State Specific Requirements) Operations Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-
All Claims Processing and Management Services Option D Cost	**$ -**	

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-1: Claims Processing and Management Services Core Scope of Work
Claims Solution Installation for Agency

Payment Milestone	DDI Phase				
	Installation and Access				Total Cost
Claims Solution Installation for Agency	$ 1,628,002.71	N/A	N/A	N/A	$1,628,002.71
Total Claim Solution Installation Cost	**$ 1,628,002.71**	N/A	N/A	N/A	**$1,628,002.71**
Total Percentage By Phase	8.00%	N/A	N/A	N/A	N/A
Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*	5%	N/A	N/A	N/A	N/A
Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*	10%	N/A	N/A	N/A	N/A

**** The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = $10,000,000, the Claim Solution Installation Cost must be between $500,000 and $1,000,000 ($500,000/$10,000,000= 5% and $1,000,000/$10,000,000=10%)***

Schedule B-2: Claims Processing and Management Services Core Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claim Solution Implementation	$ 4,070,006.77	$ 4,477,007.45	$ 7,122,511.85	$ 3,052,505.08	$18,722,031.16	
Total Cost By Phase	$4,070,006.77	$4,477,007.45	$7,122,511.85	$3,052,505.08	$18,722,031.16	$ 18,722,031.16
Total Percentage By Phase	21.74%	23.91%	38.04%	16.30%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
Grand Total	$18,722,031.16					

**** The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%***

No

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-3: Claims Processing and Management Services Option A (Financial) Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum

Option C (Federal Reporting) TOTAL	**$12,595,338.12**
Option C (Federal Reporting) GRAND TOTAL	**$21,717,924.24**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution

Claims Processing and Management Services Schedule C - Cost of Operations	
Schedule C-5: Cost of Operations Option D (State Specific Requirements)	
Phase	**Cost**
Option D Operations Year 1	$0.00
Option D Operations Year 2	$0.00
Option D Operations Year 3	$0.00
Option D Operations Year 4	$0.00
Option D (State Specific Requirements) TOTAL	**$0.00**
Option D Operations Optional Year 5	$0.00
Option D Operations Optional Year 6	$0.00
Option D Operations Optional Year 7	$0.00
Option D Operations Optional Year 8	$0.00
Option D Operations Optional Year 9	$0.00
Option D (State Specific Requirements) TOTAL	**$0.00**
Option D (State Specific Requirements) GRAND TOTAL	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-1: Enhancement Pool Hours Core	
Phase	**Cost**
Core DDI - 7,500 hours	$0.00
Total Core DDI	**$0.00**
Core Operations Year 1 - 4,000 hours	$0.00
Core Operations Year 2 - 4,000 hours	$0.00
Core Operations Year 3 - 4,000 hours	$0.00
Core Operations Year 4 - 4,000 hours	$0.00
Core Optional Operations Year 1 - 4,000 hours	$0.00
Core Optional Operations Year 2 - 4,000 hours	$0.00
Core Optional Operations Year 3 - 4,000 hours	$0.00
Core Optional Operations Year 4 - 4,000 hours	$0.00
Core Optional Operations Year 5 - 4,000 hours	$0.00
Total Core Operations	**$0.00**
Core Grand Total	$0.00

Operations Year one begins the first day of the month following the implementation of the Claims Solution and overlaps with the year of Certification.

Schedule D-2: Enhancement Pool Hours Option A (Financial)	
Phase	**Cost**
Option A DDI - 3,000 hours	$0.00
Total Option A (Financial) DDI	**$0.00**
Option A Operations Year 1 - 2,000 hours	$0.00
Option A Operations Year 2 - 2,000 hours	$0.00
Option A Operations Year 3 - 2,000 hours	$0.00
Option A Operations Year 4 - 2,000 hours	$0.00
Option A Optional Operations Year 1 - 2,000 hours	$0.00
Option A Optional Operations Year 2 - 2,000 hours	$0.00
Option A Optional Operations Year 3 - 2,000 hours	$0.00
Option A Optional Operations Year 4 - 2,000 hours	$0.00
Option A Optional Operations Year 5 - 2,000 hours	$0.00
Total Option A (Financial) Operations	**$0.00**
Option A (Financial) Grand Total	$0.00

Operations Year one begins the first day of the month following the implementation of the Financial Solution and overlaps with the year of Certification.

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-3: Enhancement Pool Hours Option B (Call Center)	
Phase	**Cost**
Option B DDI - 3,000 hours	$0.00
Total Option B (Call Center) DDI	**$0.00**
Option B Operations Year 1 - 2,000 hours	$0.00
Option B Operations Year 2 - 2,000 hours	$0.00
Option B Operations Year 3 - 2,000 hours	$0.00
Option B Operations Year 4 - 2,000 hours	$0.00
Option B Optional Operations Year 1 - 2,000 hours	$0.00
Option B Optional Operations Year 2 - 2,000 hours	$0.00
Option B Optional Operations Year 3 - 2,000 hours	$0.00
Option B Optional Operations Year 4 - 2,000 hours	$0.00
Option B Optional Operations Year 5 - 2,000 hours	$0.00
Total Option B (Call Center) Operations	**$0.00**
Option B (Call Center) Grand Total	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Call Center Solution and overlaps with the year of Certification.

Schedule D-4: Enhancement Pool Hours Option C (Federal Reporting)	
Phase	**Cost**
Option C DDI - 3,000 hours	$0.00
Total Option B (Federal Reporting) DDI	**$0.00**
Option C Operations Year 1 - 2,000 hours	$0.00
Option C Operations Year 2 - 2,000 hours	$0.00
Option C Operations Year 3 - 2,000 hours	$0.00
Option C Operations Year 4 - 2,000 hours	$0.00
Option C Optional Operations Year 1 - 2,000 hours	$0.00
Option C Optional Operations Year 2 - 2,000 hours	$0.00
Option C Optional Operations Year 3 - 2,000 hours	$0.00
Option C Optional Operations Year 4 - 2,000 hours	$0.00
Option C Optional Operations Year 5 - 2,000 hours	$0.00
Total Option C (Federal Reporting) Operations	**$0.00**
Option C (Federal Reporting) Grand Total	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution and overlaps with the year of Certification.

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-5: Enhancement Pool Hours Option D (State Specific Requirements)	
Phase	**Cost**
Option D DDI - 3,000 hours	$0.00
Total Option B (State Specific Requirements) DDI	**$0.00**
Option D Operations Year 1 - 2,000 hours	$0.00
Option D Operations Year 2 - 2,000 hours	$0.00
Option D Operations Year 3 - 2,000 hours	$0.00

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Variable Rate Factor Group 2-7:	

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

Total Fixed Hours for Each Onboarding Service Integration:	**192**

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

Claims Processing and Management Services Schedule K - DDI Requisitioned Integration Services Pool Hours and Cost

Claims Processing and Management Services Option C Operations Enhancement Pool Hou	$ -	Insert "Total Option C (Federal Reporting) Operations Enhancement Pool * CPI-U Costs" from Schedule I, Tab I-
All Claims Processing and Management Services Option C Cost	**$ 26,651,281.65**	

Schedule A-5: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work Costs

Phase	Cost	Instruction
Claims Processing and Management Services Option D DDI	$ -	Insert "Total Option D (State Specific Requirements) Base + Group DDI * CPI-U Costs" from Schedule M, Tab M-1
Claims Processing and Management Services Option D Operations	$ -	Insert "Total Option D (State Specific Requirements) Base + Group Operations * CPI-U Costs" from Schedule M, Tab M-2
Claims Processing and Management Services Option D DDI Enhancement Pool Hours	$ -	Insert "Total Option D (State Specific Requirements) DDI Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-3
Claims Processing and Management Services Option D Operations Enhancement Pool Hou	$ -	Insert "Total Option D (State Specific Requirements) Operations Enhancement Pool * CPI-U Costs" from Schedule M, Tab M-
All Claims Processing and Management Services Option D Cost	**$ -**	

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-1: Claims Processing and Management Services Core Scope of Work
Claims Solution Installation for Agency

Payment Milestone	DDI Phase				
	Installation and Access				Total Cost
Claims Solution Installation for Agency	$ 1,824,414.58	N/A	N/A	N/A	$1,824,414.58
Total Claim Solution Installation Cost	**$ 1,824,414.58**	N/A	N/A	N/A	**$1,824,414.58**
Total Percentage By Phase	8.00%	N/A	N/A	N/A	N/A
Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*	5%	N/A	N/A	N/A	N/A
Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*	10%	N/A	N/A	N/A	N/A

**** The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = $10,000,000, the Claim Solution Installation Cost must be between $500,000 and $1,000,000 ($500,000/$10,000,000= 5% and $1,000,000/$10,000,000=10%)***

Schedule B-2: Claims Processing and Management Services Core Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claim Solution Implementation	$ 4,561,036.44	$ 5,017,140.09	$ 7,981,813.78	$ 3,420,777.33	$20,980,767.64	
Total Cost By Phase	$4,561,036.44	$5,017,140.09	$7,981,813.78	$3,420,777.33	$20,980,767.64	$ 20,980,767.64
Total Percentage By Phase	21.74%	23.91%	38.04%	16.30%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
Grand Total	$20,980,767.64					

**** The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%***

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

Total Fixed Hours for Each Onboarding Service Integration:	**192**

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

Claims Processing and Management Services Schedule K - DDI Requisitioned Integration Services Pool Hours and Cost

DDI Requisitioned Integration Services Pool Hours and Cost

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

All Claims Processing and Management Services Option D Cost	**$**	**-**	

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-1: Claims Processing and Management Services Core Scope of Work
Claims Solution Installation for Agency

Payment Milestone	DDI Phase				
	Installation and Access				Total Cost
Claims Solution Installation for Agency	$ 2,106,230.10	N/A	N/A	N/A	$2,106,230.10
Total Claim Solution Installation Cost	**$ 2,106,230.10**	N/A	N/A	N/A	**$2,106,230.10**
Total Percentage By Phase	8.00%	N/A	N/A	N/A	N/A
Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*	5%	N/A	N/A	N/A	N/A
Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*	10%	N/A	N/A	N/A	N/A

**** The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = $10,000,000, the Claim Solution Installation Cost must be between $500,000 and $1,000,000 ($500,000/$10,000,000= 5% and $1,000,000/$10,000,000=10%)***

Schedule B-2: Claims Processing and Management Services Core Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claim Solution Implementation	$ 5,265,575.24	$ 5,792,132.77	$ 9,214,756.67	$ 3,949,181.43	$24,221,646.11	
Total Cost By Phase	$5,265,575.24	$5,792,132.77	$9,214,756.67	$3,949,181.43	$24,221,646.11	$ 24,221,646.11
Total Percentage By Phase	21.74%	23.91%	38.04%	16.30%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
Grand Total	$24,221,646.11					

**** The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%***

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-3: Claims Processing and Management Services Option A (Financial) Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claims Processing and Management Services Option A	$ 881,286.24	$ 705,028.99	$ 1,410,057.98	$ 528,771.74	$ 3,525,144.95	
Total Cost By Phase	$881,286.24	$705,028.99	$1,410,057.98	$528,771.74	$3,525,144.95	$ 3,525,144.95
Total Percentage By Phase	25.00%	20.00%	40.00%	15.00%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
GRAND TOTAL	$3,525,144.95					

*** The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equa to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%**

Schedule B-4: Claims Processing and Management Services Option B (Call Center) Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Total Fixed Hours for Each Onboarding Service Integration:	**192**

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

Claims Processing and Management Services Schedule K - DDI Requisitioned Integration Services Pool Hours and Cost

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

All Claims Processing and Management Services Option D Cost	**$**	**-**	

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-1: Claims Processing and Management Services Core Scope of Work
Claims Solution Installation for Agency

Payment Milestone	DDI Phase				
	Installation and Access				Total Cost
Claims Solution Installation for Agency	$ 2,685,527.54	N/A	N/A	N/A	$2,685,527.54
Total Claim Solution Installation Cost	**$ 2,685,527.54**	N/A	N/A	N/A	**$2,685,527.54**
Total Percentage By Phase	8.00%	N/A	N/A	N/A	N/A
Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*	5%	N/A	N/A	N/A	N/A
Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*	10%	N/A	N/A	N/A	N/A

**** The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = $10,000,000, the Claim Solution Installation Cost must be between $500,000 and $1,000,000 ($500,000/$10,000,000= 5% and $1,000,000/$10,000,000=10%)***

Schedule B-2: Claims Processing and Management Services Core Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase					
	Development, Configuration and Build	User Acceptance Testing and Integration Testing	Implementation and Acceptance	Certification	Total Cost	Check Sum
Claim Solution Implementation	$ 6,713,818.85	$ 7,385,200.74	$ 11,749,182.99	$ 5,035,364.14	$30,883,566.73	
Total Cost By Phase	$6,713,818.85	$7,385,200.74	$11,749,182.99	$5,035,364.14	$30,883,566.73	$ 30,883,566.73
Total Percentage By Phase	21.74%	23.91%	38.04%	16.30%	100.00%	
Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*	5%	15%	25%	10%		
Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*	35%	30%	50%	25%		
Grand Total	$30,883,566.73					

**** The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = $1,000,000, the Development Configuration and Build Cost must be between $50,000 and $350,000 ($50,000/$1,000,000= 5% and $350,000/$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15%***

Claims Processing and Management Services Schedule B DDI Payment Milestones by Phase

Schedule B-3: Claims Processing and Management Services Option A (Financial) Scope of Work
Design, Development & Implementation (DDI) Payment Milestone by Phase

Payment Milestone	DDI Phase

Option A (Financial) TOTAL	**$16,037,825.64**
Option A (Financial) GRAND TOTAL	**$27,653,746.08**

Operations Year one begins the first day of the month following the implementation of the Financial Solution

Claims Processing and Management Services Schedule C - Cost of Operations

Schedule C-3: Cost of Operations Option B (Call Center)	
Phase	**Cost**
Option B Operations Year 1	$2,500,119.24
Option B Operations Year 2	$2,555,871.84
Option B Operations Year 3	$2,612,867.76
Option B Operations Year 4	$2,671,134.72
Option B (Call Center) TOTAL	**$10,339,993.56**
Option B Operations Optional Year 5	$2,730,701.04
Option B Operations Optional Year 6	$2,791,595.64
Option B Operations Optional Year 7	$2,853,848.28
Option B Operations Optional Year 8	$2,917,489.08
Option B Operations Optional Year 9	$2,982,549.12
Option B (Call Center) TOTAL	**$14,276,183.16**
Option B (Call Center) GRAND TOTAL	**$24,616,176.72**

Operations Year one begins the first day of the month following the implementation of the Call Center Solution

Schedule C-4: Cost of Operations Option C (Federal Reporting)	
Phase	**Cost**
Option C Operations Year 1	$3,702,172.92
Option C Operations Year 2	$3,784,731.36
Option C Operations Year 3	$3,869,130.84
Option C Operations Year 4	$3,955,412.40
Option C (Federal Reporting) TOTAL	**$15,311,447.52**
Option C Operations Optional Year 5	$4,043,618.04
Option C Operations Optional Year 6	$4,133,790.72
Option C Operations Optional Year 7	$4,225,974.24
Option C Operations Optional Year 8	$4,320,213.48
Option C Operations Optional Year 9	$4,416,554.28
Option C (Federal Reporting) TOTAL	**$21,140,150.76**
Option C (Federal Reporting) GRAND TOTAL	**$36,451,598.28**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution

Claims Processing and Management Services Schedule C - Cost of Operations	
Schedule C-5: Cost of Operations Option D (State Specific Requirements)	
Phase	**Cost**
Option D Operations Year 1	$0.00
Option D Operations Year 2	$0.00
Option D Operations Year 3	$0.00
Option D Operations Year 4	$0.00
Option D (State Specific Requirements) TOTAL	**$0.00**
Option D Operations Optional Year 5	$0.00
Option D Operations Optional Year 6	$0.00
Option D Operations Optional Year 7	$0.00
Option D Operations Optional Year 8	$0.00
Option D Operations Optional Year 9	$0.00
Option D (State Specific Requirements) TOTAL	**$0.00**
Option D (State Specific Requirements) GRAND TOTAL	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-1: Enhancement Pool Hours Core	
Phase	**Cost**
Core DDI - 7,500 hours	$0.00
Total Core DDI	**$0.00**
Core Operations Year 1 - 4,000 hours	$0.00
Core Operations Year 2 - 4,000 hours	$0.00
Core Operations Year 3 - 4,000 hours	$0.00
Core Operations Year 4 - 4,000 hours	$0.00
Core Optional Operations Year 1 - 4,000 hours	$0.00
Core Optional Operations Year 2 - 4,000 hours	$0.00
Core Optional Operations Year 3 - 4,000 hours	$0.00
Core Optional Operations Year 4 - 4,000 hours	$0.00
Core Optional Operations Year 5 - 4,000 hours	$0.00
Total Core Operations	**$0.00**
Core Grand Total	$0.00

Operations Year one begins the first day of the month following the implementation of the Claims Solution and overlaps with the year of Certification.

Schedule D-2: Enhancement Pool Hours Option A (Financial)	
Phase	**Cost**
Option A DDI - 3,000 hours	$0.00
Total Option A (Financial) DDI	**$0.00**
Option A Operations Year 1 - 2,000 hours	$0.00
Option A Operations Year 2 - 2,000 hours	$0.00
Option A Operations Year 3 - 2,000 hours	$0.00
Option A Operations Year 4 - 2,000 hours	$0.00
Option A Optional Operations Year 1 - 2,000 hours	$0.00
Option A Optional Operations Year 2 - 2,000 hours	$0.00
Option A Optional Operations Year 3 - 2,000 hours	$0.00
Option A Optional Operations Year 4 - 2,000 hours	$0.00
Option A Optional Operations Year 5 - 2,000 hours	$0.00
Total Option A (Financial) Operations	**$0.00**
Option A (Financial) Grand Total	$0.00

Operations Year one begins the first day of the month following the implementation of the Financial Solution and overlaps with the year of Certification.

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-3: Enhancement Pool Hours Option B (Call Center)	
Phase	**Cost**
Option B DDI - 3,000 hours	$0.00
Total Option B (Call Center) DDI	**$0.00**
Option B Operations Year 1 - 2,000 hours	$0.00
Option B Operations Year 2 - 2,000 hours	$0.00
Option B Operations Year 3 - 2,000 hours	$0.00
Option B Operations Year 4 - 2,000 hours	$0.00
Option B Optional Operations Year 1 - 2,000 hours	$0.00
Option B Optional Operations Year 2 - 2,000 hours	$0.00
Option B Optional Operations Year 3 - 2,000 hours	$0.00
Option B Optional Operations Year 4 - 2,000 hours	$0.00
Option B Optional Operations Year 5 - 2,000 hours	$0.00
Total Option B (Call Center) Operations	**$0.00**
Option B (Call Center) Grand Total	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Call Center Solution and overlaps with the year of Certification.

Schedule D-4: Enhancement Pool Hours Option C (Federal Reporting)	
Phase	**Cost**
Option C DDI - 3,000 hours	$0.00
Total Option B (Federal Reporting) DDI	**$0.00**
Option C Operations Year 1 - 2,000 hours	$0.00
Option C Operations Year 2 - 2,000 hours	$0.00
Option C Operations Year 3 - 2,000 hours	$0.00
Option C Operations Year 4 - 2,000 hours	$0.00
Option C Optional Operations Year 1 - 2,000 hours	$0.00
Option C Optional Operations Year 2 - 2,000 hours	$0.00
Option C Optional Operations Year 3 - 2,000 hours	$0.00
Option C Optional Operations Year 4 - 2,000 hours	$0.00
Option C Optional Operations Year 5 - 2,000 hours	$0.00
Total Option C (Federal Reporting) Operations	**$0.00**
Option C (Federal Reporting) Grand Total	**$0.00**

Operations Year one begins the first day of the month following the implementation of the Federal Reporting Solution and overlaps with the year of Certification.

Claims Processing and Management Services Schedule D Enhancement Pool Hours

Schedule D-5: Enhancement Pool Hours Option D (State Specific Requirements)	
Phase	**Cost**
Option D DDI - 3,000 hours	$0.00
Total Option B (State Specific Requirements) DDI	**$0.00**
Option D Operations Year 1 - 2,000 hours	$0.00
Option D Operations Year 2 - 2,000 hours	$0.00
Option D Operations Year 3 - 2,000 hours	$0.00
Option D Operations Year 4 - 2,000 hours	$0.00
Option D Optional Operations Year 1 - 2,000 hours	$0.00
Option D Optional Operations Year 2 - 2,000 hours	$0.00
Option D Optional Operations Year 3 - 2,000 hours	$0.00
Option D Optional Operations Year 4 - 2,000 hours	$0.00
Option D Optional Operations Year 5 - 2,000 hours	$0.00
Total Option D (State Specific Requirements) Operations	**$0.00**
Option D (State Specific Requirements) Grand Total	**$0.00**

Operations Year one begins the first day of the month following the implementation of the State Specific Requirements Solution and overlaps with the year of Certification.

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

Total Fixed Hours for Each Onboarding Service Integration:	**192**

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

Claims Processing and Management Services Schedule K - DDI Requisitioned Integration Services Pool Hours and Cost

DDI Requisitioned Integration Services Pool Hours and Cost

Integration Service Type Category	Number of Interfaces	Hours		Cost	Cost * CPI-U Adjust
Major Services	5	4,440	*		
Complex Services	20	12,480	*		
Standard Services	35	16,800	*		
Simple Services	25	6,800	*		
Onboarding Services	15	2,880	*		
Total DDI Requisitioned Integration Services Pool Hours:		**43,400**			
Total Cost for DDI Requisitioned Integration Services Pool Hours Cost & CPI-U Adjusted Cost:			**	**$ 5,007,600**	**$ 5,007,600**
DDI Requisitioned Integration Services Pool Average Hourly Rate & CPI-U Adjusted Houry Rate:			***	**$ 115.38**	**$115**

**** The values found in C7 through C11 are derived by multiplying the value in each cell in column B by the fixed hour amounts found in Schedule J.***
***** The Contractor should enter the total cost for the Integration Services Pool Hours in E14 for the total hours identified in cell C12.***
****** Cell F14 is a calculated by dividing the value in E14 by the value in C12.***

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.
